

We believe in
investing in global
companies for
the long term.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, you may not receive paper copies of the fund's shareholder reports from the insurance company that offers your contract unless you specifically request paper copies from the insurance company or from your financial intermediary. Instead, the shareholder reports will be made available on a website, and the insurance company will notify you by mail each time a report is posted and provide you with a website link to access the report. Instructions for requesting paper copies will be provided by your insurance company.

If you have already elected to receive shareholder reports electronically, you will not be affected by this change and do not need to take any action. You may elect to receive shareholder reports and other communications from the insurance company electronically by following the instructions provided by the insurance company.

You may elect to receive paper copies of all future reports free of charge from the insurance company. You can inform the insurance company that you wish to continue receiving paper copies of your shareholder reports by following the instructions provided by the insurance company. Your election to receive paper reports will apply to all investment options available under your contract.

American Funds Insurance Series, by Capital Group, is the underlying investment vehicle for many variable annuities and insurance products. For more than 85 years, Capital Group has invested with a long-term focus based on thorough research and attention to risk.

Investing for short periods makes losses more likely. For current information and month-end results, visit americanfunds.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility, as more fully described in the prospectus. These risks may be heightened in connection with investments in developing countries. Investing in small-capitalization stocks can involve greater risk than is customarily associated with investing in stocks of larger, more established companies. The return of principal for bond funds and for funds with significant underlying bond holdings is not guaranteed. Fund shares are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings. High-yield bonds are subject to greater fluctuations in value and risk of loss of income and principal than investment-grade bonds. Bond ratings, which typically range from AAA/Aaa (highest) to D (lowest), are assigned by credit rating agencies such as Standard & Poor's, Moody's and/or Fitch as an indication of an issuer's creditworthiness. Futures may not provide an effective hedge of the underlying securities because changes in the prices of futures may not track those of the securities they are intended to hedge. In addition, the managed risk strategy may not effectively protect the funds from market declines and will limit the funds' participation in market gains. The use of the managed risk strategy could cause the funds' returns to lag those of the applicable underlying funds in certain rising market conditions. Refer to the funds' prospectuses and the Risk Factors section of this report for more information on these and other risks associated with investing in the funds.

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Global equity markets, pressured by rising interest rates and a slowing global economy, fell on an annual basis for the first time since 2015, as measured by the 9.42% decline in the MSCI ACWI (All Country World Index).^{1,2} Tighter monetary policy, potentially peaking earnings and a brewing trade war involving the U.S., China and Europe reverberated around the world, halting one of the longest-running bull markets in history.

Despite strong corporate earnings and economic growth boosted by tax cuts early in the year, a decline of 4.50% was recorded by the MSCI USA Index.^{1,3} The nation's GDP is estimated to have grown at an annualized 3.4% in the third quarter with the U.S. unemployment rate remaining at 3.7% in November, the lowest level in nearly 50 years. However, a series of trade-related issues between the U.S. and China that elevated geopolitical tensions, combined with political turmoil and high valuation in the U.S., contributed to a decline in the fourth quarter that wiped out the gains of the previous three quarters. Meanwhile, the Federal Reserve raised the benchmark federal funds rate to a range of 2.25% to 2.50%. The Fed continued on its path to reduce the size of its balance sheet and raised rates by a quarter percentage point four times over the past 12 months. This added to investor unease by the time they got to the fourth increase.

In Europe, worries over trade, delays in reaching a separation agreement between the U.K. and the European

Union, and a general retreat in favor of U.S. equities hurt markets. The MSCI Europe Index¹ fell 14.86% with Germany (-22.17%), Italy (-17.75%), France (-12.76%) and the U.K. (-14.15%) all registering double-digit losses. In an unexpected shift from the prior year, the European economy lurched to a near halt. Deteriorating trade relations also weighed on European stocks, given the region's dependence on international trade. Adding to those concerns, the European Central Bank ended its bond-buying stimulus program in December, removing a degree of support for the economy. As business sentiment dropped, eurozone economic growth slowed to an annualized 0.6% in the third quarter, down from 2.3% at the end of 2017. Elsewhere among developed markets, Japanese equities declined 12.88% as the economy stumbled, contracting for the first time since 2015. Private consumption faltered and output declined, owing partly to natural disasters that hurt exports and tourism.

Emerging markets stocks also fell (the MSCI Emerging Markets Investable Market Index^{1,4} was down 15.05%), dragged down by China's weakening economy, heightened U.S.-China trade frictions and a rally in the U.S. dollar. In China, selling intensified as the economy decelerated and its trade clash with the U.S. escalated. Chinese stocks (-18.74%) posted their worst annual return since 2011, as shares of their leading technology-related companies fell from lofty levels. Individual market economies

All market indexes referenced in this report are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index. Country returns are based on MSCI indexes, which reflect reinvestment of distributions and dividends net of withholding taxes, except for the MSCI USA Index, which reflects dividends gross of withholding taxes.

¹Source: MSCI.

²The MSCI ACWI is a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets, consisting of more than 40 developed and emerging market country indexes. Results reflect dividends net of withholding taxes.

³The MSCI USA Index is a free float-adjusted, market capitalization-weighted index that is designed to measure the U.S. portion of the world market. Results reflect dividends gross of withholding taxes.

⁴MSCI Emerging Markets Investable Market Index (IMI) is a free float-adjusted market capitalization-weighted index that is designed to measure results of the large-, mid-, and small-capitalization segments of more than 20 emerging equity markets. Results reflect dividends net of withholding taxes.

– Brazil and Turkey most notably – were impacted by idiosyncratic political and economic developments.

In bond markets, U.S. corporate investment-grade securities (rated BBB/Baa and above) declined 2.51% (as measured by the Bloomberg Barclays U.S. Corporate Investment Grade Index^{5,6}), while U.S. high-yield corporate debt slipped 2.08% (as measured by the Bloomberg Barclays U.S. Corporate High Yield 2% Issuer Capped Index^{5,7}). More broadly, the Bloomberg Barclays Global Aggregate Index^{5,8} was down 1.20%, while the Bloomberg Barclays U.S. Aggregate Index^{5,9} was virtually unchanged at 0.01%. The 10-year Treasury yield, which stood at 2.40% on December 31, 2017, rose marginally to finish at 2.69%. The J.P. Morgan Emerging Markets Bond Index – Global¹⁰ lost 4.61%.

In currency markets, the U.S. dollar rose against most currencies. The euro (-4.80%), British pound (-5.85%) and Canadian dollar (-8.26%) all experienced headwinds from a stronger U.S. dollar. Although most currencies slipped, the Japanese yen was a rare gainer, as it rose 2.68% against the dollar.

Looking ahead

All over the globe, economies appear to be slowing down and equity markets are exhibiting volatility. The current environment is rife with uncertainty, from

trade-related disputes to geopolitical tensions to elevated debt levels. We will be following and analyzing each of these issues. But now that these uncertainties have been priced into markets, we can utilize these new lower valuations as we search for securities that are attractive on a longer-term basis. We're careful by nature, and we know that after a period when everyone is very concerned, it is usually a good time to pick one's head up and look around for bargains.

Our time-tested approach – based on extensive research, a long-term outlook and close attention to valuation – has served investors well over time. As always, we thank you for your continued support of our efforts and we look forward to reporting to you again in six months.

Sincerely,

Donald D. O'Neal
Co-President

Alan N. Berro

⁶ The Bloomberg Barclays U.S. Corporate Investment Grade Index represents the universe of investment grade, publicly issued U.S. corporate and specified foreign debentures and secured notes that meet the specified maturity, liquidity and quality requirements.

⁷ The Bloomberg Barclays U.S. Corporate High Yield 2% Issuer Capped Index covers the universe of fixed-rate, non-investment-grade debt. The index limits the maximum exposure of any one issuer to 2%.

⁸ The Bloomberg Barclays Global Aggregate Index represents the global investment-grade fixed income markets.

⁹ The Bloomberg Barclays U.S. Aggregate Index represents the U.S. investment-grade fixed-rate bond market.

¹⁰ The J.P. Morgan Emerging Markets Bond Index – Global tracks total returns for U.S. dollar-denominated debt instruments issued by emerging markets sovereign and quasi-sovereign entities, including Brady bonds, loans and Eurobonds.

Summary investment portfolios

Summary investment portfolios are designed to streamline this report and help investors better focus on the funds' principal holdings. Ultra-Short Bond Fund, Managed Risk Growth Fund, Managed Risk International Fund, Managed Risk Blue Chip Income and Growth Fund, Managed Risk Growth-Income Fund and Managed Risk Asset Allocation Fund show a complete listing of portfolio holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings for each fund in the series.

Unless otherwise indicated, American Funds Insurance Series investment results are for Class 1 shares (Class P1 shares for managed risk funds). Class 1A shares began operations on January 6, 2017. Class 2 shares began operations on April 30, 1997. Class 3 shares began operations on January 16, 2004. Class 4 shares began operations on December 14, 2012. Results encompassing periods prior to those dates assume a hypothetical investment in Class 1 shares and include the deduction of additional annual expenses (0.25% for Class 1A shares, 0.25% for Class 2 shares, 0.18% for Class 3 shares and 0.50% for Class 4 shares).

The variable annuities and life insurance contracts that use the series funds contain certain fees and expenses not reflected in this report. Investment results assume all distributions are reinvested and reflect applicable fees and expenses. The series investment adviser waived a portion of its management fees for all existing funds from September 1, 2004, through December 31, 2008, for Global Growth and Income Fund from May 1, 2006, through December 31, 2008, for International Growth and Income Fund from November 18, 2008, through December 31, 2008, for U.S. Government/AAA-Rated Securities Fund from July 1, 2010, through December 31, 2010, and for Blue Chip Income and Growth Fund from February 1, 2014, through January 31, 2015.

For the managed risk funds, the investment adviser is currently waiving a portion of its management fee equal to 0.05% of the funds' net assets. In addition, the investment adviser is currently reimbursing a portion of other expenses for Managed Risk International Fund and Managed Risk Growth-Income Fund. The waivers and reimbursements will be in effect through at least May 1, 2020, unless modified or terminated by the series board. After that time, the investment adviser may elect to extend, modify or terminate the reimbursements. The waivers may only be modified or terminated with the approval of the series board. Applicable fund results shown reflect the waivers and reimbursements, without which results would have been lower. See the Financial Highlights tables in this report for details.

The Managed Risk Growth Fund pursues its objective by investing in shares of American Funds Insurance Series – Growth FundSM and American Funds Insurance Series – Bond FundSM. The Managed Risk International Fund pursues its objective by investing in shares of American Funds Insurance Series – International FundSM and American Funds Insurance Series – Bond FundSM. The Managed Risk Blue Chip Income and Growth Fund pursues its objective by investing in shares of American Funds Insurance Series – Blue Chip Income and Growth FundSM and American Funds Insurance Series – U.S. Government/AAA-Rated Securities FundSM. The Managed Risk Growth-Income Fund pursues its objective by investing in shares of American Funds Insurance Series – Growth-Income FundSM and American Funds Insurance Series – Bond FundSM. The Managed Risk Asset Allocation Fund pursues its objective by investing in shares of American Funds Insurance Series – Asset Allocation FundSM. The funds seek to manage portfolio volatility and provide downside protection, primarily through the use of exchange-traded futures. The benefit of the funds' managed risk strategy should be most apparent during periods of high volatility and in down markets. In steady or rising markets, the funds' results can be expected to lag those of the underlying fund.

Funds are listed in the report as follows: equity, balanced, fixed income and managed risk.

Global Growth Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Unit prices and returns will vary, so investors may lose money. For current information and month-end results, visit americanfunds.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Global Growth Fund slipped 8.81% for the 12 months ended December 31, 2018, compared with a 9.42% decrease for the MSCI ACWI (All Country World Index),¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets, consisting of more than 40 developed and emerging market country indexes.

Global stocks, as measured by the MSCI ACWI, ended the year in negative territory hurt by slowing economic growth, increased volatility and higher interest rates in the U.S. While ongoing turmoil over the U.K.'s departure from the European Union weighed on European stocks, a combination of a stronger U.S. dollar and heightened U.S.-China trade frictions impacted emerging markets equities. Cyclical stocks posted the biggest losses, underscored by double-digit declines in the financials, industrials and materials sectors.

An eclectic mix of financials and consumer discretionary investments boosted the fund's relative returns. Amazon reported strong third-quarter earnings that beat analyst estimates thanks to its cloud and advertising segments, and was the top contributor to the fund's relative returns. Investments in information technology were the biggest drag on relative results led by AAC Technologies Holdings, Tencent and Facebook, losing ground as a broad selloff continued in the formerly high-flying sector.

On a geographic basis, stocks of companies domiciled in the U.S., Germany and India were additive to relative results, while stocks of companies based in the U.K., China and Brazil lagged.

Despite market volatility, the fund's portfolio managers are optimistic they will continue to find good companies globally that offer high-quality products, and whose values are not yet fully reflected in their share prices.

Global Small Capitalization Fund declined 10.31% for the 12 months ended December 31, 2018. Its benchmark, the MSCI All Country World Small Cap Index,¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results of smaller capitalization companies in both developed and emerging markets, fell 14.39%.

Global stocks, as measured by the MSCI ACWI, ended the year in negative territory hurt by slowing economic growth, increased volatility and higher interest rates in the U.S. While ongoing turmoil over the U.K.'s departure from the European Union weighed on European stocks, a combination of a stronger U.S. dollar and heightened U.S.-China trade frictions impacted emerging markets equities. Cyclical stocks posted the biggest losses, underscored by double-digit declines in the financials, industrials and materials sectors.

Fund holdings in the health care sector, which includes investments across multiple sub-segments from biotechnology and pharmaceuticals to life sciences tools and services, aided returns. Evolent Health contributed to the fund's results as the benefits of value-based care gained support. However, the fund's investments in consumer discretionary stocks, such as Tele Columbus and Melco International Development, hurt results amid market volatility and weak economic data from the Eurozone and China.

While investments in U.S. companies were additive to relative returns, investments in companies domiciled in Hong Kong detracted.

