Dear Shareholder:

Security Investors, LLC (the “Investment Adviser”) is pleased to present the semi-annual shareholder report for a selection of our Funds (the “Fund” or “Funds”) that are part of the Rydex Variable Trust. This report covers performance of the Funds for the semi-annual period ended June 30, 2021.

The Investment Adviser is a part of Guggenheim Investments, which represents the investment management businesses of Guggenheim Partners, LLC (“Guggenheim”), a global, diversified financial services firm.

Guggenheim Funds Distributors, LLC is the distributor of the Funds. Guggenheim Funds Distributors, LLC is affiliated with Guggenheim and the Investment Adviser.

We encourage you to read the Economic and Market Overview section of the report, which follows this letter.

We are committed to providing innovative investment solutions and appreciate the trust you place in us.

Sincerely,

Security Investors, LLC

COVID-19. The global ongoing crisis caused by the outbreak of COVID-19 and the current recovery underway is causing disruption to consumer demand and economic output and supply chains. There are still travel restrictions and quarantines, and adverse impacts on local and global economies. Investors should be aware that in light of this uncertainty, volatility and distress in economies, financial markets, and labor and health conditions all over the world, the Funds’ investments and a shareholder’s investment in a Fund are subject to sudden and substantial losses, increased volatility and other adverse events. Firms through which investors invest with the Funds, the Funds, their service providers, the markets in which they invest and market intermediaries are also impacted by quarantines and similar measures intended to respond to and contain the ongoing pandemic, which can obstruct their functioning and subject them to heightened operational and other risks.

Inverse and leveraged funds are not suitable for all investors. • These Funds should be utilized only by investors who (a) understand the risks associated with the use of leverage, (b) understand the consequences of seeking daily leveraged investment results, (c) understand the risk of shorting, and (d) intend to actively monitor and manage their investments. • The more a Fund invests in leveraged instruments, the more the leverage will magnify any gains or losses on those investments. • Inverse funds involve certain risks, which include increased volatility due to the Funds' possible use of short sales of securities and derivatives, such as options and futures. • The Funds' use of derivatives, such as futures, options and swap agreements, may expose the Funds' shareholders to additional risks that they would not be subject to if they invested directly in the securities underlying those derivatives. • Short-selling involves increased risks and costs. You risk paying more for a security than you received from its sale. • Leveraged and inverse funds seek to provide investment results that match the performance of a specific benchmark, before fees and expenses, on a daily basis. Because the Funds seek to track the performance of their benchmark on a daily basis, mathematical compounding, especially with respect to those Funds that use leverage as part of their investment strategy, may prevent a fund from correlating with the monthly, quarterly, annual or other period performance of its benchmark. **Due to the compounding of daily returns, leveraged and inverse funds' returns over periods other than one day will likely differ in amount and possibly direction from the benchmark return for the same period.** For those Funds that consistently apply leverage, the value of the Fund's shares will tend to increase or decrease more than the value of any increase or decrease in its benchmark index. The Funds rebalance their portfolios on a daily basis, increasing exposure in response to that day's gains or reducing exposure in response to that day's losses. Daily rebalancing will impair a fund's performance if the benchmark experiences volatility. **Investors should monitor their leveraged and inverse funds' holdings consistent with their strategies, as frequently as daily.** • For more on these and other risks, please read the prospectus.

The NASDAQ-100® Fund may not be suitable for all investors. • Investing in Rydex NASDAQ-100® Fund involves certain risks, which may include increased volatility due to the use of futures and the possibility that companies in which the Fund invests may not be commercially successful or may become obsolete more quickly. • There are no assurances that any Rydex Fund will achieve its objective and/or strategy. This Fund is subject to active trading and tracking error risks, which may increase volatility, impact the Fund's ability to achieve its investment objective and may decrease the Fund's performance. • This Fund is considered non-diversified and can invest a greater portion of its assets in securities of individual issuers than a diversified fund. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a more diversified fund. • For more on these and other risks, please read the prospectus.

The Government Long Bond 1.2x Strategy and Inverse Government Long Bond Strategy funds are not suitable for all investors. • These Funds should be utilized only by investors who (a) understand the risks associated with the use of leverage, (b) understand the consequences of seeking daily leveraged investment results, and (c) intend to actively monitor and manage their investments. • The more a Fund invests in leveraged instruments, the more the leverage will magnify any gains or losses on those investments. • The Funds' use of derivatives, such as futures, options and swap agreements, may expose the Funds' shareholders to additional risks that they would not be subject to if they invested directly in the securities underlying those derivatives. • Leveraged and inverse Funds seek to provide investment results that match the performance of a specific benchmark, before fees and expenses, on a daily basis. Because the Funds seek to track the performance of their benchmark on a daily basis, mathematical compounding, especially with respect to those Funds that use leverage as part of their investment strategy, may prevent a fund from correlating with the monthly, quarterly, annual or other period performance of its benchmark. **Due to the compounding of daily returns, leveraged Funds' returns over periods other than one day will likely differ in amount and possibly direction from the benchmark return for the same period.** For those Funds that consistently apply leverage, the value of the fund's shares will tend to increase or decrease more than the value of any increase or decrease in its benchmark index. The Funds rebalance their portfolios on a daily basis, increasing exposure in response to that day's gains or reducing exposure in response to that day's losses. Daily rebalancing will impair a fund's performance if the benchmark experiences volatility. **Investors should monitor their leveraged Funds' holdings consistent with their strategies, as frequently as daily.** • In general, bond prices rise when interest rates fall, and vice versa. Moreover, while securities with longer maturities tend to produce higher yields, the price of longer maturity securities is also subject to greater fluctuations as a result of changes in interest rates. • It is important to note that the funds are not guaranteed by the U.S. government. • There are no assurances that any Guggenheim fund will achieve its objective and/or strategy. These Funds are subject to active trading and tracking error risks, which may increase volatility, impact the fund's ability to achieve its investment objective, and may decrease the Fund's performance. • For more on these and other risks, please read the prospectus.

The High Yield Strategy Fund may not be suitable for all investors. • The Fund's use of derivatives such as futures, options, and swap agreements will expose the Fund to additional risks that it would not be subject to if it invested directly in the securities underlying those derivatives. • A highly liquid secondary market may not exist for the credit default swaps the Fund invests in, and there can be no assurance that a highly liquid secondary market will develop. • The Fund's market value will change in response to interest rate changes and market conditions among other factors. • You may have a gain or loss when you sell your shares. • In general, bond prices rise when interest rates fall, and vice versa. • The Fund's exposure to the high yield bond market may subject the Fund to greater volatility because (i) it will be affected by the ability of high yield security issuers' ability to make principal and interest payments and (ii) the prices of derivatives linked to high yield bonds may fluctuate unpredictably and not necessarily in relation to interest rates. • It is important to note that the Fund is not guaranteed by the U.S. government. • The Fund is subject to active trading risks that may increase volatility and impact its ability to achieve its investment objective. • This Fund is considered non-diversified and can invest a greater portion of its assets in securities of individual issuers than a diversified fund. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would in a more diversified fund. • For more on these and other risks, please read the prospectus.

The U.S. Government Money Market Fund may not be suitable for all investors. • You could lose money by investing in the Fund. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time. • For more on these and other risks, please read the prospectus.

More states saw the end of COVID-19 related restrictions in the second quarter of 2021, including New York, California, and Illinois, marking a full reopening for almost all of the U.S. The U.S. has made solid vaccination progress, inoculating over 52% of the population. Those vaccinations have helped COVID-19 cases fall sharply from their peak, but the spread of the Delta variant is a worrying trend, particularly in areas with low vaccination rates. Though we expect cases will rise further as the Delta variant spreads, vaccination rates are high for the most vulnerable populations, which could limit hospitalizations and deaths, in turn reducing the need for a return to strict lockdowns.

Relaxed COVID-19 related measures and increased consumer comfort prompted a rapid reopening of the service sector and robust manufacturing activity. Both the ISM Manufacturing and Services Purchasing Managers Indexes cooled a bit in June but remain near the peaks of recent economic cycles.

Labor demand is also at record highs according to the National Federation of Independent Businesses ("NFIB"). The NFIB reported that nearly half of small-business owners in the U.S. could not fill job openings in June, making it the fifth consecutive month where the share of surveyed business owners citing jobs were hard to fill exceeded pre-COVID-19 historical highs. To attract more workers, business owners are raising or planning to raise compensation, especially in low-wage sectors where enhanced jobless benefits are competitive with wages. Corroborating this signal of strong labor demand is the consumer confidence data, which shows perceptions around job availability is above pre-COVID-19 highs.

Against this strong backdrop, the Federal Open Market Committee ("FOMC") held its June meeting where, as expected, it kept rates unchanged. But the surprise came from the quarterly Summary of Economic Projections, which showed that FOMC participants now see upside risks to inflation at the highest levels in over a decade. This shift in the distribution of risk around inflation resulted in a surprise two-hike increase in their median fed funds rate forecast for 2023.

Our interpretation is that the U.S. Federal Reserve ("Fed") is willing to be patient in reaching its dual mandate, but not irresponsible. Since the June meeting, 5-year forward Treasury Inflation-Protected Securities ("TIPS") breakeven rates have fallen by about 0.25% as the market priced out a scenario in which the Fed lets inflation run too hot. This reassessment of the Fed's reaction function led to a material decline in interest rates over the quarter. In the long run, keeping inflation expectations in check buys the central bank more time to keep policy accommodative.

Looking ahead, we are assessing the potential consequences of a slowdown in U.S. economic activity. Second quarter U.S. gross domestic product ("GDP") is on track to show 8-9% annualized growth, after which we expect sequential growth could slow heading into 2022. Base effects from last year's trough in activity could fade, as might the fiscal impulse over time. The impact of reopening businesses will also shrink. This natural slowdown in activity as we move through peak growth could present challenges if growth slows more than expected.

Inflation could fall given that much of the recent increase is coming from categories suffering temporary supply chain disruptions. Price pressures have materialized in sectors directly affected by the pandemic, such as hotels, airfares, and car rentals, where demand has bounced back faster than supply. Shortages in areas such as semiconductors and building materials are caused by factories and transportation abroad that have not returned to full capacity. As these factors are resolved and supply comes back online, a decline in inflation prints and inflation expectations over the next several quarters may prompt a rethink of the FOMC's forecasted hikes.

The Fed may commence tapering asset purchases in 2022, but we continue to believe rate hikes will likely get pushed as far as 2025 as inflation cools and the Fed targets a historically tight labor market. This patience by the Fed would support credit conditions, which could mean low default volumes and positive risk-adjusted returns. Real U.S. interest rates could remain deeply negative, further supporting the credit sector as income-seeking investors search for yield.

For the six-month period ended June 30, 2021, the S&P 500® Index* returned 15.25%. The MSCI Europe-Australasia-Far East ("EAFE") Index* returned 8.83%. The return of the MSCI Emerging Markets Index* was 7.45%.

In the bond market, the Bloomberg Barclays U.S. Aggregate Bond Index* posted a -1.60% return for the six-month period, while the Bloomberg Barclays U.S. Corporate High Yield Index* returned 3.62%. The return of the ICE Bank of America ("BofA") Merrill Lynch 3-Month U.S. Treasury Bill Index* was 0.02% for the six-month period.

***Index Definitions:**

The following indices are referenced throughout this report. Indices are unmanaged and not available for direct investment. Index performance does not reflect transaction costs, fees, or expenses.

Bloomberg Barclays U.S. Long Treasury Index includes all publicly issued, U.S. Treasury securities that have a remaining maturity of 10 or more years, are rated investment grade, and have \$250 million or more of outstanding face value. In addition, the securities must be denominated in U.S. dollars and must be fixed rate and nonconvertible. The Long U.S. Treasury Index is market capitalization weighted and the securities in the index are updated on the last business day of each month.

Bloomberg Barclays U.S. Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market, including U.S. Treasuries, government-related and corporate securities, mortgage-backed securities or "MBS" (agency fixed-rate and hybrid adjustable-rate mortgage, or "ARM", pass-throughs), asset-backed securities ("ABS"), and commercial mortgage-backed securities ("CMBS") (agency and non-agency).

Bloomberg Barclays U.S. Corporate High Yield Index measures the U.S. dollar-denominated, high yield, fixed-rate corporate bond market. Securities are classified as high yield if the middle rating of Moody's, Fitch, and S&P is Ba1/BB +/BB + or below.

Dow Jones Industrial Average® is a price-weighted average of 30 significant stocks traded on the New York Stock Exchange and the Nasdaq. The DJIA was invented by Charles Dow in 1896.

ICE BofA Merrill Lynch 3-Month U.S. Treasury Bill Index is an unmanaged market index of U.S. Treasury securities maturing in 90 days that assumes reinvestment of all income.

MSCI EAFE Index is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the U.S. & Canada.

MSCI Emerging Markets Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market performance in the global emerging markets.

NASDAQ-100® Index includes 100 of the largest domestic and international non-financial securities listed on The Nasdaq Stock Market based on market capitalization. The Index reflects companies across major industry groups including computer hardware and software, telecommunications, retail/wholesale trade and biotechnology. It does not contain securities of financial companies including investment companies.

Russell 2000® Index measures the performance of the small-cap value segment of the U.S. equity universe.

S&P 500® is a broad-based index, the performance of which is based on the performance of 500 widely held common stocks chosen for market size, liquidity, and industry group representation.

S&P MidCap 400® Index provides investors with a benchmark for mid-sized companies. The index covers approximately 7% of the U.S. equity market, and seeks to remain an accurate measure of mid-sized companies, reflecting the risk and return characteristics of the broader mid-cap universe on an on-going basis.

Many of the Funds described in this report are benchmarked daily to leveraged and/or inverse leveraged versions of published indices. To properly evaluate the performance of these funds, it is essential to understand the effect of mathematical compounding on their respective returns.

Because of the nonlinear effects of leverage applied over time, it is possible for a fund to perform in-line with its benchmark for several individual periods in a row, yet seem to trail the benchmark over the entire period on a cumulative basis. It is also possible that a fund that performs in-line with its benchmark on a daily basis may seem to outperform its benchmark over longer periods.

An Example of Compounding

For example, consider a hypothetical fund that is designed to produce returns that correspond to 150% of an index. On the first day of a period, the index rises from a level of 100 to a level of 106, producing a 6.0% gain and an expectation that the fund will rise by 9.0%. On the same day, the fund's net asset value per share ("NAV") increases from \$10.00 to \$10.90 for a gain of 9.0% — in line with its benchmark.

On day two, assume the index falls from 106 to 99 for a loss of about 6.6%. The fund, as expected, falls 9.9% to a price of \$9.82. On each day, the fund performed exactly in line with its benchmark, but for the two-day period, the fund was down 1.8%, while the index was down only 1.0%. Without taking into account the daily compounding of returns, one would expect the fund to lose 1.5% and would see the fund as trailing by 0.3% when in fact it had performed perfectly. This example is summarized in the table below.

	Index Level	Index Performance	Fund Expectation	Fund NAV	Fund Performance	Assessment
Start	100			\$10.00		
Day 1	106	6.0%	9.0%	\$10.90	9.0%	In line
Day 2	99	-6.6%	-9.9%	\$ 9.82	-9.9%	In line
Cumulative		-1.0%	-1.5%		-1.8%	-0.3%

As illustrated by this simple example, the effect of leverage can make it difficult to form expectations or judgments about fund performance given only the returns of the unleveraged index.

Because certain funds seek to track the performance of their benchmark on a daily basis, mathematical compounding, especially with respect to those funds that use leverage as part of their investment strategy, may prevent a fund from correlating with the monthly, quarterly, annual or other period performance of its benchmark. Due to the compounding of daily returns, leveraged and inverse funds' returns over periods other than one day will likely differ in amount and possibly direction from the benchmark return for the same period. Investors should monitor their leveraged and inverse funds' holdings to ensure that they are consistent with their strategies, as frequently as daily. For those funds that consistently apply leverage, the value of the fund's shares will tend to increase or decrease more than the value of any increase or decrease in its benchmark index. For more on correlation, leverage and other risks, please read the prospectus.

In general, any change in direction in an index will produce compounding that seems to work against an investor. Were the index to move in the same direction (either up or down) for two or more periods in a row, the compounding of those returns would work in an investor's favor, causing the fund to seemingly beat its benchmark.

As a general rule of thumb, more leverage in a fund will magnify the compounding effect, while less leverage will generally produce results that are more in line with expectations. In addition, periods of high volatility in an underlying index will also cause the effects of compounding to be more pronounced, while lower volatility will produce a more muted effect.

All mutual funds have operating expenses, and it is important for our shareholders to understand the impact of costs on their investments. Shareholders of a fund incur two types of costs: (i) transaction costs, including sales charges (loads) on purchase payments, reinvested dividends, other distributions, and exchange fees, and (ii) ongoing costs, including management fees, administrative services, and shareholder reports, among others. These ongoing costs, or operating expenses, are deducted from a fund's gross income and reduce the investment return of the fund.

A fund's expenses are expressed as a percentage of its average net assets, which is known as the expense ratio. The following examples are intended to help investors understand the ongoing costs (in dollars) of investing in a fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The examples are based on an investment of \$1,000 made at the beginning of the period and held for the entire six-month period beginning December 31, 2020 and ending June 30, 2021.

The following tables illustrate the Funds' costs in two ways:

Table 1. Based on actual Fund return: This section helps investors estimate the actual expenses paid over the period. The "Ending Account Value" shown is derived from the Fund's actual return, and the fifth column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. Investors may use the information here, together with the amount invested, to estimate the expenses paid over the period. Simply divide the Fund's account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number provided under the heading "Expenses Paid During Period."

Table 2. Based on hypothetical 5% return: This section is intended to help investors compare a fund's cost with those of other mutual funds. The table provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses paid during the period. The example is useful in making comparisons because the U.S. Securities and Exchange Commission (the "SEC") requires all mutual funds to calculate expenses based on the 5% return. Investors can assess a fund's costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The calculations illustrated above assume no shares were bought or sold during the period. Actual costs may have been higher or lower, depending on the amount of investment and the timing of any purchases or redemptions.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads) on purchase payments, and contingent deferred sales charges ("CDSC") on redemptions, if any. Therefore, the second table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

More information about the Funds' expenses, including annual expense ratios for periods up to five years (subject to the Fund's inception date), can be found in the Financial Highlights section of this report. For additional information on operating expenses and other shareholder costs, please refer to the appropriate Fund prospectus.

¹ This ratio represents annualized net expenses, which includes interest expense related to securities sold short. Excluding short interest expense, the operating expense ratio of the Inverse Government Long Bond Strategy Fund would be 1.68%. Excludes expenses of the underlying funds in which the Funds invest.

