

We believe in investing in global companies for the long term

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, you may not receive paper copies of the fund's shareholder reports from the insurance company that offers your contract unless you specifically request paper copies from the insurance company or from your financial intermediary. Instead, the shareholder reports will be made available on a website, and the insurance company will notify you by mail each time a report is posted and provide you with a website link to access the report. Instructions for requesting paper copies will be provided by your insurance company.

If you have already elected to receive shareholder reports electronically, you will not be affected by this change and do not need to take any action. You may elect to receive shareholder reports and other communications from the insurance company electronically by following the instructions provided by the insurance company.

You may elect to receive paper copies of all future reports free of charge from the insurance company. You can inform the insurance company that you wish to continue receiving paper copies of your shareholder reports by following the instructions provided by the insurance company. Your election to receive paper reports will apply to all investment options available under your contract.

American Funds Insurance Series, by Capital Group, is the underlying investment vehicle for many variable annuities and insurance products. For nearly 90 years, Capital Group has invested with a long-term focus based on thorough research and attention to risk.

Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility, as more fully described in the prospectus. These risks may be heightened in connection with investments in developing countries. Investing in small-capitalization stocks can involve greater risk than is customarily associated with investing in stocks of larger, more established companies. The return of principal for bond funds and for funds with significant underlying bond holdings is not guaranteed. Fund shares are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings. High-yield bonds are subject to greater fluctuations in value and risk of loss of income and principal than investment-grade bonds. Bond ratings, which typically range from AAA/Aaa (highest) to D (lowest), are assigned by credit rating agencies such as Standard & Poor's, Moody's and/or Fitch as an indication of an issuer's creditworthiness. Futures may not provide an effective hedge of the underlying securities because changes in the prices of futures may not track those of the securities they are intended to hedge. In addition, the managed risk strategy may not effectively protect the funds from market declines and will limit the funds' participation in market gains. The use of the managed risk strategy could cause the funds' returns to lag those of the applicable underlying funds in certain rising market conditions. Refer to the funds' prospectuses and the Risk Factors section of this report for more information on these and other risks associated with investing in the funds.

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Global stocks generated the best one-year returns in a decade as measured by the 26.60% gain in the MSCI ACWI (All Country World Index)^{1,2} boosted by aggressive central bank stimulus measures and easing trade tensions toward the end of the year. These returns were assisted by a low starting point for 2019, after sharp market declines in the last quarter of 2018. Information technology companies posted the highest returns, with a gain of nearly 48% (as measured by the MSCI World Index). The sector was driven by strong growth from U.S. tech giants such as Apple, Microsoft and Facebook. The next best sector, industrials, rose 28% amid an improving outlook for trade activity and global economic growth.

U.S. equities had their strongest annual gains since 2013, ending the year near all-time highs, with an increase of 31.64% recorded by the MSCI USA Index^{1,3}. The current economic expansion became the longest in U.S. history, surpassing the 10-year boom from the 1990s. For the first 11 months of the year, average hourly earnings topped at least 3% annualized growth. In November, the unemployment rate fell to 3.5%, matching its lowest level in 50 years. The robust labor market supported consumer spending, more than offsetting weaker business sentiment and manufacturing. The U.S. trade war with China occasionally caused volatility, but the resilient U.S. economy and the Federal Reserve's return to accommodative policies helped steer

markets higher. The central bank cut its policy rate three times in 2019 amid concerns over slowing economic growth, which perhaps helped prevent further slowing. In addition, potential bubbles like WeWork and certain billion-dollar tech "unicorns" were deflated without broad damage to the rest of the market.

European stocks rallied despite signs of slowing economic growth, a near-recession in Germany and Brexit-related uncertainty in the U.K. that remained unresolved until the very last month of the year. Boosted by easy monetary policy, European investors cheered aggressive interest rate cuts by the European Central Bank. The MSCI Europe Index^{1,4} gained 23.77% for the year. The progress of U.S.-China trade negotiations heavily influenced European markets throughout the year as share prices moved sharply higher or lower on the tenor of trade-related headlines. Germany's auto industry was particularly hard hit. With Europe's economy highly dependent on global trade, the announcement of a "phase one" trade deal between the U.S. and China in December helped to bolster investor sentiment heading into the new year. Elsewhere among developed markets, the Japanese economy expanded modestly through the first three quarters of 2019 despite a manufacturing slowdown driven largely by the U.S.-China trade dispute. The MSCI Japan Index^{1,5} rose 19.61% over the year.

All market returns referenced in this report are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index. Country returns are based on MSCI indexes, which reflect reinvestment of distributions and dividends net of withholding taxes, except for the MSCI USA Index, which reflects dividends gross of withholding taxes. Source: MSCI.

¹Source: MSCI.

²The MSCI ACWI is a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets, consisting of more than 40 developed and emerging market country indexes.

³The MSCI USA Index is a free float-adjusted, market capitalization-weighted index that is designed to measure the U.S. portion of the world market.

⁴MSCI Europe Index is a free float-adjusted market capitalization-weighted index that is designed to measure results of more than 10 developed equity markets in Europe. Results reflect dividends net of withholding taxes.

Emerging markets stocks advanced, overcoming bouts of volatility tied to global trade tensions, China's economic slowdown and a strong U.S. dollar. Growth stocks outpaced more defensive parts of the market, led by the information technology and consumer discretionary sectors. Overall, the MSCI Emerging Markets Investable Market Index^{1,6} gained 17.64% for the year. Chinese stocks rose despite slower growth and trade tensions with the U.S. Indian equities lagged most other emerging markets while Brazilian stocks posted their best annual return since 2016.

Bonds advanced as central banks around the world cut interest rates in an attempt to blunt concerns about a slowing economy. The Fed paused rate hikes for the first half of the year and cut three times in the second half and the federal funds rate ended the year between 1.50% and 1.75%. Credit saw very sizable returns, with the Bloomberg Barclays U.S. Corporate Investment Grade Index^{7,8} and the Bloomberg Barclays U.S. Corporate High Yield 2% Issuer Capped Index^{7,9} gaining 14.54% and 14.32%, respectively. More broadly, the Bloomberg Barclays Global Aggregate Index^{7,10} was up 6.84%, while the Bloomberg Barclays U.S.

Aggregate Index^{7,11} advanced 8.72%. The J.P. Morgan Emerging Markets Bond Index^{7,12} - Global gained 14.42%.

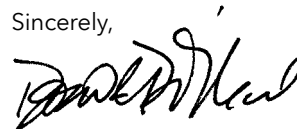

In foreign exchange markets, the U.S. dollar rose nearly 2% against the euro while declining 1% against the yen. Meanwhile, the British pound ended the year with a historic rally after U.K. voters gave the Conservative Party a strong majority in Parliament, increasing the likelihood that the U.K. will be able to begin the Brexit process and leave the European Union.

Looking ahead

The current environment is rife with uncertainty, from trade-related disputes to geopolitical tensions to an upcoming U.S. presidential election. We will be following and analyzing each of these issues closely. In this environment, it would be reasonable to expect some volatility. Valuation measures are also giving mixed signals - some look high, some look just fine. So, we will continue to focus on individual securities and bring our research and judgment to bear. With our long-term approach, we welcome opportunities to see past short-term trends and invest our shareholder's money for the long run.

Our time-tested process - based on extensive research, a long-term outlook and close attention to valuation - has served investors well over time. As always, we thank you for your continued support of our efforts and we look forward to reporting to you again in six months.

Sincerely,

Donald D. O'Neal
Co-President

Alan N. Berro
Co-President

Summary investment portfolios

Summary investment portfolios are designed to streamline this report and help investors better focus on the funds' principal holdings. Ultra-Short Bond Fund, Managed Risk Growth Fund, Managed Risk International Fund, Managed Risk Blue Chip Income and Growth Fund, Managed Risk Growth-Income Fund and Managed Risk Asset Allocation Fund show a complete listing of portfolio holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings for each fund in the series.

Unless otherwise indicated, American Funds Insurance Series investment results are for Class 1 shares (Class P1 shares for managed risk funds). Class 1A shares began operations on January 6, 2017. Class 2 shares began operations on April 30, 1997. Class 3 shares began operations on January 16, 2004. Class 4 shares began operations on December 14, 2012. Results encompassing periods prior to those dates assume a hypothetical investment in Class 1 shares and include the deduction of additional annual expenses (0.25% for Class 1A shares, 0.25% for Class 2 shares, 0.18% for Class 3 shares and 0.50% for Class 4 shares).

The variable annuities and life insurance contracts that use the series funds contain certain fees and expenses not reflected in this report. Investment results assume all distributions are reinvested and reflect applicable fees and expenses. When applicable, investment results reflect fee waivers and/or expense reimbursements, without which results would have been lower. Visit capitalgroup.com for more information.

For the managed risk funds, the investment adviser is currently waiving a portion of its management fee equal to 0.05% of the funds' net assets. In addition, the investment adviser is currently reimbursing a portion of other expenses for Managed Risk International Fund. The waivers and reimbursement will be in effect through at least May 1, 2021, unless modified or terminated by the series board. After that time, the investment adviser may elect to extend, modify or terminate the reimbursement. The waivers may only be modified or terminated with the approval of the series board. Applicable fund results shown reflect the waivers and reimbursement, without which results would have been lower. See the Financial Highlights tables in this report for details.

The Managed Risk Growth Fund pursues its objective by investing in shares of American Funds Insurance Series - Growth FundSM and American Funds Insurance Series - Bond FundSM. The Managed Risk International Fund pursues its objective by investing in shares of American Funds Insurance Series - International FundSM and American Funds Insurance Series - Bond FundSM. The Managed Risk Blue Chip Income and Growth Fund pursues its objective by investing in shares of American Funds Insurance Series - Blue Chip Income and Growth FundSM and American Funds Insurance Series - U.S. Government/AAA-Rated Securities FundSM. The Managed Risk Growth-Income Fund pursues its objective by investing in shares of American Funds Insurance Series - Growth-Income FundSM and American Funds Insurance Series - Bond FundSM. The Managed Risk Asset Allocation Fund pursues its objective by investing in shares of American Funds Insurance Series - Asset Allocation FundSM. The funds seek to manage portfolio volatility and provide downside protection, primarily through the use of exchange-traded futures. The benefit of the funds' managed risk strategy should be most apparent during periods of high volatility and in down markets. In steady or rising markets, the funds' results can be expected to lag those of the underlying fund.

Funds are listed in the report as follows: equity, balanced, fixed income and managed risk.

Global Growth Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Share prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Global Growth Fund rose 35.61% for the 12 months ended December 31, 2019, compared with a 26.60% increase for the MSCI ACWI (All Country World Index),¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets, consisting of more than 40 developed and emerging market country indexes.

Global stocks generated the best returns in a decade, boosted by aggressive central bank stimulus measures and easing trade tensions toward the end of the year. U.S. stocks soared to near record highs in December as the U.S. and China agreed to a limited trade war truce with the aim of avoiding the imposition of new tariffs and other protectionist measures. Information technology stocks posted the highest returns with a gain of nearly 48% in aggregate. Outside the U.S., European stocks advanced despite signs of slowing economic growth, a near-recession in Germany and Brexit-related uncertainty in the U.K. that remained unresolved until the very last month of the year. Emerging markets stocks advanced, overcoming bouts of volatility tied to global trade tensions, China's economic slowdown and a strong U.S. dollar.

The fund's higher-than-index position relative to the top performing information technology sector as well as individual stock selection in that sector boosted the fund's returns compared with the index. The fund's relative weightings in ASML and TSMC benefitted the fund as both outpaced the wider market and were among the top contributors to the fund's relative returns. Consumer discretionary stock Alibaba Group also helped the fund's relative returns, as its returns outpaced the market.

The biggest drag on relative results was Apple – a stock the fund didn't own – as it proved to be one of the strongest performers for the year.

On a geographic basis, stocks of companies domiciled in the Netherlands and Taiwan were additive to results, while stocks of companies based in the Philippines and Belgium lagged.

The fund's portfolio managers are optimistic they will continue to find good companies globally that offer high-quality products, and whose values are not yet fully reflected in their share prices.

Global Small Capitalization Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Share prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Global Small Capitalization Fund increased 31.84% for the 12 months ended December 31, 2019. Its benchmark, the MSCI All Country World Small Cap Index,¹ a free float-adjusted market capitalization-weighted index designed to measure equity market results of smaller capitalization companies in both developed and emerging markets, gained 24.65%.

U.S. equities had their strongest annual gains since 2013, ending the year near all-time highs. Stocks rose steadily, posting gains in 10 of 12 months. The U.S. trade war with China occasionally caused volatility, but the resilient U.S. economy and the Federal Reserve's return to accommodative policies helped steer markets higher. Information technology companies posted the highest returns, with a gain of nearly 48% in aggregate. Outside the U.S., European stocks advanced despite signs of slowing economic growth, a near-recession in Germany and Brexit-related uncertainty in the U.K. that remained unresolved until the very last month of the year. Emerging markets stocks advanced, overcoming bouts of volatility tied to global trade tensions, China's economic slowdown and a strong U.S. dollar.

Fund holdings in the information technology sector contributed the most to relative returns. Information technology stock Paycom widely outpaced the broader market and was among the fund's top contributors over the period. However, the fund's holdings of health care companies NuCana and Evolent Health detracted from returns.

While investments in U.S. companies were additive to returns, investments in companies domiciled in the U.K. detracted.

The fund's portfolio managers continue to seek investment opportunities in undervalued companies that have the potential to change industries and benefit shareholders. They believe rigorous bottom-up research into each potential equity investment can help achieve this goal. The fund currently holds nearly 300 companies diversified across geographies and industries. As always, we maintain our commitment to investing for the long term.

Growth Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Share prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Growth Fund gained 31.11% for the 12 months ended December 31, 2019, compared with a 31.49% increase in its benchmark index, Standard & Poor's 500 Composite Index,¹ a market capitalization-weighted index based on the results of approximately 500 widely held common stocks.

U.S. equities had their strongest annual gains since 2013, ending the year near all-time highs. Stocks rose steadily, posting gains in 10 of 12 months. The U.S. trade war with China occasionally caused volatility, but the resilient U.S. economy and the Federal Reserve's return to accommodative policies helped steer markets higher. Information technology companies posted the highest returns, with a gain of nearly 48% in aggregate. Outside the U.S., European stocks advanced despite signs of slowing economic growth, a near-recession in Germany and Brexit-related uncertainty in the U.K. that remained unresolved until the very last month of the year. Emerging markets stocks advanced, overcoming bouts of volatility tied to global trade tensions, China's economic slowdown and a strong U.S. dollar.

Companies in the communication services sector contributed to relative results, led by Facebook, which was boosted by strong user and revenue growth. Investments in the consumer discretionary and health care sectors detracted from the fund's relative results. The fund's top detractor to relative returns was information technology company Apple. The fund had a significantly lower investment in Apple compared to the index and Apple proved to be one of the top performers for the year.

Although U.S. economic growth remained solid, the fund's portfolio managers are keeping a close watch on near-term economic indicators, such as wage growth, monetary policy and trade relations. Portfolio managers continue to favor well-positioned, growth-oriented companies that are capable of generating free cash flow in myriad near-term economic environments and remain optimistic that our global research will help us identify attractive long-term investment opportunities.

International Fund gained 23.21% for the 12 months ended December 31, 2019. Its benchmark, the MSCI ACWI (All Country World Index) ex USA,¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets (consisting of more than 40 developed and emerging market country indexes excluding the U.S.), increased 21.51%.