The fund's portfolio managers continue to seek investment opportunities in undervalued companies that have the potential to revolutionize industries and benefit shareholders. Innovation at smaller health care companies, for example, helps facilitate breakthroughs and the biotechnology industry is an area of interest due to continuous improvements in drug research methods and approval processes. The fund also currently invests in nearly 300 companies diversified across geographies. Political uncertainty in both the U.S. and U.K. leads to some concerns about business confidence in the short term. As always, we maintain our commitment to investing for the long term and believe our rigorous bottom-up research into each potential equity investment can help achieve this goal.

Growth Fund marginally lost 0.01% for the 12 months ended December 31, 2018, compared with a 4.38% decline in its benchmark index, Standard & Poor's 500 Composite Index,¹ a market capitalization-weighted index based on the results of approximately 500 widely held common stocks.

U.S. equities declined for the first calendar year since 2008. Concerns over trade conflicts, slowing global growth and high valuations contributed to persistent volatility. Energy and materials companies were further pressured by falling commodity prices. While growth-oriented stocks performed relatively better than defensive stocks, many companies experienced wild swings throughout the year.

Investments in the information technology and consumer discretionary sectors boosted the fund's returns. Among the fund's top contributors to returns (posting double-digit gains) was consumer discretionary company Amazon and information technology company ServiceNow. While Amazon reported strong third-quarter earnings that beat analyst estimates thanks to its cloud and advertising segments, ServiceNow benefited from increased demand for cloud services. Exposure to the energy sector detracted from fund results as oil prices plummeted on concerns of excess supply.

Although U.S. economic growth remained strong with GDP growing at an annualized pace of 3.4% in the third quarter, the fund's portfolio managers are keeping a close watch on the impact of interest rate hikes on economic activity and the outlook for corporate profit growth in the U.S. Portfolio managers continue to favor well-positioned, growth-oriented companies that are capable of generating free cash flow in myriad economic environments and remain optimistic that our global research will help us identify attractive long-term investment opportunities.

International Fund declined 12.94% for the 12 months ended December 31, 2018. That compares to the 14.20% decline of its benchmark, the MSCI ACWI (All Country World Index) ex USA,¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets (consisting of more than 40 developed and emerging market country indexes excluding the U.S.).

Global stocks, as measured by the MSCI ACWI, ended the year in negative territory hurt by slowing economic growth, increased volatility and higher interest rates in the U.S. While ongoing turmoil over the U.K.'s departure from the European Union weighed on European stocks, a combination of a stronger U.S. dollar and heightened U.S.-China trade frictions impacted emerging markets equities. Cyclical stocks posted the biggest losses, underscored by double-digit declines in the financials, industrials and materials sectors.

In the fund, stocks in the financials sector generated the highest relative returns. Within the sector, HDFC Bank reported profit growth in the second quarter and AIA Group reported strong earnings for the first half of the year. On the flip side, investments in consumer staples companies were a drag on results. Within the sector, British American Tobacco hindered results amid pressure from competition and regulation.

The fund's portfolio managers continue to monitor key indicators in advanced countries – from wage growth and inflation dynamics to the impact of technology and demographics on productivity – as they seek the flexibility to pivot to areas of opportunity. Our focus on a company's fundamental growth drivers and intrinsic worth is critical to helping us identify companies that we believe represent the best value over the long term.

For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

New World Fund was down 13.83% for the 12 months ended December 31, 2018. Its benchmark index, the MSCI ACWI (All Country World Index),¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets (consisting of more than 40 developed and emerging market country indexes), declined 9.42%. The MSCI Emerging Markets Index,¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global emerging markets (consisting of more than 20 emerging market country indexes), decreased by 14.58%.

Global stocks, as measured by the MSCI ACWI, ended the year in negative territory hurt by slowing economic growth, increased volatility and higher interest rates in the U.S. While ongoing turmoil over the U.K.'s departure from the European Union weighed on European stocks, a combination of a stronger U.S. dollar and heightened U.S.-China trade frictions impacted emerging markets equities. In emerging markets, Russia was impacted by U.S. sanctions, while Argentina suffered from a currency crisis as the peso collapsed more than 45% against the greenback.

Investments in the energy sector were beneficial to the fund. Reliance Industries rose led by strong earnings growth from its petrochemical business. The company also benefited from continued expansion and success of its telecommunications network Jio. Among detractors, investments in the financials sector hurt results with Grupo Financiero Galicia hindering returns, despite reporting a rise in second-quarter profits from the same period in 2017. Investments in tobacco companies such as British American Tobacco were also a drag on results due to concerns about nicotine regulation in the U.S., as well as competition from vaping and heat-not-burn products.

At this point in the market cycle and amid increased volatility, selectivity and close attention to individual holdings are particularly important. The fund's portfolio managers continue to pursue a bottom-up approach to investing and continue to search for undervalued companies with solid foundations around the world.

Blue Chip Income and Growth Fund lost 8.45% for the 12 months ended December 31, 2018, trailing its benchmark index, Standard & Poor's 500 Composite Index,¹ a market capitalization-weighted index based on the results of approximately 500 widely held common stocks, which declined 4.38%.

U.S. equities declined for the first calendar year since 2008. Concerns over trade conflicts, slowing global growth and high valuations contributed to persistent volatility. Energy and materials companies were further pressured by falling commodity prices. While growth-oriented stocks performed relatively better than defensive stocks, many companies experienced wild swings throughout the year.

Over the fiscal year, stock selection in the materials sector helped marginally boost relative returns, while positions in health care and industrials lagged, as did holdings among the less-cyclical consumer staples sector. In particular, tobacco companies were hurt by concerns about nicotine regulation in the U.S., as well as competition from vaping and heat-not-burn products. The fund was also disadvantaged by its lower holding of select, U.S. growth stocks.

The fund's portfolio managers are keeping a close watch on the U.S. economy. Portfolio managers continue to favor more stable, high-dividend-paying companies that are likely to hold up better in weak markets, while providing consistent income and remain optimistic that our global research will help us identify attractive long-term investment opportunities.

Global Growth and Income Fund declined 9.36% for the 12 months ended December 31, 2018, compared with a 9.42% decrease in its benchmark index, MSCI ACWI (All Country World Index),¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets, consisting of more than 40 developed and emerging market country indexes.

Global stocks, as measured by the MSCI ACWI, ended the year in negative territory hurt by slowing economic growth, increased volatility and higher interest rates in the U.S. While ongoing turmoil over the U.K.'s departure from the European Union weighed on European stocks, a combination of a stronger U.S. dollar and heightened U.S.-China trade frictions impacted emerging markets equities. Cyclical stocks posted the biggest losses, underscored by double-digit declines in the financials, industrials and materials sectors.

Several sectors including health care contributed to the fund's returns. Health care companies UnitedHealth Group and Centene rallied on solid earnings reports and were among the top contributors to results. On the downside, investments in information technology – representing the fund's largest sector holding – were a drag on relative results led by PagSeguro and AAC Technologies Holdings, losing ground as a broad selloff continued in the formerly high-flying sector.

With quantitative easing programs ending or set to end and slower economic growth in the U.S. and Europe, the fund's portfolio managers remain cautiously optimistic about prospects for the global economy. Portfolio managers continue to invest based on a bottom-up approach to long-term investing and believe they can uncover promising companies with sustainable dividends and income.

Growth-Income Fund lost 1.55% for the 12 months ended December 31, 2018. Standard & Poor's 500 Composite Index,¹ a market capitalization-weighted index based on the results of approximately 500 widely held common stocks, declined 4.38%.

U.S. equities declined for the first calendar year since 2008. Concerns over trade conflicts, slowing global growth and high valuations contributed to persistent volatility. Energy and materials companies were further pressured by falling commodity prices. While growth-oriented stocks performed relatively better than defensive stocks, many companies experienced wild swings throughout the year.

Regarding the fund, investments in the consumer discretionary sector contributed the most to the fund's relative returns. Among consumer discretionary companies, Amazon reported strong third-quarter earnings that beat analyst estimates thanks to its cloud and advertising segments. On the downside, investments in the energy sector, such as EOG Resources and Schlumberger, detracted from the fund's results as oil prices plummeted on concerns of a glut.

International Growth and Income Fund declined 11.00% for the 12 months ended December 31, 2018, compared to the 14.20% decline in its benchmark index, the MSCI ACWI (All Country World Index) ex USA,¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets (consisting of more than 40 developed and emerging market country indexes excluding the U.S.).

Global stocks, as measured by the MSCI ACWI, ended the year in negative territory hurt by slowing economic growth, increased volatility and higher interest rates in the U.S. While ongoing turmoil over the U.K.'s departure from the European Union weighed on European stocks, a combination of a stronger U.S. dollar and heightened U.S.-China trade frictions impacted emerging markets equities. Cyclical stocks posted the biggest losses, underscored by double-digit declines in the financials, industrials and materials sectors.

An eclectic mix of stocks contributed to the fund's relative returns led by companies in the industrials and utilities sectors. Danish energy group Ørsted recorded double-digit returns and was among the top contributors to the fund's returns as the company reported strong third-quarter profits from operational wind farms. On the downside, investments in the consumer staples sector was a weak spot. British American Tobacco detracted from relative results amid pressure from competition and regulation.

The fund's portfolio managers continue to monitor global geopolitics that may derail economic growth, and are optimistic that global research combined with the fund's flexible mandate will help us identify attractive investment opportunities.

Capital Income Builder, a mix of stocks and bonds, lost 6.77% for the 12 months ended December 31, 2018. During the same period, the MSCI ACWI (All Country World Index)¹, a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets (consisting of more than 40 developed and emerging market country indexes), declined 9.42%. The Bloomberg Barclays U.S. Aggregate Index², which represents the U.S. investment-grade (rated BBB/Baa and above) fixed-rate bond market, was virtually unchanged and returned 0.01%. The index blend of 70%/30% MSCI ACWI/Bloomberg Barclays U.S. Aggregate Index³ lost 6.48%. The Lipper Global Equity Income Funds Average⁴, a measure of similar funds, fell 9.41%.

U.S. equities declined for the first calendar year since 2008. Concerns over trade conflicts, slowing global growth and high valuations contributed to persistent volatility. Energy and materials companies were further pressured by falling commodity prices. While growth-oriented stocks performed relatively better than defensive stocks, many companies experienced wild swings throughout the year. In a turbulent year, a fourth quarter rally helped bonds outperform other asset classes.

In the equity portfolio, the best contributors to the fund in relative terms were the financials and real estate sectors. A mix of stocks such as CME Group and American Tower contributed to results on the back of strong third quarter earnings that beat analyst estimates. The fund's fixed income portfolio was also additive to results and benefited from duration positioning.

On the downside, the consumer staples sector, which comprised the second-largest share of the fund's equity holdings, detracted from returns. Tobacco firms Philip Morris International and British American Tobacco fell due to competition from next-generation smoking products, such as JUUL.

The current market environment is rife with uncertainty. Given that the U.S. is late in the economic cycle, the fund's portfolio managers are paying close attention to companies' leverage and are more sharply focused on monitoring balance sheets. They seek to avoid companies that take on debt to pay dividends, and are focused on identifying companies with strong business models and a commitment to paying and growing dividends over time. Higher interest rates should also allow portfolio managers to reinvest bond coupon payments into higher yielding securities, thereby generating more income from the bond portfolio.

Asset Allocation Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Unit prices and returns will vary, so investors may lose money. For current information and month-end results, visit americanfunds.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Asset Allocation Fund, which is a mix of stocks and bonds, fell 4.35% for the 12 months ended December 31, 2018. Standard & Poor’s 500 Composite Index,¹ a market capitalization-weighted index based on the results of approximately 500 widely held common stocks, declined 4.38% over the same period, while the Bloomberg Barclays U.S. Aggregate Index,² which represents the U.S. investment-grade (rated BBB/Baa and above) fixed-rate bond market, returned 0.01%. A blend of the two indexes, the 60%/40% S&P 500 Index/Bloomberg Barclays U.S. Aggregate Index,³ slipped 2.35%.

U.S. equities declined for the first time since 2008. Concerns over trade conflicts, slowing global growth and high valuations contributed to persistent volatility. Energy and materials companies were further pressured by falling commodity prices. While growth-oriented stocks performed relatively better than defensive stocks, many companies experienced wild swings throughout the year. In a turbulent year, a fourth quarter rally helped bonds outperform other asset classes.

Investments in the health care sector – one of the fund’s largest sector holdings – contributed to the fund’s returns. Molina Healthcare, UnitedHealth Group and Express Scripts boosted results, as all three companies had double-digit returns, which were on the back of strong third-quarter earnings for UnitedHealth Group and Express Scripts. On the downside, energy stocks detracted from returns as oil prices slipped due to fears of growing U.S. output and weaker global demand. The fund’s fixed income holdings were also a drag on returns due to curve positioning.

The fund’s portfolio managers continue to evaluate the economic and market-sector implications of the current administration’s decisions regarding trade. The fund’s cash position allows portfolio managers to remain flexible and better navigate uncertainty by focusing on opportunities when stock prices are favorable.

Global Balanced Fund declined 5.81% for the 12 months ended December 31, 2018. The MSCI ACWI (All Country World Index)¹, a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets (consisting of more than 40 developed and emerging market country indexes), lost 9.42%, while the Bloomberg Barclays Global Aggregate Index,² a measure of global investment-grade bonds (rated BBB/Baa and above), fell 1.20%. The 60%/40% MSCI ACWI/ Bloomberg Barclays Global Aggregate Index³, a blend of the two indexes, slipped 6.00%.

Global stocks, as measured by the MSCI ACWI, ended the year in negative territory hurt by slowing economic growth, increased volatility and higher interest rates in the U.S. While ongoing turmoil over the U.K.'s departure from the European Union weighed on European stocks, a combination of a stronger U.S. dollar and heightened U.S.-China trade frictions impacted emerging markets equities.

Investments in the health care sector boosted the fund's returns led by companies such as U.S. health insurer Humana. The company's shares hit new highs on the back of strong third-quarter earnings and amid a wider boost to the health insurance sector following U.S. congressional mid-term elections.

On the flip side, investments in consumer staples companies hindered results. In particular, tobacco companies were hurt by concerns about nicotine regulation in the U.S. and increased competition. Fixed income investments also detracted from returns led by the fund's exposure to emerging market debt.

While there is reason for caution in the global outlook, there are broad themes that offer the fund's portfolio managers investment opportunities. Equity investments in health care and technology can provide exposure to innovations with significant growth potential. Within fixed income, portfolio managers see pockets of opportunities in emerging markets, such as Mexico and Poland, where selling in response to higher rates belies underlying strengths.