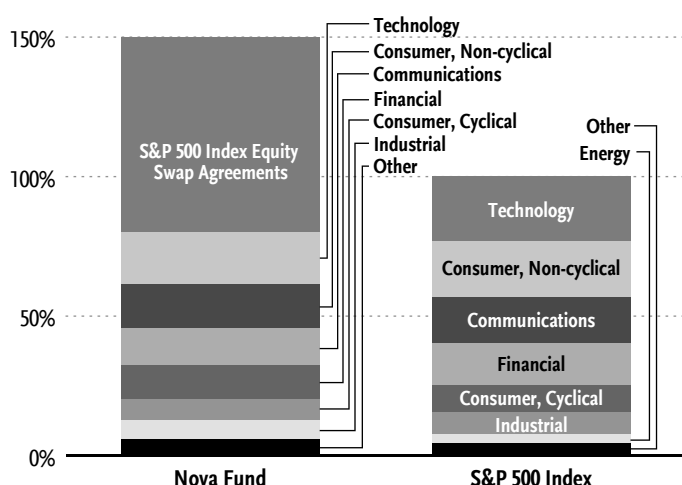

² Expenses are equal to the Fund's annualized expense ratio, net of any applicable fee waivers, multiplied by the average account value over the period, multiplied by 181/365 (to reflect the one-half year period). Expenses shown do not include fees charged by insurance companies.

³ Actual cumulative return at net asset value for the period December 31, 2020 to June 30, 2021.

NOVA FUND

OBJECTIVE: Seeks to provide investment results that match, before fees and expenses, the performance of a specific benchmark on a daily basis. The Fund's current benchmark is 150% of the performance of the S&P 500® Index (the "underlying index"). The Fund does not seek to achieve its investment objective over a period of time greater than one day.

Holdings Diversification (Market Exposure as % of Net Assets)

"Holdings Diversification (Market Exposure as % of Net Assets)" excludes any temporary cash investments, investments in Guggenheim Strategy Funds Trust mutual funds, or investments in Guggenheim Ultra Short Duration Fund. Investments in those Funds do not provide "market exposure" to meet the Fund's investment objective, but will significantly increase the portfolio's exposure to certain other asset categories (and their associated risks), which may cause the Fund to deviate from its principal investment strategy, including: (i) high yield, high risk debt securities rated below the top four long-term rating categories by a nationally recognized statistical rating organization (also known as "junk bonds"); (ii) securities issued by the U.S. government or its agencies and instrumentalities; (iii) CLOs and similar investments; and (iv) other short-term fixed income securities.

Inception Date: May 7, 1997

Average Annual Returns^{*,†}

Periods Ended June 30, 2021

	6 Month [‡]	1 Year	5 Year	10 Year
Nova Fund	22.12%	63.10%	22.78%	19.05%
S&P 500 Index	15.25%	40.79%	17.65%	14.84%

* The performance data above represents past performance that is not predictive of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Returns are historical and include changes in principal and reinvested dividends and capital gains and do not reflect the effect of taxes. The S&P 500 Index is an unmanaged index and, unlike the Fund, has no management fees or operating expenses to reduce its reported return.

† Performance figures do not reflect fees and expenses associated with an investment in variable insurance products. If returns had taken into account these fees and expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

‡ 6 month returns are not annualized.

Affiliated Transactions

Investments representing 5% or more of the outstanding voting shares of a company, or control of or by, or common control under Guggenheim Investments ("GI"), result in that company being considered an affiliated issuer, as defined in the 1940 Act.

The Fund may invest in certain of the underlying series of Guggenheim Strategy Funds Trust, including Guggenheim Strategy Fund II, Guggenheim Strategy Fund III, and Guggenheim Variable Insurance Strategy Fund III, (collectively, the "Short Term Investment Vehicles"), each of which are open-end management investment companies managed by GI. The Short Term Investment Vehicles, which launched on March 11, 2014, are offered as short term investment options only to mutual funds, trusts, and other accounts managed by GI and/or its affiliates, and are not available to the public. The Short Term Investment Vehicles pay no investment management fees. The Short Term Investment Vehicles' annual report on Form N-CSR dated September 30, 2020, is available publicly or upon request. This information is available from the EDGAR database on the SEC's website at <https://www.sec.gov/Archives/edgar/data/1601445/000182126820000133/gug81042-ncsr.htm>.

^a Unaudited figures for the period ended June 30, 2021. Percentage amounts for the period, except total return and portfolio turnover rate, have been annualized.

^b Net investment income (loss) per share was computed using average shares outstanding throughout the period.

^c Total return does not take into account any of the expenses associated with an investment in variable insurance products. If total return had taken into account these expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

^d Does not include expenses of the underlying funds in which the Fund invests.

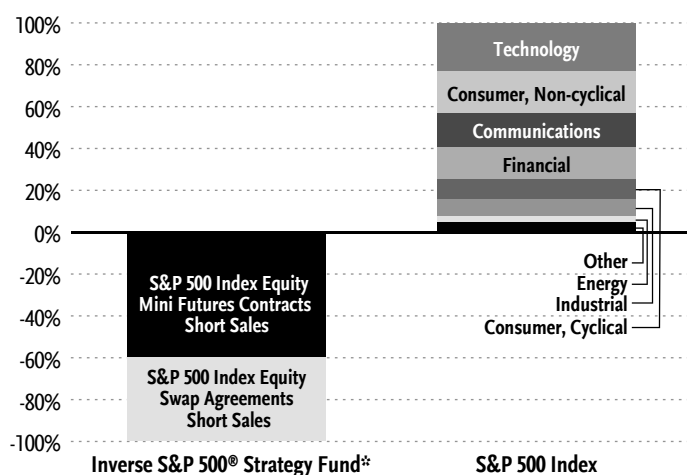

^e Net expense information reflects the expense ratios after expense waivers and reimbursements, as applicable.

^f Share split — Per share amounts for the year ended December 31, 2016, have been restated to reflect a 2:1 share split effective December 1, 2016.

INVERSE S&P 500® STRATEGY FUND

OBJECTIVE: Seeks to provide investment results that match, before fees and expenses, the performance of a specific benchmark on a daily basis. The Fund's current benchmark is the inverse (opposite) of the performance of the S&P 500® Index (the "underlying index"). The Fund does not seek to achieve its investment objective over a period of time greater than one day.

Holdings Diversification (Market Exposure as % of Net Assets)

"Holdings Diversification (Market Exposure as % of Net Assets)" excludes any temporary cash investments, investments in Guggenheim Strategy Funds Trust mutual funds, or investments in Guggenheim Ultra Short Duration Fund. Investments in those Funds do not provide "market exposure" to meet the Fund's investment objective, but will significantly increase the portfolio's exposure to certain other asset categories (and their associated risks), which may cause the Fund to deviate from its principal investment strategy, including: (i) high yield, high risk debt securities rated below the top four long-term rating categories by a nationally recognized statistical rating organization (also known as "junk bonds"); (ii) securities issued by the U.S. government or its agencies and instrumentalities; (iii) CLOs and similar investments; and (iv) other short-term fixed income securities.

Inception Date: June 9, 1997

The Fund invests principally in derivative investments such as swap agreements and futures contracts.

Largest Holdings (% of Total Net Assets)

Guggenheim Ultra Short Duration Fund — Institutional Class	25.7%
Guggenheim Strategy Fund II	14.4%
Total	40.1%

"Largest Holdings" excludes any temporary cash or derivative investments.

* The performance data above represents past performance that is not predictive of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Returns are historical and include changes in principal and reinvested dividends and capital gains and do not reflect the effect of taxes. The S&P 500 Index is an unmanaged index and, unlike the Fund, has no management fees or operating expenses to reduce its reported return.

† Performance figures do not reflect fees and expenses associated with an investment in variable insurance products. If returns had taken into account these fees and expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

‡ 6 month returns are not annualized.

INVERSE S&P 500® STRATEGY FUND**Affiliated Transactions**

Investments representing 5% or more of the outstanding voting shares of a company, or control of or by, or common control under Guggenheim Investments ("GI"), result in that company being considered an affiliated issuer, as defined in the 1940 Act.

The Fund may invest in certain of the underlying series of Guggenheim Strategy Funds Trust, including Guggenheim Strategy Fund II, Guggenheim Strategy Fund III, and Guggenheim Variable Insurance Strategy Fund III, (collectively, the "Short Term Investment Vehicles"), each of which are open-end management investment companies managed by GI. The Short Term Investment Vehicles, which launched on March 11, 2014, are offered as short term investment options only to mutual funds, trusts, and other accounts managed by GI and/or its affiliates, and are not available to the public. The Short Term Investment Vehicles pay no investment management fees. The Short Term Investment Vehicles' annual report on Form N-CSR dated September 30, 2020, is available publicly or upon request. This information is available from the EDGAR database on the SEC's website at <https://www.sec.gov/Archives/edgar/data/1601445/000182126820000133/gug81042-ncsr.htm>.

^a Unaudited figures for the period ended June 30, 2021. Percentage amounts for the period, except total return and portfolio turnover rate, have been annualized.

^b Net investment income (loss) per share was computed using average shares outstanding throughout the period.

^c Total return does not take into account any of the expenses associated with an investment in variable insurance products. If total return had taken into account these expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

^d Does not include expenses of the underlying funds in which the Fund invests.

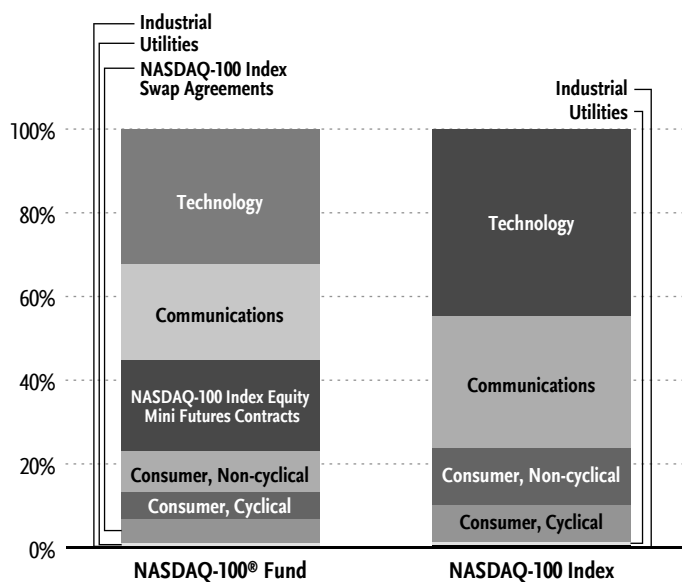

^e Net expense information reflects the expense ratios after expense waivers and reimbursements, as applicable.

^f Reverse share split — Per share amounts for the year ended December 31, 2016, have been restated to reflect a 1:6 reverse share split effective December 1, 2016.

NASDAQ-100® FUND

OBJECTIVE: Seeks to provide investment results that correspond, before fees and expenses, to a benchmark for over-the-counter securities on a daily basis. The Fund's current benchmark is the NASDAQ-100 Index® (the "underlying index").

Holdings Diversification (Market Exposure as % of Net Assets)

"Holdings Diversification (Market Exposure as % of Net Assets)" excludes any temporary cash investments, investments in Guggenheim Strategy Funds Trust mutual funds, or investments in Guggenheim Ultra Short Duration Fund. Investments in those Funds do not provide "market exposure" to meet the Fund's investment objective, but will significantly increase the portfolio's exposure to certain other asset categories (and their associated risks), which may cause the Fund to deviate from its principal investment strategy, including: (i) high yield, high risk debt securities rated below the top four long-term rating categories by a nationally recognized statistical rating organization (also known as "junk bonds"); (ii) securities issued by the U.S. government or its agencies and instrumentalities; (iii) CLOs and similar investments; and (iv) other short-term fixed income securities.

* The performance data above represents past performance that is not predictive of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Returns are historical and include changes in principal and reinvested dividends and capital gains and do not reflect the effect of taxes. The NASDAQ-100 Index is an unmanaged index and, unlike the Fund, has no management fees or operating expenses to reduce its reported return.

† Performance figures do not reflect fees and expenses associated with an investment in variable insurance products. If returns had taken into account these fees and expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

NASDAQ-100® FUND**Affiliated Transactions**

Investments representing 5% or more of the outstanding voting shares of a company, or control of or by, or common control under Guggenheim Investments ("GI"), result in that company being considered an affiliated issuer, as defined in the 1940 Act.

The Fund may invest in certain of the underlying series of Guggenheim Strategy Funds Trust, including Guggenheim Strategy Fund II, Guggenheim Strategy Fund III, and Guggenheim Variable Insurance Strategy Fund III, (collectively, the "Short Term Investment Vehicles"), each of which are open-end management investment companies managed by GI. The Short Term Investment Vehicles, which launched on March 11, 2014, are offered as short term investment options only to mutual funds, trusts, and other accounts managed by GI and/or its affiliates, and are not available to the public. The Short Term Investment Vehicles pay no investment management fees. The Short Term Investment Vehicles' annual report on Form N-CSR dated September 30, 2020, is available publicly or upon request. This information is available from the EDGAR database on the SEC's website at <https://www.sec.gov/Archives/edgar/data/1601445/000182126820000133/gug81042-ncsr.htm>.

^a Unaudited figures for the period ended June 30, 2021. Percentage amounts for the period, except total return and portfolio turnover rate, have been annualized.

^b Net investment income (loss) per share was computed using average shares outstanding throughout the period.

^c Total return does not take into account any of the expenses associated with an investment in variable insurance products. If total return had taken into account these expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

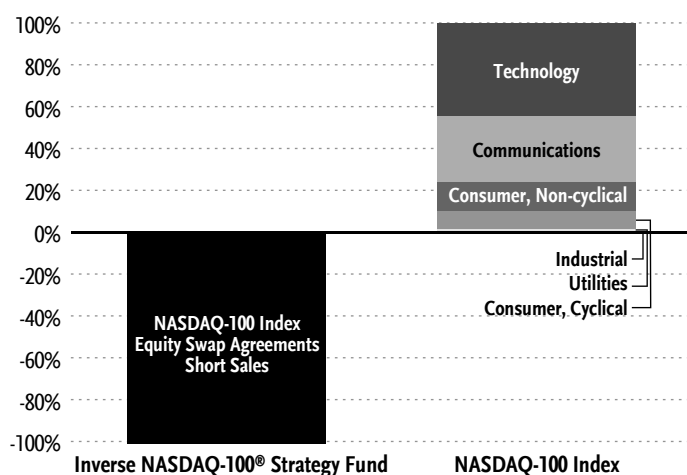

^d Does not include expenses of the underlying funds in which the Fund invests.

^e Net expense information reflects the expense ratios after expense waivers and reimbursements, as applicable.

INVERSE NASDAQ-100® STRATEGY FUND

OBJECTIVE: Seeks to provide investment results that match, before fees and expenses, the performance of a specific benchmark on a daily basis. The Fund's current benchmark is the inverse (opposite) of the performance of the NASDAQ-100 Index® (the "underlying index"). The Fund does not seek to achieve its investment objective over a period of time greater than one day.

Holdings Diversification (Market Exposure as % of Net Assets)

"Holdings Diversification (Market Exposure as % of Net Assets)" excludes any temporary cash investments, investments in Guggenheim Strategy Funds Trust mutual funds, or investments in Guggenheim Ultra Short Duration Fund. Investments in those Funds do not provide "market exposure" to meet the Fund's investment objective, but will significantly increase the portfolio's exposure to certain other asset categories (and their associated risks), which may cause the Fund to deviate from its principal investment strategy, including: (i) high yield, high risk debt securities rated below the top four long-term rating categories by a nationally recognized statistical rating organization (also known as "junk bonds"); (ii) securities issued by the U.S. government or its agencies and instrumentalities; (iii) CLOs and similar investments; and (iv) other short-term fixed income securities.

Inception Date: May 21, 2001

The Fund invests principally in derivative investments such as swap agreements and futures contracts.

Largest Holdings (% of Total Net Assets)

Guggenheim Strategy Fund II	22.6%
Guggenheim Ultra Short Duration Fund — Institutional Class	18.0%
Total	40.6%

"Largest Holdings" excludes any temporary cash or derivative investments.

* The performance data above represents past performance that is not predictive of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Returns are historical and include changes in principal and reinvested dividends and capital gains and do not reflect the effect of taxes. The NASDAQ-100 Index is an unmanaged index and, unlike the Fund, has no management fees or operating expenses to reduce its reported return.

† Performance figures do not reflect fees and expenses associated with an investment in variable insurance products. If returns had taken into account these fees and expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

‡ 6 month returns are not annualized.

Affiliated Transactions

Investments representing 5% or more of the outstanding voting shares of a company, or control of or by, or common control under Guggenheim Investments ("GI"), result in that company being considered an affiliated issuer, as defined in the 1940 Act.

The Fund may invest in certain of the underlying series of Guggenheim Strategy Funds Trust, including Guggenheim Strategy Fund II, Guggenheim Strategy Fund III, and Guggenheim Variable Insurance Strategy Fund III, (collectively, the "Short Term Investment Vehicles"), each of which are open-end management investment companies managed by GI. The Short Term Investment Vehicles, which launched on March 11, 2014, are offered as short term investment options only to mutual funds, trusts, and other accounts managed by GI and/or its affiliates, and are not available to the public. The Short Term Investment Vehicles pay no investment management fees. The Short Term Investment Vehicles' annual report on Form N-CSR dated September 30, 2020, is available publicly or upon request. ^a Unaudited figures for the period ended June 30, 2021. Percentage amounts for the period, except total return and portfolio turnover rate, have been annualized.

^b Net investment income (loss) per share was computed using average shares outstanding throughout the period.

^c Total return does not take into account any of the expenses associated with an investment in variable insurance products. If total return had taken into account these expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

^d Does not include expenses of the underlying funds in which the Fund invests.

^e Net expense information reflects the expense ratios after expense waivers and reimbursements, as applicable.

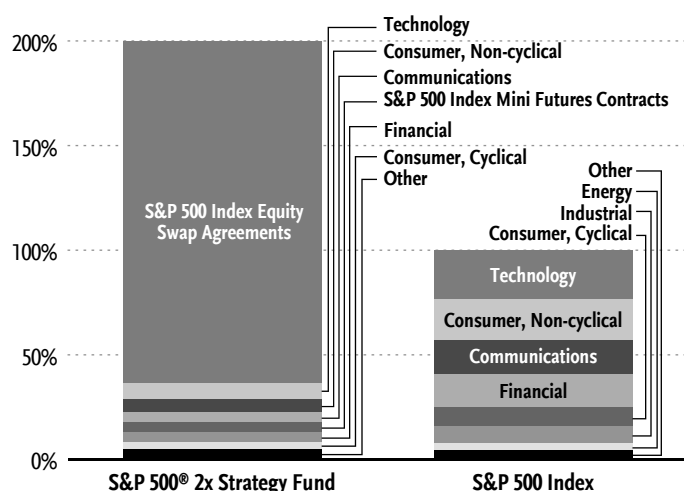

^f The amount shown for a share outstanding throughout the period does not agree with the aggregate net gain on investments for the year because of the sales and repurchases of fund shares in relation to fluctuating market value of the investments of the Fund.