Global stocks generated the best returns in a decade, boosted by aggressive central bank stimulus measures and easing trade tensions toward the end of the year. U.S. stocks soared to near record highs in December as the U.S. and China agreed to a limited trade war truce with the aim of avoiding the imposition of new tariffs and other protectionist measures. Information technology stocks posted the highest returns with a gain of nearly 48% in aggregate. Outside the U.S., European stocks advanced despite signs of slowing economic growth, a near-recession in Germany and Brexit-related uncertainty in the U.K. that remained unresolved until the very last month of the year. Emerging markets stocks advanced, overcoming bouts of volatility tied to global trade tensions, China's economic slowdown and a strong U.S. dollar.

Investments in the communication services and financials sectors boosted relative returns with Amsterdam-based Altice Europe among the top contributors thanks to better than expected growth. One of the biggest detractors to relative returns was health-care sector stock Teva Pharmaceutical, whose stock price suffered amid continued opioid litigation.

The fund's portfolio managers continue to monitor volatility and potential headwinds brought about by political and trade uncertainty. Given how late it may be in the current bull market, they seek opportunities in particular within those regions, countries and sectors less affected by these global headlines. Their focus on a company's fundamental growth drivers and intrinsic worth is critical to helping them identify investments that they believe represent the best value over the long term.

New World Fund was up 29.47% for the 12 months ended December 31, 2019. Its benchmark index, the MSCI ACWI (All Country World Index),¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets (consisting of more than 40 developed and emerging market country indexes), was up 26.60%. The MSCI Emerging Markets (EM) Index,¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global emerging markets (consisting of more than 20 emerging market country indexes), increased by 18.42%.

Global stocks generated the best returns in a decade, boosted by aggressive central bank stimulus measures and easing trade tensions toward the end of the year. U.S. stocks soared to near record highs in December as the U.S. and China agreed to a limited trade war truce with the aim of avoiding the imposition of new tariffs and other protectionist measures. Technology stocks posted the highest returns with a gain of nearly 48% in aggregate. Outside the U.S., European stocks advanced despite signs of slowing economic growth, a near-recession in Germany and Brexit-related uncertainty in the U.K. that remained unresolved until the very last month of the year. Emerging markets stocks advanced, overcoming bouts of volatility tied to global trade tensions, China's economic slowdown and a strong U.S. dollar.

The fund's relative returns outpaced emerging markets in general. Investments in the information technology and financial sectors were beneficial to the fund. Payment processing company PagSeguro contributed to relative returns as its stock price rose on the back of strong revenue growth. Among detractors, the fund's lower investment in Apple compared with the MSCI ACWI hurt relative results as it outpaced the overall market.

The fund's portfolio managers continue to pursue a bottom-up approach to investing and search for undervalued companies with solid foundations around the world, as well as stocks that are domestically focused and more insulated from geopolitical events given increased volatility at this point in the market cycle.

Blue Chip Income and Growth Fund gained 21.66% for the 12 months ended December 31, 2019, trailing the 31.49% rise in its benchmark index, Standard & Poor's 500 Composite Index,¹ a market capitalization-weighted index based on the results of approximately 500 widely held common stocks.

U.S. equities had their strongest annual gains since 2013, ending the year near all-time highs. Stocks rose steadily, posting gains in 10 of 12 months. The U.S. trade war with China occasionally caused volatility, but the resilient U.S. economy and the Federal Reserve's return to accommodative policies helped steer markets higher. Information technology companies posted the highest returns, with a gain of nearly 48% in aggregate. Outside the U.S., European stocks advanced despite signs of slowing economic growth, a near-recession in Germany and Brexit-related uncertainty in the U.K. that remained unresolved until the very last month of the year. Emerging markets stocks advanced, overcoming bouts of volatility tied to global trade tensions, China's economic slowdown and a strong U.S. dollar.

Certain investments in health care helped the fund's results relative to the index. Among the fund's top contributors to relative returns within health care was UnitedHealth Group, as it consistently surpassed earnings estimates each quarter throughout the year. Another top contributor was QUALCOMM, where an improved relationship with Apple and the prospect of a 5G wireless network bolstered both earnings prospects and the company's valuation.

Other holdings in the health care sector hindered relative returns. Investments in pharmaceutical companies, such as AbbVie and Teva Pharmaceutical, hurt results relative to the index. Overall, this proved to be a relatively disappointing year for the fund, but we continue to believe the focus on dividend-paying stocks will pay off over the long term.

Nearer term, the fund's portfolio managers are aware that the market is keeping a close watch on U.S. monetary policy, our trade relationships and the current shape of the yield curve and their implications on the U.S. economy. Portfolio managers continue to favor well-managed, high-quality companies that are capable of paying dividends in myriad economic environments. We remain optimistic that this focus, supported by our global research, will help us to identify attractive long-term investment opportunities.

Global Growth and Income Fund advanced 31.39% for the 12 months ended December 31, 2019, compared with a 26.60% increase in its benchmark index, MSCI ACWI (All Country World Index),¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets, consisting of more than 40 developed and emerging market country indexes.

Global stocks generated the best returns in a decade, boosted by aggressive central bank stimulus measures and easing trade tensions toward the end of the year. U.S. stocks soared to near record highs in December as the U.S. and China agreed to a limited trade war truce with the aim of avoiding the imposition of new tariffs and other protectionist measures. Technology stocks posted the highest returns with a gain of nearly 48% in aggregate. Outside the U.S., European stocks advanced despite signs of slowing economic growth, a near-recession in Germany and Brexit-related uncertainty in the U.K. that remained unresolved until the very last month of the year. Emerging markets stocks advanced, overcoming bouts of volatility tied to global trade tensions, China's economic slowdown and a strong U.S. dollar.

The fund's relative performance benefited from specific stock selection, particularly within the industrials and energy sectors. Industrial company Airbus rallied on positive tail winds from strong global demand, and likely benefited from Boeing's troubles with its 737MAX. On the downside, some investments in the materials sector hindered relative returns. In particular, Brazil's Vale was a top relative detractor.

On a country basis, holdings in Japan and France contributed the most to relative returns, and holdings in the U.S. and Canada were a drag on returns (the former due to a lower-than-index position).

The fund's portfolio managers recognize that we are experiencing a slowdown in global economic growth. With dovish monetary strategy back under consideration in the U.S. and Europe, the fund's managers remain cautiously optimistic about the prospects for the global economy and are monitoring the potential impact on global growth. Portfolio managers continue to invest based on a bottom-up approach to long-term investing and believe they can uncover promising companies with strong positions in their industries, sustainable growth and income opportunities globally - including emerging markets.

Growth-Income Fund gained 26.46% for the 12 months ended December 31, 2019. Standard & Poor's 500 Composite Index,¹ a market capitalization-weighted index based on the results of approximately 500 widely held common stocks, rose 31.49%.

U.S. equities had their strongest annual gains since 2013, ending the year near all-time highs. Stocks rose steadily, posting gains in 10 of 12 months. The U.S. trade war with China occasionally caused volatility, but the resilient U.S. economy and the Federal Reserve's return to accommodative policies helped steer markets higher. Information technology companies posted the highest returns, with a gain of nearly 48% in aggregate. Outside the U.S., European stocks advanced despite signs of slowing economic growth, a near-recession in Germany and Brexit-related uncertainty in the U.K. that remained unresolved until the very last month of the year. Emerging markets stocks advanced, overcoming bouts of volatility tied to global trade tensions, China's economic slowdown and a strong U.S. dollar.

Regarding the fund, investments in the industrials sector contributed the most to the fund's relative returns. Among industrials, aircraft component manufacturer TransDigm Group added the most to the fund's relative results. On the downside, the fund's lower-than-index position in information technology stocks, a sector that performed strongly over the period, weighed on relative returns. In particular, the fund's lower-than-index investment in Apple hindered sector results the most as Apple shares outperformed the broader market over the period.

The fund's portfolio managers continue to look for compelling investment opportunities, buying stocks they believe represent the best value over the long term.

International Growth and Income Fund gained 23.06% for the 12 months ended December 31, 2019, compared to the 21.51% increase in its benchmark index, the MSCI ACWI (All Country World Index) ex USA,¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets (consisting of more than 40 developed and emerging market country indexes excluding the U.S.).

Global stocks generated the best returns in a decade, boosted by aggressive central bank stimulus measures and easing trade tensions toward the end of the year. U.S. stocks soared to near record highs in December as the U.S. and China agreed to a limited trade war truce with the aim of avoiding the imposition of new tariffs and other protectionist measures. Technology stocks posted the highest returns with a gain of nearly 48% in aggregate. Outside the U.S., European stocks advanced despite signs of slowing economic growth, a near-recession in Germany and Brexit-related uncertainty in the U.K. that remained unresolved until the very last month of the year. Emerging markets stocks advanced, overcoming bouts of volatility tied to global trade tensions, China's economic slowdown and a strong U.S. dollar.

The top contributors to the fund's relative returns were the consumer discretionary and utilities sectors due in part to good stock selection. Luckin Coffee was the top contributor to the fund's relative returns as it benefited from strong growth in the Chinese retail coffee market. Health care stock Daiichi Sankyo also contributed strong relative returns.

On the downside, investments in the energy and real estate sectors detracted from the fund's relative returns. Among energy stocks, Royal Dutch Shell was one of the fund's biggest drags on returns as a result of lower oil prices and market volatility.

The fund's portfolio managers follow signs of some economic weakness in Europe and parts of emerging markets, as well as a number of geopolitical uncertainties, with an aim to preserve value in any potential market correction while being in a position to take advantage of buying opportunities, should they present themselves later in the year.

Capital Income Builder, which invests in a mix of stocks and bonds, gained 18.16% for the 12 months ended December 31, 2019. During the same period, the MSCI ACWI (All Country World Index)¹, free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets (consisting of more than 40 developed and emerging market country indexes), gained 26.60%. The Bloomberg Barclays U.S. Aggregate Index², which represents the U.S. investment-grade (rated BBB/Baa and above) fixed-rate bond market, gained 8.72%. The index blend of 70%/30% MSCI ACWI/Bloomberg Barclays U.S. Aggregate Index³ gained 21.21%. The Lipper Global Equity Income Funds Average⁴, a measure of similar funds, was up 21.01%.

U.S. equities had their strongest annual gains since 2013, ending the year near all-time highs. Stocks rose steadily, posting gains in 10 of 12 months. The U.S. trade war with China occasionally caused volatility, but the resilient U.S. economy and the Federal Reserve's return to accommodative policies helped steer markets higher. Information technology companies posted the highest returns, with a gain of nearly 48% in aggregate. Outside the U.S., European stocks advanced despite signs of slowing economic growth, a near-recession in Germany and Brexit-related uncertainty in the U.K. that remained unresolved until the very last month of the year. Emerging markets stocks advanced, overcoming bouts of volatility tied to global trade tensions, China's economic slowdown and a strong U.S. dollar.

In the equity portfolio, the top contributors in relative terms were the utilities and consumer discretionary sectors. American Tower added the most to the fund's relative returns as it notched higher returns than the general market.

On the downside, the information technology sector, which comprised the second-largest share of the fund's equity holdings, detracted from returns. The fund's top detractor to relative returns was information technology company Apple. The fund had a significantly lower investment in Apple compared to the index and Apple proved to be one of the top performers for the year. The fund's fixed income portfolio was a drag on relative results.

The current market environment is rife with uncertainty. Given that the U.S. is late in the economic cycle, the fund's portfolio managers are paying close attention to companies' leverage and are more sharply focused on monitoring balance sheets. They seek to avoid companies that take on debt to pay dividends, and are focused on identifying companies with strong business models and a commitment to paying and growing dividends over time. Higher interest rates should also allow portfolio managers to reinvest bond coupon payments into higher yielding securities, thereby generating more income from the bond portfolio.

Asset Allocation Fund, which is a mix of stocks and bonds, gained 21.54% for the 12 months ended December 31, 2019. Standard & Poor's 500 Composite Index¹, a market capitalization-weighted index based on the results of approximately 500 widely held common stocks, was up 31.49% over the same period, while the Bloomberg Barclays U.S. Aggregate Index², which represents the U.S. investment-grade (rated BBB/Baa and above) fixed-rate bond market, returned 8.72%. A blend of the two indexes, the 60%/40% S&P 500 Index/Bloomberg Barclays U.S. Aggregate Index³, gained 22.18%. Effective May 1, 2020, the fund has elected to use the 60%/40% S&P 500 Index/Bloomberg Barclays U.S. Aggregate Index as its primary benchmark, because it comes closest to reflecting its investment universe and best measures its long-term results and portfolio managers' success over time.

U.S. equities had their strongest annual gains since 2013, ending the year near all-time highs. Stocks rose steadily, posting gains in 10 of 12 months. The U.S. trade war with China occasionally caused volatility, but the resilient U.S. economy and the Federal Reserve's return to accommodative policies helped steer markets higher. Information technology companies posted the highest returns, with a gain of nearly 48% in aggregate. Outside the U.S., European stocks advanced despite signs of slowing economic growth, a near-recession in Germany and Brexit-related uncertainty in the U.K. that remained unresolved until the very last month of the year. Emerging markets stocks advanced, overcoming bouts of volatility tied to global trade tensions, China's economic slowdown and a strong U.S. dollar.

Investments in the financials sector – one of the fund's largest sector holdings – contributed to the fund's relative returns. Within financials, Arch Capital Group, Berkshire Hathaway and Apollo boosted results, as all three companies had at least double-digit returns that outpaced the general market. On the downside, health care stock AbbVie detracted from relative returns as its best-selling drug Humira faced generic competition. The fund's fixed income investments somewhat detracted from relative returns due to duration positioning and security selection.

The fund's portfolio managers continue to evaluate the economic and market-sector implications of the current administration's decisions regarding trade. The fund's cash position allows portfolio managers to remain flexible and better navigate uncertainty by focusing on opportunities when stock prices are favorable.

Global Balanced Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Share prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Global Balanced Fund gained 20.79% for the 12 months ended December 31, 2019. The MSCI ACWI (All Country World Index),¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets (consisting of more than 40 developed and emerging market country indexes), increased by 26.60%, while the Bloomberg Barclays Global Aggregate Index,² a measure of global investment-grade bonds (rated BBB/Baa and above), increased 6.84%. The 60%/40% MSCI ACWI/Bloomberg Barclays Global Aggregate Index,³ a blend of the two indexes, gained 18.55%.

Global stocks generated the best returns in a decade, boosted by aggressive central bank stimulus measures and easing trade tensions toward the end of the year. U.S. stocks soared near record highs in December as the U.S. and China agreed to a limited trade war truce. Outside the U.S., European stocks advanced despite signs of slowing economic growth, a near-recession in Germany and Brexit-related uncertainty in the U.K. that remained unresolved until the very last month of the year. Emerging markets stocks advanced, overcoming bouts of volatility tied to global trade tensions.

The fund's higher-than-index position relative to the top performing information technology sector as well as individual stock selection in that sector boosted the fund's returns compared with the index. The fund's fixed income investments also helped relative returns. On the downside, investments in tobacco company Altria detracted from the fund's relative returns as its share price dipped lower than the broader market.

The fund's portfolio managers exercise caution and continue to monitor cross-border trade discussions that could lead to further tensions on the one hand and central bank activity on the other, which could result in lower rates. Rate reductions could help mitigate some of the negative economic impacts of a reduction in global trade. Portfolio managers continue to stay the course of focusing on global research and stock-by-stock, bottom-up analysis.