Bond Fund slipped 0.45% for the 12 months ended December 31, 2018. In comparison, the fund's benchmark, the Bloomberg Barclays U.S. Aggregate Index,¹ which represents the U.S. investment-grade (rated BBB/Baa and above) fixed-rate bond market, was flat and returned 0.01%.

Rising yields made for mixed results across bond sectors as the 10-year Treasury yield rose 29 basis points. The Federal Reserve hiked the federal funds target rate four times this year to a range of 2.25% to 2.50% on the back of a strong labor market and solid economic growth.

The fund's exposure to higher-yielding securities contributed to results. Bond investments across a mix of issuers and sectors exposed the fund to idiosyncratic risks and an underweight position in U.S. Treasuries detracted from results.

On the whole, the U.S. economy appears to be in good shape and is expected to grow at a moderate pace. The Fed is well ahead of its peers on its path to monetary policy normalization that may help contribute to a more stable environment for interest rate hikes. The fund's portfolio managers are optimistic about total returns against such a backdrop and for investing in a spectrum of U.S. fixed income securities.

Global Bond Fund slipped 1.14% for the 12 months ended December 31, 2018. This was in line with the fund's benchmark, the Bloomberg Barclays Global Aggregate Index,¹ which measures global investment-grade bonds (rated BBB/Baa and above) that declined 1.20%.

U.S. Treasury bonds rose modestly, boosted by safe-haven buying as volatile financial markets sent investors fleeing for cover. The positive gains, however, masked a more tumultuous year as rising U.S. interest rates jolted markets around the world. The U.S. dollar also strengthened in response to higher rates and quantitative tightening. Investment-grade and high-yield corporate bonds finished the year in negative territory, as did emerging markets debt. Meanwhile, the Federal Reserve hiked the federal funds target rate four times this year to a range of 2.25% to 2.50%.

Country allocation contributed the most to the fund's relative returns, driven by above-benchmark investments in Polish, Indian and Brazilian debt. On the downside, duration positioning and currency exposure hampered returns. Emerging market currencies were particularly under pressure due to a stronger dollar, and investments in the Indian rupee hindered results.

As growth in the U.S. moderates, the fund's portfolio managers seek to identify long-term investments around the world such as in emerging markets where corporate and high-yield debt may present opportunities. Given the fund's core objective is to provide a high-level of total return over the long term, the fund's portfolio managers maintain a cautious approach to investing in different sectors of the bond market, such as high-yield debt.

High-Income Bond Fund declined 2.15% for the 12 months ended December 31, 2018. In comparison, the fund's benchmark, the Bloomberg Barclays U.S. Corporate High Yield 2% Issuer Capped Index,¹ which measures non-investment-grade bonds and limits the exposure of an issuer to 2%, fell 2.08%.

Rising yields made for mixed results across bond sectors as the 10-year Treasury yield rose 29 basis points. The Federal Reserve hiked the federal funds target rate four times this year to a range of 2.25% to 2.50% on the back of a strong labor market and solid economic growth.

While the fund's returns were in line with the benchmark, an allocation to select industries contributed to relative returns – an underweight position in consumer cyclical and an overweight position in technology boosted results.

The fund's portfolio managers continue to believe current fundamentals support a mildly constructive outlook for the high-yield market. While we are monitoring the Federal Reserve's tightening monetary policy, the higher yields and relatively short duration of high-yield bonds should help mitigate any impact from rising rates.

Mortgage Fund gained 0.58% for the 12 months ended December 31, 2018, while the Bloomberg Barclays U.S. Mortgage-Backed Securities Index,¹ which covers the mortgage-backed pass-through securities of Ginnie Mae, Fannie Mae and Freddie Mac, rose 0.99%.

Rising yields made for mixed results across bond sectors as the 10-year Treasury yield rose 29 basis points. The Federal Reserve hiked the federal funds target rate four times this year to a range of 2.25% to 2.50% on the back of a strong labor market and solid economic growth.

The fund's allocation to Treasuries, Agency debentures, and high-quality liquid asset-backed securities contributed to relative results as agency mortgage-backed securities lagged some of the other sectors during the calendar year. Duration had little impact and on the downside the fund's yield curve position detracted from results.

The fund's portfolio managers remain focused on meeting the core objectives of the fund – providing current income and protecting capital. The fund's relatively low allocation to agency mortgage-backed securities, combined with an interest rate stance that anticipates that the yield curve will steepen, are positions that the portfolio managers expect will contribute to relative results in the future as markets evolve. As the Fed continues to withdraw liquidity by divesting Treasuries and mortgage securities from its balance sheet, more attractive valuations for mortgage investments are expected to emerge.

			Percent of net assets

Ultra-Short Bond Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Unit prices and returns will vary, so investors may lose money. For current information and month-end results, visit americanfunds.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Ultra-Short Bond Fund gained 1.58% for the 12 months ended December 31, 2018, compared with a 1.99% rise in the Bloomberg Barclays Short-Term Government/Corporate Index,¹ which consists of investment-grade (rated BBB/Baa and above), fixed-rate, publicly placed, dollar-denominated and non-convertible securities with remaining maturity from one up to (but not including) 12 months within either the government or corporate sector.

The fund's returns were higher than in 2017 as the Federal Reserve continued on its path to reducing the size of its balance sheet, raising rates by a quarter percentage point four times over the past 12 months, to the current range of 2.25% to 2.50%. Given an increase in interest rates to reassure investors of persistent U.S. economic strength, the fund's portfolio managers believe the fund has the potential to provide current income.

U.S. Government/AAA-Rated Securities Fund rose 0.91% for the 12 months ended December 31, 2018, while the Bloomberg Barclays U.S. Government/Mortgage-Backed Securities Index,¹ which covers obligations issued by the U.S. Treasury and U.S. government agencies, increased by 0.93%.

Rising yields made for mixed results across bond sectors as the 10-year Treasury yield rose 29 basis points. The Federal Reserve hiked the federal funds target rate four times this year to a range of 2.25% to 2.50% on the back of a strong labor market and solid economic growth.

During the period, curve positioning led by higher yields contributed to relative returns. On the downside, TIPS (Treasury inflation protected securities) detracted from relative returns as inflation expectations fell in the fourth quarter of 2018.

The fund strives to meet its objective of providing a high level of current income consistent with the preservation of capital. The fund's portfolio managers have positioned the fund with the expectation that rate hikes in the near future will be at a gradual pace and believe this can lead to a steepening yield curve and higher inflation expectations.

The fund slipped 0.04% for the 12 months ended December 31, 2018. Standard & Poor's 500 Managed Risk Index - Moderate Aggressive¹ fell 2.51%. Standard & Poor's 500 Composite Index,² a market capitalization-weighted index based on the results of approximately 500 widely held common stocks, lost 4.38%.

The fund pursues its objective by investing in shares of American Funds Insurance Series - Growth FundSM and American Funds Insurance Series - Bond FundSM while seeking to manage portfolio volatility and provide downside protection, primarily through the use of exchange-traded futures. The benefit of the fund's managed risk strategy should be most apparent during periods of high volatility and in down markets. In steady or rising markets, the fund's results can be expected to lag those of the underlying Growth Fund.

The underlying Growth Fund's investments in consumer discretionary added to returns, while investments in communication services detracted from the fund's results.

Average annual total returns based on a \$1,000 investment	For periods ended December 31, 2018				
		1 year	Lifetime (since May 1, 2013)	Gross expense ratio	Net expense ratio

Milliman Financial Risk Management LLC serves as the subadviser with respect to the management of the fund's managed risk strategy.

Managed Risk Blue Chip Income and Growth Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Unit prices and returns will vary, so investors may lose money. For current information and month-end results, visit americanfunds.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

The fund lost 6.99% for the 12 months ended December 31, 2018, trailing the S&P 500 Managed Risk Index - Moderate,¹ which fell 2.13%. Standard & Poor's 500 Composite Index,² a market capitalization-weighted index based on the results of approximately 500 widely held common stocks, decreased by 4.38%.

The fund pursues its objective by investing in shares of American Funds Insurance Series - Blue Chip Income and Growth FundSM and American Funds Insurance Series - U.S. Government/AAA-Rated Securities FundSM while seeking to manage portfolio volatility and provide downside protection, primarily through the use of exchange-traded futures. The benefit of the fund's managed risk strategy should be most apparent during periods of high volatility and in down markets. In steady or rising markets, the fund's results can be expected to lag those of the underlying Blue Chip Income and Growth Fund.

The underlying Blue Chip Income and Growth Fund's investments in consumer staples stocks detracted the most from the fund's results.

Managed Risk Growth-Income Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Unit prices and returns will vary, so investors may lose money. For current information and month-end results, visit americanfunds.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

The fund slipped 1.66% for the 12 months ended December 31, 2018, compared to the S&P 500 Managed Risk Index - Moderate,¹ which declined 2.13%. Standard & Poor's 500 Composite Index,² a market capitalization-weighted index based on the results of approximately 500 widely held common stocks, decreased by 4.38%.

The fund pursues its objective by investing in shares of American Funds Insurance Series - Growth-Income FundSM and American Funds Insurance Series - Bond FundSM while seeking to manage portfolio volatility and provide downside protection, primarily through the use of exchange-traded futures. The benefit of the fund's managed risk strategy should be most apparent during periods of high volatility and in down markets. In steady or rising markets, the fund's results can be expected to lag those of the underlying Growth-Income Fund.

The underlying Growth-Income Fund's investments in the consumer discretionary sector contributed the most to the fund's relative returns, while investments in the information technology sector detracted the most from the fund's relative results.

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. One security in "Other securities" (with a value of \$16,560,000, an aggregate cost of \$8,280,000, and which represented .45% of the net assets of the fund) was acquired on 5/1/2015 through private placement transactions exempt from registration under the Securities Act of 1933, which may subject it to legal or contractual restrictions on resale.

Investments in affiliates

A company is an affiliate of the fund under the Investment Company Act of 1940 if the fund's holdings in that company represent 5% or more of the outstanding voting shares. The value of the fund's holdings in affiliated companies is included in "Other securities" under the respective industry sectors in the summary investment portfolio. Further details on these holdings and related transactions during the year ended December 31, 2018, appear below.

	Beginning shares	Additions	Reductions	Ending shares	Net realized gain (000)	Net unrealized depreciation (000)	Dividend income (000)	Value of affiliates at 12/31/2018 (000)

Growth Fund

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. Some securities in "Other securities" (with an aggregate value of \$50,104,000, an aggregate cost of \$47,650,000, and which represented .21% of the net assets of the fund) were acquired from 5/22/2015 to 12/21/2018 through private placement transactions exempt from registration under the Securities Act of 1933, which may subject them to legal or contractual restrictions on resale. "Other securities" also includes securities (with an aggregate value of \$427,632,000, which represented 1.82% of the net assets of the fund) which were acquired in transactions exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933 and may be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers.

¹Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$819,772,000, which represented 3.50% of the net assets of the fund. This amount includes \$719,983,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

²Security did not produce income during the last 12 months.

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. "Other securities" includes securities which were valued under fair value procedures adopted by authority of the board of trustees. The total value of securities which were valued under fair value procedures was \$1,082,559,000, which represented 3.62% of the net assets of the fund. This amount includes \$974,212,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

Investments in affiliates

A company is an affiliate of the fund under the Investment Company Act of 1940 if the fund's holdings in that company represent 5% or more of the outstanding voting shares. The value of the fund's affiliated-company holding is shown in the summary investment portfolio. Further details on this holding and related transactions during the year ended December 31, 2018, appear below.

International Growth and Income Fund

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio.

¹Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$410,893,000, which represented 30.73% of the net assets of the fund. This entire amount relates to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

²Security did not produce income during the last 12 months.

³Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$59,763,000, which represented 4.47% of the net assets of the fund.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

¹Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$77,218,000, which represented 11.43% of the net assets of the fund. This amount includes \$76,827,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

²All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$284,000, which represented .04% of the net assets of the fund.

³Index-linked bond whose principal amount moves with a government price index.

⁴Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

⁵Purchased on a TBA basis.

⁶Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$23,524,000, which represented 3.48% of the net assets of the fund.

⁷Notional amount is calculated based on the number of contracts and notional contract size.

⁸Value is calculated based on the notional amount and current market price.

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. "Other securities" also includes loan participations and assignments, which may be subject to legal or contractual restrictions on resale. The total value of all such loans was \$43,203,000, which represented .19% of the net assets of the fund. Some securities in "Other securities" (with an aggregate value of \$30,904,000, an aggregate cost of \$36,241,000, and which represented .13% of the net assets of the fund) were acquired from 9/26/2013 to 11/16/2018 through private placement transactions exempt from registration under the Securities Act of 1933, which may subject them to legal or contractual restrictions on resale.

Asset Allocation Fund

Investments in affiliates

A company is an affiliate of the fund under the Investment Company Act of 1940 if the fund's holdings in that company represent 5% or more of the outstanding voting shares. The value of the fund's holdings in affiliated companies is included in "Other securities" under the respective industry sectors in the summary investment portfolio. Further details on these holdings and related transactions during the year ended December 31, 2018, appear below.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

¹Security did not produce income during the last 12 months.

²Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$396,462,000, which represented 1.73% of the net assets of the fund. This amount includes \$369,780,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

³All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$10,162,000, which represented .04% of the net assets of the fund.

⁴Index-linked bond whose principal amount moves with a government price index.

⁵Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$1,612,443,000, which represented 7.03% of the net assets of the fund.

⁶Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

⁷Coupon rate may change periodically.

⁸Purchased on a TBA basis.

⁹Notional amount is calculated based on the number of contracts and notional contract size.

¹⁰Value is calculated based on the notional amount and current market price.

¹¹This security was an unaffiliated issuer in its initial period of acquisition at 12/31/2017; it was not publicly disclosed.

Key to abbreviations and symbol

ADR = American Depositary Receipts

EFFR = Effective Federal Funds Rate

LIBOR = London Interbank Offered Rate

TBA = To-be-announced

Global Balanced Fund

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

¹Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$42,136,000, which represented 11.51% of the net assets of the fund. This amount includes \$40,068,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

²Security did not produce income during the last 12 months.

³Acquired in a transaction exempt from registration under Rule 144A of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$10,661,000, which represented 2.91% of the net assets of the fund.