^g Reverse share split — Per share amounts for the year ended December 31, 2016 have been restated to reflect a 1:4 reverse share split effective December 1, 2016.

S&P 500® 2x STRATEGY FUND

OBJECTIVE: Seeks to provide investment results that match, before fees and expenses, the performance of a specific benchmark on a daily basis. The Fund's current benchmark is 200% of the performance of the S&P 500® Index (the "underlying index"). The Fund does not seek to achieve its investment objective over a period of time greater than one day.

Holdings Diversification (Market Exposure as % of Net Assets)

"Holdings Diversification (Market Exposure as % of Net Assets)" excludes any temporary cash investments, investments in Guggenheim Strategy Funds Trust mutual funds, or investments in Guggenheim Ultra Short Duration Fund. Investments in those Funds do not provide "market exposure" to meet the Fund's investment objective, but will significantly increase the portfolio's exposure to certain other asset categories (and their associated risks), which may cause the Fund to deviate from its principal investment strategy, including: (i) high yield, high risk debt securities rated below the top four long-term rating categories by a nationally recognized statistical rating organization (also known as "junk bonds"); (ii) securities issued by the U.S. government or its agencies and instrumentalities; (iii) CLOs and similar investments; and (iv) other short-term fixed income securities.

Inception Date: October 1, 2001

* The performance data above represents past performance that is not predictive of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Returns are historical and include changes in principal and reinvested dividends and capital gains and do not reflect the effect of taxes. The S&P 500 Index is an unmanaged index and, unlike the Fund, has no management fees or operating expenses to reduce its reported return.

† Performance figures do not reflect fees and expenses associated with an investment in variable insurance products. If returns had taken into account these fees and expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

‡ 6 month returns are not annualized.

Affiliated Transactions

Investments representing 5% or more of the outstanding voting shares of a company, or control of or by, or common control under Guggenheim Investments ("GI"), result in that company being considered an affiliated issuer, as defined in the 1940 Act.

The Fund may invest in certain of the underlying series of Guggenheim Strategy Funds Trust, including Guggenheim Strategy Fund II, Guggenheim Strategy Fund III, and Guggenheim Variable Insurance Strategy Fund III, (collectively, the "Short Term Investment Vehicles"), each of which are open-end management investment companies managed by GI. The Short Term Investment Vehicles, which launched on March 11, 2014, are offered as short term investment options only to mutual funds, trusts, and other accounts managed by GI and/or its affiliates, and are not available to the public. The Short Term Investment Vehicles pay no investment management fees. The Short Term Investment Vehicles' annual report on Form N-CSR dated September 30, 2020, is available publicly or upon request. This information is available from the EDGAR database on the SEC's website at <https://www.sec.gov/Archives/edgar/data/1601445/000182126820000133/gug81042-ncsr.htm>.

^a Unaudited figures for the period ended June 30, 2021. Percentage amounts for the period, except total return and portfolio turnover rate, have been annualized.

^b Net investment income (loss) per share was computed using average shares outstanding throughout the period.

^c Total return does not take into account any of the expenses associated with an investment in variable insurance products. If total return had taken into account these expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

^d Does not include expenses of the underlying funds in which the Fund invests.

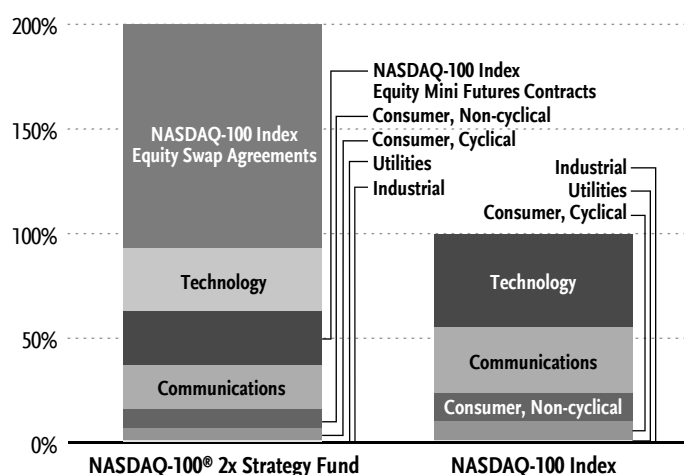

^e Net expense information reflects the expense ratios after expense waivers and reimbursements, as applicable.

^f The amount shown for a share outstanding throughout the period does not agree with the aggregate net loss on investments for the year because of the sales and repurchases of fund shares in relation to fluctuating market value of the investments in the Fund.

NASDAQ-100® 2x STRATEGY FUND

OBJECTIVE: Seeks to provide investment results that match, before fees and expenses, the performance of a specific benchmark on a daily basis. The Fund's current benchmark is 200% of the performance of the NASDAQ-100 Index® (the "underlying index"). The Fund does not seek to achieve its investment objective over a period of time greater than one day.

Holdings Diversification (Market Exposure as % of Net Assets)

"Holdings Diversification (Market Exposure as % of Net Assets)" excludes any temporary cash investments, investments in Guggenheim Strategy Funds Trust mutual funds, or investments in Guggenheim Ultra Short Duration Fund. Investments in those Funds do not provide "market exposure" to meet the Fund's investment objective, but will significantly increase the portfolio's exposure to certain other asset categories (and their associated risks), which may cause the Fund to deviate from its principal investment strategy, including: (i) high yield, high risk debt securities rated below the top four long-term rating categories by a nationally recognized statistical rating organization (also known as "junk bonds"); (ii) securities issued by the U.S. government or its agencies and instrumentalities; (iii) CLOs and similar investments; and (iv) other short-term fixed income securities.

* The performance data above represents past performance that is not predictive of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Returns are historical and include changes in principal and reinvested dividends and capital gains and do not reflect the effect of taxes. The NASDAQ-100 Index is an unmanaged index and, unlike the Fund, has no management fees or operating expenses to reduce its reported return.

† Performance figures do not reflect fees and expenses associated with an investment in variable insurance products. If returns had taken into account these fees and expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

‡ 6 month returns are not annualized.

NASDAQ-100® 2x STRATEGY FUND**Affiliated Transactions**

Investments representing 5% or more of the outstanding voting shares of a company, or control of or by, or common control under Guggenheim Investments ("GI"), result in that company being considered an affiliated issuer, as defined in the 1940 Act.

The Fund may invest in certain of the underlying series of Guggenheim Strategy Funds Trust, including Guggenheim Strategy Fund II, Guggenheim Strategy Fund III, and Guggenheim Variable Insurance Strategy Fund III, (collectively, the "Short Term Investment Vehicles"), each of which are open-end management investment companies managed by GI. The Short Term Investment Vehicles, which launched on March 11, 2014, are offered as short term investment options only to mutual funds, trusts, and other accounts managed by GI and/or its affiliates, and are not available to the public. The Short Term Investment Vehicles pay no investment management fees. The Short Term Investment Vehicles' annual report on Form N-CSR dated September 30, 2020, is available publicly or upon request. This information is available from the EDGAR database on the SEC's website at <https://www.sec.gov/Archives/edgar/data/1601445/000182126820000133/gug81042-ncsr.htm>.

^a Unaudited figures for the period ended June 30, 2021. Percentage amounts for the period, except total return and portfolio turnover rate, have been annualized.

^b Net investment income (loss) per share was computed using average shares outstanding throughout the period.

^c Total return does not take into account any of the expenses associated with an investment in variable insurance products. If total return had taken into account these expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

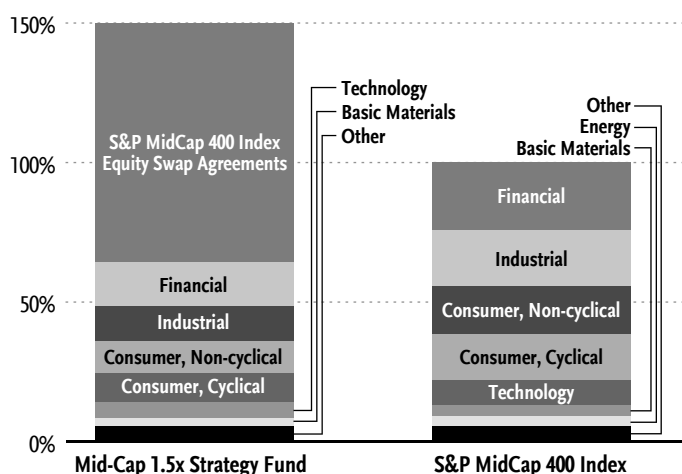

^d Does not include expenses of the underlying funds in which the Fund invests.

^e Net expense information reflects the expense ratios after expense waivers and reimbursements, as applicable.

MID-CAP 1.5x STRATEGY FUND

OBJECTIVE: Seeks to provide investment results that correlate, before fees and expenses, to the performance of a specific benchmark for mid-cap securities on a daily basis. The Fund's current benchmark is 150% of the performance of the S&P MidCap 400[®] Index (the "underlying index"). The Fund does not seek to achieve its investment objective over a period of time greater than one day.

Holdings Diversification (Market Exposure as % of Net Assets)

"Holdings Diversification (Market Exposure as % of Net Assets)" excludes any temporary cash investments, investments in Guggenheim Strategy Funds Trust mutual funds, or investments in Guggenheim Ultra Short Duration Fund. Investments in those Funds do not provide "market exposure" to meet the Fund's investment objective, but will significantly increase the portfolio's exposure to certain other asset categories (and their associated risks), which may cause the Fund to deviate from its principal investment strategy, including: (i) high yield, high risk debt securities rated below the top four long-term rating categories by a nationally recognized statistical rating organization (also known as "junk bonds"); (ii) securities issued by the U.S. government or its agencies and instrumentalities; (iii) CLOs and similar investments; and (iv) other short-term fixed income securities.

* The performance data above represents past performance that is not predictive of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Returns are historical and include changes in principal and reinvested dividends and capital gains and do not reflect the effect of taxes. The S&P MidCap 400 Index is an unmanaged index and, unlike the Fund, has no management fees or operating expenses to reduce its reported return.

† Performance figures do not reflect fees and expenses associated with an investment in variable insurance products. If returns had taken into account these fees and expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

‡ 6 month returns are not annualized.

Affiliated Transactions

Investments representing 5% or more of the outstanding voting shares of a company, or control of or by, or common control under Guggenheim Investments ("GI"), result in that company being considered an affiliated issuer, as defined in the 1940 Act.

The Fund may invest in certain of the underlying series of Guggenheim Strategy Funds Trust, including Guggenheim Strategy Fund II, Guggenheim Strategy Fund III, and Guggenheim Variable Insurance Strategy Fund III, (collectively, the "Short Term Investment Vehicles"), each of which are open-end management investment companies managed by GI. The Short Term Investment Vehicles, which launched on March 11, 2014, are offered as short term investment options only to mutual funds, trusts, and other accounts managed by GI and/or its affiliates, and are not available to the public. The Short Term Investment Vehicles pay no investment management fees. The Short Term Investment Vehicles' annual report on Form N-CSR dated September 30, 2020, is available publicly or upon request. This information is available from the EDGAR database on the SEC's website at <https://www.sec.gov/Archives/edgar/data/1601445/000182126820000133/gug81042-ncsr.htm>.

^a Unaudited figures for the period ended June 30, 2021. Percentage amounts for the period, except total return and portfolio turnover rate, have been annualized.

^b Net investment income (loss) per share was computed using average shares outstanding throughout the period.

^c Total return does not take into account any of the expenses associated with an investment in variable insurance products. If total return had taken into account these expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

^d Does not include expenses of the underlying funds in which the Fund invests.

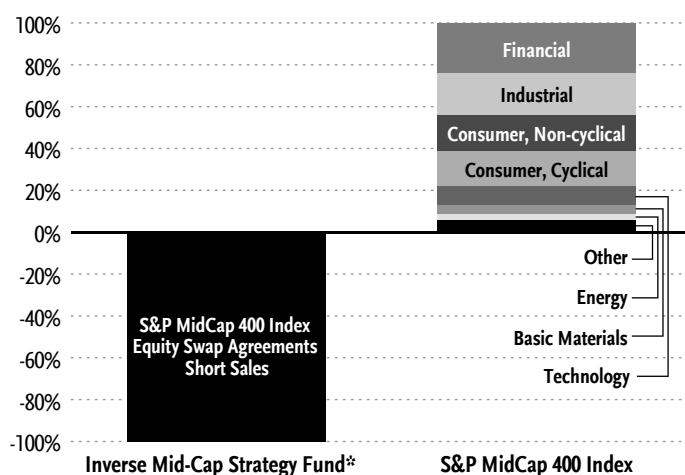

^e Net expense information reflects the expense ratios after expense waivers and reimbursements, as applicable.

^f Reverse share split — Per share amounts for the years presented through December 31, 2019 have been restated to reflect a 1:10 reverse share split effective August 24, 2020.

INVERSE MID-CAP STRATEGY FUND

OBJECTIVE: Seeks to provide investment results that match, before fees and expenses, the performance of a specific benchmark on a daily basis. The Fund's current benchmark is the inverse (opposite) of the performance of the S&P MidCap 400® Index (the "underlying index"). The Fund does not seek to achieve its investment objective over a period of time greater than one day.

Holdings Diversification (Market Exposure as % of Net Assets)

"Holdings Diversification (Market Exposure as % of Net Assets)" excludes any temporary cash investments, investments in Guggenheim Strategy Funds Trust mutual funds, or investments in Guggenheim Ultra Short Duration Fund. Investments in those Funds do not provide "market exposure" to meet the Fund's investment objective, but will significantly increase the portfolio's exposure to certain other asset categories (and their associated risks), which may cause the Fund to deviate from its principal investment strategy, including: (i) high yield, high risk debt securities rated below the top four long-term rating categories by a nationally recognized statistical rating organization (also known as "junk bonds"); (ii) securities issued by the U.S. government or its agencies and instrumentalities; (iii) CLOs and similar investments; and (iv) other short-term fixed income securities.

Inception Date: May 3, 2004

The Fund invests principally in derivative investments such as swap agreements and futures contracts.

Largest Holdings (% of Total Net Assets)

Guggenheim Strategy Fund II	23.4%
Guggenheim Ultra Short Duration Fund — Institutional Class	18.6%
Total	42.0%

"Largest Holdings" excludes any temporary cash or derivative investments.

* The performance data above represents past performance that is not predictive of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Returns are historical and include changes in principal and reinvested dividends and capital gains and do not reflect the effect of taxes. The S&P MidCap 400 Index is an unmanaged index and, unlike the Fund, has no management fees or operating expenses to reduce its reported return.

† Performance figures do not reflect fees and expenses associated with an investment in variable insurance products. If returns had taken into account these fees and expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

‡ 6 month returns are not annualized.

^b Net investment income (loss) per share was computed using average shares outstanding throughout the period.

^c Total return does not take into account any of the expenses associated with an investment in variable insurance products. If total return had taken into account these expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

^d Does not include expenses of the underlying funds in which the Fund invests.

^e Net expense information reflects the expense ratios after expense waivers and reimbursements, as applicable.

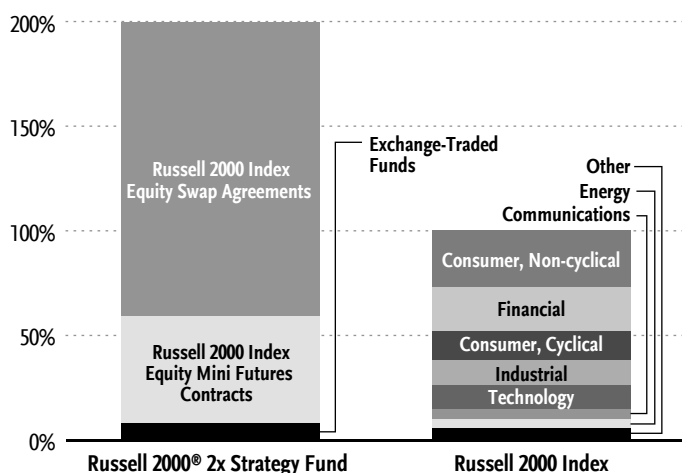

^f The amount shown for a share outstanding throughout the period does not agree with the aggregate net loss on investments for the year because of the sales and repurchases of fund shares in relation to fluctuating market value of the investments in the Fund.

^g Reverse Share Split — Per share amounts for the year ended December 31, 2016, have been restated to reflect a 1:3 reverse share split effective December 1, 2016.

RUSSELL 2000® 2x STRATEGY FUND

OBJECTIVE: Seeks to provide investment results that match, before fees and expenses, the performance of a specific benchmark on a daily basis. The Fund's current benchmark is 200% of the performance of the Russell 2000® Index (the "underlying index"). The Fund does not seek to achieve its investment objective over a period of time greater than one day.

Holdings Diversification (Market Exposure as % of Net Assets)

"Holdings Diversification (Market Exposure as % of Net Assets)" excludes any temporary cash investments, investments in Guggenheim Strategy Funds Trust mutual funds, or investments in Guggenheim Ultra Short Duration Fund. Investments in those Funds do not provide "market exposure" to meet the Fund's investment objective, but will significantly increase the portfolio's exposure to certain other asset categories (and their associated risks), which may cause the Fund to deviate from its principal investment strategy, including: (i) high yield, high risk debt securities rated below the top four long-term rating categories by a nationally recognized statistical rating organization (also known as "junk bonds"); (ii) securities issued by the U.S. government or its agencies and instrumentalities; (iii) CLOs and similar investments; and (iv) other short-term fixed income securities.

Inception Date: October 27, 2006

The Fund invests principally in derivative investments such as swap agreements and futures contracts.

* The performance data above represents past performance that is not predictive of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Returns are historical and include changes in principal and reinvested dividends and capital gains and do not reflect the effect of taxes. The Russell 2000 Index is an unmanaged index and, unlike the Fund, has no management fees or operating expenses to reduce its reported return.

† Performance figures do not reflect fees and expenses associated with an investment in variable insurance products. If returns had taken into account these fees and expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

RUSSELL 2000® 2x STRATEGY FUND**Affiliated Transactions**

Investments representing 5% or more of the outstanding voting shares of a company, or control of or by, or common control under Guggenheim Investments ("GI"), result in that company being considered an affiliated issuer, as defined in the 1940 Act.