Bond Fund gained 9.70% for the 12 months ended December 31, 2019. In comparison, the fund's benchmark, the Bloomberg Barclays U.S. Aggregate Index¹, which represents the U.S. investment-grade (rated BBB/Baa and above) fixed-rate bond market, returned 8.72%.

The Federal Reserve began the year by pausing its rate hike campaign in response to market turbulence at the end of 2018. It then began to cut the federal funds rate over the summer. It reduced the rate three times to end the year with the target in a range of 1.50%-1.75%.

Security selection within agency mortgage backed pass-through securities was the primary detractor from relative results over the period. On the positive side, the fund benefitted from active duration management as interest rates declined over the period. Sector selection was also a positive factor as out-of-benchmark investments in Treasury Inflation Protected Securities (TIPS), investment grade corporate bonds, high yield, and emerging markets all helped results.

With the current economic expansion now more than 10 years old, it is the longest in the post-war period. While we expect the expansion to continue in 2020, late cycle economies may be susceptible to risks or idiosyncratic problems throwing them off balance. For that reason, we feel strongly that a core bond fund like Bond Fund should remain conservatively positioned with a long-term focus. Managers remain committed to pursuing all four roles of fixed income: income, diversification from equities, capital preservation and inflation protection. We aim to manage a fund that will help to provide stability for your portfolio in any market environment.

Global Bond Fund gained 8.08% for the 12 months ended December 31, 2019. This outpaced the fund's benchmark, the Bloomberg Barclays Global Aggregate Index¹, which measures global investment-grade bonds (rated BBB/Baa and above) and increased 6.84%.

Government bonds advanced as central banks around the world cut interest rates in an attempt to blunt the negative effects of a trade war. After raising rates in 2018, the U.S. Federal Reserve abruptly changed course and cut rates three times in 2019. Many other central banks followed the same path, while the European Central Bank took rates further into negative territory. The Treasury curve ultimately steepened after some flattening amid declining yields. Credit saw very sizable returns, with investment-grade and high-yield bonds gaining more than 14%. U.S. corporate spreads tightened sharply, by 60 basis points, to end at 93 basis points on an option-adjusted basis. The federal funds rate ended the year between 1.50% and 1.75%.

Sector/industry allocation helped results relative to the market index, as did careful security selection and the fund's chosen exposure to countries. Investments in government bonds from Greece and Mexico were the largest individual contributors to relative results while Argentine government bonds were among the larger individual detractors.

As growth in the U.S. moderates, the fund's portfolio managers seek to identify long-term investments around the world such as in emerging markets where corporate and high-yield debt may present opportunities. Given the fund's core objective is to provide a high-level of total return over the long term, the fund's portfolio managers maintain a cautious approach to investing in different sectors of the bond market, such as high-yield debt.

Share prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

High-Income Bond Fund gained 12.85% for the 12 months ended December 31, 2019. In comparison, the fund's benchmark, the Bloomberg Barclays U.S. Corporate High Yield 2% Issuer Capped Index,¹ which measures fixed-rate non-investment-grade bonds and limits the exposure of an issuer to 2% was up 14.32%.

Bond returns were strong during the period. The Federal Reserve maintained its target rate for the first half of the year, but then reduced the target rate three times in the second half. The federal funds rate ended the year between 1.50% and 1.75%. The Treasury curve ultimately steepened after some flattening amid declining yields.

The fund's portfolio managers continue to believe current fundamentals support a mildly constructive outlook for the high yield market. We continue to monitor global central bank monetary policy actions, and believe that the higher yields and relatively short duration of high yield bonds should help mitigate any impact should rates begin to rise from current levels.

Mortgage Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Share prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Mortgage Fund gained 5.30% for the 12 months ended December 31, 2019, while the Bloomberg Barclays U.S. Mortgage-Backed Securities Index,¹ which covers the mortgage-backed pass-through securities of Ginnie Mae, Fannie Mae and Freddie Mac, rose 6.35%.

Bond returns were strong. The Federal Reserve paused rate hikes for the first half of the year and cut three times in the second half. The federal funds target rate ended the year between 1.50% and 1.75%. The Treasury curve ultimately steepened after some flattening amid declining yields.

Sector and security selection detracted from relative results, including holdings in U.S. Treasuries and interest rate swaps.

The fund's portfolio managers remain focused on meeting the core objectives of the fund providing current income and protecting capital. The fund's relatively low allocation to MBS Pass-Through securities, combined with an interest rate stance that anticipates that the yield curve will steepen, are positions that the portfolio managers expect will contribute to relative results in the future as markets evolve. More attractive valuations for mortgage investments are expected to emerge going forward amid a transition from our extended period of extremely low volatility to a more normal period of economic and asset price uncertainty.

Ultra-Short Bond Fund gained 1.92% for the 12 months ended December 31, 2019, compared with a 2.69% rise in the Bloomberg Barclays Short-Term Government/Corporate Index¹, which consists of investment-grade (rated BBB/Baa and above), fixed-rate, publicly placed, dollar-denominated and non-convertible securities with remaining maturity from one up to (but not including) 12 months within either the government or corporate sector. With a focus on capital preservation and liquidity, the fund continues to be managed in a relatively conservative manner compared to the above-described index.

The fund's returns were higher than in 2018 even as the Federal Reserve paused rate hikes for the first half of the year and cut three times in the second half. The federal funds rate ended the year between 1.50% and 1.75%. The Treasury curve ultimately steepened after some flattening amid declining yields. Assuming the current interest rate environment and solid U.S. economic conditions persist, the fund has the potential to continue to provide income.

Ultra-Short Bond Fund

Total returns based on a \$1,000 investment For periods ended December 31, 2019²

	1 year	5 years	10 years	Lifetime (since February 8, 1984)	Expense ratio
Class 1	1.92%	0.81%	0.30%	3.39%	.37%
Class 1A	1.92	0.71	0.12	3.16	.62
Class 2	1.62	0.56	0.05	3.14	.62
Class 3	1.76	0.62	0.12	3.21	.55
Class 4	1.40	0.30	-0.13	2.90	.87

Investment results assume all distributions are reinvested and reflect applicable fees and expenses. When applicable, investment results reflect fee waivers and/or expense reimbursements, without which results would have been lower. Visit capitalgroup.com for more information. Expense ratios are as of the fund's prospectus dated May 1, 2020 (unaudited). See the Financial Highlights table in this report for details.

U.S. Government/AAA-Rated Securities Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Share prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

U.S. Government/AAA-Rated Securities Fund rose 5.69% for the 12 months ended December 31, 2019, while the Bloomberg Barclays U.S. Government/Mortgage-Backed Securities Index,¹ which covers obligations issued by the U.S. Treasury and U.S. government agencies, increased by 6.63%.

Bond returns were strong during the period. The Federal Reserve maintained its target rate for the first half of the year, but then reduced the target rate three times in the second half. The federal funds rate ended the year between 1.50% and 1.75%. The Treasury curve ultimately steepened after some flattening amid declining yields.

During the period, the fund's interest rate positioning detracted from relative returns, including investments in interest rate swaps.

The fund strives to meet its objective of providing a high level of current income consistent with the preservation of capital. The fund's portfolio managers have positioned the fund with the expectation that rate hikes in the near future are unlikely as the Federal Reserve wants to extend the economic expansion and to also raise inflation closer to its stated "strong commitment" to a symmetric target of 2%. We believe this stance by the Federal Reserve can lead to a steepening yield curve and potentially higher inflation expectations.

U.S. Government/AAA-Rated Securities Fund

The fund gained 22.01% for the 12 months ended December 31, 2019. S&P 500 Managed Risk Index - Moderate Aggressive¹ was up 20.47%. Standard & Poor's 500 Composite Index², a market capitalization-weighted index based on the results of approximately 500 widely held common stocks, increased 31.49%.

The fund pursues its objective by investing in shares of American Funds Insurance Series - Growth FundSM and American Funds Insurance Series - Bond FundSM while seeking to manage portfolio volatility and provide downside protection, primarily through the use of exchange-traded futures. The benefit of the fund's managed risk strategy should be most apparent during periods of high volatility and in down markets. In steady or rising markets, the fund's results can be expected to lag those of the underlying fund.

The underlying Growth Fund's investments in communication services added to relative returns, while investments in consumer discretionary detracted from the fund's relative results.

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. Some securities in "Other securities" (with an aggregate value of \$44,058,000, an aggregate cost of \$37,986,000, and which represented .95% of the net assets of the fund) were acquired from 5/1/2015 to 12/26/2019 through private placement transactions exempt from registration under the Securities Act of 1933, which may subject them to legal or contractual restrictions on resale.

Investments in affiliates

A company is an affiliate of the fund under the Investment Company Act of 1940 if the fund's holdings represent 5% or more of the outstanding voting shares of that company. The value of the fund's affiliated-company holding is included in "Other securities" under the respective industry sector in the summary investment portfolio. Further details on this holding and related transactions during the year ended December 31, 2019, appear below.

	Beginning shares	Additions	Reductions	Ending shares	Net realized gain (000)	Net unrealized depreciation (000)	Dividend income (000)	Value of affiliates at 12/31/2019 (000)
Common stocks 0.28%								
Health care 0.28%								
NuCana PLC (ADR) ^{1,2}	2,067,724	15,980	—	2,083,704	\$—	\$(17,366)	\$—	\$12,711

¹Security did not produce income during the last 12 months.

²All or a portion of this security was on loan. The total value of all such securities, including those in "Other securities," was \$102,111,000, which represented 2.21% of the net assets of the fund. Refer to Note 5 for more information on securities lending.

³Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$1,960,603,000, which represented 42.43% of the net assets of the fund. This amount includes \$1,889,826,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

⁴Acquired in a transaction exempt from registration under Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$41,018,000, which represented .89% of the net assets of the fund.

⁵Rate represents the seven-day yield at 12/31/2019.

⁶Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. "Other securities" also includes securities (with an aggregate value of \$61,434,000, which represented 1.63% of the net assets of the fund) which were acquired in transactions exempt from registration under Rule 144A of the Securities Act of 1933 and may be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. "Other securities" also includes securities on loan. The total value of securities on loan was \$2,679,000, which represented .07% of the net assets of the fund. Refer to Note 5 for more information on securities lending.

¹Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$1,928,580,000, which represented 51.29% of the net assets of the fund. This amount includes \$1,899,554,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

²Security did not produce income during the last 12 months.

³Rate represents the seven-day yield at 12/31/2019.

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. "Other securities" also includes a security (with a value of \$5,722,000, which represented .02% of the net assets of the fund) which was acquired in transactions exempt from registration under Rule 144A of the Securities Act of 1933 and may be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers.

Investments in affiliates

A company is an affiliate of the fund under the Investment Company Act of 1940 if the fund's holdings represent 5% or more of the outstanding voting shares of that company. The value of the fund's affiliated-company holding is shown in the summary investment portfolio. Further details on this holding and related transactions during the year ended December 31, 2019, appear below.

	Beginning shares	Additions	Reductions	Ending shares	Net realized loss (000)	Net unrealized appreciation (000)	Dividend income (000)	Value of affiliates at 12/31/2019 (000)
Common stocks 0.93%								
Industrials 0.93%								
BWX Technologies, Inc.	5,290,948	489,900	366,178	5,414,670	\$(1,021)	\$128,124	\$3,592	\$336,143

¹Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$3,637,561,000, which represented 10.10% of the net assets of the fund. This amount includes \$3,621,224,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

²Security did not produce income during the last 12 months.

³Represents an affiliated company as defined under the Investment Company Act of 1940.

⁴Rate represents the seven-day yield at 12/31/2019.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

¹Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$345,473,000, which represented 34.59% of the net assets of the fund. This amount includes \$345,261,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

²Amount less than one thousand.

³All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$1,180,000, which represented .12% of the net assets of the fund.

⁴Index-linked bond whose principal amount moves with a government price index.

⁵Step bond; coupon rate may change at a later date.

⁶Acquired in a transaction exempt from registration under Rule 144A of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$21,329,000, which represented 2.14% of the net assets of the fund.

⁷Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

⁸Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.

⁹Rate represents the seven-day yield at 12/31/2019.

¹⁰Notional amount is calculated based on the number of contracts and notional contract size.

¹¹Value is calculated based on the notional amount and current market price.

Key to abbreviations and symbol

ADR = American Depositary Receipts

CAD = Canadian dollars

EFFR = Effective Federal Funds Rate

GBP = British pounds

SOFR = Secured Overnight Financing Rate

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. "Other securities" also includes loan participations and assignments, which may be subject to legal or contractual restrictions on resale. The total value of all such loans was \$40,104,000, which represented .15% of the net assets of the fund. Some securities in "Other securities" (with an aggregate value of \$4,194,000, an aggregate cost of \$9,168,000, and which represented .02% of the net assets of the fund) were acquired from 9/26/2013 to 9/4/2018 through private placement transactions exempt from registration under the Securities Act of 1933, which may subject them to legal or contractual restrictions on resale.

Investments in affiliates

A company is an affiliate of the fund under the Investment Company Act of 1940 if the fund's holdings represent 5% or more of the outstanding voting shares of that company. The value of the fund's affiliated-company holdings is either shown in the summary investment portfolio or included in the value of "Other securities" under the respective industry sectors. Further details on these holdings and related transactions during the year ended December 31, 2019, appear below.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

¹Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$923,930,000, which represented 3.37% of the net assets of the fund. This amount includes \$906,137,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

²Represents an affiliated company as defined under the Investment Company Act of 1940.

³Security did not produce income during the last 12 months.

⁴All or a portion of this security was on loan. The total value of all such securities, including those in "Other securities," was \$5,211,000, which represented .02% of the net assets of the fund. Refer to Note 5 for more information on securities lending.

⁵All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$15,999,000, which represented .06% of the net assets of the fund.

⁶Index-linked bond whose principal amount moves with a government price index.

⁷Acquired in a transaction exempt from registration under Rule 144A of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$975,763,000, which represented 3.56% of the net assets of the fund.

⁸Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

⁹Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.

¹⁰Purchased on a TBA basis.

¹¹Rate represents the seven-day yield at 12/31/2019.

¹²Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.

¹³Notional amount is calculated based on the number of contracts and notional contract size.

¹⁴Value is calculated based on the notional amount and current market price.

¹⁵Unaffiliated issuer at 12/31/2019.

¹⁶Scheduled interest and/or principal payment was not received.

Key to abbreviations and symbol

ADR = American Depositary Receipts

CAD = Canadian dollars

LIBOR = London Interbank Offered Rate

TBA = To-be-announced

USD/\$ = U.S. dollars

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. "Other securities" includes securities that were valued under fair value procedures adopted by authority of the board of trustees. The total value of securities that were valued under fair value procedures was \$3,541,000, which represented .03% of the net assets of the fund. "Other securities" also includes loan participations and assignments, which may be subject to legal or contractual restrictions on resale. The total value of all such loans was \$87,000, which represented less than .01% of the net assets of the fund.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

¹Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

²Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.

³Purchased on a TBA basis.

⁴Acquired in a transaction exempt from registration under Rule 144A of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$1,120,890,000, which represented 10.62% of the net assets of the fund.

⁵All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$40,365,000, which represented .38% of the net assets of the fund.

⁶Index-linked bond whose principal amount moves with a government price index.

⁷Rate represents the seven-day yield at 12/31/2019.

⁸Notional amount is calculated based on the number of contracts and notional contract size.