⁴Index-linked bond whose principal amount moves with a government price index.

⁵All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$154,000, which represented .04% of the net assets of the fund.

⁶Step bond; coupon rate may change at a later date.

⁷Coupon rate may change periodically.

⁸Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

⁹Purchased on a TBA basis.

¹⁰Notional amount is calculated based on the number of contracts and notional contract size.

¹¹Value is calculated based on the notional amount and current market price.

¹²Amount less than one thousand.

Bond Fund

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. "Other securities" includes securities which were valued under fair value procedures adopted by authority of the board of trustees. The total value of securities which were valued under fair value procedures was \$1,591,000, which represented .02% of the net assets of the fund. "Other securities" also includes loan participations and assignments, which may be subject to legal or contractual restrictions on resale. The total value of all such loans was \$1,243,000, which represented .01% of the net assets of the fund.

Bond Fund

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

¹Step bond; coupon rate may change at a later date.

²Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$1,180,984,000, which represented 11.98% of the net assets of the fund.

³Coupon rate may change periodically.

⁴All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$25,155,000, which represented .26% of the net assets of the fund.

⁵Index-linked bond whose principal amount moves with a government price index.

⁶Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

⁷Purchased on a TBA basis.

⁸Notional amount is calculated based on the number of contracts and notional contract size.

⁹Value is calculated based on the notional amount and current market price.

Global Bond Fund

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. "Other securities" includes securities which were valued under fair value procedures adopted by authority of the board of trustees. The total value of securities which were valued under fair value procedures was \$2,483,000, which represented .12% of the net assets of the fund. This amount includes \$283,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading. "Other securities" also includes loan participations and assignments, which may be subject to legal or contractual restrictions on resale. The total value of all such loans was \$3,706,000, which represented .18% of the net assets of the fund. Some securities in "Other securities" (with an aggregate value of \$2,768,000, an aggregate cost of \$2,711,000, and which represented .13% of the net assets of the fund) were acquired from 8/31/2015 to 11/16/2018 through private placement transactions exempt from registration under the Securities Act of 1933, which may subject them to legal or contractual restrictions on resale.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

¹Index-linked bond whose principal amount moves with a government price index.

²All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$4,216,000, which represented .20% of the net assets of the fund.

³Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

⁴Step bond; coupon rate may change at a later date.

⁵Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$188,658,000, which represented 9.04% of the net assets of the fund.

⁶Purchased on a TBA basis.

⁷Notional amount is calculated based on the number of contracts and notional contract size.

⁸Value is calculated based on the notional amount and current market price.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

¹Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$681,560,000, which represented 56.61% of the net assets of the fund.

²Scheduled interest and/or principal payment was not received.

³Acquired through a private placement transaction exempt from registration under the Securities Act of 1933. May be subject to legal or contractual restrictions on resale. Further details on these holdings appear below.

⁴Loan participations and assignments; may be subject to legal or contractual restrictions on resale. The total value of all such loans, including those in "Other securities," was \$76,517,000, which represented 6.36% of the net assets of the fund.

⁵Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

⁶Coupon rate may change periodically.

⁷Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Most recent payment was 100% cash unless otherwise noted.

⁸Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$30,796,000, which represented 2.56% of the net assets of the fund. This amount includes \$3,926,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

⁹Value determined using significant unobservable inputs.

Private placement securities	Acquisition date(s)	Cost (000)	Value (000)	Percent of net assets

Mortgage Fund

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

¹Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

²Purchased on a TBA basis.

³Coupon rate may change periodically.

⁴Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$52,359,000, which represented 17.98% of the net assets of the fund.

⁵All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$2,758,000, which represented .95% of the net assets of the fund.

⁶Index-linked bond whose principal amount moves with a government price index.

⁷Notional amount is calculated based on the number of contracts and notional contract size.

⁸Value is calculated based on the notional amount and current market price.

Key to abbreviations and symbol

EFFR = Effective Federal Funds Rate

LIBOR = London Interbank Offered Rate

TBA = To-be-announced

USD/\$ = U.S. dollars

U.S. Government/AAA-Rated Securities Fund

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

¹All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$36,486,000, which represented 1.27% of the net assets of the fund.

²Index-linked bond whose principal amount moves with a government price index.

³Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

⁴Purchased on a TBA basis.

⁵Coupon rate may change periodically.

⁶Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$151,166,000, which represented 5.27% of the net assets of the fund.

⁷Notional amount is calculated based on the number of contracts and notional contract size.

⁸Value is calculated based on the notional amount and current market price.

Notes to financial statements

1. Organization

American Funds Insurance Series (the “series”) is registered under the Investment Company Act of 1940 as an open-end, diversified management investment company with 28 different funds (the “funds”). Twenty-three funds in the series are covered in this report. The other five funds in the series, American Funds Insurance Series - Portfolio Series, are covered in a separate report. The assets of each fund are segregated, with each fund accounted for separately. Capital Research and Management Company (“CRMC”) is the series’ investment adviser. Milliman Financial Risk Management LLC (“Milliman FRM”) is the subadviser for the risk management strategy for eight of the funds (the “managed risk funds”), five of which are covered in this report.

The managed risk funds covered in this report are Managed Risk Growth Fund, Managed Risk International Fund, Managed Risk Blue Chip Income and Growth Fund, Managed Risk Growth-Income Fund and Managed Risk Asset Allocation Fund. The managed risk funds invest in other funds within the series (the “underlying funds”) and employ Milliman FRM to implement the risk management strategy, which consists of using hedging instruments – primarily short positions on exchange-traded futures contracts – to attempt to stabilize the volatility of the funds around target volatility levels and reduce the downside exposure of the funds during periods of significant market declines.

In 2009, shareholders approved the reorganization of the series from a Massachusetts business trust to a Delaware statutory trust. The series reserved the right to delay implementing the reorganization and has elected to do so.

The investment objectives for each fund covered in this report are as follows:

Global Growth Fund – Seeks to provide long-term growth of capital.

Global Small Capitalization Fund – Seeks to provide long-term growth of capital.

Growth Fund – Seeks to provide growth of capital.

International Fund – Seeks to provide long-term growth of capital.

New World Fund – Seeks long-term capital appreciation.

Blue Chip Income and Growth Fund – Seeks to produce income exceeding the average yield on U.S. stocks generally and to provide an opportunity for growth of principal consistent with sound common stock investing.

Global Growth and Income Fund – Seeks to provide long-term growth of capital while providing current income.

Growth-Income Fund – Seeks to achieve long-term growth of capital and income.

International Growth and Income Fund – Seeks to provide long-term growth of capital while providing current income.

Capital Income Builder – Seeks to provide a level of current income that exceeds the average yield on U.S. stocks generally and to provide a growing stream of income over the years. Secondly, seeks to provide growth of capital.

Asset Allocation Fund – Seeks to provide high total return consistent with preservation of capital over the long term.

Global Balanced Fund – Seeks the balanced accomplishment of three objectives: long-term growth of capital, conservation of principal and current income.

Bond Fund – Seeks to provide as high a level of current income as is consistent with the preservation of capital.

Global Bond Fund – Seeks to provide, over the long term, a high level of total return consistent with prudent investment management.

High-Income Bond Fund – Seeks to provide a high level of current income and, secondarily, capital appreciation.

Mortgage Fund – Seeks to provide current income and preservation of capital.

Ultra-Short Bond Fund – Seeks to provide current income, consistent with the maturity and quality standards applicable to the fund, and preservation of capital and liquidity.

U.S. Government/AAA-Rated Securities Fund – Seeks to provide a high level of current income consistent with preservation of capital.

Managed Risk Growth Fund – Seeks to provide growth of capital while seeking to manage volatility and provide downside protection.

Managed Risk International Fund – Seeks to provide long-term growth of capital while seeking to manage volatility and provide downside protection.

Managed Risk Blue Chip Income and Growth Fund – Seeks to produce income exceeding the average yield on U.S. stocks generally and to provide an opportunity for growth of principal consistent with sound common stock investing, in each case while seeking to manage volatility and provide downside protection.

Managed Risk Growth-Income Fund – Seeks to achieve long-term growth of capital and income while seeking to manage volatility and provide downside protection.

Managed Risk Asset Allocation Fund – Seeks to provide high total return consistent with preservation of capital over the long term while seeking to manage volatility and provide downside protection.

Each fund in the series, except the managed risk funds, offers either four or five share classes (Classes 1, 1A, 2, 3 or 4); the managed risk funds offer two share classes (Classes P1 and P2). Holders of all share classes of each fund have equal pro rata rights to assets, dividends and liquidation proceeds of each fund held. Each share class of each fund has identical voting rights, except for the exclusive right to vote on matters affecting only its class. Share classes have different fees and expenses ("class-specific fees and expenses"), primarily due to different arrangements for certain distribution expenses. Differences in class-specific fees and expenses will result in differences in net investment income and, therefore, the payment of different per-share dividends by each class of each fund.

2. Significant accounting policies

Each fund is an investment company that applies the accounting and reporting guidance issued in Topic 946 by the U.S. Financial Accounting Standards Board. Each fund's financial statements have been prepared to comply with U.S. generally accepted accounting principles ("U.S. GAAP"). These principles require the series' investment adviser to make estimates and assumptions that affect reported amounts and disclosures. Actual results could differ from those estimates. Subsequent events, if any, have been evaluated through the date of issuance in the preparation of the financial statements. The funds follow the significant accounting policies described in this section, as well as the valuation policies described in the next section on valuation.

Security transactions and related investment income – Security transactions are recorded by the funds as of the date the trades are executed with brokers. Realized gains and losses from security transactions are determined based on the specific identified cost of the securities. In the event a security is purchased with a delayed payment date, the funds will segregate liquid assets sufficient to meet their payment obligations. Dividend income is recognized on the ex-dividend date and interest income is recognized on an accrual basis. Market discounts, premiums and original issue discounts on fixed-income securities are amortized daily over the expected life of the security.

Fees and expenses – The fees and expenses of the underlying funds held by the managed risk funds are not included in the fees and expenses reported for each of the managed risk funds; however, they are indirectly reflected in the valuation of each of the underlying funds. These fees are included in the net effective expense ratios that are provided as additional information in the financial highlights tables.

Class allocations – Income, fees and expenses (other than class-specific fees and expenses) and realized and unrealized gains and losses are allocated daily among the various share classes of each fund based on their relative net assets. Class-specific fees and expenses, such as distribution expenses, are accrued daily and charged directly to the respective share class of each fund.

Distributions paid to shareholders – Income dividends and capital gain distributions are recorded on each fund's ex-dividend date.

Currency translation – Assets and liabilities, including investment securities, denominated in currencies other than U.S. dollars are translated into U.S. dollars at the exchange rates supplied by one or more pricing vendors on the valuation date. Purchases and sales of investment securities and income and expenses are translated into U.S. dollars at the exchange rates on the dates of such transactions. The effects of changes in exchange rates on investment securities are included with the net realized gain or loss and net unrealized appreciation or depreciation on investments in the funds’ statements of operations. The realized gain or loss and unrealized appreciation or depreciation resulting from all other transactions denominated in currencies other than U.S. dollars are disclosed separately.

3. Valuation

CRMC, the series’ investment adviser, values the funds’ investments at fair value as defined by U.S. GAAP. The net asset value of each share class of each fund is generally determined as of approximately 4:00 p.m. New York time each day the New York Stock Exchange is open.

Methods and inputs – The series’ investment adviser uses the following methods and inputs to establish the fair value of each fund’s assets and liabilities. Use of particular methods and inputs may vary over time based on availability and relevance as market and economic conditions evolve.

Equity securities are generally valued at the official closing price of, or the last reported sale price on, the exchange or market on which such securities are traded, as of the close of business on the day the securities are being valued or, lacking any sales, at the last available bid price. Prices for each security are taken from the principal exchange or market on which the security trades. The value of an underlying fund is based on its reported net asset value.

Fixed-income securities, including short-term securities, are generally valued at prices obtained from one or more pricing vendors. Vendors value such securities based on one or more of the inputs described in the following table. The table provides examples of inputs that are commonly relevant for valuing particular classes of fixed-income securities in which the funds are authorized to invest. However, these classifications are not exclusive and any of the inputs may be used to value any other class of fixed-income security.

Fixed-income class	Examples of standard inputs
All	Benchmark yields, transactions, bids, offers, quotations from dealers and trading systems, new issues, spreads and other relationships observed in the markets among comparable securities; and proprietary pricing models such as yield measures calculated using factors such as cash flows, financial or collateral performance and other reference data (collectively referred to as “standard inputs”)
Corporate bonds & notes; convertible securities	Standard inputs and underlying equity of the issuer
Bonds & notes of governments & government agencies	Standard inputs and interest rate volatilities
Mortgage-backed; asset-backed obligations	Standard inputs and cash flows, prepayment information, default rates, delinquency and loss assumptions, collateral characteristics, credit enhancements and specific deal information
Municipal securities	Standard inputs and, for certain distressed securities, cash flows or liquidation values using a net present value calculation based on inputs that include, but are not limited to, financial statements and debt contracts

When the series’ investment adviser deems it appropriate to do so (such as when vendor prices are unavailable or not deemed to be representative), fixed-income securities will be valued in good faith at the mean quoted bid and ask prices that are reasonably and timely available (or bid prices, if ask prices are not available) or at prices for securities of comparable maturity, quality and type.

Securities with both fixed-income and equity characteristics, or equity securities traded principally among fixed-income dealers, are generally valued in the manner described for either equity or fixed-income securities, depending on which method is deemed most appropriate by the series' investment adviser. The Government Cash Management Fund held by the managed risk funds is managed to maintain a \$1.00 net asset value per share. The net asset value of each share class of each managed risk fund is calculated based on the reported net asset values of the underlying funds in which each fund invests.

Exchange-traded options and futures are generally valued at the official closing price for options and official settlement price for futures of the exchange or market on which such instruments are traded, as of the close of business on the day such instruments are being valued. Forward currency contracts are valued at the mean of representative quoted bid and ask prices, generally based on prices supplied by one or more pricing vendors. Interest rate swaps and credit default swaps are generally valued by pricing vendors based on market inputs that include the index and term of index, reset frequency, payer/receiver, currency and pay frequency.