The Fund may invest in certain of the underlying series of Guggenheim Strategy Funds Trust, including Guggenheim Strategy Fund II, Guggenheim Strategy Fund III, and Guggenheim Variable Insurance Strategy Fund III, (collectively, the "Short Term Investment Vehicles"), each of which are open-end management investment companies managed by GI. The Short Term Investment Vehicles, which launched on March 11, 2014, are offered as short term investment options only to mutual funds, trusts, and other accounts managed by GI and/or its affiliates, and are not available to the public. The Short Term Investment Vehicles pay no investment management fees. The Short Term Investment Vehicles' annual report on Form N-CSR dated September 30, 2020, is available publicly or upon request. This information is available from the EDGAR database on the SEC's website at <https://www.sec.gov/Archives/edgar/data/1601445/000182126820000133/gug81042-ncsr.htm>.

RUSSELL 2000® 1.5x STRATEGY FUND

OBJECTIVE: Seeks to provide investment results that correlate, before fees and expenses, to the performance of a specific benchmark for small-cap securities on a daily basis. The Fund's current benchmark is 150% of the performance of the Russell 2000® Index (the "underlying index"). The Fund does not seek to achieve its investment objective over a period of time greater than one day.

RUSSELL 2000® 1.5x STRATEGY FUND**Affiliated Transactions**

Investments representing 5% or more of the outstanding voting shares of a company, or control of or by, or common control under Guggenheim Investments ("GI"), result in that company being considered an affiliated issuer, as defined in the 1940 Act.

The Fund may invest in certain of the underlying series of Guggenheim Strategy Funds Trust, including Guggenheim Strategy Fund II, Guggenheim Strategy Fund III, and Guggenheim Variable Insurance Strategy Fund III, (collectively, the "Short Term Investment Vehicles"), each of which are open-end management investment companies managed by GI. The Short Term Investment Vehicles, which launched on March 11, 2014, are offered as short term investment options only to mutual funds, trusts, and other accounts managed by GI and/or its affiliates, and are not available to the public. The Short Term Investment Vehicles pay no investment management fees. The Short Term Investment Vehicles' annual report on Form N-CSR dated September 30, 2020, is available publicly or upon request. This information is available from the EDGAR database on the SEC's website at <https://www.sec.gov/Archives/edgar/data/1601445/000182126820000133/gug81042-ncsr.htm>.

^a Unaudited figures for the period ended June 30, 2021. Percentage amounts for the period, except total return and portfolio turnover rate, have been annualized.

^b Net investment income (loss) per share was computed using average shares outstanding throughout the period.

^c Total return does not take into account any of the expenses associated with an investment in variable insurance products. If total return had taken into account these expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

^d Does not include expenses of the underlying funds in which the Fund invests.

^e Net expense information reflects the expense ratios after expense waivers and reimbursements, as applicable.

INVERSE RUSSELL 2000® STRATEGY FUND

OBJECTIVE: Seeks to provide investment results that match, before fees and expenses, the performance of a specific benchmark on a daily basis. The Fund's current benchmark is the inverse (opposite) of the performance of the Russell 2000® Index (the "underlying index"). The Fund does not seek to achieve its investment objective over a period of time greater than one day.

Holdings Diversification (Market Exposure as % of Net Assets)

"Holdings Diversification (Market Exposure as % of Net Assets)" excludes any temporary cash investments, investments in Guggenheim Strategy Funds Trust mutual funds, or investments in Guggenheim Ultra Short Duration Fund. Investments in those Funds do not provide "market exposure" to meet the Fund's investment objective, but will significantly increase the portfolio's exposure to certain other asset categories (and their associated risks), which may cause the Fund to deviate from its principal investment strategy, including: (i) high yield, high risk debt securities rated below the top four long-term rating categories by a nationally recognized statistical rating organization (also known as "junk bonds"); (ii) securities issued by the U.S. government or its agencies and instrumentalities; (iii) CLOs and similar investments; and (iv) other short-term fixed income securities.

Inception Date: May 3, 2004

The Fund invests principally in derivative investments such as swap agreements and futures contracts.

Largest Holdings (% of Total Net Assets)

Guggenheim Ultra Short Duration Fund — Institutional Class	36.5%
Guggenheim Strategy Fund II	35.6%
Total	72.1%

"Largest Holdings" excludes any temporary cash or derivative investments.

Russell 2000 Index	17.54%	62.03%	16.47%	14.24%

* The performance data above represents past performance that is not predictive of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Returns are historical and include changes in principal and reinvested dividends and capital gains and do not reflect the effect of taxes. The Russell 2000 Index is an unmanaged index and, unlike the Fund, has no management fees or operating expenses to reduce its reported return.

† Performance figures do not reflect fees and expenses associated with an investment in variable insurance products. If returns had taken into account these fees and expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

‡ 6 month returns are not annualized.

DOW 2x STRATEGY FUND

OBJECTIVE: Seeks to provide investment results that match, before fees and expenses, the performance of a specific benchmark on a daily basis. The Fund's current benchmark is 200% of the performance of the Dow Jones Industrial Average® (the "underlying index"). The Fund does not seek to achieve its investment objective over a period of time greater than one day.

Holdings Diversification (Market Exposure as % of Net Assets)

"Holdings Diversification (Market Exposure as % of Net Assets)" excludes any temporary cash investments, investments in Guggenheim Strategy Funds Trust mutual funds, or investments in Guggenheim Ultra Short Duration Fund. Investments in those Funds do not provide "market exposure" to meet the Fund's investment objective, but will significantly increase the portfolio's exposure to certain other asset categories (and their associated risks), which may cause the Fund to deviate from its principal investment strategy, including: (i) high yield, high risk debt securities rated below the top four long-term rating categories by a nationally recognized statistical rating organization (also known as "junk bonds"); (ii) securities issued by the U.S. government or its agencies and instrumentalities; (iii) CLOs and similar investments; and (iv) other short-term fixed income securities.

* The performance data above represents past performance that is not predictive of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Returns are historical and include changes in principal and reinvested dividends and capital gains and do not reflect the effect of taxes. The Dow Jones Industrial Average Index is an unmanaged index and, unlike the Fund, has no management fees or operating expenses to reduce its reported return.

† Performance figures do not reflect fees and expenses associated with an investment in variable insurance products. If returns had taken into account these fees and expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

DOW 2x STRATEGY FUND**Affiliated Transactions**

Investments representing 5% or more of the outstanding voting shares of a company, or control of or by, or common control under Guggenheim Investments ("GI"), result in that company being considered an affiliated issuer, as defined in the 1940 Act.

The Fund may invest in certain of the underlying series of Guggenheim Strategy Funds Trust, including Guggenheim Strategy Fund II, Guggenheim Strategy Fund III, and Guggenheim Variable Insurance Strategy Fund III, (collectively, the "Short Term Investment Vehicles"), each of which are open-end management investment companies managed by GI. The Short Term Investment Vehicles, which launched on March 11, 2014, are offered as short term investment options only to mutual funds, trusts, and other accounts managed by GI and/or its affiliates, and are not available to the public. The Short Term Investment Vehicles pay no investment management fees. The Short Term Investment Vehicles' annual report on Form N-CSR dated September 30, 2020, is available publicly or upon request. This information is available from the EDGAR database on the SEC's website at <https://www.sec.gov/Archives/edgar/data/1601445/000182126820000133/gug81042-ncsr.htm>.

INVERSE DOW 2x STRATEGY FUND

OBJECTIVE: Seeks to provide investment results that match, before fees and expenses, the performance of a specific benchmark on a daily basis. The Fund's current benchmark is 200% of the inverse (opposite) of the performance of the Dow Jones Industrial Average® (the "underlying index"). The Fund does not seek to achieve its investment objective over a period of time greater than one day.

Holdings Diversification (Market Exposure as % of Net Assets)

"Holdings Diversification (Market Exposure as % of Net Assets)" excludes any temporary cash investments, investments in Guggenheim Strategy Funds Trust mutual funds, or investments in Guggenheim Ultra Short Duration Fund. Investments in those Funds do not provide "market exposure" to meet the Fund's investment objective, but will significantly increase the portfolio's exposure to certain other asset categories (and their associated risks), which may cause the Fund to deviate from its principal investment strategy, including: (i) high yield, high risk debt securities rated below the top four long-term rating categories by a nationally recognized statistical rating organization (also known as "junk bonds"); (ii) securities issued by the U.S. government or its agencies and instrumentalities; (iii) CLOs and similar investments; and (iv) other short-term fixed income securities.

Inception Date: May 3, 2004

The Fund invests principally in derivative investments such as swap agreements and futures contracts.

Affiliated Transactions

Investments representing 5% or more of the outstanding voting shares of a company, or control of or by, or common control under Guggenheim Investments ("GI"), result in that company being considered an affiliated issuer, as defined in the 1940 Act.

The Fund may invest in certain of the underlying series of Guggenheim Strategy Funds Trust, including Guggenheim Strategy Fund II, Guggenheim Strategy Fund III, and Guggenheim Variable Insurance Strategy Fund III, (collectively, the "Short Term Investment Vehicles"), each of which are open-end management investment companies managed by GI. The Short Term Investment Vehicles, which launched on March 11, 2014, are offered as short term investment options only to mutual funds, trusts, and other accounts managed by GI and/or its affiliates, and are not available to the public. The Short Term Investment Vehicles pay no investment management fees. The Short Term Investment Vehicles' annual report on Form N-CSR dated September 30, 2020, is available publicly or upon request. This information is available from the EDGAR database on the SEC's website at <https://www.sec.gov/Archives/edgar/data/1601445/000182126820000133/gug81042-ncsr.htm>.

GOVERNMENT LONG BOND 1.2x STRATEGY FUND

OBJECTIVE: Seeks to provide investment results that correspond, before fees and expenses, to a benchmark for U.S. government securities on a daily basis. The Fund's current benchmark is 120% of the daily price movement of the Long Treasury Bond. The Long Treasury Bond is the most recently issued 30 Year U.S. Treasury Bond. The price movement of the Long Treasury Bond is based on the daily price change of the most recently issued Long Treasury Bond. The Fund does not seek to achieve its investment objective over a period of time greater than one day.

Holdings Diversification (Market Exposure as % of Net Assets)

“Holdings Diversification (Market Exposure as % of Net Assets)” excludes any temporary cash investments, investments in Guggenheim Strategy Funds Trust mutual funds, or investments in Guggenheim Ultra Short Duration Fund. Investments in those Funds do not provide “market exposure” to meet the Fund’s investment objective, but will significantly increase the portfolio’s exposure to certain other asset categories (and their associated risks), which may cause the Fund to deviate from its principal investment strategy, including: (i) high yield, high risk debt securities rated below the top four long-term rating categories by a nationally recognized statistical rating organization (also known as “junk bonds”); (ii) securities issued by the U.S. government or its agencies and instrumentalities; (iii) CLOs and similar investments; and (iv) other short-term fixed income securities.

Inception Date: August 18, 1997

The Fund invests principally in U.S. Government securities and in derivative investments such as futures contracts.

Largest Holdings (% of Total Net Assets)

U.S. Treasury Bonds	47.4%
Guggenheim Ultra Short Duration Fund — Institutional Class	14.6%
Guggenheim Strategy Fund II	11.1%
Total	73.1%

“Largest Holdings” excludes any temporary cash or derivative investments.

Bloomberg Barclays U.S. Long Treasury Index	(7.92%)	(10.58%)	3.13%	6.66%

* The performance data above represents past performance that is not predictive of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost. Returns are historical and include changes in principal and reinvested dividends and capital gains and do not reflect the effect of taxes. The Bloomberg Barclays U.S. Long Treasury Index and the Price Movement of Long Treasury Bond are unmanaged indices and, unlike the Fund, have no management fees or operating expenses to reduce their reported returns.

** Does not reflect any interest.

† Performance figures do not reflect fees and expenses associated with an investment in variable insurance products. If returns had taken into account these fees and expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

‡ 6 month returns are not annualized.

^a Unaudited figures for the period ended June 30, 2021. Percentage amounts for the period, except total return and portfolio turnover rate, have been annualized.

^b Net investment income (loss) per share was computed using average shares outstanding throughout the period.

^c Total return does not take into account any of the expenses associated with an investment in variable insurance products. If total return had taken into account these expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

^d Does not include expenses of the underlying funds in which the Fund invests.

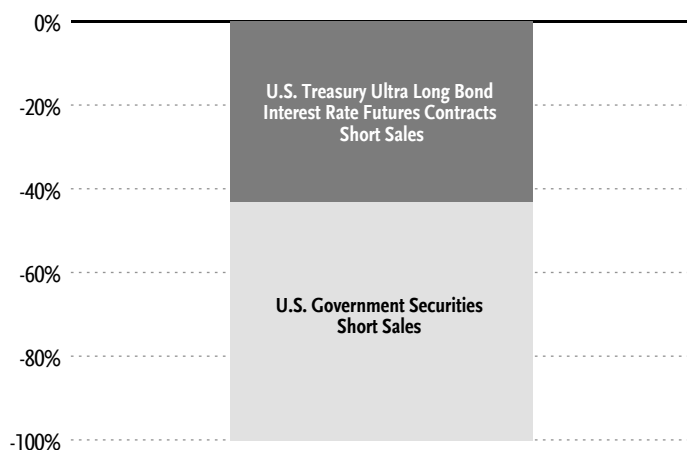

^e Net expense information reflects the expense ratios after expense waivers and reimbursements, as applicable.

^f The amount shown for a share outstanding throughout the period does not agree with the aggregate net loss on investments for the year because of the sales and repurchases of fund shares in relation to fluctuating market value of the investments of the Fund.

INVERSE GOVERNMENT LONG BOND STRATEGY FUND

OBJECTIVE: Seeks to provide total returns that inversely correlate, before fees and expenses, to the price movements of a benchmark for U.S. Treasury debt instruments or futures contracts on a specified debt instrument on a daily basis. The Fund's current benchmark is the daily price movement of the Long Treasury Bond. The Long Treasury Bond is the most recently issued 30 Year U.S. Treasury Bond. The price movement of the Long Treasury Bond is based on the daily price change of the most recently issued Long Treasury Bond. The Fund does not seek to achieve its investment objective over a period of time greater than one day.

Holdings Diversification (Market Exposure as % of Net Assets)

“Holdings Diversification (Market Exposure as % of Net Assets)” excludes any temporary cash investments, investments in Guggenheim Strategy Funds Trust mutual funds, or investments in Guggenheim Ultra Short Duration Fund. Investments in those Funds do not provide “market exposure” to meet the Fund’s investment objective, but will significantly increase the portfolio’s exposure to certain other asset categories (and their associated risks), which may cause the Fund to deviate from its principal investment strategy, including: (i) high yield, high risk debt securities rated below the top four long-term rating categories by a nationally recognized statistical rating organization (also known as “junk bonds”); (ii) securities issued by the U.S. government or its agencies and instrumentalities; (iii) CLOs and similar investments; and (iv) other short-term fixed income securities.

Inception Date: May 1, 2003

The Fund invests principally in short sales and derivative investments such as futures contracts.

Largest Holdings (% of Total Net Assets)

Guggenheim Ultra Short Duration Fund — Institutional Class	28.6%
Guggenheim Strategy Fund II	19.5%
Total	48.1%

“Largest Holdings” excludes any temporary cash or derivative investments.

Bloomberg Barclays U.S. Long Treasury Index	(7.92%)	(10.58%)	3.13%	6.66%

* The performance data above represents past performance that is not predictive of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost. Returns are historical and include changes in principal and reinvested dividends and capital gains and do not reflect the effect of taxes. The Bloomberg Barclays U.S. Long Treasury Index and the Price Movement of Long Treasury Bond are unmanaged indices and, unlike the Fund, have no management fees or operating expenses to reduce their reported returns.

^{**} Does not reflect interest.

[†] Performance figures do not reflect fees and expenses associated with an investment in variable insurance products. If returns had taken into account these fees and expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

[‡] 6 month returns are not annualized.

INVERSE GOVERNMENT LONG BOND STRATEGY FUND**Affiliated Transactions**

Investments representing 5% or more of the outstanding voting shares of a company, or control of or by, or common control under Guggenheim Investments ("GI"), result in that company being considered an affiliated issuer, as defined in the 1940 Act.

The Fund may invest in certain of the underlying series of Guggenheim Strategy Funds Trust, including Guggenheim Strategy Fund II, Guggenheim Strategy Fund III, and Guggenheim Variable Insurance Strategy Fund III, (collectively, the "Short Term Investment Vehicles"), each of which are open-end management investment companies managed by GI. The Short Term Investment Vehicles, which launched on March 11, 2014, are offered as short term investment options only to mutual funds, trusts, and other accounts managed by GI and/or its affiliates, and are not available to the public. The Short Term Investment Vehicles pay no investment management fees. The Short Term Investment Vehicles' annual report on Form N-CSR dated September 30, 2020, is available publicly or upon request. This information is available from the EDGAR database on the SEC's website at <https://www.sec.gov/Archives/edgar/data/1601445/000182126820000133/gug81042-ncsr.htm>.

HIGH YIELD STRATEGY FUND

OBJECTIVE: Seeks to provide investment results that correlate, before fees and expenses, to the performance of the high yield bond market.

Holdings Diversification (Market Exposure as % of Net Assets)

“Holdings Diversification (Market Exposure as % of Net Assets)” excludes any temporary cash investments, investments in Guggenheim Strategy Funds Trust mutual funds, or investments in Guggenheim Ultra Short Duration Fund. Investments in those Funds do not provide “market exposure” to meet the Fund’s investment objective, but will significantly increase the portfolio’s exposure to certain other asset categories (and their associated risks), which may cause the Fund to deviate from its principal investment strategy, including: (i) high yield, high risk debt securities rated below the top four long-term rating categories by a nationally recognized statistical rating organization (also known as “junk bonds”); (ii) securities issued by the U.S. government or its agencies and instrumentalities; (iii) CLOs and similar investments; and (iv) other short-term fixed income securities.

Affiliated Transactions

Investments representing 5% or more of the outstanding voting shares of a company, or control of or by, or common control under Guggenheim Investments ("GI"), result in that company being considered an affiliated issuer, as defined in the 1940 Act.

The Fund may invest in certain of the underlying series of Guggenheim Strategy Funds Trust, including Guggenheim Strategy Fund II, Guggenheim Strategy Fund III, and Guggenheim Variable Insurance Strategy Fund III, (collectively, the "Short Term Investment Vehicles"), each of which are open-end management investment companies managed by GI. The Short Term Investment Vehicles, which launched on March 11, 2014, are offered as short term investment options only to mutual funds, trusts, and other accounts managed by GI and/or its affiliates, and are not available to the public. The Short Term Investment Vehicles pay no investment management fees. The Short Term Investment Vehicles' annual report on Form N-CSR dated September 30, 2020, is available publicly or upon request. This information is available from the EDGAR database on the SEC's website at <https://www.sec.gov/Archives/edgar/data/1601445/000182126820000133/gug81042-ncsr.htm>.

^a Unaudited figures for the period ended June 30, 2021. Percentage amounts for the period, except total return and portfolio turnover rate, have been annualized.

^b Net investment income (loss) per share was computed using average shares outstanding throughout the period.