⁹Value is calculated based on the notional amount and current market price.

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. "Other securities" includes securities that were valued under fair value procedures adopted by authority of the board of trustees. The total value of securities that were valued under fair value procedures was \$2,425,000, which represented .11% of the net assets of the fund. "Other securities" also includes loan participations and assignments, which may be subject to legal or contractual restrictions on resale. The total value of all such loans was \$3,927,000, which represented .18% of the net assets of the fund. One security in "Other securities" (with a value of \$27,000, an aggregate cost of \$116,000, and which represented less than .01% of the net assets of the fund) was acquired on 8/31/2018 through private placement transactions exempt from registration under the Securities Act of 1933, which may subject it to legal or contractual restrictions on resale.

Global Bond Fund

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

¹Index-linked bond whose principal amount moves with a government price index.

²Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

³Acquired in a transaction exempt from registration under Rule 144A of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$185,840,000, which represented 8.73% of the net assets of the fund.

⁴Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.

⁵All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$9,498,000, which represented .45% of the net assets of the fund.

⁶Rate represents the seven-day yield at 12/31/2019.

⁷Notional amount is calculated based on the number of contracts and notional contract size.

⁸Value is calculated based on the notional amount and current market price.

⁹Amount less than one thousand.

High-Income Bond Fund

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. Some securities in "Other securities" (with an aggregate value of \$5,152,000, an aggregate cost of \$5,650,000, and which represented .41% of the net assets of the fund) were acquired from 9/26/2013 to 8/31/2018 through private placement transactions exempt from registration under the Securities Act of 1933, which may subject them to legal or contractual restrictions on resale.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

¹Acquired in a transaction exempt from registration under Rule 144A of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$792,983,000, which represented 62.62% of the net assets of the fund.

²Step bond; coupon rate may change at a later date.

³Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$23,174,000, which represented 1.83% of the net assets of the fund.

⁴Value determined using significant unobservable inputs.

⁵Loan participations and assignments; may be subject to legal or contractual restrictions on resale. The total value of all such loans, including those in "Other securities," was \$64,996,000, which represented 5.13% of the net assets of the fund.

⁶Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Most recent payment was 100% cash unless otherwise noted.

⁷Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.

⁸Security did not produce income during the last 12 months.

⁹Rate represents the seven-day yield at 12/31/2019.

¹⁰Notional amount is calculated based on the number of contracts and notional contract size.

¹¹Value is calculated based on the notional amount and current market price.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

¹Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

²Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.

³Step bond; coupon rate may change at a later date.

⁴Purchased on a TBA basis.

⁵Valued under fair value procedures adopted by authority of the board of trustees. The total value of the security was \$1,270,000, which represented .43% of the net assets of the fund.

⁶Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$17,782,000, which represented 6.04% of the net assets of the fund.

⁷Index-linked bond whose principal amount moves with a government price index.

⁸All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$4,195,000, which represented 1.42% of the net assets of the fund.

⁹Notional amount is calculated based on the number of contracts and notional contract size.

¹⁰Value is calculated based on the notional amount and current market price.

¹¹Amount less than one thousand.

Key to abbreviations and symbol

EFFR = Effective Federal Funds Rate

LIBOR = London Interbank Offered Rate

TBA = To-be-announced

USD/\$ = U.S. dollars

U.S. Government/AAA-Rated Securities Fund

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

¹All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$46,115,000, which represented 1.59% of the net assets of the fund.

²Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.

³Index-linked bond whose principal amount moves with a government price index.

⁴Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

⁵Purchased on a TBA basis.

⁶Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$177,830,000, which represented 6.14% of the net assets of the fund.

⁷Notional amount is calculated based on the number of contracts and notional contract size.

⁸Value is calculated based on the notional amount and current market price.

Key to abbreviations and symbol

EFFR = Effective Federal Funds Rate

LIBOR = London Interbank Offered Rate

TBA = To-be-announced

USD/\$ = U.S. dollars

Notes to financial statements

1. Organization

American Funds Insurance Series (the “series”) is registered under the Investment Company Act of 1940 as an open-end, diversified management investment company with 34 different funds (“the funds”), including 23 funds in the series covered in this report. The other 11 funds in the series are covered in separate reports. Six funds in the series are covered in the American Funds Insurance Series - Target Date Series report and five funds in the series are covered in the American Funds Insurance Series - Portfolio Series report. The assets of each fund are segregated, with each fund accounted for separately. Capital Research and Management Company (“CRMC”) is the series’ investment adviser. Milliman Financial Risk Management LLC (“Milliman FRM”) is the subadviser for the risk management strategy for eight of the funds (the “managed risk funds”), five of which are covered in this report.

The managed risk funds covered in this report are Managed Risk Growth Fund, Managed Risk International Fund, Managed Risk Blue Chip Income and Growth Fund, Managed Risk Growth-Income Fund and Managed Risk Asset Allocation Fund. The managed risk funds invest in other funds within the series (the “underlying funds”) and employ Milliman FRM to implement the risk management strategy, which consists of using hedging instruments – primarily short positions on exchange-traded futures contracts – to attempt to stabilize the volatility of the funds around target volatility levels and reduce the downside exposure of the funds during periods of significant market declines.

Shareholders approved a proposal to reorganize the series from a Massachusetts business trust to a Delaware statutory trust. The series reserved the right to delay implementing the reorganization and has elected to do so.

The investment objectives for each fund covered in this report are as follows:

Global Growth Fund – To provide long-term growth of capital.

Global Small Capitalization Fund – To provide long-term growth of capital.

Growth Fund – To provide growth of capital.

International Fund – To provide long-term growth of capital.

New World Fund – To provide long-term capital appreciation.

Blue Chip Income and Growth Fund – To produce income exceeding the average yield on U.S. stocks generally and to provide an opportunity for growth of principal consistent with sound common stock investing.

Global Growth and Income Fund – To provide long-term growth of capital while providing current income.

Growth-Income Fund – To achieve long-term growth of capital and income.

International Growth and Income Fund – To provide long-term growth of capital while providing current income.

Capital Income Builder – The two primary objectives are (1) to provide a level of current income that exceeds the average yield on U.S. stocks generally and (2) to provide a growing stream of income over the years. The secondary objective is to provide growth of capital.

Asset Allocation Fund – To provide high total return (including income and capital gains) consistent with preservation of capital over the long term.

Global Balanced Fund – Seeks the balanced accomplishment of three objectives: long-term growth of capital, conservation of principal and current income.

Bond Fund – To provide as high a level of current income as is consistent with the preservation of capital.

Global Bond Fund – To provide, over the long term, a high level of total return consistent with prudent investment management.

High-Income Bond Fund – The primary objective is to provide a high level of current income. The secondary objective is capital appreciation.

Mortgage Fund – To provide current income and preservation of capital.

Ultra-Short Bond Fund – To provide current income, consistent with the maturity and quality standards applicable to the fund, and preservation of capital and liquidity.

U.S. Government/AAA-Rated Securities Fund – To provide a high level of current income consistent with preservation of capital.

Managed Risk Growth Fund – To provide growth of capital while seeking to manage volatility and provide downside protection.

Managed Risk International Fund – To provide long-term growth of capital while seeking to manage volatility and provide downside protection.

Managed Risk Blue Chip Income and Growth Fund – To produce income exceeding the average yield on U.S. stocks generally and to provide an opportunity for growth of principal consistent with sound common stock investing, in each case while seeking to manage volatility and provide downside protection.

Managed Risk Growth-Income Fund – To achieve long-term growth of capital and income while seeking to manage volatility and provide downside protection.

Managed Risk Asset Allocation Fund – To provide high total return (including income and capital gains) consistent with preservation of capital over the long term while seeking to manage volatility and provide downside protection.

Each fund in the series, except the managed risk funds, offers either four or five share classes (Classes 1, 1A, 2, 3 or 4); the managed risk funds offer two share classes (Classes P1 and P2). Holders of all share classes of each fund have equal pro rata rights to assets, dividends and liquidation proceeds of each fund held. Each share class of each fund has identical voting rights, except for the exclusive right to vote on matters affecting only its class. Share classes have different fees and expenses ("class-specific fees and expenses"), primarily due to different arrangements for certain distribution expenses. Differences in class-specific fees and expenses will result in differences in net investment income and, therefore, the payment of different per-share dividends by each class of each fund.

2. Significant accounting policies

Each fund is an investment company that applies the accounting and reporting guidance issued in Topic 946 by the U.S. Financial Accounting Standards Board. Each fund's financial statements have been prepared to comply with U.S. generally accepted accounting principles ("U.S. GAAP"). These principles require the series' investment adviser to make estimates and assumptions that affect reported amounts and disclosures. Actual results could differ from those estimates. Subsequent events, if any, have been evaluated through the date of issuance in the preparation of the financial statements. The funds follow the significant accounting policies described in this section, as well as the valuation policies described in the next section on valuation.

Security transactions and related investment income – Security transactions are recorded by the funds as of the date the trades are executed with brokers. Realized gains and losses from security transactions are determined based on the specific identified cost of the securities. In the event a security is purchased with a delayed payment date, the funds will segregate liquid assets sufficient to meet their payment obligations. Dividend income is recognized on the ex-dividend date and interest income is recognized on an accrual basis. Market discounts, premiums and original issue discounts on fixed-income securities are amortized daily over the expected life of the security.

Fees and expenses – The fees and expenses of the underlying funds held by the managed risk funds are not included in the fees and expenses reported for each of the managed risk funds; however, they are indirectly reflected in the valuation of each of the underlying funds. These fees are included in the net effective expense ratios that are provided as additional information in the financial highlights tables.

Class allocations – Income, fees and expenses (other than class-specific fees and expenses) and realized and unrealized gains and losses are allocated daily among the various share classes of each fund based on their relative net assets. Class-specific fees and expenses, such as distribution expenses, are accrued daily and charged directly to the respective share class of each fund.

Distributions paid to shareholders – Income dividends and capital gain distributions are recorded on each fund's ex-dividend date.

Currency translation – Assets and liabilities, including investment securities, denominated in currencies other than U.S. dollars are translated into U.S. dollars at the exchange rates supplied by one or more pricing vendors on the valuation date. Purchases and sales of investment securities and income and expenses are translated into U.S. dollars at the exchange rates on the dates of such transactions. The effects of changes in exchange rates on investment securities are included with the net realized gain or loss and net unrealized appreciation or depreciation on investments in the funds’ statements of operations. The realized gain or loss and unrealized appreciation or depreciation resulting from all other transactions denominated in currencies other than U.S. dollars are disclosed separately.

3. Valuation

CRMC, the series’ investment adviser, values the funds’ investments at fair value as defined by U.S. GAAP. The net asset value of each share class of each fund is generally determined as of approximately 4:00 p.m. New York time each day the New York Stock Exchange is open.

Methods and inputs – The series’ investment adviser uses the following methods and inputs to establish the fair value of each fund’s assets and liabilities. Use of particular methods and inputs may vary over time based on availability and relevance as market and economic conditions evolve.

Equity securities are generally valued at the official closing price of, or the last reported sale price on, the exchange or market on which such securities are traded, as of the close of business on the day the securities are being valued or, lacking any sales, at the last available bid price. Prices for each security are taken from the principal exchange or market on which the security trades. The value of an underlying fund is based on its reported net asset value.

Fixed-income securities, including short-term securities, are generally valued at prices obtained from one or more pricing vendors. Vendors value such securities based on one or more of the inputs described in the following table. The table provides examples of inputs that are commonly relevant for valuing particular classes of fixed-income securities in which the funds are authorized to invest. However, these classifications are not exclusive and any of the inputs may be used to value any other class of fixed-income security.

Fixed-income class	Examples of standard inputs
All	Benchmark yields, transactions, bids, offers, quotations from dealers and trading systems, new issues, spreads and other relationships observed in the markets among comparable securities; and proprietary pricing models such as yield measures calculated using factors such as cash flows, financial or collateral performance and other reference data (collectively referred to as “standard inputs”)
Corporate bonds & notes; convertible securities	Standard inputs and underlying equity of the issuer
Bonds & notes of governments & government agencies	Standard inputs and interest rate volatilities
Mortgage-backed; asset-backed obligations	Standard inputs and cash flows, prepayment information, default rates, delinquency and loss assumptions, collateral characteristics, credit enhancements and specific deal information
Municipal securities	Standard inputs and, for certain distressed securities, cash flows or liquidation values using a net present value calculation based on inputs that include, but are not limited to, financial statements and debt contracts

When the series’ investment adviser deems it appropriate to do so (such as when vendor prices are unavailable or not deemed to be representative), fixed-income securities will be valued in good faith at the mean quoted bid and ask prices that are reasonably and timely available (or bid prices, if ask prices are not available) or at prices for securities of comparable maturity, quality and type.

Securities with both fixed-income and equity characteristics, or equity securities traded principally among fixed-income dealers, are generally valued in the manner described for either equity or fixed-income securities, depending on which method is deemed most appropriate by the series' investment adviser. The Government Cash Management Fund held by the managed risk funds is managed to maintain a \$1.00 net asset value per share. The Capital Group Central Cash Fund ("CCF") is valued based upon a floating net asset value, which fluctuates with changes in the value of CCF's portfolio securities. The underlying securities are valued based on the policies and procedures in CCF's statement of additional information. The net asset value of each share class of each managed risk fund is calculated based on the reported net asset values of the underlying funds in which each fund invests.

Exchange-traded options and futures are generally valued at the official closing price for options and official settlement price for futures of the exchange or market on which such instruments are traded, as of the close of business on the day such instruments are being valued. Forward currency contracts are valued at the mean of representative quoted bid and ask prices, generally based on prices supplied by one or more pricing vendors. Interest rate swaps and credit default swaps are generally valued by pricing vendors based on market inputs that include the index and term of index, reset frequency, payer/receiver, currency and pay frequency.

Securities and other assets for which representative market quotations are not readily available or are considered unreliable by the series' investment adviser are fair valued as determined in good faith under fair value guidelines adopted by authority of the series' board of trustees as further described. The investment adviser follows fair valuation guidelines, consistent with U.S. Securities and Exchange Commission rules and guidance, to consider relevant principles and factors when making fair value determinations. The investment adviser considers relevant indications of value that are reasonably and timely available to it in determining the fair value to be assigned to a particular security, such as the type and cost of the security; contractual or legal restrictions on resale of the security; relevant financial or business developments of the issuer; actively traded similar or related securities; conversion or exchange rights on the security; related corporate actions; significant events occurring after the close of trading in the security; and changes in overall market conditions. In addition, the closing prices of equity securities and futures that trade in markets outside U.S. time zones may be adjusted to reflect significant events that occur after the close of local trading but before the net asset value of each share class of each fund is determined. Fair valuations and valuations of investments and futures that are not actively trading involve judgment and may differ materially from valuations that would have been used had greater market activity occurred.

Processes and structure – The series' board of trustees has delegated authority to the series' investment adviser to make fair value determinations, subject to board oversight. The investment adviser has established a Joint Fair Valuation Committee (the "Fair Valuation Committee") to administer, implement and oversee the fair valuation process, and to make fair value decisions. The Fair Valuation Committee regularly reviews its own fair value decisions, as well as decisions made under its standing instructions to the investment adviser's valuation teams. The Fair Valuation Committee reviews changes in fair value measurements from period to period and may, as deemed appropriate, update the fair valuation guidelines to better reflect the results of back testing and address new or evolving issues. The Fair Valuation Committee reports any changes to the fair valuation guidelines to the board of trustees. The series' board and audit committee also regularly review reports that describe fair value determinations and methods.