Securities and other assets for which representative market quotations are not readily available or are considered unreliable by the series' investment adviser are fair valued as determined in good faith under fair value guidelines adopted by authority of the series' board of trustees as further described. The investment adviser follows fair valuation guidelines, consistent with U.S. Securities and Exchange Commission rules and guidance, to consider relevant principles and factors when making fair value determinations. The investment adviser considers relevant indications of value that are reasonably and timely available to it in determining the fair value to be assigned to a particular security, such as the type and cost of the security; contractual or legal restrictions on resale of the security; relevant financial or business developments of the issuer; actively traded similar or related securities; conversion or exchange rights on the security; related corporate actions; significant events occurring after the close of trading in the security; and changes in overall market conditions. In addition, the closing prices of equity securities and futures that trade in markets outside U.S. time zones may be adjusted to reflect significant events that occur after the close of local trading but before the net asset value of each share class of each fund is determined. Fair valuations and valuations of investments and futures that are not actively trading involve judgment and may differ materially from valuations that would have been used had greater market activity occurred.

Processes and structure – The series' board of trustees has delegated authority to the series' investment adviser to make fair value determinations, subject to board oversight. The investment adviser has established a Joint Fair Valuation Committee (the "Fair Valuation Committee") to administer, implement and oversee the fair valuation process, and to make fair value decisions. The Fair Valuation Committee regularly reviews its own fair value decisions, as well as decisions made under its standing instructions to the investment adviser's valuation teams. The Fair Valuation Committee reviews changes in fair value measurements from period to period and may, as deemed appropriate, update the fair valuation guidelines to better reflect the results of back testing and address new or evolving issues. The Fair Valuation Committee reports any changes to the fair valuation guidelines to the board of trustees. The series' board and audit committee also regularly review reports that describe fair value determinations and methods.

The series' investment adviser has also established a Fixed-Income Pricing Review Group to administer and oversee the fixed-income valuation process, including the use of fixed-income pricing vendors. This group regularly reviews pricing vendor information and market data. Pricing decisions, processes and controls over security valuation are also subject to additional internal reviews, including an annual control self-evaluation program facilitated by the investment adviser's compliance group.

Classifications – The series' investment adviser classifies the funds' assets and liabilities into three levels based on the inputs used to value the assets or liabilities. Level 1 values are based on quoted prices in active markets for identical securities. Level 2 values are based on significant observable market inputs, such as quoted prices for similar securities and quoted prices in inactive markets. Certain securities trading outside the U.S. may transfer between Level 1 and Level 2 due to valuation adjustments resulting from significant market movements following the close of local trading. Level 3 values are based on significant unobservable inputs that reflect the investment adviser's determination of assumptions that market participants might reasonably use in valuing the securities.

The valuation levels are not necessarily an indication of the risk or liquidity associated with the underlying investment. For example, U.S. government securities are reflected as Level 2 because the inputs used to determine fair value may not always be quoted prices in an active market. The following tables present the funds' valuation levels as of December 31, 2018 (dollars in thousands):

The following table reconciles the valuation of the fund's Level 3 investment securities and related transactions for the year ended December 31, 2018 (dollars in thousands):

	Beginning value at 1/1/2018	Transfers into Level 3 ²	Purchases	Sales	Net realized gain ³	Unrealized appreciation ³	Transfers out of Level 3 ²	Ending value at 12/31/2018
Investment securities	\$23,741	\$—	\$17,504	\$(34,559)	\$6,060	\$9,202	\$(4,411)	\$17,537
Net unrealized appreciation during the period on Level 3 investment securities held at December 31, 2018								\$ 1,603

²Transfers into or out of Level 3 are based on the beginning market value of the quarter in which they occurred.

³Net realized gain and unrealized appreciation are included in the related amounts on investments in the statement of operations.

Unobservable inputs – Valuation of the fund’s Level 3 securities is based on significant unobservable inputs that reflect the investment adviser’s determination of assumptions that market participants might reasonably use in valuing the securities. The following table provides additional information used by the fund’s investment adviser to fair value the fund’s Level 3 securities (dollars in thousands):

	Value at 12/31/2018	Valuation techniques	Unobservable inputs	Range	Weighted average	Impact to valuation from an increase in input*
Bonds, notes & other debt instruments	\$ 8,992	Yield analysis	Yield to maturity risk premium	0-400 bps	299 bps	Decrease
Convertible securities	5,892	Market comparables	EBITDA multiple	8.9x	8.9x	Increase
		Recent market information	Market comparables	25%	25%	Decrease
Common stocks	2,397	Enterprise value	Revenue multiple	1.3x	1.3x	Increase
		Expected proceeds	Discount to reflect timing of receipt and amount of proceeds	50%	50%	Decrease
Rights & warrants	256	Black-Scholes	Implied volatility	30%	30%	Increase
		Recent market information	Quoted price	N/A	N/A	N/A
	<u>\$17,537</u>					

*This column represents the directional change in fair value of the Level 3 securities that would result in an increase from the corresponding input. A decrease to the unobservable input would have the opposite effect. Significant increases and decreases in these inputs in isolation could result in significantly higher or lower fair value measurements.

Key to abbreviation

EBITDA = Earnings before income taxes, depreciation and amortization

Managed Risk Growth Fund

At December 31, 2018, all of the fund's investments were classified as Level 1.

Managed Risk International Fund

At December 31, 2018, all of the fund's investments were classified as Level 1.

Managed Risk Blue Chip Income and Growth Fund

At December 31, 2018, all of the fund's investments were classified as Level 1.

Managed Risk Growth-Income Fund

At December 31, 2018, all of the fund's investments were classified as Level 1.

Managed Risk Asset Allocation Fund

At December 31, 2018, all of the fund's investments were classified as Level 1.

4. Risk factors

Investing in the funds may involve certain risks including, but not limited to, those described below.

Market conditions – The prices of, and the income generated by, the common stocks, bonds and other securities held by a fund may decline – sometimes rapidly or unpredictably – due to various factors, including events or conditions affecting the general economy or particular industries; overall market changes; local, regional or global political, social or economic instability; governmental, governmental agency or central bank responses to economic conditions; and currency exchange rate, interest rate and commodity price fluctuations.

Issuer risks – The prices of, and the income generated by, securities held by a fund may decline in response to various factors directly related to the issuers of such securities, including reduced demand for an issuer's goods or services, poor management performance, major litigation against the issuer, changes in government regulations affecting the issuer or its competitive environment and strategic initiatives such as mergers, acquisitions or dispositions and the market response to any such initiatives.

Investing in growth-oriented stocks – Growth-oriented common stocks and other equity-type securities (such as preferred stocks, convertible preferred stocks and convertible bonds) may involve larger price swings and greater potential for loss than other types of investments. These risks may be even greater in the case of smaller capitalization stocks.

Investing in income-oriented stocks – The value of a fund's securities and income provided by a fund may be reduced by changes in the dividend policies of, and the capital resources available for dividend payments at, the companies in which the fund invests.

Investing in small companies – Investing in smaller companies may pose additional risks. For example, it is often more difficult to value or dispose of small company stocks and more difficult to obtain information about smaller companies than about larger companies. Furthermore, smaller companies often have limited product lines, operating histories, markets and/or financial resources, may be dependent on one or a few key persons for management, and can be more susceptible to losses. Moreover, the prices of their stocks may be more volatile than stocks of larger, more established companies, particularly during times of market turmoil.

Investing outside the U.S. – Securities of issuers domiciled outside the U.S., or with significant operations or revenues outside the U.S., may lose value because of adverse political, social, economic or market developments (including social instability, regional conflicts, terrorism and war) in the countries or regions in which the issuers operate or generate revenue. These securities may also lose value due to changes in foreign currency exchange rates against the U.S. dollar and/or currencies of other countries. Issuers of these securities may be more susceptible to actions of foreign governments, such as nationalization, currency blockage or the imposition of price controls or punitive taxes, each of which could adversely impact the value of these securities. Securities markets in certain countries may be more volatile and/or less liquid than those in the U.S. Investments outside the U.S. may also be subject to different accounting practices and different regulatory, legal and reporting standards and practices, and may be more difficult to value, than those in the U.S. In addition, the value of investments outside the U.S. may be reduced by foreign taxes, including foreign withholding taxes on interest and dividends. Further, there may be increased risks of delayed settlement of securities purchased or sold by the fund. The risks of investing outside the U.S. may be heightened in connection with investments in emerging markets.

Investing in developing countries – Investing in countries with developing economies and/or markets may involve risks in addition to and greater than those generally associated with investing in developed countries. For instance, emerging market countries may have less developed legal and accounting systems than those in developed countries. The governments of these countries may be less stable and more likely to impose capital controls, nationalize a company or industry, place restrictions on foreign ownership and on withdrawing sale proceeds of securities from the country, and/or impose punitive taxes that could adversely affect the prices of securities. In addition, the economies of these countries may be dependent on relatively few industries that are more susceptible to local and global changes. Securities markets in these countries can also be relatively small and have substantially lower trading volumes. As a result, securities issued in these countries may be more volatile and less liquid, and may be more difficult to value, than securities issued in countries with more developed economies and/or markets. Less certainty with respect to security valuations may lead to additional challenges and risks in calculating the fund's net asset value. Additionally, emerging markets are more likely to experience problems with the clearing and settling of trades and the holding of securities by banks, agents and depositories that are less established than those in developed countries.

Investing in emerging markets – Investing in emerging markets may involve risks in addition to and greater than those generally associated with investing in the securities markets of developed countries. For instance, emerging market countries may have less developed legal and accounting systems than those in developed countries. The governments of these countries may be less stable and more likely to impose capital controls, nationalize a company or industry, place restrictions on foreign ownership and on withdrawing sale proceeds of securities from the country, and/or impose punitive taxes that could adversely affect the prices of securities. In addition, the economies of these countries may be dependent on relatively few industries that are more susceptible to local and global changes. Securities markets in these countries can also be relatively small and have substantially lower trading volumes. As a result, securities issued in these countries may be more volatile and less liquid, and may be more difficult to value, than securities issued in countries with more developed economies and/or markets. Less certainty with respect to security valuations may lead to additional challenges and risks in calculating a fund's net asset value. Additionally, emerging markets are more likely to experience problems with the clearing and settling of trades and the holding of securities by banks, agents and depositories that are less established than those in developed countries.

Investing in debt instruments – The prices of, and the income generated by, bonds and other debt securities held by a fund may be affected by changing interest rates and by changes in the effective maturities and credit ratings of these securities.

Rising interest rates will generally cause the prices of bonds and other debt securities to fall. A general rise in interest rates may cause investors to sell debt securities on a large scale, which could also adversely affect the price and liquidity of debt securities and could also result in increased redemptions from a fund. Falling interest rates may cause an issuer to redeem, call or refinance a debt security before its stated maturity, which may result in a fund failing to recoup the full amount of its initial investment and having to reinvest the proceeds in lower yielding securities. Longer maturity debt securities generally have greater sensitivity to changes in interest rates and may be subject to greater price fluctuations than shorter maturity debt securities.

Bonds and other debt securities are also subject to credit risk, which is the possibility that the credit strength of an issuer or guarantor will weaken or be perceived to be weaker, and/or an issuer of a debt security will fail to make timely payments of principal or interest and the security will go into default. A downgrade or default affecting any of a fund's securities could cause the value of a fund's shares to decrease. Lower quality debt securities generally have higher rates of interest and may be subject to greater price fluctuations than higher quality debt securities. Credit risk is gauged, in part, by the credit ratings of the debt securities in which a fund invests. However, ratings are only the opinions of the rating agencies issuing them and are not guarantees as to credit quality or an evaluation of market risk. The funds' investment adviser relies on its own credit analysts to research issuers and issues in seeking to assess credit and default risks.

Investing in lower rated debt instruments – Lower rated bonds and other lower rated debt securities generally have higher rates of interest and involve greater risk of default or price declines due to changes in the issuer's creditworthiness than those of higher quality debt securities. The market prices of these securities may fluctuate more than the prices of higher quality debt securities and may decline significantly in periods of general economic difficulty. These risks may be increased with respect to investments in junk bonds.

Investing in derivatives – The use of derivatives involves a variety of risks, which may be different from, or greater than, the risks associated with investing in traditional securities, such as stocks and bonds. Changes in the value of a derivative may not correlate perfectly with, and may be more sensitive to market events than, the underlying asset, rate or index, and a derivative instrument may expose a fund to losses in excess of its initial investment. Derivatives may be difficult to value, difficult for a fund to buy or sell at an opportune time or price and difficult to terminate or otherwise offset. A fund's use of derivatives may result in losses to the fund, and investing in derivatives may reduce a fund's returns and increase a fund's price volatility. A fund's counterparty to a derivative transaction (including, if applicable, the fund's clearing broker, the derivatives exchange or the clearinghouse) may be unable or unwilling to honor its financial obligations in respect of the transaction.

Currency – The prices of, and the income generated by, most debt securities held by a fund may also be affected by changes in relative currency values. If the U.S. dollar appreciates against foreign currencies, the value in U.S. dollars of a fund's securities denominated in such currencies would generally fall and vice versa. U.S. dollar-denominated securities of foreign issuers may also be affected by changes in relative currency values.

Investing in mortgage-related and other asset-backed securities – Mortgage-related securities, such as mortgage-backed securities, and other asset-backed securities, include debt obligations that represent interests in pools of mortgages or other income-bearing assets, such as consumer loans or receivables. Such securities often involve risks that are different from or more acute than the risks associated with investing in other types of debt securities. Mortgage-backed and other asset-backed securities are subject to changes in the payment patterns of borrowers of the underlying debt, potentially increasing the volatility of the securities and a fund's net asset value. When interest rates fall, borrowers are more likely to refinance or prepay their debt before its stated maturity. This may result in a fund having to reinvest the proceeds in lower yielding securities, effectively reducing a fund's income. Conversely, if interest rates rise and borrowers repay their debt more slowly than expected, the time in which the mortgage-backed and other asset-backed securities are paid off could be extended, reducing a fund's cash available for reinvestment in higher yielding securities. Mortgage-backed securities are also subject to the risk that underlying borrowers will be unable to meet their obligations and the value of property that secures the mortgages may decline in value and be insufficient, upon foreclosure, to repay the associated loans. Investments in asset-backed securities are subject to similar risks.