^c Total return does not take into account any of the expenses associated with an investment in variable insurance products. If total return had taken into account these expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

^d Does not include expenses of the underlying funds in which the Fund invests.

^e Net expense information reflects the expense ratios after expense waivers and reimbursements, as applicable.

^f Reverse share split — Per share amounts for the year ended December 31, 2016 have been restated to reflect a 1:3 reverse share split effective December 1, 2016.

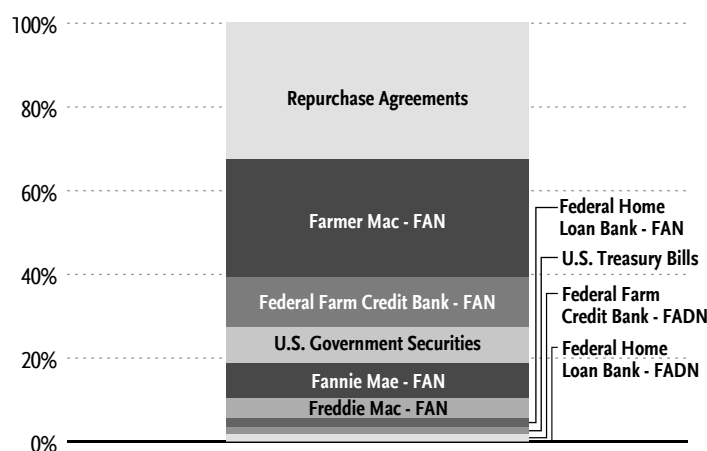

U.S. GOVERNMENT MONEY MARKET FUND

OBJECTIVE: Seeks to provide security of principal, high current income, and liquidity.

Performance displayed represents past performance, which is no guarantee of future results.

You could lose money by investing in the Fund. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time.

Holdings Diversification (Market Exposure as % of Net Assets)

Inception Date: May 7, 1997

The Fund invests principally in money market instruments issued or guaranteed as to principal and interest by the U.S. Government, its agencies or instrumentalities and enters into repurchase agreements fully collateralized by U.S. government securities.

* The performance data above represents past performance that is not predictive of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Returns are historical and include changes in principal and reinvested dividends and capital gains and do not reflect the effect of taxes.

† Performance figures do not reflect fees and expenses associated with an investment in variable insurance products. If returns had taken into account these fees and expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

‡ 6 month returns are not annualized.

^d Net expense information reflects the expense ratio after expense waivers, as applicable.

^e Less than 0.01%.

^f Total return does not take into account any of the expenses associated with an investment in variable insurance products. If total return had taken into account these expenses, performance would have been lower. Shares of a series of Rydex Variable Trust are available only through the purchase of such products.

Note 1 – Organization and Significant Accounting Policies

Organization

The Rydex Variable Trust (the “Trust”), a Delaware statutory trust, is registered with the SEC under the Investment Company Act of 1940 (“1940 Act”), as an open-ended investment company of the series type. Each series, in effect, is representing a separate fund (each, a “Fund”). The Trust may issue an unlimited number of authorized shares. The Trust accounts for the assets of each Fund separately. At June 30, 2021, the Trust consisted of forty-nine funds. The Trust offers shares of the funds to insurance companies for their variable annuity and variable life insurance contracts.

This report covers the following funds (collectively, the “Funds”):

The Funds are designed and operated to accommodate frequent trading by shareholders and, unlike most mutual funds, offer unlimited exchange privileges with no minimum holding periods or transactions fees, which may cause the Funds to experience high portfolio turnover.

Security Investors, LLC, which operates under the name Guggenheim Investments (“GI”), provides advisory services. Guggenheim Funds Distributors, LLC (“GFD”) acts as principal underwriter for the Trust. GI and GFD are affiliated entities.

Significant Accounting Policies

The Funds operate as investment companies and, accordingly, follow the investment company accounting and reporting guidance of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification Topic 946 Financial Services – Investment Companies.

The following significant accounting policies are in conformity with U.S. generally accepted accounting principles (“U.S. GAAP”) and are consistently followed by the Trust. This requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. All time references are based on Eastern Time.

The net asset value per share (“NAV”) of a fund is calculated by dividing the market value of a fund’s securities and other assets, less all liabilities, by the number of outstanding shares of that fund.

(a) Valuation of Investments

The Board of Trustees of the Funds (the “Board”) has adopted policies and procedures for the valuation of the Funds’ investments (the “Valuation Procedures”). Pursuant to the Valuation Procedures, the Board has delegated to a valuation committee, consisting of representatives from Guggenheim’s investment management, fund administration, legal and compliance departments (the “Valuation Committee”), the day-to-day responsibility for implementing the Valuation Procedures, including, under most circumstances, the responsibility for determining the fair value of the Funds’ securities and/or other assets.

Valuations of the Funds’ securities and other assets are supplied primarily by pricing services appointed pursuant to the processes set forth in the Valuation Procedures. The Valuation Committee convenes monthly, or more frequently as needed, to review the valuation of all assets which have been fair valued for reasonableness. The Funds’ officers, through the Valuation Committee and consistent with the monitoring and review responsibilities set forth in the Valuation Procedures, regularly review procedures used and valuations provided by the pricing services.

If the pricing service cannot or does not provide a valuation for a particular investment or such valuation is deemed unreliable, such investment is fair valued by the Valuation Committee.

Equity securities listed or traded on a recognized U.S. securities exchange or the National Association of Securities Dealers Automated Quotations (“NASDAQ”) National Market System shall generally be valued on the basis of the last sale price on the primary U.S. exchange or market on which the security is listed or traded; provided, however, that securities listed on NASDAQ will be valued at the NASDAQ Official Closing Price, which may

not necessarily represent the last sale price. If there is no sale on the valuation date, exchange-traded U.S. equity securities will be valued on the basis of the last bid price.

Open-end investment companies are valued at their NAV as of the close of business, on the valuation date. Exchange-traded funds are valued at the last quoted sale price.

The U.S. Government Money Market Fund values debt securities at amortized cost pursuant to Rule 2a-7 of the 1940 Act, which approximates market value.

With the exception of the U.S. Government Money Market Fund, U.S. government securities are valued by either independent pricing services, the last traded fill price, or at the reported bid price at the close of business.

Debt securities with a maturity of greater than 60 days at acquisition are valued at prices that reflect broker-dealer supplied valuations or are obtained from independent pricing services, which may consider the trade activity, treasury spreads, yields or price of bonds of comparable quality, coupon, maturity, and type, as well as prices quoted by dealers who make markets in such securities. Short-term debt securities with a maturity of 60 days or less at acquisition are valued at amortized cost, provided such amount approximates market value.

Repurchase agreements are generally valued at amortized cost, provided such amounts approximate market value.

The value of futures contracts is accounted for using the unrealized appreciation or depreciation on the contracts that is determined by marking the contracts to their current realized settlement prices. Financial futures contracts are valued at the 4:00 p.m. price on the valuation date. In the event that the exchange for a specific futures contract closes earlier than 4:00 p.m., the futures contract is valued at the official settlement price of the exchange. However, the underlying securities from which the futures contract value is derived are monitored until 4:00 p.m. to determine if fair valuation would provide a more accurate valuation.

The values of swap agreements entered into by a fund are accounted for using the unrealized appreciation or depreciation on the agreements that are determined by marking the agreements to the last quoted value of the index or other underlying position that the swaps pertain to at the close of the New York Stock Exchange ("NYSE").

Investments for which market quotations are not readily available are fair-valued as determined in good faith by GI, subject to review and approval by the Valuation Committee, pursuant to methods established or ratified by the Board. Valuations in accordance with these methods are intended to reflect each security's (or asset's

or liability's) "fair value". Each such determination is based on a consideration of all relevant factors, which are likely to vary from one pricing context to another. Examples of such factors may include, but are not limited to market prices; sale prices; broker quotes; and models which derive prices based on inputs such as prices of securities with comparable maturities and characteristics, or based on inputs such as anticipated cash flows or collateral, spread over U.S. Treasury securities, and other information analysis. In connection with futures contracts and other derivative investments, such factors may include obtaining information as to how (a) these contracts and other derivative investments trade in the futures or other derivative markets, respectively, and (b) the securities underlying these contracts and other derivative investments trade in the cash market.

(b) U.S. Government and Agency Obligations

Certain U.S. Government and Agency Obligations are traded on a discount basis; the interest rates shown on the Schedules of Investments reflect the effective rates paid at the time of purchase by the Funds. Other securities bear interest at the rates shown, payable at fixed dates through maturity.

(c) Short Sales

When a Fund engages in a short sale of a security, an amount equal to the proceeds is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the market value of the short sale. The Fund maintains a segregated account of cash and/or securities as collateral for short sales.

Fees, if any, paid to brokers to borrow securities in connection with short sales are recorded as interest expense. In addition, the Fund must pay out the dividend rate of the equity or coupon rate of the obligation to the lender and record this as an expense. Short dividend or interest expense is a cost associated with the investment objective of short sales transactions, rather than an operational cost associated with the day-to-day management of any mutual fund. The Fund may also receive rebate income from the broker resulting from the investment of the proceeds from securities sold short.

(d) Futures Contracts

Upon entering into a futures contract, a Fund deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is affected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized appreciation or depreciation. When the contract is closed, the Fund records a

realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

(e) Swap Agreements

Swap agreements are marked-to-market daily and the change, if any, is recorded as unrealized appreciation or depreciation. Payments received or made as a result of an agreement or termination of an agreement are recognized as realized gains or losses.

Upon entering into certain centrally-cleared swap transactions, a Fund is required to deposit with its clearing broker an amount of cash or securities as an initial margin. Subsequent variation margin receipts or payments are received or made by the Fund depending on fluctuations in the fair value of the reference entity and are recorded by the Fund as unrealized appreciation or depreciation. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

Upfront payments received or made by a Fund on credit default swap agreements and interest rate swap agreements are amortized over the expected life of the agreement. Periodic payments received or paid by a Fund are recorded as realized gains or losses. Payments received or made as a result of a credit event or termination of the contract are recognized, net of a proportional amount of the upfront payment, as realized gains or losses.

(f) Foreign Taxes

The Funds may be subject to foreign taxes (a portion of which may be reclaimable) on income, stock dividends, capital gains on investments or certain foreign currency transactions. All foreign taxes are recorded in accordance with the applicable foreign tax regulations and rates that exist in the foreign jurisdictions in which the Funds invest. These foreign taxes, if any, are paid by the Funds and reflected in their Statements of Operations as follows: foreign taxes withheld at source are presented as a reduction of income and foreign taxes on capital gains from sales of investments are included with the net realized gain (loss) on investments. Foreign taxes payable or deferred as of June 30, 2021, if any, are disclosed in the Funds' Statements of Assets and Liabilities.

(g) Security Transactions

Security transactions are recorded on the trade date for financial reporting purposes. Realized gains and losses from securities transactions are recorded using the identified cost basis. Proceeds from lawsuits related to investment holdings are recorded as a reduction to cost if the securities are still held and as realized gains if no longer held in the respective Fund. Dividend income

is recorded on the ex-dividend date, net of applicable taxes withheld by foreign countries, if any. Taxable non-cash dividends are recorded as dividend income. Interest income, including amortization of premiums and accretion of discounts, is accrued on a daily basis. Dividend income from Real Estate Investment Trusts ("REITs") is recorded based on the income included in the distributions received from the REIT investments using published REIT classifications, including some management estimates when actual amounts are not available. Distributions received in excess of this estimated amount are recorded as a reduction of the cost of investments or reclassified to realized gains. The actual amounts of income, return of capital, and realized gains are only determined by each REIT after its fiscal year-end, and may differ from the estimated amounts.

(h) Distributions

Dividends from net investment income are declared daily in the Government Long Bond 1.2x Strategy Fund and the U.S. Government Money Market Fund. Distributions of net investment income in the remaining Funds and distributions of net realized gains, if any, in all Funds are declared at least annually. Normally, all distributions of a Fund will automatically be reinvested without charge in additional shares of the same Fund. Distributions are recorded on the ex-dividend date and are determined in accordance with U.S. federal income tax regulations which may differ from U.S. GAAP.

(i) Cash

The Funds may leave cash overnight in their cash account with the custodian. Periodically, a Fund may have cash due to the custodian bank as an overdraft balance. A fee is incurred on this overdraft, calculated by multiplying the overdraft by a rate based on the federal funds rate, which was 0.08% at June 30, 2021.

(j) Indemnifications

Under the Funds' organizational documents, the Trustees and Officers are indemnified against certain liabilities arising out of the performance of their duties to the Trust. In addition, throughout the normal course of business, the Funds enter into contracts that contain a variety of representations and warranties which provide general indemnifications. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds and/or their affiliates that have not yet occurred. However, based on experience, the Funds expect the risk of loss to be remote.

Note 2 – Financial Instruments and Derivatives

As part of their investment strategy, the Funds may utilize short sales and a variety of derivative instruments. These investments involve, to varying degrees, elements of market risk and risks in excess of amounts recognized on the Statements of Assets and Liabilities. Valuation and accounting treatment of these instruments can be found under Significant Accounting Policies in Note 1 of these Notes to Financial Statements.

Short Sales

A short sale is a transaction in which a Fund sells a security it does not own. If the security sold short decreases in price between the time the Fund sells the security and closes its short position, the Fund will realize a gain on the transaction. Conversely, if the security increases in price during the period, the Fund will realize a loss on the transaction. The risk of such price increases is the principal risk of engaging in short sales.

Derivatives

Derivatives are instruments whose values depend on, or are derived from, in whole or in part, the value of one or more other assets, such as securities, currencies, commodities or indices. Derivative instruments may be used to increase investment flexibility (including to maintain cash reserves while maintaining exposure to certain other assets), for risk management (hedging) purposes, to facilitate trading, to reduce transaction costs and to pursue higher investment returns. Derivative instruments may also be used to mitigate certain investment risks, such as foreign currency exchange rate risk, interest rate risk and credit risk. U.S. GAAP requires disclosures to enable investors to better understand how and why a Fund uses derivative instruments, how these derivative instruments are accounted for and their effects on the Fund's financial position and results of operations.

The Funds may utilize derivatives for the following purposes:

Duration: the use of an instrument to manage the interest rate risk of a portfolio.

Index Exposure: the use of an instrument to obtain exposure to a listed or other type of index.

Leverage: gaining total exposure to equities or other assets on the long and short sides at greater than 100% of invested capital.

Liquidity: the ability to buy or sell exposure with little price/market impact.

For any Fund whose investment strategy consistently involves applying leverage, the value of the Fund's shares will tend to increase or decrease more than the value of any increase or decrease in the underlying index or other asset. In addition, because an investment in derivative instruments generally requires a small investment relative to the amount of investment exposure assumed, an opportunity for increased net income is created; but, at the same time, leverage risk will increase. The Fund's use of leverage, through borrowings or instruments such as derivatives, may cause the Fund to be more volatile and riskier than if they had not been leveraged.

Futures Contracts

A futures contract is an agreement to purchase (long) or sell (short) an agreed amount of securities or other instruments at a set price for delivery at a future date. There are significant risks associated with a Fund's use of futures contracts, including (i) there may be an imperfect or no correlation between the changes in market value of the underlying asset and the prices of futures contracts; (ii) there may not be a liquid secondary market for a futures contract; (iii) trading restrictions or limitations may be imposed by an exchange; and (iv) government regulations may restrict trading in futures contracts. When investing in futures, there is minimal counterparty credit risk to a Fund because futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees against default. Cash deposits are shown as segregated cash with broker on the Statements of Assets and Liabilities; securities held as collateral are noted on the Schedules of Investments.

Swap Agreements

A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. When utilizing over-the-counter ("OTC") swaps, a fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty or if the underlying asset declines in value. Certain standardized swaps are subject to mandatory central clearing and are executed on a multi-lateral or other trade facility platform, such as a registered exchange. There is limited counterparty credit risk with respect to centrally-cleared swaps as the transaction is facilitated through a central clearinghouse, much like exchange-traded futures contracts. For a fund utilizing centrally-cleared swaps, the exchange bears the risk of loss resulting from a counterparty not being able to pay. There is no guarantee that a fund or an underlying fund could eliminate its exposure under an outstanding swap agreement by entering into an offsetting swap agreement with the same or another party.

Total return swaps involve commitments where single or multiple cash flows are exchanged based on the price of an underlying reference asset (such as an index) for a fixed or variable interest rate. Total return swaps will usually be computed based on the current value of the reference asset as of the close of regular trading on the NYSE or other exchange, with the swap value being adjusted to include dividends accrued, financing charges and/or interest associated with the swap agreement. When utilizing total return swaps, a fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty or if the underlying reference asset declines in value.

The following table represents the Funds' use and volume of total return swaps on a monthly basis:

Credit default swaps are instruments which allow for the full or partial transfer of third party credit risk, with respect to a particular entity or entities, from one counterparty to the other. A fund enters into credit default swaps as a “seller” or “buyer” of protection primarily to gain or reduce exposure to the investment grade and/or high yield bond market. A seller of credit default swaps is selling credit protection or assuming credit risk with respect to the underlying entity or entities. The buyer in a credit default swap is obligated to pay the seller a periodic stream of payments over the term of the contract provided that no event of default on an underlying reference obligation has occurred. If a credit event occurs, as defined under the terms of the swap agreement, the seller will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. The notional amount reflects the maximum potential amount the seller of credit protection could be required to pay to the buyer if a credit event occurs. The seller of protection receives periodic premium payments from the buyer and may also receive or pay an upfront premium adjustment to the stated periodic payments. In the event a credit default occurs on a credit default swap referencing an index, a factor adjustment will take place and the buyer of protection will receive a payment reflecting the par less the default recovery rate of the defaulted index component based on its weighting in the index. If no default occurs, the counterparty will pay the stream of payments and have no further obligations to the fund selling the credit protection. For a fund utilizing centrally cleared credit default swaps, the exchange bears the risk of loss resulting from a counterparty not being able to pay. For OTC credit default swaps, a fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty, or in the case of a credit default swap in which a fund is selling credit protection, the default of a third party issuer.

The quoted market prices and resulting market values for credit default swap agreements on securities and credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative had the notional amount of the swap agreement been closed/sold as of the period end. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entity’s credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

The following table represents the Fund’s use and volume of credit default swaps on a monthly basis:

Fund	Use	Average Notional Amount	
		Protection Sold	Protection Purchased
High Yield Strategy Fund	Duration, Index exposure, Liquidity,	\$ 5,158,333	\$ —

In conjunction with short sales and the use of derivative instruments, the Funds are required to maintain collateral in various forms. Depending on the financial instrument utilized and the broker involved, the Funds use margin deposits at the broker, cash and/or securities segregated at the custodian bank, discount notes or repurchase agreements allocated to the Funds as collateral.