The series' investment adviser has also established a Fixed-Income Pricing Review Group to administer and oversee the fixed-income valuation process, including the use of fixed-income pricing vendors. This group regularly reviews pricing vendor information and market data. Pricing decisions, processes and controls over security valuation are also subject to additional internal reviews, including an annual control self-evaluation program facilitated by the investment adviser's compliance group.

Classifications – The series' investment adviser classifies the funds' assets and liabilities into three levels based on the inputs used to value the assets or liabilities. Level 1 values are based on quoted prices in active markets for identical securities. Level 2 values are based on significant observable market inputs, such as quoted prices for similar securities and quoted prices in inactive markets. Certain securities trading outside the U.S. may transfer between Level 1 and Level 2 due to valuation adjustments resulting from significant market movements following the close of local trading. Level 3 values are based on significant unobservable inputs that reflect the investment adviser's determination of assumptions that market participants might reasonably use in valuing the securities.

The valuation levels are not necessarily an indication of the risk or liquidity associated with the underlying investment. For example, U.S. government securities are reflected as Level 2 because the inputs used to determine fair value may not always be quoted prices in an active market. The following tables present the funds' valuation levels as of December 31, 2019 (dollars in thousands):

The following table reconciles the valuation of the fund's Level 3 investment securities and related transactions for the year ended December 31, 2019 (dollars in thousands):

	Beginning value at 1/1/2019	Transfers into Level 3 ²	Purchases	Sales	Net realized gain ³	Unrealized depreciation ³	Transfers out of Level 3 ²	Ending value at 12/31/2019
Investment securities	\$17,537	\$—	\$10,278	\$(5,076)	\$6	\$(3,050)	\$(20)	\$19,675
Net unrealized depreciation during the period on Level 3 investment securities held at December 31, 2019								\$ (3,075)

²Transfers into or out of Level 3 are based on the beginning market value of the quarter in which they occurred.

³Net realized gain and unrealized depreciation are included in the related amounts on investments in the statement of operations.

Unobservable inputs – Valuation of the fund’s Level 3 securities is based on significant unobservable inputs that reflect the investment adviser’s determination of assumptions that market participants might reasonably use in valuing the securities. The following table provides additional information used by the fund’s investment adviser to fair value the fund’s Level 3 securities (dollars in thousands):

	Value at 12/31/2019	Valuation techniques	Unobservable inputs	Range (if appropriate)	Weighted average	Impact to valuation from an increase in input*
Bonds, notes & other debt instruments	\$ 9,187	Yield analysis	Yield to maturity risk premium	N/A	N/A	Decrease
		Redemption value	N/A	N/A	N/A	N/A
		Market comparable security	N/A	N/A	N/A	N/A
Convertible stocks	4,834	Multiple of revenue	Revenue multiple	0.85x	0.85x	Increase
Common stocks	4,946	Market comparable companies	EBITDA multiple	4.8x	4.8x	Increase
			Discount for lack of marketability	20%	20%	Decrease
		Multiple of revenue	Revenue multiple	1.4x	1.4x	Increase
		Expected proceeds	Discount to reflect timing of receipt and amount of proceeds	50%	50%	Decrease
Rights & warrants	708	Black-Scholes	Implied volatility	30%	30%	Increase
		Market comparables	\$ per acre	\$4.5K	\$4.5K	Increase
			\$ per thousand barrels of oil equivalent per day	\$25K	\$25K	Increase
	\$19,675					

*This column represents the directional change in fair value of the Level 3 securities that would result in an increase from the corresponding input. A decrease to the unobservable input would have the opposite effect. Significant increases and decreases in these inputs in isolation could result in significantly higher or lower fair value measurements.

Key to abbreviation

EBITDA = Earnings before income taxes, depreciation and amortization

At December 31, 2019, all of the fund's investments were classified as Level 1.

Managed Risk Asset Allocation Fund

At December 31, 2019, all of the fund's investments were classified as Level 1.

4. Risk factors

Investing in the funds may involve certain risks including, but not limited to, those described below.

Market conditions – The prices of, and the income generated by, the common stocks, bonds and other securities held by a fund may decline – sometimes rapidly or unpredictably – due to various factors, including events or conditions affecting the general economy or particular industries; overall market changes; local, regional or global political, social or economic instability; governmental, governmental agency or central bank responses to economic conditions; and currency exchange rate, interest rate and commodity price fluctuations.

Issuer risks – The prices of, and the income generated by, securities held by a fund may decline in response to various factors directly related to the issuers of such securities, including reduced demand for an issuer's goods or services, poor management performance, major litigation related to the issuer, changes in government regulations affecting the issuer or its competitive environment and strategic initiatives such as mergers, acquisitions or dispositions and the market response to any such initiatives.

Investing in stocks – Investing in stocks may involve larger price swings and greater potential for loss than other types of investments. As a result, the value of a fund may be subject to sharp declines in value. Income provided by a fund may be reduced by changes in the dividend policies of, and the capital resources available at, the companies in which the fund invests. These risks may be even greater in the case of smaller capitalization stocks.

Investing in small companies – Investing in smaller companies may pose additional risks. For example, it is often more difficult to value or dispose of small company stocks and more difficult to obtain information about smaller companies than about larger companies. Furthermore, smaller companies often have limited product lines, operating histories, markets and/or financial resources, may be dependent on one or a few key persons for management, and can be more susceptible to losses. Moreover, the prices of their stocks may be more volatile than stocks of larger, more established companies, particularly during times of market turmoil.

Investing outside the U.S. – Securities of issuers domiciled outside the U.S., or with significant operations or revenues outside the U.S., may lose value because of adverse political, social, economic or market developments (including social instability, regional conflicts, terrorism and war) in the countries or regions in which the issuers operate or generate revenue. These securities may also lose value due to changes in foreign currency exchange rates against the U.S. dollar and/or currencies of other countries. Issuers of these securities may be more susceptible to actions of foreign governments, such as nationalization, currency blockage or the imposition of price controls or punitive taxes, each of which could adversely impact the value of these securities. Securities markets in certain countries may be more volatile and/or less liquid than those in the U.S. Investments outside the U.S. may also be subject to different accounting practices and different regulatory, legal and reporting standards and practices, and may be more difficult to value, than those in the U.S. In addition, the value of investments outside the U.S. may be reduced by foreign taxes, including foreign withholding taxes on interest and dividends. Further, there may be increased risks of delayed settlement of securities purchased or sold by the fund. The risks of investing outside the U.S. may be heightened in connection with investments in emerging markets.

Investing in developing countries – Investing in countries with developing economies and/or markets may involve risks in addition to and greater than those generally associated with investing in developed countries. For instance, emerging market countries may have less developed legal and accounting systems than those in developed countries. The governments of these countries may be less stable and more likely to impose capital controls, nationalize a company or industry, place restrictions on foreign ownership and on withdrawing sale proceeds of securities from the country, and/or impose punitive taxes that could adversely affect the prices of securities. In addition, the economies of these countries may be dependent on relatively few industries that are more susceptible to local and global changes. Securities markets in these countries can also be relatively small and have substantially lower trading volumes. As a result, securities issued in these countries may be more volatile and less liquid, and may be more difficult to value, than securities issued in countries with more developed economies and/or markets. Less certainty with respect to security valuations may lead to additional challenges and risks in calculating the fund's net asset value. Additionally, emerging markets are more likely to experience problems with the clearing and settling of trades and the holding of securities by banks, agents and depositories that are less established than those in developed countries.

Investing in emerging markets – Investing in emerging markets may involve risks in addition to and greater than those generally associated with investing in the securities markets of developed countries. For instance, emerging market countries may have less developed legal and accounting systems than those in developed countries. The governments of these countries may be less stable and more likely to impose capital controls, nationalize a company or industry, place restrictions on foreign ownership and on withdrawing sale proceeds of securities from the country, and/or impose punitive taxes that could adversely affect the prices of securities. In addition, the economies of these countries may be dependent on relatively few industries that are more susceptible to local and global changes. Securities markets in these countries can also be relatively small and have substantially lower trading volumes. As a result, securities issued in these countries may be more volatile and less liquid, and may be more difficult to value, than securities issued in countries with more developed economies and/or markets. Less certainty with respect to security valuations may lead to additional challenges and risks in calculating a fund's net asset value. Additionally, emerging markets are more likely to experience problems with the clearing and settling of trades and the holding of securities by banks, agents and depositories that are less established than those in developed countries.

Investing in debt instruments – The prices of, and the income generated by, bonds and other debt securities held by a fund may be affected by changing interest rates and by changes in the effective maturities and credit ratings of these securities.

Rising interest rates will generally cause the prices of bonds and other debt securities to fall. A general rise in interest rates may cause investors to sell debt securities on a large scale, which could also adversely affect the price and liquidity of debt securities and could also result in increased redemptions from a fund. Falling interest rates may cause an issuer to redeem, call or refinance a debt security before its stated maturity, which may result in a fund failing to recoup the full amount of its initial investment and having to reinvest the proceeds in lower yielding securities. Longer maturity debt securities generally have greater sensitivity to changes in interest rates and may be subject to greater price fluctuations than shorter maturity debt securities.

Bonds and other debt securities are also subject to credit risk, which is the possibility that the credit strength of an issuer or guarantor will weaken or be perceived to be weaker, and/or an issuer of a debt security will fail to make timely payments of principal or interest and the security will go into default. A downgrade or default affecting any of a fund's securities could cause the value of a fund's shares to decrease. Lower quality debt securities generally have higher rates of interest and may be subject to greater price fluctuations than

higher quality debt securities. Credit risk is gauged, in part, by the credit ratings of the debt securities in which a fund invests. However, ratings are only the opinions of the rating agencies issuing them and are not guarantees as to credit quality or an evaluation of market risk. The fund's investment adviser relies on its own credit analysts to research issuers and issues in seeking to assess credit and default risks.

Investing in lower rated debt instruments – Lower rated bonds and other lower rated debt securities generally have higher rates of interest and involve greater risk of default or price declines due to changes in the issuer's creditworthiness than those of higher quality debt securities. The market prices of these securities may fluctuate more than the prices of higher quality debt securities and may decline significantly in periods of general economic difficulty. These risks may be increased with respect to investments in junk bonds.

Investing in derivatives – The use of derivatives involves a variety of risks, which may be different from, or greater than, the risks associated with investing in traditional securities, such as stocks and bonds. Changes in the value of a derivative may not correlate perfectly with, and may be more sensitive to market events than, the underlying asset, rate or index, and a derivative instrument may expose a fund to losses in excess of its initial investment. Derivatives may be difficult to value, difficult for a fund to buy or sell at an opportune time or price and difficult, or even impossible, to terminate or otherwise offset. A fund's use of derivatives may result in losses to the fund, and investing in derivatives may reduce a fund's returns and increase a fund's price volatility. A fund's counterparty to a derivative transaction (including, if applicable, the fund's clearing broker, the derivatives exchange or the clearinghouse) may be unable or unwilling to honor its financial obligations in respect of the transaction. In certain cases, the fund may be hindered or delayed in exercising remedies against or closing out derivative instruments with a counterparty, which may result additional losses.

Currency – The prices of, and the income generated by, most debt securities held by a fund may also be affected by changes in relative currency values. If the U.S. dollar appreciates against foreign currencies, the value in U.S. dollars of a fund's securities denominated in such currencies would generally fall and vice versa. U.S. dollar-denominated securities of foreign issuers may also be affected by changes in relative currency values.

Investing in mortgage-related and other asset-backed securities – Mortgage-related securities, such as mortgage-backed securities, and other asset-backed securities, include debt obligations that represent interests in pools of mortgages or other income-bearing assets, such as consumer loans or receivables. Such securities often involve risks that are different from or more acute than the risks associated with investing in other types of debt securities. Mortgage-backed and other asset-backed securities are subject to changes in the payment patterns of borrowers of the underlying debt, potentially increasing the volatility of the securities and a fund's net asset value. When interest rates fall, borrowers are more likely to refinance or prepay their debt before its stated maturity. This may result in a fund having to reinvest the proceeds in lower yielding securities, effectively reducing a fund's income. Conversely, if interest rates rise and borrowers repay their debt more slowly than expected, the time in which the mortgage-backed and other asset-backed securities are paid off could be extended, reducing a fund's cash available for reinvestment in higher yielding securities. Mortgage-backed securities are also subject to the risk that underlying borrowers will be unable to meet their obligations and the value of property that secures the mortgages may decline in value and be insufficient, upon foreclosure, to repay the associated loans. Investments in asset-backed securities are subject to similar risks.

Investing in future delivery contracts – A fund may enter into contracts, such as to-be-announced contracts and mortgage dollar rolls, that involve a fund selling mortgage-related securities and simultaneously contracting to repurchase similar securities for delivery at a future date at a predetermined price. This can increase a fund's market exposure, and the market price of the securities that the fund contracts to repurchase could drop below their purchase price. While a fund can preserve and generate capital through the use of such contracts by, for example, realizing the difference between the sale price and the future purchase price, the income generated by the fund may be reduced by engaging in such transactions. In addition, these transactions may increase the turnover rate of a fund.

Investing in inflation linked bonds – The values of inflation linked bonds generally fluctuate in response to changes in real interest rates – i.e., rates of interest after factoring in inflation. A rise in real interest rates may cause the prices of inflation linked securities to fall, while a decline in real interest rates may cause the prices to increase. Inflation linked bonds may experience greater losses than other debt securities with similar durations when real interest rates rise faster than nominal interest rates. There can be no assurance that the value of an inflation linked security will be directly correlated to changes in interest rates; for example, if interest rates rise for reasons other than inflation, the increase may not be reflected in the security's inflation measure.

Investing in inflation linked bonds may also reduce a fund's distributable income during periods of deflation. If prices for goods and services decline throughout the economy, the principal and income on inflation linked securities may decline and result in losses to a fund.

Investing in securities backed by the U.S. government – Securities backed by the U.S. Treasury or the full faith and credit of the U.S. government are guaranteed only as to the timely payment of interest and principal when held to maturity. Accordingly, the current market values for these securities will fluctuate with changes in interest rates and the credit rating of the U.S. government. Securities

issued by government-sponsored entities and federal agencies and instrumentalities that are not backed by the full faith and credit of the U.S. government are neither issued nor guaranteed by the U.S. government.

Investing in repurchase agreements – Upon entering into a repurchase agreement, a fund purchases a security from a bank or broker-dealer, which simultaneously commits to repurchase the security within a specified time at the fund's cost with interest. The security purchased by the fund constitutes collateral for the seller's repurchase obligation. If the party agreeing to repurchase should default, the fund may seek to sell the security it holds as collateral. The fund may incur a loss if the value of the collateral securing the repurchase obligation falls below the repurchase price. The fund may also incur disposition costs and encounter procedural delays in connection with liquidating the collateral.

Interest rate risk – The values and liquidity of the securities held by a fund may be affected by changing interest rates. For example, the values of these securities may decline when interest rates rise and increase when interest rates fall. Longer maturity debt securities generally have greater sensitivity to changes in interest rates and may be subject to greater price fluctuations than shorter maturity debt securities. A fund may invest in variable and floating rate securities. When a fund holds variable or floating rate securities, a decrease in market interest rates will adversely affect the income received from such securities and the net asset value of a fund's shares. Although the values of such securities are generally less sensitive to interest rate changes than those of other debt securities, the value of variable and floating rate securities may decline if their interest rates do not rise as quickly, or as much, as market interest rates. Conversely, floating rate securities will not generally increase in value if interest rates decline. During periods of extremely low short-term interest rates, a fund may not be able to maintain a positive yield and, given the current low interest rate environment, risks associated with rising rates are currently heightened.