Investing in future delivery contracts – A fund may enter into contracts, such as to-be-announced contracts and mortgage dollar rolls, that involve a fund selling mortgage-related securities and simultaneously contracting to repurchase similar securities for delivery at a future date at a predetermined price. This can increase a fund's market exposure, and the market price of the securities that the fund contracts to repurchase could drop below their purchase price. While a fund can preserve and generate capital through the use of such contracts by, for example, realizing the difference between the sale price and the future purchase price, the income generated by the fund may be reduced by engaging in such transactions. In addition, these transactions may increase the turnover rate of a fund.

Investing in inflation linked bonds – The values of inflation linked bonds generally fluctuate in response to changes in real interest rates – i.e., rates of interest after factoring in inflation. A rise in real interest rates may cause the prices of inflation linked securities to fall, while a decline in real interest rates may cause the prices to increase. Inflation linked bonds may experience greater losses than other debt securities with similar durations when real interest rates rise faster than nominal interest rates. There can be no assurance that the value of an inflation linked security will be directly correlated to changes in interest rates; for example, if interest rates rise for reasons other than inflation, the increase may not be reflected in the security's inflation measure.

Investing in inflation linked bonds may also reduce a fund's distributable income during periods of deflation. If prices for goods and services decline throughout the economy, the principal and income on inflation linked securities may decline and result in losses to a fund.

Investing in securities backed by the U.S. government – Securities backed by the U.S. Treasury or the full faith and credit of the U.S. government are guaranteed only as to the timely payment of interest and principal when held to maturity. Accordingly, the current market values for these securities will fluctuate with changes in interest rates and the credit rating of the U.S. government. Securities issued by government-sponsored entities and federal agencies and instrumentalities that are not backed by the full faith and credit of the U.S. government are neither issued nor guaranteed by the U.S. government.

Investing in repurchase agreements – Upon entering into a repurchase agreement, a fund purchases a security from a bank or broker-dealer, which simultaneously commits to repurchase the security within a specified time at the fund's cost with interest. The security purchased by the fund constitutes collateral for the seller's repurchase obligation. If the party agreeing to repurchase should default, the fund may seek to sell the security it holds as collateral. The fund may incur a loss if the value of the collateral securing the repurchase obligation falls below the repurchase price. The fund may also incur disposition costs and encounter procedural delays in connection with liquidating the collateral.

Interest rate risk – The values and liquidity of the securities held by a fund may be affected by changing interest rates. For example, the values of these securities may decline when interest rates rise and increase when interest rates fall. Longer maturity debt securities generally have greater sensitivity to changes in interest rates and may be subject to greater price fluctuations than shorter maturity debt securities. A fund may invest in variable and floating rate securities. When a fund holds variable or floating rate securities, a decrease in market interest rates will adversely affect the income received from such securities and the net asset value of a fund's shares. Although the values of such securities are generally less sensitive to interest rate changes than those of other debt securities, the value of variable and floating rate securities may decline if their interest rates do not rise as quickly, or as much, as market interest rates. Conversely, floating rate securities will not generally increase in value if interest rates decline. During periods of extremely low short-term interest rates, a fund may not be able to maintain a positive yield and, given the current low interest rate environment, risks associated with rising rates are currently heightened.

Credit and liquidity support – Changes in the credit quality of banks and financial institutions providing credit and liquidity support features with respect to securities held by a fund could cause the values of these securities to decline.

Asset allocation – A fund's percentage allocation to equity securities, debt securities and money market instruments could cause the fund to underperform relative to relevant benchmarks and other funds with similar investment objectives.

Nondiversification risk – As nondiversified funds, certain funds have the ability to invest a larger percentage of their assets in the securities of a smaller number of issuers than diversified funds. Although the funds do not intend to limit their investments to the securities of a small number of issuers, if they were to do so, poor performance by a single large holding could adversely impact the funds' investment results more than if the funds were invested in a larger number of issuers.

Liquidity risk – Certain fund holdings may be or become difficult or impossible to sell, particularly during times of market turmoil. Illiquidity may result from the lack of an active market for a holding, legal or contractual restrictions on resale, or the reduced number and capacity of market participants to make a market in such holding. Market prices for less liquid or illiquid holdings may be volatile, and reduced liquidity may have an adverse impact on the market price of such holdings. Additionally, the sale of less liquid or illiquid holdings may involve substantial delays (including delays in settlement) and additional costs and the fund may be unable to sell such holdings when necessary to meet its liquidity needs or may be forced to sell at a loss.

Management – The investment adviser to the funds actively manages the funds' investments. Consequently, the funds are subject to the risk that the methods and analyses, including models, tools and data, employed by the investment adviser in this process may be flawed or incorrect and may not produce the desired results. This could cause the funds to lose value or their investment results to lag relevant benchmarks or other funds with similar objectives.

Investing in the managed risk funds may involve additional risks including, but not limited to, those described below.

Fund structure – The managed risk funds invest in underlying funds and incur expenses related to those underlying funds. In addition, investors in the managed risk funds will incur fees to pay for certain expenses related to the operations of the managed risk funds. An investor holding the underlying fund directly would incur lower overall expenses but would not receive the benefit of the managed risk strategy.

Management – The managed risk funds are subject to the risk that the managed risk strategy or the methods employed by the subadviser in implementing the managed risk strategy may not produce the desired results. This could cause the managed risk funds to lose value or their investment results to lag relevant benchmarks or other funds with similar objectives.

Underlying fund risks – Because the managed risk funds’ investments consist of investments in underlying funds, the managed risk funds’ risks are directly related to the risks of the respective underlying fund in which each managed fund invests. For this reason, it is important to understand the risks associated with investing both in the managed risk fund and in each of the underlying funds.

Investing in options and futures contracts – In addition to the risks generally associated with investing in derivative instruments, options and futures contracts are subject to the creditworthiness of the clearing organizations, exchanges and, in the case of futures, futures commission merchants with which a fund transacts. Additionally, although futures require only a small initial investment in the form of a deposit of initial margin, the amount of a potential loss on a futures contract could greatly exceed the initial amount invested. While both options and futures contracts are generally liquid instruments, under certain market conditions, options and futures may be deemed to be illiquid. For example, a fund may be temporarily prohibited from closing out its position in an options or futures contract if intraday price change limits or limits on trading volume imposed by the applicable exchange are triggered. If a fund is unable to close out a position on an options or futures contract, the fund would remain subject to the risk of adverse price movements until the fund is able to close out the position in question. The ability of a fund to successfully utilize options and futures contracts may depend in part upon the ability of the fund’s investment adviser or subadviser to accurately forecast interest rates and other economic factors and to assess and predict the impact of such economic factors on the options and futures in which the fund invests. If the investment adviser or subadviser incorrectly forecasts economic developments or incorrectly predicts the impact of such developments on the options and futures in which it invests, a fund could be exposed to the risk of loss. Whereas the risk of loss on a put option purchased by the fund is limited to the initial cost of the option, the amount of a potential loss on a futures contract could greatly exceed the relatively small initial amount invested in entering the futures position.

Hedging – There may be imperfect or even negative correlation between the prices of the options and futures contracts in which a fund invests and the prices of the underlying securities or indexes which the fund seeks to hedge. For example, options and futures contracts may not provide an effective hedge because changes in options and futures contract prices may not track those of the underlying securities or indexes they are intended to hedge. In addition, there are significant differences between the securities market, on the one hand, and the options and futures markets, on the other, that could result in an imperfect correlation between the markets, causing a given hedge not to achieve its objectives. The degree of imperfection of correlation depends on circumstances such as variations in speculative market demand for options and futures, including technical influences in options and futures trading, and differences between the financial instruments being hedged and the instruments underlying the standard contracts available for trading. A decision as to whether, when and how to hedge involves the exercise of skill and judgment, and even a well-conceived hedge may be unsuccessful to some degree because of market behavior or unexpected interest rate trends. In addition, the fund’s investment in exchange-traded options and futures and their resulting costs could limit the fund’s gains in rising markets relative to those of the underlying funds, or to those of unhedged funds in general.

Short positions – A fund may suffer losses from short positions in futures contracts. Losses from short positions in futures contracts occur when the underlying index increases in value. As the underlying index increases in value, the holder of the short position in the corresponding futures contract is required to pay the difference in value of the futures contract resulting from the increase in the index on a daily basis. Losses from a short position in an index futures contract could potentially be very large if the value of the underlying index rises dramatically in a short period of time.

5. Certain investment techniques

Securities lending – One of the funds has entered into securities lending transactions in which the fund earns income by lending investment securities to brokers, dealers or other institutions. Each transaction involves three parties: the fund, acting as the lender of the securities, a borrower, and a lending agent that acts as an intermediary.

Securities lending transactions are entered into by the fund under the securities lending agreement with the lending agent. The lending agent facilitates the exchange of securities between the lender and the borrower, generally provides protection from borrower default, marks to market the value of collateral daily, secures additional collateral from the borrower if it falls below preset terms, and may reinvest the collateral on behalf of the fund according to agreed parameters. The lending agent has indemnified the fund against losses resulting from borrower default. Although risk is mitigated by the collateral and indemnification, the fund could experience a delay in recovering its securities and a potential loss of income or value if the borrower fails to return the securities, collateral investments decline in value or the lending agent fails to perform.

The borrower is required to post highly liquid assets, such as cash or U.S. government securities, as collateral for the loan in an amount at least equal to the value of the securities loaned. Investments made with cash collateral are recognized as assets in the fund’s investment portfolio. The same amount is recorded as a liability in the fund’s statement of assets and liabilities. While securities are on loan, the fund will continue to receive the equivalent of the interest, dividends or other distributions paid by the issuer, as well as a

portion of the interest on the investment of the collateral. Additionally, although the fund does not have the right to vote on securities while they are on loan, the fund has a right to consent on corporate actions and a right to recall loaned securities to vote on proposals affecting them. The borrower is obligated to return the loaned security at the conclusion of the loan or, during the pendency of the loan, on demand from the fund.

As of December 31, 2018, the total value of securities on loan was \$67,607,000, and the total value of collateral received was \$72,379,000. Collateral received included cash of \$60,486,000 and non-cash U.S. Government securities of \$11,893,000. Investment securities purchased from cash collateral of \$54,436,000 are disclosed in the summary investment portfolio as short-term securities. Securities received as collateral, if any, are not recognized as fund assets. The contractual maturity of collateral received under the securities lending agreement is classified as overnight and continuous.

Index-linked bonds – Some of the funds have invested in index-linked bonds, which are fixed-income securities whose principal value is periodically adjusted to a government price index. Over the life of an index-linked bond, interest is paid on the adjusted principal value. Increases or decreases in the principal value of index-linked bonds are recorded as interest income in the fund's statement of operations.

Mortgage dollar rolls – Some of the funds have entered into mortgage dollar roll transactions in which the fund sells a mortgage-backed security to a counterparty and simultaneously enters into an agreement with the same counterparty to buy back a similar security on a specific future date at a predetermined price. Mortgage dollar rolls are accounted for as purchase and sale transactions, which may increase the funds' portfolio turnover rates.

Loan transactions – Some of the funds have entered into loan transactions in which the fund acquires a loan either through an agent, by assignment from another holder, or as a participation interest in another holder's portion of a loan. The loan is often administered by a financial institution that acts as agent for the holders of the loan, and the fund may be required to receive approval from the agent and/or borrower prior to the sale of the investment. The loan's interest rate and maturity date may change based on the terms of the loan, including potential early payments of principal.

Short-term securities – The managed risk funds hold shares of the Government Cash Management Fund, a cash management vehicle offered by the Bank of New York Mellon ("BNY Mellon"), the funds' custodian bank. The Government Cash Management Fund is managed by the Dreyfus Corporation.

Options contracts – The Managed Risk Growth-Income Fund has entered into options contracts, which give the holder of the option, in return for a premium payment, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option, the security underlying the option (or the cash value of the index underlying the option) at a specified price. As part of its managed risk strategy, the Managed Risk Growth-Income Fund will at times purchase put options on equity indexes in standardized contracts traded on foreign or domestic securities exchanges, boards of trade, or similar entities. By purchasing a put option on an equity index, the fund obtains the right (but not the obligation) to sell the cash value of the index underlying the option at a specified exercise price, and in return for this right, the fund pays the current market price, or the option premium, for the option.

The fund may terminate its position in a put option by allowing the option to expire or by exercising the option. If the option is allowed to expire, the fund will lose the entire premium. If the option is exercised, the fund completes the sale of the underlying instrument (or delivers the cash value of the index underlying the option) at the exercise price. The fund may also terminate a put option position by entering into opposing close-out transactions in advance of the option expiration date.

Premiums paid on options purchased, as well as the daily fluctuation in market value, are included in investment securities in the fund's statement of assets and liabilities. Realized gains or losses are recorded at the time the option contract is closed or expires. Net realized gains or losses and net unrealized appreciation or depreciation from options contracts are recorded in the fund's statement of operations.

Futures contracts – Some of the funds have entered into futures contracts, which provide for the future sale by one party and purchase by another party of a specified amount of a specific financial instrument for a specified price, date, time and place designated at the time the contract is made. Futures contracts are used to strategically manage the fund's interest rate sensitivity by increasing or decreasing the duration of the fund or a portion of the fund's portfolio. For the managed risk funds, futures contracts are used to strategically manage portfolio volatility and downside equity risk.

Upon entering into futures contracts, and to maintain the fund's open positions in futures contracts, the fund is required to deposit with a futures broker, or FCM, in a segregated account in the name of the FCM an amount of cash, U.S. government securities or other liquid securities, known as initial margin. The margin required for a particular futures contract is set by the exchange on which the contract is

traded to serve as collateral, and may be significantly modified from time to time by the exchange during the term of the contract. Securities deposited as initial margin, if any, are disclosed in the investment portfolio and cash deposited as initial margin, if any, is reflected as restricted cash pledged for futures contracts in the fund's statement of assets and liabilities.

On a daily basis, each fund pays or receives variation margin based on the increase or decrease in the value of the futures contracts and records variation margin on futures contracts in each fund's statement of assets and liabilities. In addition, each fund segregates liquid assets equivalent to the fund's outstanding obligations under the contract in excess of the initial margin and variation margin, if any. Futures contracts may involve a risk of loss in excess of the variation margin shown on each fund's statement of assets and liabilities. Each fund records realized gains or losses at the time the futures contract is closed or expires. Net realized gains or losses and net unrealized appreciation or depreciation from futures contracts are recorded in each fund's statement of operations.