The Trust has established counterparty credit guidelines and enters into transactions only with financial institutions of investment grade or better. The Trust monitors the counterparty credit risk.

Note 3 – Offsetting

In the normal course of business, the Funds enter into transactions subject to enforceable master netting arrangements or other similar arrangements. Generally, the right to offset in those agreements allows the Funds to counteract the exposure to a specific counterparty with collateral received from or delivered to that counterparty based on the terms of the arrangements. These arrangements provide for the right to liquidate upon the occurrence of an event of default, credit event upon merger or additional termination event.

In order to better define their contractual rights and to secure rights that will help the Funds mitigate their counterparty risk, the Funds may enter into an International Swaps and Derivatives Association, Inc. Master Agreement (“ISDA Master Agreement”) or similar agreement with their derivative contract counterparties. An ISDA Master Agreement is a bilateral agreement between a fund and a counterparty that governs OTC derivatives, including foreign exchange contracts, and typically contains, among other things, collateral posting terms and netting provisions in the event of a default and/or termination event. The provisions of the ISDA Master Agreement typically permit a single net payment in the event of a default (close-out netting) or similar event, including the bankruptcy or insolvency of the counterparty.

For derivatives traded under an ISDA Master Agreement, the collateral requirements are typically calculated by netting the mark-to-market amount for each transaction under such agreement and comparing that amount to the value of any collateral currently pledged by the Funds and the counterparty. For financial reporting purposes, cash collateral that has been pledged to cover obligations of the Funds and cash collateral received from the counterparty, if any, are reported separately on the Statements of Assets and Liabilities as segregated cash with broker/receivable for variation margin, or payable for swap settlement/variation margin. Cash and/or securities pledged or received as collateral by the Funds in connection with an OTC derivative subject to an ISDA Master Agreement generally may not be invested, sold or rehypothecated by the counterparty or the Funds, as applicable, absent an event of default under such agreement, in which case such collateral generally may be applied towards obligations due to and payable by such counterparty or the Funds, as applicable. Generally, the amount of collateral due from or to a counterparty must exceed a minimum transfer amount threshold (e.g., \$300,000) before a transfer is required to be made. To the extent amounts due to the Funds from their counterparties are not fully collateralized, contractually or otherwise, the Funds bear the risk of loss from counterparty nonperformance. The Funds attempt to mitigate counterparty risk by only entering into agreements with counterparties that they believe to be of good standing and by monitoring the financial stability of those counterparties.

For financial reporting purposes, the Funds do not offset derivative assets and derivative liabilities that are subject to netting arrangements in the Statements of Assets and Liabilities.

Note 4 – Fair Value Measurement

In accordance with U.S. GAAP, fair value is defined as the price that the Funds would receive to sell an investment or pay to transfer a liability in an orderly transaction with an independent buyer in the principal market, or in the absence of a principal market, the most advantageous market for the investment or liability. U.S. GAAP establishes a three-tier fair value hierarchy based on the types of inputs used to value assets and liabilities and requires corresponding disclosure. The hierarchy and the corresponding inputs are summarized below:

Level 1 — quoted prices in active markets for identical assets or liabilities.

Level 2 — significant other observable inputs (for example quoted prices for securities that are similar based on characteristics such as interest rates, prepayment speeds, credit risk, etc.).

Level 3 — significant unobservable inputs based on the best information available under the circumstances, to the extent observable inputs are not available, which may include assumptions.

The types of inputs available depend on a variety of factors, such as the type of security and the characteristics of the markets in which it trades, if any. Fair valuation determinations that rely on fewer or no observable inputs require greater judgment. Accordingly, fair value determinations for Level 3 securities require the greatest amount of judgment.

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The suitability of the techniques and sources employed to determine fair valuation are regularly monitored and subject to change.

Note 5 – Investment Advisory Agreement and Other Agreements

GI pays operating expenses on behalf of the Trust, such as audit and accounting related services, legal services, custody, printing and mailing, among others, on a pass-through basis. Such expenses are allocated to various Funds within the complex based on relative net assets.

The Board has adopted an Investor Services Plan for which GFD and other firms that provide investor services (“Service Providers”) may receive compensation. The Funds will pay investor service fees to GFD at an annual rate not to exceed 0.25% of average daily net assets. GFD, in turn, will compensate Service Providers for providing such services, while retaining a portion of such payments to compensate itself for investor services it performs.

GI and its affiliates have voluntarily agreed to waive their fees, including but not limited to accounting, shareholder investor services and investment advisory fees, in an attempt to maintain a positive net yield for the U.S. Government Money Market Fund. GI or its affiliates may terminate this voluntary waiver at any time upon notice to the Fund. When shareholder investor services fees are waived, dealer compensation will be reduced to the extent of such waiver.

If a Fund invests in a fund that is advised by the same adviser or an affiliated adviser, the investing Fund's adviser has agreed to waive fees at the investing fund level to the extent necessary to offset the proportionate share of any management fee paid by each Fund with respect to its investment in such affiliated fund. Fee waivers will be calculated at the investing Fund level without regard to any expense cap in effect for the investing Fund. Fees waived under this arrangement are not subject to reimbursement to GI. For the period ended June 30, 2021, the following Funds waived fees related to investments in affiliated funds:

Fund	Amount Waived
Nova Fund	\$ 9,228
Inverse S&P 500® Strategy Fund	494

GI has contractually agreed to waive and/or reimburse expenses for Inverse S&P 500 Strategy Fund, Inverse NASDAQ-100 Strategy Fund, S&P 500 2x Strategy Fund, NASDAQ-100 2x Strategy Fund, Mid Cap 1.5x Strategy Fund, Inverse Mid-Cap Strategy Fund, Russell 2000 2x Strategy Fund, Russell 2000 1.5x Strategy Fund, Inverse Russell 2000 Strategy Fund, Dow 2x Strategy Fund, Inverse Dow 2x Strategy Fund and Inverse Government Long Bond Strategy Fund, in an amount equal to an annual percentage rate of 0.05% of each Fund's average daily net assets. This agreement is effective June 1, 2021 and the end of the initial term is August 1, 2022. This agreement shall automatically renew for one-year terms, unless GI provides written notice to the Fund of the termination at least thirty days prior to the end of the then-current term. This agreement may be terminated at any time by the Fund's Board of Trustees upon sixty days' written notice.

Certain trustees and officers of the Trust are also officers of GI and/or GFD. The Trust does not compensate its officers or trustees who are officers, directors and/or employees of GI or GFD.

At June 30, 2021, GI and its affiliates owned over twenty percent of the outstanding shares of the Funds, as follows:

Fund	Percent of Outstanding Shares Owned
High Yield Strategy Fund	39%

MUFG Investor Services (US), LLC ("MUIS") acts as the Funds' administrator, transfer agent and accounting agent. As administrator, transfer agent and accounting agent, MUIS maintains the books and records of the Funds' securities and cash. U.S. Bank, N.A. ("U.S. Bank") acts as the Funds' custodian. As custodian, U.S. Bank is responsible for the custody of the Funds' assets. For providing the aforementioned services, MUIS and U.S. Bank are entitled to receive a monthly fee equal to an annual percentage of each Fund's average daily net assets and out of pocket expenses.

Note 6 – Repurchase Agreements

The Funds transfer uninvested cash balances into a single joint account, the daily aggregate balance of which is invested in one or more repurchase agreements collateralized by obligations of the U.S. Treasury and U.S. government agencies. The joint account includes other Funds in the Guggenheim complex not covered in this report. The collateral is in the possession of the Funds' custodian and is evaluated to ensure that its market value exceeds, at a minimum, 102% of the original face amount of the repurchase agreements. Each Fund holds a pro rata share of the collateral based on the dollar amount of the repurchase agreement entered into by each Fund.

NOTES TO FINANCIAL STATEMENTS (Unaudited) (continued)

At June 30, 2021, the repurchase agreements in the joint account were as follows:

Counterparty and Terms of Agreement	Face Value	Repurchase Price	Collateral	Par Value	Fair Value
J.P. Morgan Securities LLC 0.05% Due 07/01/21	\$ 43,014,729	\$ 43,014,789	U.S. Treasury Note 0.13% Due 04/30/23	\$ 43,947,200	\$ 43,875,223

In the event of counterparty default, the Funds have the right to collect the collateral to offset losses incurred. There is potential loss to the Funds in the event the Funds are delayed or prevented from exercising their rights to dispose of the collateral securities, including the risk of a possible decline in the value of the underlying securities during the period while the Funds seek to assert their rights. GI, acting under the supervision of the Board, reviews the value of the collateral and the creditworthiness of those banks and dealers with which the Funds enter into repurchase agreements to evaluate potential risks.

Note 7 – Portfolio Securities Loaned

The Funds may lend their securities to approved brokers to earn additional income. Security lending income shown on the Statements of Operations is shown net of rebates paid to the borrowers and earnings on cash collateral investments shared with the lending agent. Within this arrangement, the Funds act as the lender, U.S. Bank acts as the lending agent, and other approved registered broker dealers act as the borrowers. The Funds receive cash collateral, valued at 102% of the value of the securities on loan. Under the terms of the Funds' securities lending agreement with U.S. Bank, cash collateral and proceeds are invested in the First American Government Obligations Fund — Class Z. The Funds bear the risk of loss on cash collateral investments. Collateral is maintained over the life of the loan in an amount not less than the value of loaned securities, as determined at the close of fund business each day; any additional collateral required due to changes in security values is delivered to the Funds the next business day. Although the collateral mitigates the risk, the Funds could experience a delay in recovering their securities and a possible loss of income or value if the borrower fails to return the securities. The Funds have the right under the securities lending agreement to recover the securities from the borrower on demand. Securities lending transactions are accounted for as secured borrowings. The remaining contractual maturity of the securities lending agreement is overnight and continuous.

At June 30, 2021, the Funds participated in securities lending transactions, which are subject to enforceable netting arrangements, as follows:

Fund	Gross Amounts Not Offset in the Statements of Assets and Liabilities			Securities Lending Collateral

High Yield Strategy Fund	484,289	(484,289)	—	494,728	—	494,728

^(a) Actual collateral received by the Fund is generally greater than the amount shown due to overcollateralization.

In the event of counterparty default, the Funds have the right to collect the collateral to offset losses incurred. There is potential loss to the Funds in the event the Funds are delayed or prevented from exercising their rights to dispose of the collateral securities, including the risk of a possible decline in the value of the underlying securities during the period while the Funds seek to assert their rights. GI, acting under the supervision of the Board, reviews the value of the collateral and the creditworthiness of those banks and dealers to evaluate potential risks.

Note 8 – Federal Income Tax Information

The Funds intend to comply with the provisions of Subchapter M of the Internal Revenue Code applicable to regulated investment companies and will distribute substantially all taxable net investment income and capital gains sufficient to relieve the Funds from all, or substantially all, federal income, excise and state income taxes. Therefore, no provision for federal or state income tax or federal excise tax is required.

Tax positions taken or expected to be taken in the course of preparing the Funds' tax returns are evaluated to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold would be recorded as a tax benefit or expense in the current year. Management has analyzed the Funds' tax positions taken, or to be taken, on U.S. federal income tax returns for all open tax years, and has concluded that no provision for income tax is required in the Funds' financial statements. The Funds' U.S. federal income tax returns are subject to examination by the Internal Revenue Service for a period of three years after they are filed.

At June 30, 2021, the cost of investments for U.S. federal income tax purposes, the aggregate gross unrealized appreciation for all investments for which there was an excess of value over tax cost, and the aggregate gross unrealized depreciation for all investments for which there was an excess of tax cost over value, were as follows:

The Funds are permitted to purchase or sell securities from or to certain affiliated funds under specified conditions outlined in procedures adopted by the Board. The procedures have been designed to ensure that any purchase or sale of securities by a Fund from or to another fund or portfolio that is or could be considered an affiliate by virtue of having a common investment adviser (or affiliated investment advisers), common trustees and/or common officers complies with Rule 17a-7 of the 1940 Act. Further, as defined under these procedures, each transaction is effected at the current market price to save costs, where permissible. For the period ended June 30, 2021, the Funds engaged in purchases and sales of securities, pursuant to Rule 17a-7 of the 1940 Act, as follows:

Note 10 – Line of Credit

The Trust, along with other affiliated trusts, secured an uncommitted \$150,000,000 line of credit from U.S. Bank, N.A., which was increased to \$200,000,000 on February 10, 2021 and expired on June 7, 2021. On June 7, 2021, the line of credit agreement was renewed and expires on June 6, 2022. This line of credit is reserved for emergency or temporary purposes. Borrowings, if any, under this arrangement bear interest equal to the Prime Rate, minus 2%, which shall be paid monthly, averaging 1.25% for the period ended June 30, 2021. The Funds did not have any borrowings outstanding under this agreement at June 30, 2021.

The average daily balances borrowed for the period ended June 30, 2021, were as follows:

Note 11 – Legal Proceedings

Tribune Company

Rydex Variable Trust has been named as a defendant and a putative member of the proposed defendant class of shareholders in the case entitled *Kirschner v. FitzSimons*, No. 12-2652 (S.D.N.Y.) (formerly *Official Committee of Unsecured Creditors of Tribune Co. v. FitzSimons*, Adv. Pro. No. 10-54010 (Bankr. D. Del.)) (the “*FitzSimons* action”), as a result of ownership by certain series of the Rydex Variable Trust of shares in the Tribune Company (“Tribune”) in 2007, when Tribune effected a leveraged buyout transaction (“LBO”) by which Tribune converted to a privately-held company. In his complaint, the plaintiff has alleged that, in connection with the LBO, Tribune insiders and shareholders were overpaid for their Tribune stock using financing that the insiders knew would, and ultimately did, leave Tribune insolvent. The plaintiff has asserted claims against certain insiders, major shareholders, professional advisers, and others involved in the LBO. The plaintiff is also attempting to obtain from former Tribune shareholders, including the Rydex Variable Trust, the proceeds they received in connection with the LBO.

In June 2011, a group of Tribune creditors filed multiple actions against former Tribune shareholders involving state law constructive fraudulent conveyance claims arising out of the 2007 LBO (the “SLCFC actions”). Rydex Variable Trust has been named as a defendant in one or more of these suits. In those actions, the creditors seek to recover from Tribune’s former shareholders the proceeds received in connection with the 2007 LBO.

The *FitzSimons* action and the SLCFC actions have been consolidated with the majority of the other Tribune LBO-related lawsuits in a multidistrict litigation proceeding captioned *In re Tribune Company Fraudulent Conveyance Litig.*, No. 11-md-2296 (S.D.N.Y.) (the “MDL Proceeding”).

On September 23, 2013, the District Court granted the defendants’ omnibus motion to dismiss the SLCFC actions, on the basis that the creditors lacked standing. On September 30, 2013, the creditors filed a notice of appeal of the September 23 order. On October 28, 2013, the defendants filed a joint notice of cross-appeal of that same order. On March 29, 2016, the U.S. Court of Appeals for the Second Circuit issued its opinion on the appeal of the SLCFC actions. The appeals court affirmed the district court’s dismissal of those lawsuits, but on different grounds than the district court. The appeals court held that while the plaintiffs have standing under the U.S. Bankruptcy Code, their claims were preempted by Section 546(e) of the Bankruptcy Code—the statutory safe harbor for settlement payments. On April 12, 2016, the Plaintiffs in the SLCFC actions filed a petition seeking rehearing *en banc* before the appeals court. On July 22, 2016, the appeals court denied the petition. On September 9, 2016, the plaintiffs filed a petition for writ of certiorari in the U.S. Supreme Court challenging the Second Circuit’s decision that the safe harbor of Section 546(e) applied to their claims. The shareholder defendants, including the Funds, filed a joint brief in opposition to the petition for certiorari on October 24, 2016. On April 3, 2018, Justice Kennedy and Justice Thomas issued a “Statement” related to the petition for certiorari suggesting that the Second Circuit and/or District Court may want to take steps to reexamine the application of the Section 546(e) safe harbor to the previously dismissed state law constructive fraudulent transfer claims based on the Supreme Court’s decision in *Merit Management Group LP v. FTI Consulting, Inc.* On April 10, 2018, Plaintiffs filed in the Second Circuit a motion for that court to recall its mandate, vacate its prior decision, and remand to the district court for further proceedings consistent with *Merit Management*. On April 20, 2018, the shareholder defendants filed an opposition to Plaintiffs’ motion to recall the mandate. On May 15, 2018, the Second Circuit issued an order recalling the mandate “in anticipation of further panel review.” On December 19, 2019, the Second Circuit issued an amended opinion that again affirmed the district court’s ruling on the basis that plaintiffs’ claims were preempted by Section 546(e) of the Bankruptcy Code. Plaintiffs filed a motion for rehearing and rehearing *en banc* on January 2, 2020. The Second Circuit denied the petition on February 6, 2020. On July 6, 2020, plaintiffs filed a new petition for a writ of certiorari in the U.S. Supreme Court. In that petition, plaintiffs stated that “[t]o make it more likely that there will be a quorum for this petition,” they have “abandon[ed] the case and let the judgment below stand” with respect to certain defendants. That list did not include Rydex Variable Trust. Defendants filed an opposition to the petition for certiorari on August 26, 2020, and plaintiffs filed a reply in support of the petition for certiorari on September 8, 2020. The Court denied the petition for certiorari on April 19, 2021.

On May 23, 2014, the defendants filed motions to dismiss the *FitzSimons* action, including a global motion to dismiss Count I, which is the claim brought against former Tribune shareholders for intentional fraudulent conveyance under U.S. federal law. On January 6, 2017, the United States District Court for the Southern District of New York granted the shareholder defendants' motion to dismiss the intentional fraudulent conveyance claim in the *FitzSimons* action. The Court concluded that the plaintiff had failed to allege that Tribune entered the LBO with actual intent to hinder, delay, or defraud its creditors, and therefore the complaint failed to state a claim. In dismissing the intentional fraudulent conveyance claim, the Court denied the plaintiff's request to amend the complaint. On February 23, 2017, the Court issued an order stating that it intended to permit an interlocutory appeal of the dismissal order, but would wait to do so until it has resolved outstanding motions to dismiss filed by other defendants.

On July 18, 2017, the plaintiff submitted a letter to the District Court seeking leave to amend its complaint to add a constructive fraudulent transfer claim. The shareholder defendants opposed that request. On August 24, 2017, the Court denied the plaintiff's request without prejudice to renewal of the request in the event of an intervening change in the law. On March 8, 2018, the plaintiff renewed his request for leave to file a motion to amend the complaint to assert a constructive fraudulent transfer claim based on the Supreme Court's ruling in *Merit Management Group LP v. FTI Consulting, Inc.* The shareholder defendants opposed that request. On June 18, 2018 the District Court ordered that the request would be stayed pending further action by the Second Circuit in the SLCFC actions.