Credit and liquidity support – Changes in the credit quality of banks and financial institutions providing credit and liquidity support features with respect to securities held by a fund could cause the values of these securities to decline.

Asset allocation – A fund's percentage allocation to equity securities, debt securities and money market instruments could cause the fund to underperform relative to relevant benchmarks and other funds with similar investment objectives.

Nondiversification risk – As nondiversified funds, certain funds have the ability to invest a larger percentage of their assets in the securities of a smaller number of issuers than diversified funds. Although the funds do not intend to limit their investments to the securities of a small number of issuers, if they were to do so, poor performance by a single large holding could adversely impact the funds' investment results more than if the funds were invested in a larger number of issuers.

Liquidity risk – Certain fund holdings may be or may become difficult or impossible to sell, particularly during times of market turmoil. Liquidity may be impacted by the lack of an active market for a holding, legal or contractual restrictions on resale, or the reduced number and capacity of market participants to make a market in such holding. Market prices for less liquid or illiquid holdings may be volatile, and reduced liquidity may have an adverse impact on the market price of such holdings. Additionally, the sale of less liquid or illiquid holdings may involve substantial delays (including delays in settlement) and additional costs and the fund may be unable to sell such holdings when necessary to meet its liquidity needs or may be forced to sell at a loss.

Management – The investment adviser to the funds actively manages the funds' investments. Consequently, the funds are subject to the risk that the methods and analyses, including models, tools and data, employed by the investment adviser in this process may be flawed or incorrect and may not produce the desired results. This could cause the funds to lose value or their investment results to lag relevant benchmarks or other funds with similar objectives.

Investing in the managed risk funds may involve additional risks including, but not limited to, those described below.

Fund structure – The managed risk funds invest in underlying funds and incur expenses related to those underlying funds. In addition, investors in the managed risk funds will incur fees to pay for certain expenses related to the operations of the managed risk funds. An investor holding the underlying fund directly would incur lower overall expenses but would not receive the benefit of the managed risk strategy. Additionally, in accordance with an exemption under the Investment Company Act of 1940, as amended, the investment adviser considers only proprietary funds when selecting underlying investment options and allocations. This means that the fund's investment adviser did not, nor does it expect to, consider any unaffiliated funds as underlying investment options for the fund. This strategy could raise certain conflicts of interest when choosing underlying investments for the fund, including the selection of funds that result in greater compensation to the adviser or funds with relatively lower historical investment results. The investment adviser has policies and procedures designed to mitigate material conflicts of interest that may arise in connection with its management of the fund.

Management – The managed risk funds are subject to the risk that the managed risk strategy or the methods employed by the subadviser in implementing the managed risk strategy may not produce the desired results. This could cause the managed risk funds to lose value or their investment results to lag relevant benchmarks or other funds with similar objectives.

Underlying fund risks – Because the managed risk funds' investments consist of investments in underlying funds, the managed risk funds' risks are directly related to the risks of the respective underlying fund in which each managed risk fund invests. For this reason, it is important to understand the risks associated with investing both in the managed risk fund and in each of the underlying funds.

Investing in options and futures contracts – In addition to the risks generally associated with investing in derivative instruments, options and futures contracts are subject to the creditworthiness of the clearing organizations, exchanges and, in the case of futures, futures commission merchants with which a fund transacts. Additionally, although futures require only a small initial investment in the form of a deposit of initial margin, the amount of a potential loss on a futures contract could greatly exceed the initial amount invested. While both options and futures contracts are generally liquid instruments, under certain market conditions, options and futures may be deemed to be illiquid. For example, a fund may be temporarily prohibited from closing out its position in an options or futures contract if intraday price change limits or limits on trading volume imposed by the applicable exchange are triggered. If a fund is unable to close out a position on an options or futures contract, the fund would remain subject to the risk of adverse price movements until the fund is able to close out the position in question. The ability of a fund to successfully utilize options and futures contracts may depend in part upon the ability of the fund's investment adviser or subadviser to accurately forecast interest rates and other economic factors and to assess and predict the impact of such economic factors on the options and futures in which the fund invests. If the investment adviser or subadviser incorrectly forecasts economic developments or incorrectly predicts the impact of such developments on the options and futures in which it invests, a fund could be exposed to the risk of loss. Whereas the risk of loss on a put option purchased by the fund is limited to the initial cost of the option, the amount of a potential loss on a futures contract could greatly exceed the relatively small initial amount invested in entering the futures position.

Hedging – There may be imperfect or even negative correlation between the prices of the options and futures contracts in which a fund invests and the prices of the underlying securities or indexes which the fund seeks to hedge. For example, options and futures contracts may not provide an effective hedge because changes in options and futures contract prices may not track those of the underlying securities or indexes they are intended to hedge. In addition, there are significant differences between the securities market, on the one hand, and the options and futures markets, on the other, that could result in an imperfect correlation between the markets, causing a given hedge not to achieve its objectives. The degree of imperfection of correlation depends on circumstances such as variations in speculative market demand for options and futures, including technical influences in options and futures trading, and differences between the financial instruments being hedged and the instruments underlying the standard contracts available for trading. A decision as to whether, when and how to hedge involves the exercise of skill and judgment, and even a well-conceived hedge may be unsuccessful to some degree because of market behavior or unexpected interest rate trends. In addition, the fund's investment in exchange-traded options and futures and their resulting costs could limit the fund's gains in rising markets relative to those of the underlying funds, or to those of unhedged funds in general.

Short positions – Losses from short positions in futures contracts occur when the underlying index increases in value. As the underlying index increases in value, the holder of the short position in the corresponding futures contract is required to pay the difference in value of the futures contract resulting from the increase in the index on a daily basis. Losses from a short position in an index futures contract could potentially be very large if the value of the underlying index rises dramatically in a short period of time.

5. Certain investment techniques

Securities lending – Some of the funds have entered into securities lending transactions in which the funds earn income by lending investment securities to brokers, dealers or other institutions. Each transaction involves three parties: the fund, acting as the lender of the securities, a borrower, and a lending agent that acts as an intermediary.

Securities lending transactions are entered into by the fund under the securities lending agreement with the lending agent. The lending agent facilitates the exchange of securities between the lender and the borrower, generally provides protection from borrower default, marks to market the value of collateral daily, secures additional collateral from the borrower if it falls below preset terms, and may reinvest the collateral on behalf of the fund according to agreed parameters. The lending agent has indemnified the fund against losses resulting from borrower default. Although risk is mitigated by the collateral and indemnification, the fund could experience a delay in recovering its securities and a potential loss of income or value if the borrower fails to return the securities, collateral investments decline in value or the lending agent fails to perform.

The borrower is required to post highly liquid assets, such as cash or U.S. government securities, as collateral for the loan in an amount at least equal to the value of the securities loaned. Investments made with cash collateral are recognized as assets in the fund's investment portfolio. The same amount is recorded as a liability in the fund's statement of assets and liabilities. While securities are on loan, the fund will continue to receive the equivalent of the interest, dividends or other distributions paid by the issuer, as well as a portion of the interest on the investment of the collateral. Additionally, although the fund does not have the right to vote on securities while they are on loan, the fund has a right to consent on corporate actions and a right to recall loaned securities to vote on proposals affecting them. The borrower is obligated to return the loaned security at the conclusion of the loan or, during the pendency of the loan, on demand from the fund.

The following table presents the value of the securities on loan, the type and value of collateral received and the value of the investment securities purchased, if any, from the cash collateral received by each fund (dollars in thousands):

Fund	Value of securities on loan	Collateral type		Value of investment securities purchased
		Cash	U.S. government securities	
Global Small Capitalization Fund	\$102,111	\$95,814	\$11,588	\$86,233
New World Fund	2,679	—	2,733	—
Asset Allocation Fund	5,211	5,103	232	4,593

Investment securities purchased from cash collateral are disclosed in the summary investment portfolio as short-term securities. Securities received as collateral, if any, are not recognized as fund assets. The contractual maturity of collateral received under the securities lending agreement is classified as overnight and continuous.

Index-linked bonds – Some of the funds have invested in index-linked bonds, which are fixed-income securities whose principal value is periodically adjusted to a government price index. Over the life of an index-linked bond, interest is paid on the adjusted principal value. Increases or decreases in the principal value of index-linked bonds are recorded as interest income in the fund's statement of operations.

Mortgage dollar rolls – Some of the funds have entered into mortgage dollar roll transactions in which the fund sells a mortgage-backed security to a counterparty and simultaneously enters into an agreement with the same counterparty to buy back a similar security on a specific future date at a predetermined price. Mortgage dollar rolls are accounted for as purchase and sale transactions, which may increase the funds' portfolio turnover rates.

Loan transactions – Some of the funds have entered into loan transactions in which the fund acquires a loan either through an agent, by assignment from another holder, or as a participation interest in another holder's portion of a loan. The loan is often administered by a financial institution that acts as agent for the holders of the loan, and the fund may be required to receive approval from the agent and/or borrower prior to the sale of the investment. The loan's interest rate and maturity date may change based on the terms of the loan, including potential early payments of principal.

Short-term securities – The managed risk funds hold shares of the Government Cash Management Fund, a cash management vehicle offered by the Bank of New York Mellon ("BNY Mellon"), the funds' custodian bank. The Government Cash Management Fund is managed by the Dreyfus Corporation.

Unfunded commitments – High-Income Bond Fund has participated in transactions that involve unfunded commitments, which may obligate the fund to purchase new or additional bonds if certain contingencies are met. As of December 31, 2019, the maximum exposure of unfunded loan commitments for High-Income Bond Fund was \$131,000, which would represent 0.01% of the net assets of the fund should such commitments become due.

Options contracts – The Managed Risk Growth-Income Fund has entered into options contracts, which give the holder of the option, in return for a premium payment, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option, the security underlying the option (or the cash value of the index underlying the option) at a specified price. As part of its managed risk strategy, the Managed Risk Growth-Income Fund will at times purchase put options on equity indexes in standardized contracts traded on foreign or domestic securities exchanges, boards of trade, or similar entities. By purchasing a put option on an equity index, the fund obtains the right (but not the obligation) to sell the cash value of the index underlying the option at a specified exercise price, and in return for this right, the fund pays the current market price, or the option premium, for the option.

The fund may terminate its position in a put option by allowing the option to expire or by exercising the option. If the option is allowed to expire, the fund will lose the entire premium. If the option is exercised, the fund completes the sale of the underlying instrument (or delivers the cash value of the index underlying the option) at the exercise price. The fund may also terminate a put option position by entering into opposing close-out transactions in advance of the option expiration date.

Premiums paid on options purchased, as well as the daily fluctuation in market value, are included in investment securities in the fund's statement of assets and liabilities. Realized gains or losses are recorded at the time the option contract is closed or expires. Net realized gains or losses and net unrealized appreciation or depreciation from options contracts are recorded in the fund's statement of operations.

Futures contracts – Some of the funds have entered into futures contracts, which provide for the future sale by one party and purchase by another party of a specified amount of a specific financial instrument for a specified price, date, time and place designated at the time the contract is made. Futures contracts are used to strategically manage the fund's interest rate sensitivity by increasing or decreasing the duration of the fund or a portion of the fund's portfolio. For the managed risk funds, futures contracts are used to strategically manage portfolio volatility and downside equity risk.

Upon entering into futures contracts, and to maintain the fund's open positions in futures contracts, the fund is required to deposit with a futures broker, known as a futures commission merchant ("FCM"), in a segregated account in the name of the FCM an amount of cash, U.S. government securities or other liquid securities, known as initial margin. The margin required for a particular futures contract is set by the exchange on which the contract is traded to serve as collateral, and may be significantly modified from time to time by the exchange during the term of the contract. Securities deposited as initial margin, if any, are disclosed in the investment portfolio and cash deposited as initial margin, if any, is reflected as cash pledged for futures contracts in the fund's statement of assets and liabilities.

On a daily basis, each fund pays or receives variation margin based on the increase or decrease in the value of the futures contracts and records variation margin on futures contracts in each fund's statement of assets and liabilities. In addition, each fund segregates liquid assets equivalent to the fund's outstanding obligations under the contract in excess of the initial margin and variation margin, if any. Futures contracts may involve a risk of loss in excess of the variation margin shown on each fund's statement of assets and liabilities. Each fund records realized gains or losses at the time the futures contract is closed or expires. Net realized gains or losses and net unrealized appreciation or depreciation from futures contracts are recorded in each fund's statement of operations.

Forward currency contracts – Some of the funds have entered into forward currency contracts, which represent agreements to exchange currencies on specific future dates at predetermined rates. The series' investment adviser uses forward currency contracts to manage the fund's exposure to changes in exchange rates. Upon entering into these contracts, risks may arise from the potential inability of counterparties to meet the terms of their contracts and from possible movements in exchange rates.

On a daily basis, the series' investment adviser values forward currency contracts based on the applicable exchange rates and records unrealized appreciation or depreciation for open forward currency contracts in each fund's statement of assets and liabilities. Realized gains or losses are recorded at the time the forward contract is closed or offset by another contract with the same broker for the same settlement date and currency. Closed forward currency contracts that have not reached their settlement date are included in the respective receivables or payables for closed forward currency contracts in each fund's statement of assets and liabilities. Net realized gains or losses from closed forward currency contracts and net unrealized appreciation or depreciation from open forward currency contracts are recorded in each fund's statement of operations.

Interest rate swaps – Some of the funds have entered into interest rate swaps, which are agreements to exchange one stream of future interest payments for another based on a specified notional amount. Typically, interest rate swaps exchange a fixed interest rate for a payment that floats relative to a benchmark or vice versa. The series' investment adviser uses interest rate swaps to manage the interest rate sensitivity of the fund by increasing or decreasing the duration of the fund or a portion of the fund's portfolio. Risks may arise as a result of the series' investment adviser incorrectly anticipating changes in interest rates, increased volatility, reduced liquidity and the potential inability of counterparties to meet the terms of their agreements.

Upon entering into an interest rate swap contract, the fund is required to deposit cash, U.S. government securities or other liquid securities, which is known as initial margin. Generally, the initial margin required for a particular interest rate swap is set and held as collateral by the clearinghouse on which the contract is cleared. The amount of initial margin required may be significantly modified from time to time by the clearinghouse during the term of the contract.

On a daily basis, the series' investment adviser records daily interest accruals related to the exchange of future payments as a receivable and payable in each fund's statement of assets and liabilities. Each fund also pays or receives a variation margin based on the increase or decrease in the value of the interest rate swaps, including accrued interest, and records variation margin on interest rate swaps in

each fund's statement of assets and liabilities. Each fund records realized gains and losses on both the net accrued interest and any gain or loss recognized at the time the interest rate swap is closed or expires. Net realized gains or losses, as well as any net unrealized appreciation or depreciation, from interest rate swaps are recorded in each fund's statement of operations.

Credit default swap indices – Some of the funds have entered into centrally cleared credit default swap agreements on credit indices ("CDSI") that involve one party (the protection buyer) making a stream of payments to another party (the protection seller) in exchange for the right to receive a specified return upon the occurrence of a credit event, such as a default or restructuring, with respect to any of the underlying issuers (reference obligations) in the referenced index. The series' investment adviser uses credit default swaps to assume exposure to a diversified portfolio of credits or to hedge against existing credit risks.