Forward currency contracts – Some of the funds have entered into forward currency contracts, which represent agreements to exchange currencies on specific future dates at predetermined rates. The series' investment adviser uses forward currency contracts to manage the fund's exposure to changes in exchange rates. Upon entering into these contracts, risks may arise from the potential inability of counterparties to meet the terms of their contracts and from possible movements in exchange rates.

On a daily basis, the series' investment adviser values forward currency contracts based on the applicable exchange rates and records unrealized appreciation or depreciation for open forward currency contracts in each fund's statement of assets and liabilities. Realized gains or losses are recorded at the time the forward contract is closed or offset by another contract with the same broker for the same settlement date and currency. Closed forward currency contracts that have not reached their settlement date are included in the respective receivables or payables for closed forward currency contracts in each fund's statement of assets and liabilities. Net realized gains or losses from closed forward currency contracts and net unrealized appreciation or depreciation from open forward currency contracts are recorded in each fund's statement of operations.

Interest rate swaps – Some of the funds have entered into interest rate swaps, which are agreements to exchange one stream of future interest payments for another based on a specified notional amount. Typically, interest rate swaps exchange a fixed interest rate for a payment that floats relative to a benchmark or vice versa. The series' investment adviser uses interest rate swaps to manage the interest rate sensitivity of the fund by increasing or decreasing the duration of the fund or a portion of the fund's portfolio. Risks may arise as a result of the series' investment adviser incorrectly anticipating changes in interest rates, increased volatility, reduced liquidity and the potential inability of counterparties to meet the terms of their agreements.

Upon entering into an interest rate swap contract, the fund is required to deposit cash, U.S. government securities or other liquid securities, which is known as initial margin. Generally, the initial margin required for a particular interest rate swap is set and held as collateral by the clearinghouse on which the contract is cleared. The amount of initial margin required may be significantly modified from time to time by the clearinghouse during the term of the contract.

On a daily basis, the series' investment adviser records daily interest accruals related to the exchange of future payments as a receivable and payable in each fund's statement of assets and liabilities. Each fund also pays or receives a variation margin based on the increase or decrease in the value of the interest rate swaps, including accrued interest, and records variation margin on interest rate swaps in each fund's statement of assets and liabilities. Each fund records realized gains and losses on both the net accrued interest and any gain or loss recognized at the time the interest rate swap is closed or expires. Net realized gains or losses, as well as any net unrealized appreciation or depreciation, from interest rate swaps are recorded in each fund's statement of operations.

Credit default swap indices – Some of the funds have entered into centrally cleared credit default swap agreements on credit indices ("CDSI") that involve one party (the protection buyer) making a stream of payments to another party (the protection seller) in exchange for the right to receive a specified return upon the occurrence of a credit event, such as a default or restructuring, with respect to any of the underlying issuers (reference obligations) in the referenced index. The series' investment adviser uses credit default swaps to assume exposure to a diversified portfolio of credits or to hedge against existing credit risks.

CDSI are portfolios of credit instruments or exposures designed to be representative of some part of the credit market, such as the high-yield or investment-grade credit market. CDSI are generally traded using standardized terms, including a fixed spread and standard maturity dates, and reference all the names in the index. If there is a credit event, it is settled based on that name's weight in the index. The composition of the underlying issuers or obligations within a particular index may change periodically, usually every six months. A specified credit event may affect all or individual underlying reference obligations included in the index, and will be settled based upon the relative weighting of the affected obligation(s) within the index. The value of each CDSI can be used as a measure of the current payment/performance risk of the CDSI and represents the likelihood of an expected liability or profit should the notional amount of the CDSI be closed or sold as of the period end. An increasing value, as compared to the notional amount of the CDSI, represents a deterioration of the referenced indices' credit soundness and a greater likelihood of risk of default or other credit event

occurring as defined under the terms of the agreement. When a fund provides sell protection, its maximum exposure is the notional amount of the credit default swap agreement.

Upon entering into a centrally cleared CDSI contract, the fund is required to deposit with a derivatives clearing member ("DCM") in a segregated account in the name of the DCM an amount of cash, U.S. government securities or other liquid securities, which is known as initial margin. Generally, the initial margin required for a particular credit default swap is set and held as collateral by the clearinghouse on which the contract is cleared. The amount of initial margin required may be significantly modified from time to time by the clearinghouse during the term of the contract. Securities deposited as initial margin are designated on the investment portfolio.

On a daily basis, interest accruals related to the exchange of future payments are recorded as a receivable and payable in each fund's statement of assets and liabilities. Each fund also pays or receives a variation margin based on the increase or decrease in the value of the centrally cleared swaps, and records variation margin in each fund's statement of assets and liabilities. Each fund records realized gains and losses on both the net accrued interest and any gain or loss recognized at the time the swap is closed or expires. Net realized gains or losses, as well as any net unrealized appreciation or depreciation, from credit default swaps are recorded in each fund's statement of operations.

The following table presents the average month-end notional amounts of options purchased, futures contracts, forward currency contracts, interest rate swaps and credit default swaps while held for each fund (dollars in thousands):

	Options purchased	Futures contracts	Forward currency contracts	Interest rate swaps	Credit default swaps

¹Includes cumulative appreciation/depreciation on futures contracts, interest rate swaps and credit default swaps as reported in the applicable table following each fund's investment portfolio. Only current day's variation margin is reported within the statements of assets and liabilities.

²Includes options purchased as reported in the fund's investment portfolio.

³Options purchased are included in net realized gain (loss) on unaffiliated investments.

⁴Options purchased are included in net unrealized (depreciation) appreciation on unaffiliated investments.

Collateral – Some funds participate in a collateral program that calls for the funds to either receive or pledge highly liquid assets, such as cash or U.S. government securities, as collateral due to securities lending and/or their use of futures contracts, forward currency contracts, interest rate swaps, credit default swaps and/or future delivery contracts. For securities lending, each participating fund receives collateral in exchange for lending investment securities. The purpose of the collateral is to cover potential losses that could occur in the event that the borrower cannot meet its contractual obligation. The lending agent may reinvest collateral from securities lending transactions according to agreed parameters. For futures contracts, interest rate swaps and credit default swaps, the program calls for each participating fund to pledge collateral for initial and variation margin by contract. For forward currency contracts, the program calls for each participating fund to either receive or pledge collateral based on the net gain or loss on unsettled forward currency contracts by counterparty. For future delivery contracts, the program calls for each participating fund to either receive or pledge collateral based on the net gain or loss on unsettled contracts by certain counterparties. The purpose of the collateral is to cover potential losses that could occur in the event that either party cannot meet its contractual obligation. Non-cash collateral pledged by each participating fund, if any, is disclosed in each fund's investment portfolio, and cash collateral pledged by each participating fund, if any, is held in a segregated account with the fund's custodian, which is reflected as pledged cash in each fund's statement of assets and liabilities.

Rights of offset – Funds that hold forward currency contracts have enforceable master netting agreements with certain counterparties, where amounts payable by each party to the other in the same currency (with the same settlement date and with the same counterparty) are settled net of each party's payment obligation. If an early termination date occurs under these agreements following an event of default or termination event, all obligations of each party to its counterparty are settled net through a single payment in a single currency ("close-out netting"). For financial reporting purposes, the funds do not offset financial assets and financial liabilities that are subject to these master netting arrangements in the statements of assets and liabilities.

The following tables present each fund's forward currency contracts by counterparty that are subject to master netting agreements but that are not offset in the funds' statements of assets and liabilities. The net amount column shows the impact of offsetting on the funds' statement of assets and liabilities as of December 31, 2018, if close-out netting was exercised (dollars in thousands):

International Fund

Counterparty	Gross amounts recognized in the statement of assets and liabilities	Gross amounts not offset in the statement of assets and liabilities and subject to a master netting agreement			Net amount
		Available to offset	Non-cash collateral*	Cash collateral	
Liabilities:					
Goldman Sachs	\$525	\$–	\$–	\$(330)	\$195

New World Fund

6. Taxation and distributions

Federal income taxation – Each fund complies with the requirements under Subchapter M of the Internal Revenue Code applicable to mutual funds and intends to distribute substantially all of its net taxable income and net capital gains each year. The funds are not subject to income taxes to the extent such distributions are made. Therefore, no federal income tax provision is required.

As of and during the period ended December 31, 2018, none of the funds had a liability for any unrecognized tax benefits. Each fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in their respective statements of operations. During the period, none of the funds incurred any significant interest or penalties.

Each fund's tax returns are not subject to examination by federal, state and, if applicable, non-U.S. tax authorities after the expiration of each jurisdiction's statute of limitations, which is generally three years after the date of filing but can be extended in certain jurisdictions.

Non-U.S. taxation – Dividend and interest income, if any, are recorded net of non-U.S. taxes paid. The funds may file withholding tax reclaims in certain jurisdictions to recover a portion of amounts previously withheld. As a result of rulings from European courts, the funds filed for additional reclaims related to prior years. These reclaims are recorded when the amount is known and there are no significant uncertainties on collectability. Gains realized by the funds on the sale of securities in certain countries, if any, may be subject to non-U.S. taxes. If applicable, the funds record an estimated deferred tax liability based on unrealized gains to provide for potential non-U.S. taxes payable upon the sale of these securities.

Distributions – Distributions paid to shareholders are based on each fund's net investment income and net realized gains determined on a tax basis, which may differ from net investment income and net realized gains for financial reporting purposes. These differences are due primarily to different treatment for items such as currency gains and losses; short-term capital gains and losses; capital losses related to sales of certain securities within 30 days of purchase; unrealized appreciation of certain investments in securities outside the U.S.; deferred expenses; cost of investments sold; paydowns on fixed-income securities; net capital losses; non-U.S. taxes on capital gains, amortization of premiums and discounts and income on certain investments. The fiscal year in which amounts are distributed may differ from the year in which the net investment income and net realized gains are recorded by the funds for financial reporting purposes.

Additional tax basis disclosures for each fund as of December 31, 2018, were as follows (dollars in thousands):

	Global Growth Fund	Global Small Capitalization Fund	Growth Fund	International Fund	New World Fund	Blue Chip Income and Growth Fund

7. Fees and transactions

CRMC, the series' investment adviser, is the parent company of American Funds Distributors,[®] Inc. ("AFD"), the distributor of the series' shares, and American Funds Service Company[®] ("AFS"), the series' transfer agent. CRMC, AFD and AFS are considered related parties to the series.

Investment advisory services – The series has an investment advisory and service agreement with CRMC that provides for monthly fees accrued daily. These fees are based on annual rates that generally decrease as net asset levels increase. CRMC receives investment advisory fees from the underlying funds held by the managed risk funds. These fees are included in the net effective expense ratios that are provided as additional information in the financial highlights tables. Subadvisory fees for the managed risk funds are paid by CRMC to Milliman FRM. The managed risk funds are not responsible for paying any subadvisory fees.

Investment advisory services waivers – On December 4, 2017, the series board of trustees approved amended agreements effective February 1, 2018, decreasing the annual rate to 0.580% on daily net assets in excess of \$4 billion for New World Fund, decreasing the annual rate to 0.350% on daily net assets in excess of \$10.5 billion for Blue Chip Income and Growth Fund, and decreasing the annual rate to 0.320% on daily net assets in excess of \$13 billion for Bond Fund. During the year ended December 31, 2018, CRMC voluntarily reduced the investment advisory services fees to a proposed rate of 0.500% on daily net assets in excess of \$1.5 billion for International Growth and Income Fund and a proposed rate of 0.450% and 0.410% on daily net assets in excess of \$600 million and \$1 billion, respectively, for Capital Income Builder. CRMC is also waiving a portion of its investment advisory services fees for each of the managed risk funds. Investment advisory services fees are presented in each fund's statement of operations gross of the waivers from CRMC. For the year ended December 31, 2018, total investment advisory services fees waived by CRMC were \$2,789,000.

The range of rates, net asset levels and the current annualized rates of average daily net assets for each fund before and after any investment advisory services waivers (if applicable), are as follows:

Fund	Rates		Net asset level (in billions)		For the year ended December 31, 2018, before waiver	For the year ended December 31, 2018, after waiver

Distribution services – The series has plans of distribution for all share classes except Class 1. Under the plans, the board of trustees approves certain categories of expenses that are used to finance activities primarily intended to sell fund shares. The plans provide for payments to pay service fees to firms that have entered into agreements with the series. These payments, based on an annualized percentage of average daily net assets, range from 0.18% to 0.50% as noted in the table below. In some cases, the board of trustees has limited the amounts that may be paid to less than the maximum allowed by the plans.

Share class	Currently approved limits	Plan limits
Class 1A	0.00%	0.25%
Class 2	0.25	0.25
Class 3	0.18	0.18
Class 4	0.25	0.25
Class P1	0.00	0.25
Class P2	0.25	0.50

Insurance administrative services – The series has an insurance administrative services plan for Class 1A, 4, P1 and P2 shares. Under the plan, these share classes pay 0.25% of each insurance company's respective average daily net assets in each share class to compensate the insurance companies for services provided to their separate accounts and contractholders for which the shares of the fund are beneficially owned as underlying investments of such contractholders' annuities. These services include, but are not limited to, maintenance, shareholder communications and transactional services. The insurance companies are not related parties to the series.

Transfer agent services – The series has a shareholder services agreement with AFS under which the funds compensate AFS for providing transfer agent services to all of the funds' share classes. These services include recordkeeping, shareholder communications and transaction processing. In addition, the managed risk funds reimburse AFS for amounts paid to third parties for performing transfer agent services on behalf of fund shareholders.

Administrative services – The series has an administrative services agreement with CRMC under which each fund compensates CRMC for providing administrative services to all of the funds' share classes except Class P1 and P2 shares. Administrative services are provided by CRMC to help assist third parties providing non-distribution services to fund shareholders. These services include providing in depth information on each fund and market developments that impact fund investors. Administrative services also include, but are not limited to, coordinating, monitoring and overseeing third parties that provide services to fund shareholders. The agreement between the series and CRMC provides each fund, other than the managed risk funds, the ability to charge an administrative services fee of 0.05% of average daily net assets for all share classes. Currently all share classes pay an annual fee of 0.01% of average daily net assets (which could be increased as noted above). For the managed risk funds, CRMC receives administrative services fees of 0.01% of average daily net assets from Class 1 shares of the underlying funds for administrative services provided to the series.