On December 18, 2018, plaintiff filed a letter with the District Court requesting that the stay be dissolved in order to permit briefing on the motion to amend the complaint and indicating plaintiff's intention to file another motion to amend the complaint to reinstate claims for intentional fraudulent transfer. The shareholder defendants opposed that request. On January 14, 2019, the court held a case management conference, during which the court stated that it would not lift the stay prior to further action from the Second Circuit in the SLCFC actions. The court further stated that it would allow the plaintiff to file a motion to amend to try to reinstate its intentional fraudulent transfer claim. On January 23, 2019, the court ordered the parties still facing pending claims to participate in a mediation, to commence on January 28, 2019. The mediation did not result in a settlement of the claims against the shareholder defendants.

On April 4, 2019, plaintiff filed a motion to amend the Fifth Amended Complaint to assert a federal constructive fraudulent transfer claim against certain shareholder defendants. On April 10, 2019, the shareholder defendants filed a brief in opposition to plaintiff's motion to amend. On April 12, 2019, the plaintiff filed a reply brief. On April 23, 2019, the court denied the plaintiff's motion to amend. On June 13, 2019, the court entered judgment pursuant to Rule 54(b). On July 12, 2019, the Plaintiff filed a notice of appeal with respect to the dismissal of his claims and the District Court's denial of his motion for leave to amend. Plaintiff filed an appellate brief on January 7, 2020. The shareholder defendants' brief was filed on April 27, 2020. Plaintiff filed a reply brief on May 18, 2020. The Court held oral argument on August 24, 2020.

None of these lawsuits alleges any wrongdoing on the part of Rydex Variable Trust. The following series of Rydex Variable Trust held shares of Tribune and tendered these shares as part of Tribune's LBO: Nova Fund, S&P 500 2x Strategy Fund, Multi-Cap Core Equity Fund, S&P 500 Pure Value Fund, Hedged Equity Fund and Multi-Hedge Strategies Fund (the "Funds"). The value of the proceeds received by the foregoing Funds was \$12,580, \$2,380, \$1,360, \$148,376, \$2,720, and \$119,034, respectively. At this stage of the proceedings, Rydex Variable Trust is not able to make a reliable predication as to the outcome of these lawsuits or the effect, if any, on a Fund's net asset value.

Note 12 – COVID-19

The global ongoing crisis caused by the outbreak of COVID-19 and the current recovery underway is causing disruption to consumer demand and economic output and supply chains. There are still travel restrictions and quarantines, and adverse impacts on local and global economies. Investors should be aware that in light of the current uncertainty, volatility and distress in economies, financial markets, and labor and public health conditions around the world, the Funds' investments and a shareholder's investment in a Fund are subject to sudden and substantial losses, increased volatility and other adverse events. Firms through which investors invest with the Funds, the Funds, their service providers, the markets in which they invest and market intermediaries are also impacted by quarantines and similar measures intended to respond to and contain the ongoing pandemic, which can obstruct their functioning and subject them to heightened operational and other risks.

Note 13 – Subsequent Events

The Funds evaluated subsequent events through the date the financial statements were available for issue and determined there were no material events that would require adjustment to or disclosure in the Funds' financial statements.

Delivery of Shareholder Reports

Paper copies of the Funds’ annual and semi-annual shareholder reports are not sent by mail, unless you specifically request paper copies of the reports from a fund or from your financial intermediary. Instead, the reports are made available on a website, and you are notified by mail each time a report is posted and provided with a website link to access the report.

You may elect to receive all future shareholder reports in paper free of charge. If you hold shares of a fund directly, you can inform the Fund that you wish to receive paper copies of reports by calling 800.820.0888. If you hold shares of a fund through a financial intermediary, please contact the financial intermediary to make this election. Your election to receive reports in paper may apply to all Guggenheim Funds in which you are invested and may apply to all Guggenheim funds held with your financial intermediary.

Proxy Voting Information

A description of the policies and procedures that the Trust uses to determine how to vote proxies relating to securities held in the Funds’ portfolios is available, without charge and upon request, by calling 800.820.0888. This information is also available from the EDGAR database on the SEC’s website at <https://www.sec.gov>.

Information regarding how the Funds’ voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available without charge, upon request, by calling 800.820.0888. This information is also available from the EDGAR database on the SEC’s website at <https://www.sec.gov>.

Sector Classification

Information in the Schedule of Investments is categorized by sectors using sector-level Classifications defined by the Bloomberg Industry Classification System, a widely recognized industry classification system provider. Each Fund’s registration statement has investment policies relating to concentration in specific sectors/industries. For purposes of these investment policies, the Funds usually classify sectors/industries based on industry-level Classifications used by widely recognized industry classification system providers such as Bloomberg Industry Classification System, Global Industry Classification Standards and Barclays Global Classification Scheme.

Quarterly Portfolio Schedules Information

The Trust files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year as an exhibit to its reports on Form N-PORT, and for reporting periods ended prior to March 31, 2019, filed such information on Form N-Q. The Funds’ Forms N-PORT and N-Q are available on the SEC’s website at <https://www.sec.gov>. Copies of the portfolio holdings are also available to shareholders, without charge and upon request, by calling 800.820.0888.

* Each, a “Sector Fund” and collectively, the “Sector Funds.”

** Each, an “Alternative Fund” and collectively, the “Alternative Funds.”

*** The Fund has been organized as a series of the Trust but has not commenced operations, and shares of the Fund are not currently offered to investors. The investment advisory agreement for the Fund was not considered for renewal. Consequently, all references to “the Funds” or similar references hereafter should be understood as excluding such Fund.

Security Investors, LLC (“Security Investors”), an indirect subsidiary of Guggenheim Partners, LLC, a privately-held, global investment and advisory firm (“Guggenheim Partners”), serves as investment adviser to each of the Funds pursuant to an investment advisory agreement between the Trust, with respect to the Funds, and Security Investors (the “Advisory Agreement”).¹ (Guggenheim Partners, Security Investors and their affiliates may be referred to herein collectively as “Guggenheim.” “Guggenheim Investments” refers to the global asset management and investment advisory division of Guggenheim Partners and includes Security Investors and other affiliated investment management businesses of Guggenheim Partners.)

Under the supervision of the Board of Trustees of the Trust (the “Board,” with the members of the Board referred to individually as the “Trustees”), the Adviser regularly provides investment research, advice and supervision, along with a continuous investment program for the Funds, and directs the purchase and sale of securities and other investments for each Fund’s portfolio.

The Advisory Agreement continues in effect from year to year provided that such continuance is specifically approved at least annually by (i) the Board or a majority of the outstanding voting securities (as defined in the 1940 Act) of each Fund, and, in either event, (ii) the vote of a majority of the Trustees who are not “interested person[s],” as defined by the 1940 Act, of the Trust (the “Independent Trustees”) casting votes in person at

¹ Security Investors also serves as investment adviser to each of Rydex Variable Commodities Strategy CFC, Rydex Variable Managed Futures Strategy CFC and Rydex Variable Multi-Hedge Strategies CFC (each, a “Subsidiary” and collectively, the “Subsidiaries”), wholly-owned subsidiaries of the Trust that are organized as limited companies under the laws of the Cayman Islands and used by Commodities Strategy Fund, Managed Futures Strategy Fund and Multi-Hedge Strategies Fund, respectively, to obtain commodities exposure. Pursuant to a separate investment management agreement for each Subsidiary (each, a “Subsidiary Advisory Agreement” and collectively, the “Subsidiary Advisory Agreements”), the Subsidiary pays Security Investors an advisory fee at the same rate that the respective Fund pays Security Investors under the Advisory Agreement. The Subsidiary Advisory Agreements do not require annual renewal by the Independent Trustees and will continue until they are terminated as provided in the Agreements. In addition, Security Investors has entered into a separate waiver agreement with respect to each applicable Fund pursuant to which Security Investors has contractually agreed to waive the advisory fee it receives from the Fund in an amount equal to the advisory fee paid to Security Investors by the respective Subsidiary. This undertaking will continue with respect to each applicable Fund for so long as the Fund invests in the respective Subsidiary, and may be terminated only with the approval of the Board.

a meeting called for such purpose.² At meetings held by videoconference on April 20, 2021 (the “April Meeting”) and on May 26, 2021 (the “May Meeting”), the members of the Contracts Review Committee of the Board (the “Committee”), consisting solely of the Independent Trustees, met separately from Guggenheim to consider the proposed renewal of the Advisory Agreement in connection with the Committee’s annual contract review schedule.

As part of its review process, the Committee was represented by independent legal counsel to the Independent Trustees (“Independent Legal Counsel”), from whom the Independent Trustees received separate legal advice and with whom they met separately. Independent Legal Counsel reviewed and discussed with the Committee various key aspects of the Trustees’ legal responsibilities relating to the proposed renewal of the Advisory Agreement and other principal contracts. The Committee took into account various materials received from Guggenheim and Independent Legal Counsel. The Committee also considered the variety of written materials, reports and oral presentations the Board received throughout the year regarding performance and operating results of the Funds, and other information relevant to its evaluation of the Advisory Agreement.

In connection with the contract review process, FUSE Research Network LLC (“FUSE”), an independent, third-party research provider, was engaged to prepare advisory contract renewal reports designed specifically to help the Board fulfill its advisory contract renewal responsibilities. The objective of the reports is to present the subject funds’ relative position regarding fees, expenses and total return performance, with peer group and universe comparisons. The Committee met with a representative of FUSE at the April Meeting to discuss how FUSE determined the appropriate peer groups for the Funds. Thereafter, the Committee assessed the data provided in the FUSE reports as well as commentary presented by Guggenheim, including, among other things, a list of Funds for which no peer funds were identified, a summary of notable distinctions between certain Funds and the applicable peer group identified in the FUSE reports and explanations for custom peer groups created for certain Funds that do not fit well into any particular category.

As part of its evaluation of the Adviser and the proposed renewal of the Advisory Agreement, the Committee took into account that each Tradable Fund is designed to provide tactical advisors with specific exposures (with the exception of the U.S. Government Money Market Fund which is designed to support tactical advisors seeking to avoid market exposure or preserve capital) while also providing for unlimited trading privileges, and that the Tradable Funds offer a unique set of product features. The Committee noted that each Tradable Fund (other than the U.S. Government Money Market Fund) seeks to track, or correlate to, the performance (before fees and expenses) of a specific benchmark index over certain time periods or a specific market, noting that, because appropriate published indices are not available for many of the Sector Funds and the Real Estate Fund, the Adviser has developed its own methodology to construct internal performance benchmarks for the Sector Funds and the Real Estate Fund. In this regard, the Committee received information regarding the Adviser’s proprietary methodology for constructing internal performance benchmarks for such Funds, including the personnel with primary responsibility for the maintenance and execution of the methodology. The Committee also noted that, in addition to the performance information included in the FUSE reports, the Adviser provided tracking error data for each Tradable Fund (other than U.S. Government Money Market Fund) relative to the applicable benchmark index or Guggenheim-constructed internal performance benchmark.

In addition, Guggenheim provided materials and data in response to formal requests for information sent by Independent Legal Counsel on behalf of the Independent Trustees. Guggenheim also made a presentation at the April Meeting. Throughout the process, the Committee asked questions of management and requested certain additional information, which Guggenheim provided (collectively with the foregoing reports and materials, the “Contract Review Materials”). The Committee considered the Contract Review Materials in the context of its accumulated experience governing the Trust and other Guggenheim funds and weighed the factors and standards discussed with Independent Legal Counsel.

Following an analysis and discussion of relevant factors, including those identified below, and in the exercise of its business judgment, the Committee concluded that it was in the best interest of each Fund to recommend that the Board approve the renewal of the Advisory Agreement for an additional annual term.

Nature, Extent and Quality of Services Provided by the Adviser: With respect to the nature, extent and quality of services currently provided by the Adviser, the Committee considered the qualifications, experience and skills of key personnel performing services for the Funds, including those personnel providing compliance and risk oversight, as well as the supervisors and reporting lines for such personnel. The

² On March 13, 2020, the Securities and Exchange Commission issued an exemptive order providing relief to registered management investment companies from certain provisions of the 1940 Act in light of the outbreak of coronavirus disease 2019 (COVID-19), including the in-person voting requirements under Section 15(c) of the 1940 Act with respect to approving or renewing an investment advisory agreement, subject to certain conditions. The relief, initially provided for a limited period of time, has been extended multiple times and was in effect as of May 26, 2021. The Board, including the Independent Trustees, relied on this relief in voting to renew the Advisory Agreement at a meeting of the Board held by videoconference on May 26, 2021.

Committee also considered other information, including Guggenheim's resources and related efforts to retain, attract and motivate capable personnel to serve the Funds. In evaluating Guggenheim's resources and capabilities, the Committee considered Guggenheim's commitment to focusing on, and investing resources in support of, the funds in the Guggenheim fund complex, including the Funds.

The Committee's review of the services provided by Guggenheim to the Funds included consideration of Guggenheim's investment processes and index methodologies and resulting performance, portfolio oversight and risk management, and the related regular quarterly reports and presentations received by the Board. The Committee took into account the risks borne by Guggenheim in sponsoring and providing services to the Funds, including entrepreneurial, legal, regulatory and operational risks. The Committee considered the resources dedicated by Guggenheim to compliance functions and the reporting made to the Board by Guggenheim compliance personnel regarding Guggenheim's adherence to regulatory requirements. The Committee also considered the regular reports the Board receives from the Trust's Chief Compliance Officer regarding compliance policies and procedures established pursuant to Rule 38a-1 under the 1940 Act.

With respect to the Tradable Funds, the Committee considered their unique product features, including their tradability, the real time cash process employed for such Funds, and the leveraged and inverse strategies offered, and the Adviser's assessment of the value to shareholders provided by the Funds' structure and the services required by the Adviser to provide the Funds' unique features. The Committee noted that the Tradable Funds allow frequent trading and noted the magnitude of changes in each Fund's assets during 2020 and 2019. In this regard, the Committee noted that the real time cash process is utilized by the Adviser to aggregate shareholder flow data to estimate daily net subscriptions or redemptions in order to mitigate the costs associated with the tradability feature, improve tracking and keep the Funds fully invested. The Committee also took into account the infrastructure developed by the Adviser to manage the significant volume and size of trading that typically occurs near the end of each business day, as well as the unique considerations required in the portfolio construction process to determine the optimal way to obtain the applicable exposures, including leveraged and inverse exposures, while allowing for high turnover. With respect to the Sector Funds and the Real Estate Fund, the Committee considered the Adviser's proprietary methodology for constructing internal performance benchmarks for such Funds, noting the Adviser's statement that it uses a quantitative portfolio investment process that also requires investment discretion in implementing adjustments for factors that affect tradability and liquidity, changing dynamics within a sector or market, and corporate actions such as spin-offs, among other adjustments.

In connection with the Committee's evaluation of the overall package of services provided by Guggenheim, the Committee considered Guggenheim's administrative services, including its role in supervising, monitoring, coordinating and evaluating the various services provided by the fund administrator, transfer agent, distributor, custodian and other service providers to the Funds. The Committee evaluated the Office of Chief Financial Officer (the "OCFO"), established to oversee the fund administration, accounting and transfer agency services provided to the Funds and other Guggenheim funds, including the OCFO's resources, personnel and services provided.

With respect to Guggenheim's resources and the ability of the Adviser to carry out its responsibilities under the Advisory Agreement, the Chief Financial Officer of Guggenheim Investments reviewed with the Committee financial information concerning the holding company for Guggenheim Investments, Guggenheim Partners Investment Management Holdings, LLC ("GPIMH"), and the various entities comprising Guggenheim Investments, and provided the audited consolidated financial statements of GPIMH.

The Committee also considered the acceptability of the terms of the Advisory Agreement, including the scope of services required to be performed by the Adviser.

Based on the foregoing, and based on other information received (both oral and written) at the April Meeting and the May Meeting, as well as other considerations, including the Committee's knowledge of how the Adviser performs its duties obtained through Board meetings, discussions and reports throughout the year, the Committee concluded that the Adviser and its personnel were qualified to serve the Funds in such capacity and may reasonably be expected to continue to provide a high quality of services under the Advisory Agreement with respect to the Funds.

Investment Performance: Except as otherwise noted, the Committee received, for each Fund, investment returns for the since-inception, ten-year, five-year, three-year, one-year and three-month periods ended December 31, 2020, as applicable. For certain Tradable Funds with only one or two identified peer funds, if any, from the two direct competitor product suites, only investment returns for the five-year, three-year and one-year periods ended December 31, 2020, as applicable, were received. In addition, the Committee received a comparison of each Fund's performance to the performance of a benchmark and a peer group of similar funds based on asset levels as identified by FUSE, and for certain Funds, a broader universe of funds, in each case for the same periods, as applicable. The Committee also received from FUSE a description

of the methodology for identifying each Fund's peer group and universe for performance and expense comparisons. For the Tradable Funds (other than U.S. Government Money Market Fund), the Committee received tracking error data for other similar funds in the Guggenheim fund complex. The Committee also received certain updated performance information as of March 31, 2021.

With respect to the Tradable Funds (other than U.S. Government Money Market Fund), the Committee considered the Adviser's statement that such Funds are designed as a suite of products seeking to provide a number of broad and specific exposures for tactical advisors and also considered that the Funds have a unique set of product features designed to meet the needs of those tactical advisors, which has an impact on performance. The Committee considered the Adviser's statement that, in circumstances in which there are significant deviations from expected returns, management seeks to understand the cause of such deviations and determine if any remedial actions should be considered, noting that no such remedial actions were currently deemed necessary by the Adviser to address performance. The Committee also considered the Adviser's discussion of factors that contribute to such deviations, including shareholder activity, financing costs associated with leverage and investment instruments used to achieve certain exposures, noting the Adviser's statement that expenses and transaction costs based on shareholder activity are the primary driver of performance differences.

With respect to certain Tradable Funds with only one or two identified peer funds, if any, from the two direct competitor product suites, the Committee considered the Adviser's summary of notable distinctions between the Tradable Funds and the peer funds in the two direct competitor product suites and noted the Adviser's statement that certain Tradable Funds do not have any peer funds that provide the same index, leverage or inverse exposure. The Committee also considered management's commentary explaining instances of significant underperformance (defined as greater than 100 basis points), as applicable, of such Funds over the five-year, three-year and/or one-year periods ended December 31, 2020, relative to their respective peer funds, attributing such relative underperformance to, among other factors, differences in portfolio construction methodologies and exposures. The Committee noted that the two direct competitor product suites do not offer a fund comparable to the Commodities Strategy Fund and considered a comparison to a peer group identified in the FUSE report that includes actively-managed funds, noting the limitations in the comparability of such peer group.

With respect to the U.S. Government Money Market Fund, the Committee noted the Adviser's statement that the Fund is designed to support tactical advisors seeking to avoid market exposure or preserve capital and that only one other fund in its peer group identified in the FUSE report has product features that make it comparable in this regard. The Committee considered that the Fund outperformed the comparable peer fund over the five-year, three-year and one-year periods ended December 31, 2020, although its performance ranked in the fourth quartile of the broader peer group over the same time periods.