CDSI are portfolios of credit instruments or exposures designed to be representative of some part of the credit market, such as the high-yield or investment-grade credit market. CDSI are generally traded using standardized terms, including a fixed spread and standard maturity dates, and reference all the names in the index. If there is a credit event, it is settled based on that name's weight in the index. The composition of the underlying issuers or obligations within a particular index may change periodically, usually every six months. A specified credit event may affect all or individual underlying reference obligations included in the index, and will be settled based upon the relative weighting of the affected obligation(s) within the index. The value of each CDSI can be used as a measure of the current payment/performance risk of the CDSI and represents the likelihood of an expected liability or profit should the notional amount of the CDSI be closed or sold as of the period end. An increasing value, as compared to the notional amount of the CDSI, represents a deterioration of the referenced indices' credit soundness and a greater likelihood of risk of default or other credit event occurring as defined under the terms of the agreement. When a fund provides sell protection, its maximum exposure is the notional amount of the credit default swap agreement.

Upon entering into a centrally cleared CDSI contract, the fund is required to deposit with a derivatives clearing member ("DCM") in a segregated account in the name of the DCM an amount of cash, U.S. government securities or other liquid securities, which is known as initial margin. Generally, the initial margin required for a particular credit default swap is set and held as collateral by the clearinghouse on which the contract is cleared. The amount of initial margin required may be significantly modified from time to time by the clearinghouse during the term of the contract. Securities deposited as initial margin are designated on the investment portfolio.

On a daily basis, interest accruals related to the exchange of future payments are recorded as a receivable and payable in each fund's statement of assets and liabilities. Each fund also pays or receives a variation margin based on the increase or decrease in the value of the centrally cleared swaps, and records variation margin in each fund's statement of assets and liabilities. Each fund records realized gains and losses on both the net accrued interest and any gain or loss recognized at the time the swap is closed or expires. Net realized gains or losses, as well as any net unrealized appreciation or depreciation, from credit default swaps are recorded in each fund's statement of operations.

The following table presents the average month-end notional amounts of options contracts purchased, futures contracts, forward currency contracts, interest rate swaps and credit default swaps while held for each fund (dollars in thousands):

	Options contracts purchased	Futures contracts	Forward currency contracts	Interest rate swaps	Credit default swaps

¹Includes cumulative appreciation/depreciation on futures contracts, interest rate swaps and/or credit default swaps as reported in the applicable table following each fund's investment portfolio. Only current day's variation margin is reported within the statements of assets and liabilities.

²Includes options purchased as reported in the fund's investment portfolio.

³Options purchased are included in net realized gain (loss) on unaffiliated investments.

⁴Options purchased are included in net unrealized appreciation (depreciation) on unaffiliated investments.

Collateral – Some funds participate in a collateral program that calls for the funds to either receive or pledge highly liquid assets, such as cash or U.S. government securities, as collateral due to securities lending and/or their use of futures contracts, forward currency contracts, interest rate swaps, credit default swaps and/or future delivery contracts. For securities lending, each participating fund receives collateral in exchange for lending investment securities. The purpose of the collateral is to cover potential losses that could occur in the event that the borrower cannot meet its contractual obligation. The lending agent may reinvest collateral from securities lending transactions according to agreed parameters. For futures contracts, interest rate swaps and credit default swaps, the program calls for each participating fund to pledge collateral for initial and variation margin by contract. For forward currency contracts, the program calls for each participating fund to either receive or pledge collateral based on the net gain or loss on unsettled forward currency contracts by counterparty. For future delivery contracts, the program calls for each participating fund to either receive or pledge collateral based on the net gain or loss on unsettled contracts by certain counterparties. The purpose of the collateral is to cover potential losses that could occur in the event that either party cannot meet its contractual obligation. Non-cash collateral pledged by each participating fund, if any, is disclosed in each fund's investment portfolio, and cash collateral pledged by each participating fund, if any, is held in a segregated account with the fund's custodian, which is reflected as pledged cash in each fund's statement of assets and liabilities.

Rights of offset – Funds that hold forward currency contracts have enforceable master netting agreements with certain counterparties, where amounts payable by each party to the other in the same currency (with the same settlement date and with the same counterparty) are settled net of each party's payment obligation. If an early termination date occurs under these agreements following an event of default or termination event, all obligations of each party to its counterparty are settled net through a single payment in a single currency ("close-out netting"). For financial reporting purposes, the funds do not offset financial assets and financial liabilities that are subject to these master netting arrangements in the statements of assets and liabilities.

The following tables present each fund's forward currency contracts by counterparty that are subject to master netting agreements but that are not offset in the funds' statements of assets and liabilities. The net amount column shows the impact of offsetting on the funds' statement of assets and liabilities as of December 31, 2019, if close-out netting was exercised (dollars in thousands):

6. Taxation and distributions

Federal income taxation – Each fund complies with the requirements under Subchapter M of the Internal Revenue Code applicable to mutual funds and intends to distribute substantially all of its net taxable income and net capital gains each year. The funds are not subject to income taxes to the extent such distributions are made. Therefore, no federal income tax provision is required.

As of and during the period ended December 31, 2019, none of the funds had a liability for any unrecognized tax benefits. Each fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in their respective statements of operations. During the period, none of the funds incurred any significant interest or penalties.

Each fund's tax returns are not subject to examination by federal, state and, if applicable, non-U.S. tax authorities after the expiration of each jurisdiction's statute of limitations, which is generally three years after the date of filing but can be extended in certain jurisdictions.

Non-U.S. taxation – Dividend and interest income, if any, are recorded net of non-U.S. taxes paid. The funds may file withholding tax reclaims in certain jurisdictions to recover a portion of amounts previously withheld. As a result of rulings from European courts, the funds filed for additional reclaims related to prior years. These reclaims are recorded when the amount is known and there are no significant uncertainties on collectability. Gains realized by the funds on the sale of securities in certain countries, if any, may be subject to non-U.S. taxes. If applicable, the funds record an estimated deferred tax liability based on unrealized gains to provide for potential non-U.S. taxes payable upon the sale of these securities.

Distributions – Distributions paid to shareholders are based on each fund's net investment income and net realized gains determined on a tax basis, which may differ from net investment income and net realized gains for financial reporting purposes. These differences are due primarily to different treatment for items such as currency gains and losses; short-term capital gains and losses; capital losses related to sales of certain securities within 30 days of purchase; unrealized appreciation of certain investments in securities outside the U.S.; deferred expenses; cost of investments sold; paydowns on fixed-income securities; net capital losses; non-U.S. taxes on capital gains; amortization of premiums and discounts and income on certain investments. The fiscal year in which amounts are distributed may differ from the year in which the net investment income and net realized gains are recorded by the funds for financial reporting purposes.

Additional tax basis disclosures for each fund as of December 31, 2019, were as follows (dollars in thousands):

	Global Growth Fund	Global Small Capitalization Fund	Growth Fund	International Fund	New World Fund	Blue Chip Income and Growth Fund

7. Fees and transactions

CRMC, the series' investment adviser, is the parent company of American Funds Distributors®, Inc. ("AFD"), the distributor of the series' shares, and American Funds Service Company® ("AFS"), the series' transfer agent. CRMC, AFD and AFS are considered related parties to the series.

Investment advisory services – The series has an investment advisory and service agreement with CRMC that provides for monthly fees accrued daily. These fees are based on annual rates that generally decrease as net asset levels increase. CRMC receives investment advisory fees from the underlying funds held by the managed risk funds. These fees are included in the net effective expense ratios that are provided as additional information in the financial highlights tables. Subadvisory fees for the managed risk funds are paid by CRMC to Milliman FRM. The managed risk funds are not responsible for paying any subadvisory fees.

Investment advisory services waivers – On March 4, 2019, the series board of trustees approved amended agreements effective May 1, 2019, decreasing the annual rate to 0.500% on daily net assets in excess of \$1.5 billion for International Growth and Income Fund, and decreasing the annual rate to 0.410% on daily net assets in excess of \$1 billion for Capital Income Builder. CRMC voluntarily reduced the investment advisory services fees to the approved rates in advance of the effective date. CRMC is also waiving a portion of its investment advisory services fees for each of the managed risk funds. Investment advisory services fees are presented in each fund's statement of operations gross of the waivers from CRMC. For the year ended December 31, 2019, total investment advisory services fees waived by CRMC were \$2,880,000.

The range of rates, net asset levels and the current annualized rates of average daily net assets for each fund before and after any investment advisory services waivers (if applicable), are as follows:

Fund	Rates		Net asset level (in billions)		For the year ended December 31, 2019, before waiver	For the year ended December 31, 2019, after waiver

Distribution services – The series has plans of distribution for all share classes except Class 1. Under the plans, the board of trustees approves certain categories of expenses that are used to finance activities primarily intended to sell fund shares. The plans provide for payments to pay service fees to firms that have entered into agreements with the series. These payments, based on an annualized percentage of average daily net assets, range from 0.18% to 0.50% as noted in the table below. In some cases, the board of trustees has limited the amounts that may be paid to less than the maximum allowed by the plans.

Share class	Currently approved limits	Plan limits
Class 1A	0.00%	0.25%
Class 2	0.25	0.25
Class 3	0.18	0.18
Class 4	0.25	0.25
Class P1	0.00	0.25
Class P2	0.25	0.50

Insurance administrative services – The series has an insurance administrative services plan for Class 1A, 4, P1 and P2 shares. Under the plan, these share classes pay 0.25% of each insurance company's respective average daily net assets in each share class to compensate the insurance companies for services provided to their separate accounts and contractholders for which the shares of the fund are beneficially owned as underlying investments of such contractholders' annuities. These services include, but are not limited to, maintenance, shareholder communications and transactional services. The insurance companies are not related parties to the series.

Transfer agent services – The series has a shareholder services agreement with AFS under which the funds compensate AFS for providing transfer agent services to all of the funds' share classes. These services include recordkeeping, shareholder communications and transaction processing. In addition, the managed risk funds reimburse AFS for amounts paid to third parties for performing transfer agent services on behalf of fund shareholders.

Administrative services – The series has an administrative services agreement with CRMC under which each fund compensates CRMC for providing administrative services to all of the funds' share classes except Class P1 and P2 shares. Administrative services are provided by CRMC and its affiliates to help assist third parties providing non-distribution services to fund shareholders. These services include providing in depth information on each fund and market developments that impact fund investments. Administrative services also include, but are not limited to, coordinating, monitoring and overseeing third parties that provide services to fund shareholders. The agreement provides each fund, other than the managed risk funds, the ability to charge an administrative services fee at the annual rate of 0.05% of daily net assets attributable to each share class. Prior to July 1, 2019, all share classes of each fund, other than the managed-risk funds, paid CRMC an administrative services fee at the annual rate of 0.01% of daily net assets. The series board of trustees authorized the funds, other than the managed risk funds, to pay CRMC effective July 1, 2019, an administrative services fee at the annual rate of 0.03% of the daily net assets of each share class for CRMC's provision of administrative services. For the managed risk funds, CRMC receives administrative services fees at an annual rate of 0.03% of daily net assets from Class 1 shares of the underlying funds for administrative services provided to the series.

Accounting and administrative services – The managed risk funds have a subadministration agreement with BNY Mellon under which the fund compensates BNY Mellon for providing accounting and administrative services to each of the managed risk funds' share classes. These services include, but are not limited to, fund accounting (including calculation of net asset value), financial reporting and tax services. BNY Mellon is not a related party to the managed risk funds.

Class-specific expenses under the agreements described above were as follows (dollars in thousands):

Miscellaneous fee reimbursements – CRMC has agreed to reimburse a portion of miscellaneous fees and expenses of Managed Risk Growth Fund, Managed Risk International Fund and Managed Risk Blue Chip Income and Growth Fund. Miscellaneous expenses exclude investment advisory services and distribution services fees. These reimbursements may be adjusted or discontinued by CRMC, subject to any restrictions in the series' prospectus. For the year ended December 31, 2019, total fees and expenses reimbursed by CRMC were \$74,000. Fees and expenses in each fund's statement of operations are presented gross of any reimbursements from CRMC.

Trustees' deferred compensation – Trustees who are unaffiliated with CRMC may elect to defer the cash payment of part or all of their compensation. These deferred amounts, which remain as liabilities of the funds, are treated as if invested in one or more of the American Funds. These amounts represent general, unsecured liabilities of the funds and vary according to the total returns of the selected funds. Trustees' compensation, shown on the accompanying financial statements, reflects current fees (either paid in cash or deferred) and a net increase in the value of the deferred amounts as follows (dollars in thousands):

Fund	Current fees	Increase in value of deferred amounts	Total trustees' compensation
Global Growth Fund	\$ 31	\$11	\$ 42
Global Small Capitalization Fund	21	7	28

*Amount less than one thousand.

Affiliated officers and trustees – Officers and certain trustees of the series are or may be considered to be affiliated with CRMC, AFD and AFS. No affiliated officers or trustees received any compensation directly from any fund in the series.

Investment in CCF – Some of the funds hold shares of CCF, an institutional prime money market fund managed by CRMC. CCF invests in high-quality, short-term money market instruments. CCF is used as the primary investment vehicle for each fund's short-term investments. CCF shares are only available for purchase by CRMC, its affiliates, and other funds managed by CRMC. CCF shares are not available to the public. CRMC does not receive an investment advisory services fee from CCF.

Security transactions with related funds – The funds may purchase from, or sell securities to, other CRMC-managed funds (or funds managed by certain affiliates of CRMC) under procedures adopted by the fund's board of trustees. The funds involved in such transactions are considered related by virtue of having a common investment adviser (or affiliated investment advisers), common trustees and/or common officers. When such transactions occur, each transaction is executed at the current market price of the security and no brokerage commissions or fees are paid in accordance with Rule 17a-7 of the 1940 Act.

The following table presents purchase and sale transactions between each fund and related funds as of December 31, 2019 (dollars in thousands):

Fund	Purchases	Sales	Net realized gain (loss)
Global Growth Fund	\$ 24,083	\$ 81,665	\$ 14,006
Global Small Capitalization Fund	36,878	122,208	33,693

Global Bond Fund	4,273	1,394	(2)
High-Income Bond Fund	4,365	9,431	(2,079)

8. Committed line of credit

Global Small Capitalization Fund, New World Fund and High-Income Bond Fund participate with other funds managed by CRMC in a \$1.5 billion credit facility (the "line of credit") to be utilized for temporary purposes to fund shareholder redemptions. Each fund has agreed to pay commitment fees on its pro-rata portion of the line of credit, which are reflected in other expenses in each fund's statement of operations. None of the funds borrowed on this line of credit at any time during the year ended December 31, 2019.

9. Capital share transactions

Capital share transactions in the funds were as follows (dollars and shares in thousands):

¹Based on average shares outstanding.

²Ratios do not include expenses of any Central Funds. The fund indirectly bears its proportionate share of the expenses of any Central Funds, if applicable.

³Based on operations for a period that is less than a full year.

⁴Class 1A shares began investment operations on January 6, 2017.

⁵Not annualized.

⁶Annualized.

⁷Amount less than \$1 million.

⁸Amount less than \$.01.

⁹Amount less than .01%.

¹⁰All or a significant portion of assets in this class consisted of seed capital invested by CRMC and/or its affiliates. Certain fees (including, where applicable, fees for distribution services) are not charged or accrued on these seed capital assets. If such fees were paid by the fund on seed capital assets, fund expenses would have been higher and net income and total return would have been lower.