Accounting and administrative services – The managed risk funds have a subadministration agreement with BNY Mellon under which the fund compensates BNY Mellon for providing accounting and administrative services to each of the managed risk funds' share classes. These services include, but are not limited to, fund accounting (including calculation of net asset value), financial reporting and tax services. BNY Mellon is not a related party to the managed risk funds.

Class-specific expenses under the agreements described above were as follows (dollars in thousands):

Trustees' deferred compensation – Trustees who are unaffiliated with CRMC may elect to defer the cash payment of part or all of their compensation. These deferred amounts, which remain as liabilities of the funds, are treated as if invested in one or more of the American Funds. These amounts represent general, unsecured liabilities of the funds and vary according to the total returns of the selected funds. Trustees' compensation, shown on the accompanying financial statements, reflects current fees (either paid in cash or deferred) and a net increase in the value of the deferred amounts as follows (dollars in thousands):

Fund	Current fees	Increase in value of deferred amounts	Total trustees' compensation
Global Growth Fund	\$ 36	\$1	\$ 37
Global Small Capitalization Fund	24	1	25

*Amount less than one thousand.

Affiliated officers and trustees – Officers and certain trustees of the series are or may be considered to be affiliated with CRMC, AFD and AFS. No affiliated officers or trustees received any compensation directly from any fund in the series.

Other expenses – The amounts of \$(18,000), \$(9,000) and \$(1,637,000) for other expenses for Managed Risk International Fund, Managed Risk Growth-Income Fund and Managed Risk Asset Allocation Fund, respectively, are due to over accruals of prior year expenses.

Security transactions with related funds – The funds may purchase from, or sell securities to, other CRMC-managed funds (or funds managed by certain affiliates of CRMC) under procedures adopted by the fund's board of trustees. The funds involved in such transactions are considered related by virtue of having a common investment adviser (or affiliated investment advisers), common trustees and/or common officers. When such transactions occur, each transaction is executed at the current market price of the security and no brokerage commissions or fees are paid in accordance with Rule 17a-7 of the 1940 Act.

The following table presents purchase and sale transactions between each fund and related funds as of December 31, 2018 (dollars in thousands):

Fund	Purchases	Sales
Global Growth Fund	\$ 34,488	\$ 66,699
Global Small Capitalization Fund	27,363	116,375

8. Committed line of credit

Global Small Capitalization Fund, New World Fund and High-Income Bond Fund participate with other funds managed by CRMC in a \$1.5 billion credit facility (the “line of credit”) to be utilized for temporary purposes to fund shareholder redemptions. Each fund has agreed to pay commitment fees on its pro-rata portion of the line of credit, which are reflected in other expenses in each fund’s statement of operations. None of the funds borrowed on this line of credit at any time during the year ended December 31, 2018.

9. Capital share transactions

Capital share transactions in the funds were as follows (dollars and shares in thousands):

Global Growth Fund

¹Based on average shares outstanding.

²For the year ended December 31, 2014, reflects the impact of a corporate action event that resulted in a one-time increase to net investment income. If the corporate action event had not occurred, the net investment income per share and ratio of net income to average net assets would have been lower for all share classes.

³Based on operations for a period that is less than a full year.

⁴Class 1A shares began investment operations on January 6, 2017.

⁵Not annualized.

⁶Annualized.

⁷Amount less than \$1 million.

⁸Amount less than \$.01.

⁹Amount less than .01%.

¹⁰For the period May 1, 2014, commencement of operations, through December 31, 2014.

¹¹All or a significant portion of assets in this class consisted of seed capital invested by CRMC and/or its affiliates. Certain fees (including, where applicable, fees for distribution services) are not charged or accrued on these seed capital assets. If such fees were paid by the fund on seed capital assets, fund expenses would have been higher and net income and total return would have been lower.

¹²On May 1, 2016, the fund converted from a cash fund to an ultra-short-term bond fund and changed its name from Cash Management Fund to Ultra-Short Bond Fund.

¹³This column reflects the impact of certain waivers/reimbursements by CRMC. CRMC waived a portion of investment advisory services and reimbursed a portion of miscellaneous fees and expenses for the managed risk funds.

¹⁴This column reflects the net effective expense ratios for each fund and class, which are unaudited. These ratios include each class's expense ratio combined with the weighted average net expense ratio of the underlying funds for the periods presented. See expense example for further information regarding fees and expenses.

¹⁵Refer to Note 5 for further information on mortgage dollar rolls.

¹⁶Amount is either less than 1% or there is no turnover.

Report of Independent Registered Public Accounting Firm

To the Board of Trustees of American Funds Insurance Series and Shareholders of Global Growth Fund, Global Small Capitalization Fund, Growth Fund, International Fund, New World Fund®, Blue Chip Income and Growth Fund, Global Growth and Income Fund, Growth-Income Fund, International Growth and Income Fund, Capital Income Builder®, Asset Allocation Fund, Global Balanced Fund, Bond Fund, Global Bond Fund, High-Income Bond Fund, Mortgage Fund, Ultra-Short Bond Fund, U.S. Government/AAA-Rated Securities Fund, Managed Risk Growth Fund, Managed Risk International Fund, Managed Risk Blue Chip Income and Growth Fund, Managed Risk Growth-Income Fund and Managed Risk Asset Allocation Fund

Opinions on the Financial Statements

We have audited the accompanying statements of assets and liabilities, including summary investment portfolios of Global Growth Fund, Global Small Capitalization Fund, Growth Fund, International Fund, New World Fund®, Blue Chip Income and Growth Fund, Global Growth and Income Fund, Growth-Income Fund, International Growth and Income Fund, Capital Income Builder®, Asset Allocation Fund, Global Balanced Fund, Bond Fund, Global Bond Fund, High-Income Bond Fund, Mortgage Fund and U.S. Government/AAA-Rated Securities Fund and investment portfolios of Ultra-Short Bond Fund, Managed Risk Growth Fund, Managed Risk International Fund, Managed Risk Blue Chip Income and Growth Fund, Managed Risk Growth-Income Fund and Managed Risk Asset Allocation Fund, (twenty-three of the funds constituting American Funds Insurance Series, hereafter collectively referred to as the "Funds") as of December 31, 2018, the related statements of operations for the year ended December 31, 2018, the statements of changes in net assets for each of the two years in the period ended December 31, 2018, including the related notes, and the financial highlights for each of the periods indicated therein (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds as of December 31, 2018, the results of each of their operations for the year then ended, the changes in each of their net assets for each of the two years in the period ended December 31, 2018 and each of the financial highlights for each of the periods indicated therein in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinions

These financial statements are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2018 by correspondence with the custodians, transfer agent and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

/s/PricewaterhouseCoopers LLP

Los Angeles, California
February 12, 2019

We have served as the auditor of one or more investment companies in The Capital Group Companies Investment Company Complex since 1934.

Expense example

unaudited

The funds in American Funds Insurance Series serve as the underlying investment vehicle for various insurance products. As an owner of an insurance contract that invests in one of the funds in the series, you incur two types of costs: (1) transaction costs, such as initial sales charges on purchase payments and contingent deferred sales charges on redemptions (loads), and (2) ongoing costs, including management fees, distribution and service (12b-1) fees, and other expenses. Additional fees are charged by the insurance companies related to the various benefits they provide. This example is intended to help you understand your ongoing costs (in dollars) of investing in the underlying funds so you can compare these costs with the ongoing costs of investing in other mutual funds that serve a similar function in other annuity products. The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire six-month period (July 1, 2018, through December 31, 2018).

Actual expenses:

The first line of each share class in the table on the following pages provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading titled "Expenses paid during period" to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes:

The second line of each share class in the table on the following pages provides information about hypothetical account values and hypothetical expenses based on the actual expense ratio for the share class and an assumed rate of return of 5.00% per year before expenses, which is not the actual return of the share class. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the fund and other funds. To do so, compare this 5.00% hypothetical example with the 5.00% hypothetical examples that appear in the shareholder reports of the other funds.

Notes:

Additional fees are charged by the insurance companies related to the various benefits they provide. You can estimate the impact of these fees by adding the amount of the fees to the total estimated expenses you paid on your account during the period as calculated above. In addition, your ending account value would be lower by the amount of these fees.

Note that the expenses shown in the table on the following pages are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of each share class in the table is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

¹The “expenses paid during period” are equal to the “annualized expense ratio,” multiplied by the average account value over the period, multiplied by the number of days in the period, and divided by 365 (to reflect the one-half year period).

²The “expenses paid during period” and “annualized expense ratio” do not include the expenses of the underlying funds in which each fund invests.

³The “effective expenses paid during period” are equal to the “effective annualized expense ratio,” multiplied by the average account value over the period, multiplied by the number of days in the period, and divided by 365 (to reflect the period).

⁴The “effective annualized expense ratio” reflects the net annualized expense ratio of the class plus the class’s pro-rata share of the weighted average expense ratio of the underlying funds in which it invests.

Dori Laskin , 1951 Assistant Treasurer	2010	Vice President – Investment Operations, Capital Research and Management Company

¹The term independent trustee refers to a trustee who is not an “interested person” of the series within the meaning of the Investment Company Act of 1940.

²Trustees and officers of the series serve until their resignation, removal or retirement.

³This includes all directorships/trusteeships (other than those in the American Funds or other funds managed by Capital Research and Management Company or its affiliates) that are held by each trustee as a trustee or director of a public company or a registered investment company.

⁴The term interested trustee refers to a trustee who is an “interested person” within the meaning of the Investment Company Act of 1940, on the basis of their affiliation with the series’ investment adviser, Capital Research and Management Company, or affiliated entities (including the series’ principal underwriter).

⁵All of the trustees and/or officers listed, with the exception of Martin Jacobs, S. Keiko McKibben and Renaud H. Samyn, are officers and/or directors/trustees of one or more of the other funds for which Capital Research and Management Company serves as investment adviser.

⁶Company affiliated with Capital Research and Management Company.

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the series prospectuses and summary prospectuses, which can be obtained from your financial professional and should be read carefully before investing. You may also call American Funds Service Company (AFS) at (800) 421-4225 or visit the American Funds website at americanfunds.com. Fund shares offered through American Funds Distributors, Inc.

"American Funds Proxy Voting Procedures and Principles" – which describes how we vote proxies relating to portfolio securities – is available on the American Funds website or upon request by calling AFS. The series files its proxy voting record with the U.S. Securities and Exchange Commission (SEC) for the 12 months ended June 30 by August 31. The proxy voting record is available free of charge on the SEC website at sec.gov and on the American Funds website.

Complete December 31, 2018, portfolios of American Funds Insurance Series' investments are available free of charge by calling AFS or visiting the SEC website (where they are part of Form N-CSR).

American Funds Insurance Series files a complete list of its portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. This filing is available free of charge on the SEC website. Additionally, the list of portfolio holdings is available by calling AFS.

This report is for the information of American Funds Insurance Series investors, but it also may be used as sales literature when preceded or accompanied by the current prospectuses or summary prospectuses for American Funds Insurance Series and the prospectus for the applicable insurance contract, which give details about charges, expenses, investment objectives and operating policies of the series. If used as sales material after March 31, 2019, this report must be accompanied by a statistical update for the most recently completed calendar quarter.

Fund attribution data was produced using FactSet, a third-party software system, based on daily portfolios. Securities in their initial period of acquisition may not be included in this analysis. The analysis includes equity investments only and excludes forward contracts and fixed income investments, if applicable. It does not account for buy-and-sell transactions that might have occurred intraday. As a result, average portfolio weight percentages are approximate, and the actual average portfolio weight percentages might be higher or lower. Data elements, such as pricing, income, market cap, etc., were provided by FactSet. The indexes provided for attribution are based on FactSet's methodology. The indexes are broad-based market benchmarks and may not be used by Capital Group® as the sole comparative index for the funds. Capital Group believes the software and information from FactSet to be reliable. However, Capital Group cannot be responsible for inaccuracies, incomplete information or updating of information by FactSet.

Futures may not provide an effective hedge of the underlying securities because changes in the prices of futures may not track those of the securities they are intended to hedge. In addition, the managed risk strategy may not effectively protect the fund from market declines and will limit the fund's participation in market gains. The use of the managed risk strategy could cause the fund's return to lag that of the underlying fund in certain market conditions.

The Capital Advantage[®]

Since 1931, Capital Group, home of American Funds, has helped investors pursue long-term investment success. Our consistent approach – in combination with The Capital SystemSM – has resulted in a superior long-term track record for American Funds Insurance Series[®].

Aligned with investor success

We base our decisions on a long-term perspective, which we believe aligns our goals with the interests of our clients. American Funds Insurance Series portfolio managers average 26 years of investment experience, including 21 years at our company, reflecting a career commitment to our long-term approach.¹

The Capital System

The Capital System combines individual accountability with teamwork. Funds using The Capital System are divided into portions that are managed independently by investment professionals with diverse backgrounds, ages and investment approaches. An extensive global research effort is the backbone of our system.

Superior long-term track record

American Funds Insurance Series equity funds have beaten their Lipper peer indexes in 91% of 10-year periods and 100% of 20-year periods. Fixed income funds have beaten their Lipper indexes in 65% of 10-year periods and 81% of 20-year periods.² Fund management fees have been among the lowest in the industry.³

¹ Portfolio manager experience as of the American Funds Insurance Series prospectus dated May 1, 2018, as supplemented January 1, 2019.

² Based on Class 1 share results for rolling periods through December 31, 2018. Periods covered are the shorter of the fund's lifetime or since the comparable Lipper index inception date. The comparable Lipper indexes are: Global Funds Index (Global Growth Fund), Growth Funds Index (Growth Fund), International Funds Index (International Fund), Emerging Markets Funds Index (New World Fund), Growth & Income Funds Index (Blue Chip Income and Growth Fund, Growth-Income Fund), Balanced Portfolio Funds Index (Asset Allocation Fund), Core Bond Funds Index (Bond Fund), High Yield Funds Index (High-Income Bond Fund) and General U.S. Government Funds Index (U.S. Government/AAA-Rated Securities Fund). The Lipper Global Small-/Mid-Cap Funds Average was used for Global Small Capitalization Fund.

³ Based on management fees for the 20-year period ended December 31, 2018, versus comparable Lipper categories, excluding funds of funds.