With respect to the Sector Funds and the Real Estate Fund, the Committee considered the Adviser's summary of notable distinctions between each Fund and the applicable peer group identified in the FUSE reports. The Committee considered that the peer groups are comprised of actively-managed funds seeking similar exposures but that do not offer the same product features, including unlimited trading privileges, noting the Adviser's statement that certain peer funds also cover a narrower or wider market segment than the applicable Fund. The Committee considered management's commentary explaining such Funds' underperformance, as applicable, over the five-year, three-year and one-year periods ended December 31, 2020, relative to their respective peer groups, attributing such underperformance to, among other factors, high turnover associated with daily shareholder flows, differences in exposures and the Funds' modified cap weighting approach to portfolio construction.

With respect to the Alternative Funds (i.e., the non-Tradable Funds), in seeking to evaluate Fund performance over a full market cycle, the Committee focused its attention on five-year and three-year performance rankings as compared to the relevant universe of funds. The Committee observed that the Global Managed Futures Strategy Fund's returns ranked in the third quartile or better of its performance universe for each of the relevant periods considered.

In addition, the Committee made the following observations regarding the other Alternative Funds:

Long Short Equity Fund: The Fund's returns ranked in the 80th percentile of its performance universe for the five-year and three-year periods ended December 31, 2020. The Committee noted management's explanation that the Fund's relative underperformance over these time periods was primarily a result of the Fund's fundamental factor tilts and the underperformance of the Fund's prior investment strategy. The Committee noted management's statement that the Fund's long exposure to value and short exposure to growth, as well as negative sector exposures to well-performing sectors, have detracted from investment performance. The Committee also noted management's statement that

the Fund employed a momentum-based investment strategy prior to May 31, 2017 that demonstrated bouts of volatility and inconsistencies, which affected long-term performance. The Committee noted that, as of March 31, 2021, the five-year and three-year performance rankings had improved to the 45th and 60th percentiles, respectively.

Multi-Hedge Strategies Fund: The Fund's returns ranked in the 100th percentile of its performance universe for the five-year and three-year periods ended December 31, 2020. The Committee noted management's explanation that the Fund's relative underperformance over these time periods was primarily due to the underperformance of its long short equity sleeve and its overall lower equity market beta relative to its peers. With respect to the Fund's long short equity sleeve, the Committee noted management's statement that the sleeve's high long exposure to value and short exposure to growth have detracted from investment performance. The Committee took into account management's statement that the Fund changed its underlying investment strategies to improve diversification amongst the strategies, target a higher and more stable risk profile and enhance risk-adjusted returns while providing continuity for shareholders. The Committee noted that, as of March 31, 2021, the five-year and three-year performance rankings had improved to the 55th and 21st percentiles, respectively.

Based on the foregoing, and based on other information received (both oral and written) at the April Meeting and the May Meeting, as well as other considerations, the Committee concluded that: (i) each Fund's performance was acceptable; or (ii) it was satisfied with Guggenheim's responses and efforts to improve investment performance.

Comparative Fees, Costs of Services Provided and the Benefits Realized by the Adviser from Its Relationship with the Funds: The Committee compared each Fund's contractual advisory fee, net effective management fee³ and total net expense ratio to the applicable peer group, if any. The Committee also reviewed the median advisory fees and expense ratios, including expense ratio components (e.g., transfer agency fees, administration fees, other operating expenses, distribution fees and fee waivers/reimbursements), of the peer group of funds. In addition, the Committee considered information regarding Guggenheim's process for evaluating the competitiveness of each Fund's fees and expenses, noting Guggenheim's statement that evaluations seek to incorporate a variety of factors with a general focus on ensuring fees and expenses: (i) are competitive; (ii) give consideration to resource support requirements; and (iii) ensure Funds are able to deliver on shareholder return expectations.

As part of its evaluation of each Fund's advisory fee, the Committee considered how such fees compared to the advisory fee charged by Guggenheim to one or more other clients that it manages pursuant to similar investment strategies, to the extent applicable. The Committee noted Guggenheim's statement that it does not provide advisory services to other clients that have investment strategies similar to those of the Funds, other than the retail fund counterparts to the Funds and certain other clients with respect to Long Short Equity Fund, each of which is charged the same advisory fee as the corresponding Fund.

With respect to the Tradable Funds that are designed to track a widely available index, which have only one or two identified peer funds, if any, from the two direct competitor product suites, the Committee considered the Adviser's summary of notable distinctions between the Tradable Funds and the peer funds, noting the Adviser's statement that only one of the two direct competitor product suites is directly comparable for purposes of assessing such Funds' advisory fees. For those Tradable Funds with a peer fund from the directly comparable product suite, the Committee noted that each Fund's contractual advisory fee was equal to or lower than the contractual advisory fee charged to the peer fund, with the exception of 15 Funds for which the contractual advisory fee was five basis points higher than the contractual advisory fee charged to the peer fund. With respect to each of those 15 Funds, the Adviser agreed to waive five basis points of its contractual advisory fee through August 1, 2022. The Committee also considered that each such Fund's net effective management fee was competitive. The Committee noted that the higher total net expense ratio as compared to the peer fund was driven primarily by the higher other operating expenses of each such Fund.

With respect to the U.S. Government Money Market Fund, the Committee noted the Adviser's statement that the Fund is designed to support tactical advisors seeking to avoid market exposure or preserve capital and that only one other fund in its peer group identified in the FUSE report is directly comparable in terms of product features offered. The Committee considered that, as of the Fund's and the peer fund's respective fiscal year ends, the Fund's contractual advisory fee, net effective management fee and total net expense ratio are lower than those of the peer fund. The Committee noted the Adviser's statement that, given the current low interest rate environment, it is currently waiving, and intends to continue to waive, all or a portion of its fees to the extent necessary to maintain the Fund's stable net asset value.

³ The "net effective management fee" for each Fund represents the combined effective advisory fee and administration fee as a percentage of average net assets for the latest fiscal year, after any waivers and/or reimbursements.

With respect to the Sector Funds and the Real Estate Fund, the Committee considered the Adviser's summary of notable distinctions between each Fund and the applicable peer group identified in the FUSE reports. The Committee considered that the peer groups are comprised of actively-managed funds seeking similar exposures but that do not offer the same product features, such as unlimited trading privileges. As a result, the fee and expense comparisons are more difficult given the uniqueness of both the Funds' structure and the portfolio management needed to meet client requirements.

With respect to the Alternative Funds (i.e., the non-Tradable Funds), the Committee made the following observations:

Global Managed Futures Strategy Fund: The Fund's contractual advisory fee ranks in the fourth quartile (100th percentile) of its peer group. The Fund's net effective management fee ranks in the first quartile (1st percentile) of its peer group. The Fund's total net expense ratio ranks in the fourth quartile (100th percentile) of its peer group, with higher other operating expenses than its peer fund. The Committee considered that the peer group is limited in size and is comprised of only two funds. The Committee noted that the Fund's contractual advisory fee and total net expense ratio each rank more competitively when compared to the broader universe of funds.

Long Short Equity Fund: The Fund's contractual advisory fee, net effective management fee and total net expense ratio each rank in the fourth quartile (80th, 80th and 100th percentiles, respectively) of its peer group. The Committee noted the Fund's higher other operating expenses compared to its peers. The Committee considered that the peer group is limited in size and is comprised of only six funds.

Multi-Hedge Strategies Fund: Although the Fund's contractual advisory fee ranks in the fourth quartile (75th percentile) of its peer group, the Committee considered that the Fund's net effective management fee and total net expense ratio each rank at the median of its peer group. The Committee considered that the peer group is limited in size and is comprised of only five funds.

With respect to the costs of services provided and benefits realized by Guggenheim Investments from its relationship with the Funds, the Committee reviewed a profitability analysis and data from management for each Fund setting forth the average assets under management for the twelve months ended December 31, 2020, gross revenues received by Guggenheim Investments, expenses allocated to the Fund, expense waivers (as applicable), earnings and the operating margin/profitability rate, including variance information relative to the foregoing amounts as of December 31, 2019. In addition, the Chief Financial Officer of Guggenheim Investments reviewed with, and addressed questions from, the Committee concerning the expense allocation methodology employed in producing the profitability analysis.

In the course of its review of Guggenheim Investments' profitability, the Committee took into account the methods used by Guggenheim Investments to determine expenses and profit. The Committee considered all of the foregoing, among other things, in evaluating the costs of services provided, the profitability to Guggenheim Investments and the profitability rates presented.

The Committee also considered other benefits available to the Adviser because of its relationship with the Funds and noted Guggenheim's statement that it does not believe the Adviser derives any such "fall-out" benefits. In this regard, the Committee noted Guggenheim's statement that, although it does not consider such benefits to be fall-out benefits, the Adviser may benefit from certain economies of scale and synergies, such as enhanced visibility of the Adviser, enhanced leverage in fee negotiations and other synergies arising from offering a broad spectrum of products, including the Funds.

Based on the foregoing, and based on other information received (both oral and written) at the April Meeting and the May Meeting, as well as other considerations, the Committee concluded that the comparative fees and the benefits realized by the Adviser from its relationship with the Funds were appropriate and that the Adviser's profitability from its relationship with the Funds was not unreasonable.

Economies of Scale: The Committee received and considered information regarding whether there have been economies of scale with respect to the management of the Funds as Fund assets grow, whether the Funds have appropriately benefited from any economies of scale, and whether there is potential for realization of any further economies of scale. The Committee considered whether economies of scale in the provision of services to the Funds were being passed along to and shared with the shareholders. The Committee considered that Guggenheim believes it is appropriately sharing potential economies of scale and that, although Guggenheim's overall expenses declined in 2020, generally, costs are anticipated to increase in many key areas, including compensation of portfolio managers, key analysts and support staff, as well as for infrastructure needs, with respect to risk management oversight, valuation processes and disaster recovery systems, among other things.

The Committee also noted the process employed by the Adviser to evaluate whether it would be appropriate to institute a new breakpoint for an Alternative Fund (i.e., a non-Tradable Fund), with consideration given to, among other things: (i) the Fund's size and trends in asset levels over recent years; (ii) the competitiveness of the expense levels; (iii) whether expense waivers are in place; (iv) changes and trends in revenue and expenses; (v) whether there are any anticipated expenditures that may benefit the Fund in the future; (vi) Fund profit level margins; (vii) relative Fund performance; (viii) the nature, extent and quality of services management provides to the Fund; and (ix) the complexity of the Fund's investment strategy and the resources required to support the Fund.

As part of its assessment of economies of scale, the Committee also considered Guggenheim's view that it seeks to share economies of scale through a number of means, including breakpoints, advisory fees set at competitive rates pre-assuming future asset growth, expense waivers and limitations, and investments in personnel, operations and infrastructure to support the Fund business. The Committee also received information regarding amounts that had been shared with shareholders through such expense waivers and limitations. Thus, the Committee considered the size of the Funds and the competitiveness of and/or other determinations made regarding the current advisory fee for each Fund, as well as whether a Fund is subject to an expense limitation.

Based on the foregoing, and based on other information received (both oral and written) at the April Meeting and the May Meeting, as well as other considerations, the Committee concluded that the advisory fee for each Fund was reasonable.

Overall Conclusions

The Committee concluded that the investment advisory fees are fair and reasonable in light of the extent and quality of the services provided and other benefits received and that the continuation of the Advisory Agreement is in the best interest of each Fund. In reaching this conclusion, no single factor was determinative or conclusive and each Committee member, in the exercise of his or her well-informed business judgment, may afford different weights to different factors. At the May Meeting, the Committee, constituting all of the Independent Trustees, recommended the renewal of the Advisory Agreement for an additional annual term.

We may use Aggregate/Anonymous Information for any purpose, including without limitation for research and marketing purposes, and may also share such data with any third parties, including advertisers, promotional partners, and sponsors.

We do not sell information about current or former clients or their accounts to third parties. Nor do we share this information, except when necessary to complete transactions at your request, to make you aware of investment products and services that we or our affiliates offer, or as permitted or required by law.

We provide information about you to companies and individuals not affiliated with Guggenheim Investments to complete certain transactions or account changes, or to perform services for us related to your account. For example, if you ask to transfer assets from another financial institution to Guggenheim Investments, we must provide certain information about you to that company to complete the transaction. We provide the third party with only the information necessary to carry out its responsibilities and only for that purpose. And we require these third parties to treat your private information with the same high degree of confidentiality that we do. To alert you to other Guggenheim Investments products and services, we share your information within our family of affiliated companies. You may limit our sharing with affiliated companies as set out below. We may also share information with any successor to all or part of our business, or in connection with steps leading up to a merger or acquisition. For example, if part of our business was sold we may give customer information as part of that transaction. We may also share information about you with your consent.

We will release information about you if you direct us to do so, if we are compelled by law to do so, or in other circumstances as permitted by law (for example, to protect your account from fraud).

If you close your account(s) or become an inactive client or investor, we will continue to adhere to the privacy policies and practices described in this notice.

Opt-Out Provisions and Your Data Choices

The law allows you to "opt out" of certain kinds of information sharing with third parties. We do not share personal information about you with any third parties that triggers this opt-out right. This means **YOU ARE ALREADY OPTED OUT**.

When you are no longer our client or investor, we continue to share your information as described in this notice, and you may contact us at any time to limit our sharing by sending an email to CorporateDataPrivacy@GuggenheimPartners.com.

European Union Data Subjects and certain others: In addition to the choices set forth above, residents of the European Union and certain other jurisdictions have certain rights to (1) request access to or rectification or deletion of information we collect about them, (2) request a restriction on the processing of their information, (3) object to the processing of their information, or (4) request the portability of certain information. To exercise these or other rights, please contact us using the contact information below. We will consider all requests and provide our response within the time period stated by applicable law. Please note, however, that certain information may be exempt from such requests in some circumstances, which may include if we need to keep processing your information for our legitimate interests or to comply with a legal obligation. We may request you provide us with information necessary to confirm your identity before responding to your request.

Residents of France and certain other jurisdictions may also provide us with instructions regarding the manner in which we may continue to store, erase and share your information after your death, and where applicable, the person you have designated to exercise these rights after your death.

How We Protect Privacy Online

We take steps to protect your privacy when you use our web site – www.guggenheiminvestments.com – by using secure forms of online communication, including encryption technology, Secure Socket Layer (SSL) protocol, firewalls and user names and passwords. These safeguards vary based on the sensitivity of the information that we collect and store. However, we cannot and do not guarantee that these measures will prevent every unauthorized attempt to access, use, or disclose your information since despite our efforts, no Internet and/or other

electronic transmissions can be completely secure. Our web site uses “http cookies”—tiny pieces of information that we ask your browser to store. We use cookies for session management and security features on the Guggenheim Investments web site. We do not use them to pull data from your hard drive, to learn your e-mail address, or to view data in cookies created by other web sites. We will not share the information in our cookies or give others access to it. See the legal information area on our web site for more details about web site security and privacy features.

How We Safeguard Your Personal Information and Data Retention

We restrict access to nonpublic personal information about you to our employees and in some cases to third parties (for example, the service providers described above) as permitted by law. We maintain strict physical, electronic and procedural safeguards that comply with federal standards to guard your nonpublic personal information.

We keep your information for no longer than necessary for the purposes for which it is processed. The length of time for which we retain information depends on the purposes for which we collected and use it and/or as required to comply with applicable laws. Information may persist in copies made for backup and business continuity purposes for additional time.

International Visitors

If you are not a resident of the United States, please be aware that your information may be transferred to, stored and processed in the United States where our servers are located and our databases are operated. The data protection and other laws of the United States and other countries might not be as comprehensive as those in your country.

In such cases, we ensure that a legal basis for such a transfer exists and that adequate protection is provided as required by applicable law, for example, by using standard contractual clauses or by transferring your data to a jurisdiction that has obtained an adequacy finding. Individuals whose data may be transferred on the basis of standard contractual clauses may contact us as described below.

We'll Keep You Informed

If you have any questions or concerns about how we treat your personal data, we encourage you to consult with us first. You may also contact the relevant supervisory authority.

We reserve the right to modify this policy at any time and will inform you promptly of material changes. You may access our privacy policy from our web site at www.guggenheiminvestments.com. Should you have any questions regarding our privacy policy, contact us by email at CorporateDataPrivacy@GuggenheimPartners.com.

In compliance with SEC Rule 22e-4 under the U.S. Investment Company Act of 1940 (the “Liquidity Rule”), the Rydex Variable Trust (the “Trust”) has adopted and implemented a written liquidity risk management program (the “Program”) for each series of the Trust (each, a “Fund” and, collectively, the “Funds”). The Trust’s Board of Trustees (the “Board”) has also designated a Program administrator (the “Administrator”).

The Liquidity Rule requires that the Program be reasonably designed to assess and manage each Fund’s liquidity risk. A Fund’s “liquidity risk” is the risk that the Fund could not meet requests to redeem shares issued by the Fund without significant dilution of the remaining investors’ interests in the Fund. The Program includes a number of elements that support the assessment, management and review of liquidity risk. In accordance with the Program, each Fund’s liquidity risk is assessed no less frequently than annually taking into consideration a variety of factors, including, as applicable, the Fund’s investment strategy and liquidity of portfolio investments, cash flow projections, and holdings of cash and cash equivalents, as well as borrowing arrangements and other funding sources. Certain factors are considered under both normal and reasonably foreseeable stressed conditions. There is no guarantee that the Program will achieve its objective under all circumstances.

Under the Program, each Fund portfolio investment is classified into one of four liquidity categories based on a determination of the number of days it is reasonably expected to take to convert the investment to cash, or sell or dispose of the investment, in current market conditions without significantly changing the investment’s market value. The Program is reasonably designed to meet Liquidity Rule requirements relating to “highly liquid investment minimums” (i.e., the minimum amount of Fund net assets to be invested in highly liquid investments that are assets) and to monitor compliance with the Liquidity Rule’s limitations on a Fund’s investments in illiquid investments. Under the Liquidity Rule, a Fund is prohibited from acquiring any illiquid investment if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments that are assets.

During the period covered by this shareholder report, the Board received a written report (the “Report”) prepared by the Administrator addressing the Program’s operation and assessing the adequacy and effectiveness of its implementation for the period from March 31, 2020, to March 31, 2021. The Report concluded that the Program operated effectively, the Program had been and continued to be reasonably designed to assess and manage each Fund’s liquidity risk, and the Program has been adequately and effectively implemented to monitor and respond to the Funds’ liquidity developments, as applicable. The Report further concluded that the Program operated effectively during recent market conditions arising from COVID-19.

Please refer to your Fund’s prospectus for more information regarding the Fund’s exposure to liquidity risk and other risks to which an investment in the Fund may be subject.