¹¹On May 1, 2016, the fund converted from a cash fund to an ultra-short-term bond fund and changed its name from Cash Management Fund to Ultra-Short Bond Fund.

¹²This column reflects the impact of certain waivers/reimbursements by CRMC. CRMC waived a portion of investment advisory services and reimbursed a portion of miscellaneous fees and expenses for the managed risk funds.

¹³This column reflects the net effective expense ratios for each fund and class, which are unaudited. These ratios include each class's expense ratio combined with the weighted average net expense ratio of the underlying funds for the periods presented. See expense example for further information regarding fees and expenses.

¹⁴Refer to Note 5 for further information on mortgage dollar rolls.

¹⁵Rates do not include the fund's portfolio activity with respect to any Central Funds, if applicable.

¹⁶Amount is either less than 1% or there is no turnover.

See notes to financial statements.

Report of Independent Registered Public Accounting Firm

To the Board of Trustees of American Funds Insurance Series and Shareholders of Global Growth Fund, Global Small Capitalization Fund, Growth Fund, International Fund, New World Fund®, Blue Chip Income and Growth Fund, Global Growth and Income Fund, Growth-Income Fund, International Growth and Income Fund, Capital Income Builder®, Asset Allocation Fund, Global Balanced Fund, Bond Fund, Global Bond Fund, High-Income Bond Fund, Mortgage Fund, Ultra-Short Bond Fund, U.S. Government/AAA-Rated Securities Fund, Managed Risk Growth Fund, Managed Risk International Fund, Managed Risk Blue Chip Income and Growth Fund, Managed Risk Growth-Income Fund and Managed Risk Asset Allocation Fund

Opinions on the Financial Statements

We have audited the accompanying statements of assets and liabilities, including summary investment portfolios of Global Growth Fund, Global Small Capitalization Fund, Growth Fund, International Fund, New World Fund®, Blue Chip Income and Growth Fund, Global Growth and Income Fund, Growth-Income Fund, International Growth and Income Fund, Capital Income Builder®, Asset Allocation Fund, Global Balanced Fund, Bond Fund, Global Bond Fund, High-Income Bond Fund, Mortgage Fund and U.S. Government/AAA-Rated Securities Fund and investment portfolios of Ultra-Short Bond Fund, Managed Risk Growth Fund, Managed Risk International Fund, Managed Risk Blue Chip Income and Growth Fund, Managed Risk Growth-Income Fund and Managed Risk Asset Allocation Fund, (twenty-three of the funds constituting American Funds Insurance Series, hereafter collectively referred to as the "Funds") as of December 31, 2019, the related statements of operations for the year ended December 31, 2019, the statements of changes in net assets for each of the two years in the period ended December 31, 2019, including the related notes, and the financial highlights for each of the periods indicated therein (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds as of December 31, 2019, the results of each of their operations for the year then ended, the changes in each of their net assets for each of the two years in the period ended December 31, 2019 and each of the financial highlights for each of the periods indicated therein in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinions

These financial statements are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2019 by correspondence with the custodians, transfer agent and brokers; when replies were not received from the transfer agent and brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

/s/PricewaterhouseCoopers LLP

Los Angeles, California
February 11, 2020

We have served as the auditor of one or more investment companies in The Capital Group Companies Investment Company Complex since 1934.

The funds in American Funds Insurance Series serve as the underlying investment vehicle for various insurance products. As an owner of an insurance contract that invests in one of the funds in the series, you incur two types of costs: (1) transaction costs, such as initial sales charges on purchase payments and contingent deferred sales charges on redemptions (loads), and (2) ongoing costs, including management fees, distribution and service (12b-1) fees, and other expenses. Additional fees are charged by the insurance companies related to the various benefits they provide. This example is intended to help you understand your ongoing costs (in dollars) of investing in the underlying funds so you can compare these costs with the ongoing costs of investing in other mutual funds that serve a similar function in other annuity products. The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire six-month period (July 1, 2019, through December 31, 2019).

Actual expenses:

The first line of each share class in the tables on the following pages provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading titled "Expenses paid during period" to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes:

The second line of each share class in the tables on the following pages provides information about hypothetical account values and hypothetical expenses based on the actual expense ratio for the share class and an assumed rate of return of 5.00% per year before expenses, which is not the actual return of the share class. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the fund and other funds. To do so, compare this 5.00% hypothetical example with the 5.00% hypothetical examples that appear in the shareholder reports of the other funds.

Notes:

Additional fees are charged by the insurance companies related to the various benefits they provide. You can estimate the impact of these fees by adding the amount of the fees to the total estimated expenses you paid on your account during the period as calculated above. In addition, your ending account value would be lower by the amount of these fees.

Note that the expenses shown in the tables on the following pages are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of each share class in the table is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

¹The “expenses paid during period” are equal to the “annualized expense ratio,” multiplied by the average account value over the period, multiplied by the number of days in the period, and divided by 365 (to reflect the one-half year period).

²The “expenses paid during period” and “annualized expense ratio” do not include the expenses of the underlying funds in which each fund invests.

³The “effective expenses paid during period” are equal to the “effective annualized expense ratio,” multiplied by the average account value over the period, multiplied by the number of days in the period, and divided by 365 (to reflect the period).

⁴The “effective annualized expense ratio” reflects the net annualized expense ratio of the class plus the class’s pro-rata share of the weighted average expense ratio of the underlying funds in which it invests.

Liquidity Risk Management Program

The series has adopted a liquidity risk management program (the “program”). The series’ board has designated Capital Research and Management Company (“CRMC”) as the administrator of the program. Personnel of CRMC or its affiliates conduct the day-to-day operation of the program pursuant to policies and procedures administered by the Capital Group Liquidity Risk Management Committee.

Under the program, CRMC manages each fund’s liquidity risk, which is the risk that the fund could not meet shareholder redemption requests without significant dilution of remaining shareholders’ interests in the fund. This risk is managed by monitoring the degree of liquidity of each fund’s investments, limiting the amount of each fund’s illiquid investments, and utilizing various risk management tools and facilities available to each fund for meeting shareholder redemptions, among other means. CRMC’s process of determining the degree of liquidity of each fund’s investments is supported by one or more third-party liquidity assessment vendors.

The series’ board reviewed a report prepared by CRMC regarding the operation and effectiveness of the program for the period December 1, 2018, through September 30, 2019. No significant liquidity events impacting any of the funds were noted in the report. In addition, CRMC provided its assessment that the program had been effective in managing each fund’s liquidity risk.

Board of trustees and other officers

Independent trustees¹

Name and year of birth	Year first elected a trustee of the series ²	Principal occupation(s) during past five years	Number of portfolios in fund complex overseen by trustee	Other directorships ³ held by trustee
William H. Baribault , 1945	2009	Chairman of the Board and CEO, Oakwood Advisors (private investment and consulting); former CEO and President, Richard Nixon Foundation	89	General Finance Corporation
James G. Ellis , 1947	2010	Professor of Marketing and former Dean, Marshall School of Business, University of Southern California	99	Mercury General Corporation
Nariman Farvardin , 1956	2018	President, Stevens Institute of Technology	86	None
Mary Davis Holt , 1950	2015-2016; 2017	Principal, Mary Davis Holt Enterprises, LLC (leadership development consulting); former Partner, Flynn Heath Holt Leadership, LLC (leadership consulting); former COO, Time Life Inc. (1993-2003)	86	None
R. Clark Hooper , 1946	2010	Private investor	89	None
Merit E. Janow , 1958	2007	Dean and Professor, Columbia University, School of International and Public Affairs	88	Mastercard Incorporated; Trimble Inc.
Margaret Spellings , 1957 Chairman of the Board (Independent and Non-Executive)	2010	CEO, Texas 2036; former President, Margaret Spellings & Company (public policy and strategic consulting); former President, The University of North Carolina; former President, George W. Bush Foundation	90	None
Alexandra Trower , 1964	2018	Executive Vice President, Global Communications and Corporate Officer, The Estée Lauder Companies	85	None

Interested trustees^{4,5}

Name, year of birth and position with series	Year first elected a trustee or officer of the series ²	Principal occupation(s) during past five years and positions held with affiliated entities or the principal underwriter of the series	Number of portfolios in fund complex overseen by trustee	Other directorships ³ held by trustee
Donald D. O'Neal , 1960 Co-President	1998	Partner – Capital International Investors, Capital Research and Management Company; Partner – Capital International Investors, Capital Bank and Trust Company; ⁶ Director, Capital Research and Management Company	35	None
Michael C. Gitlin , 1970	2019	Vice Chairman and Director, Capital Research and Management Company; Partner – Capital Fixed Income Investors, Capital Research and Management Company; Director, The Capital Group Companies, Inc.; ⁶ served as Head of Fixed Income at a large investment management firm prior to joining Capital Research and Management Company in 2015	85	None

The series statement of additional information includes further details about the series trustees and is available without charge upon request by calling American Funds Service Company at (800) 421-4225 or by visiting the Capital Group website at capitalgroup.com. The address for all trustees and officers of the series is 333 South Hope Street, Los Angeles, CA 90071, Attention: Secretary.

Other officers⁵

Name, year of birth and position with series	Year first elected an officer of the series ²	Principal occupation(s) during past five years and positions held with affiliated entities or the principal underwriter of the series
Alan N. Berro , 1960 Co-President	1998	Partner – Capital World Investors, Capital Research and Management Company; Partner – Capital World Investors, Capital Bank and Trust Company; ⁶ Director, The Capital Group Companies, Inc. ⁶
Maria Manotok , 1974 Executive Vice President	2012	Senior Vice President and Senior Counsel – Fund Business Management Group, Capital Research and Management Company; Senior Vice President, Senior Counsel and Director, Capital International, Inc.; ⁶ Director, Capital Group Investment Management Limited ⁶

¹ The term independent trustee refers to a trustee who is not an “interested person” of the series within the meaning of the Investment Company Act of 1940.

² Trustees and officers of the series serve until their resignation, removal or retirement.

³ This includes all directorships/trusteeships (other than those in the American Funds or other funds managed by Capital Research and Management Company or its affiliates) that are held by each trustee as a trustee or director of a public company or a registered investment company.

⁴ The term interested trustee refers to a trustee who is an “interested person” within the meaning of the Investment Company Act of 1940, on the basis of their affiliation with the series investment adviser, Capital Research and Management Company, or affiliated entities (including the series principal underwriter).

⁵ All of the trustees and/or officers listed, with the exception of Martin Jacobs, Keiko McKibben and Renaud H. Samyn, are officers and/or directors/trustees of one or more of the other funds for which Capital Research and Management Company serves as investment adviser.

⁶ Company affiliated with Capital Research and Management Company.

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the series prospectuses and summary prospectuses, which can be obtained from your financial professional and should be read carefully before investing. You may also call American Funds Service Company (AFS) at (800) 421-4225 or visit the Capital Group website at capitalgroup.com.

"American Funds Proxy Voting Procedures and Principles" – which describes how we vote proxies relating to portfolio securities – is available on the Capital Group website or upon request by calling AFS. The series files its proxy voting record with the U.S. Securities and Exchange Commission (SEC) for the 12 months ended June 30 by August 31. The proxy voting record is available free of charge on the SEC website at sec.gov and on the Capital Group website.

Complete December 31, 2019, portfolios of American Funds Insurance Series' investments are available free of charge by calling AFS or visiting the SEC website (where they are part of Form N-CSR).

American Funds Insurance Series files a complete list of its portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form NPORT-P. This filing is available free of charge on the SEC website. Additionally, the list of portfolio holdings is available by calling AFS.

This report is for the information of American Funds Insurance Series investors, but it also may be used as sales literature when preceded or accompanied by the current prospectuses or summary prospectuses for American Funds Insurance Series and the prospectus for the applicable insurance contract, which give details about charges, expenses, investment objectives and operating policies of the series. If used as sales material after March 31, 2020, this report must be accompanied by a statistical update for the most recently completed calendar quarter.

Fund attribution data was produced using FactSet, a third-party software system, based on daily portfolios. Securities in their initial period of acquisition may not be included in this analysis. The analysis includes equity investments only and excludes forward contracts and fixed income investments, if applicable. It does not account for buy-and-sell transactions that might have occurred intraday. As a result, average portfolio weight percentages are approximate, and the actual average portfolio weight percentages might be higher or lower. Data elements, such as pricing, income, market cap, etc., were provided by FactSet. The indexes provided for attribution are based on FactSet's methodology. The indexes are broad-based market benchmarks and may not be used by Capital Group® as the sole comparative index for the funds. Capital Group believes the software and information from FactSet to be reliable. However, Capital Group cannot be responsible for inaccuracies, incomplete information or updating of information by FactSet.

Futures may not provide an effective hedge of the underlying securities because changes in the prices of futures may not track those of the securities they are intended to hedge. In addition, the managed risk strategy may not effectively protect the fund from market declines and will limit the fund's participation in market gains. The use of the managed risk strategy could cause the fund's return to lag that of the underlying fund in certain market conditions.

The Capital Advantage[®]

Since 1931, Capital Group, home of American Funds, has helped investors pursue long-term investment success. Our consistent approach – in combination with The Capital SystemSM – has resulted in superior outcomes.

Aligned with investor success

We base our decisions on a long-term perspective, which we believe aligns our goals with the interests of our clients. American Funds Insurance Series portfolio managers average 28 years of investment experience, including 23 years at our company, reflecting a career commitment to our long-term approach.¹

The Capital System

The Capital System combines individual accountability with teamwork. Funds using The Capital System are divided into portions that are managed independently by investment professionals with diverse backgrounds, ages and investment approaches. An extensive global research effort is the backbone of our system.

American Funds Insurance Series superior outcomes

American Funds Insurance Series equity funds have beaten their comparable Lipper indexes in 90% of 10-year periods and 100% of 20-year periods.² Our fixed income funds have helped investors achieve diversification through attention to correlation between bonds and equities.³ We strive to keep management fees competitive. Over the past 20 years, most funds' fees have been below industry averages.⁴

¹ Portfolio manager experience as of the American Funds Insurance Series prospectus dated May 1, 2020.

² Based on Class 1 share results for rolling periods through December 31, 2019. Periods covered are the shorter of the fund's lifetime or since the inception date of the comparable Lipper index or average. The comparable Lipper indexes are: Global Funds Index (Global Growth Fund, Global Growth and Income Fund), Growth Funds Index (Growth Fund), International Funds Index (International Fund), Emerging Markets Funds Index (New World Fund), Growth & Income Funds Index (Blue Chip Income and Growth Fund, Growth-Income Fund) and Balanced Funds Index (Asset Allocation Fund). The Lipper Global Small-/Mid-Cap Funds Average was used for Global Small Capitalization Fund. Lipper source: Refinitiv Lipper. There have been periods when the fund has lagged the index.

³ Based on Class 1 share results as of December 31, 2019. Four of our five fixed income funds showed a three-year correlation below 0.1. Standard & Poor's 500 Composite Index was used as an equity market proxy. Correlation based on monthly total returns. Correlation is a statistical measure of how two securities move in relation to each other. A correlation ranges from -1 to 1. A positive correlation close to 1 implies that as one security moves, either up or down, the other security will move in "lockstep," in the same direction. A negative correlation close to -1 indicates that the securities have moved in the opposite direction.

⁴ Based on management fees for the 20-year period ended December 31, 2019, versus comparable Lipper categories, excluding funds of funds.
