Shares of the Portfolios are currently offered only to separate accounts established by insurance companies to fund variable annuity contracts and variable life insurance policies. Portfolio shares may also be offered to certain qualified pension and retirement plans and accounts permitting accumulation of assets on a tax-deferred basis.

Please consider a Portfolio's investment objective, risks, charges and expenses carefully before investing. For more complete information about Lazard Retirement Series, Inc. (the "Fund"), you may obtain a prospectus or a Portfolio's summary prospectus by calling 800-823-6300, or online, at www.lazardassetmanagement.com. Read the prospectus or the Portfolio's summary prospectus carefully before you invest. The prospectus and a Portfolio's summary prospectus contain the investment objective, risks, charges, expenses and other information about the Portfolio, which are not detailed in this report.

Distributed by Lazard Asset Management Securities LLC.

Dear Shareholder,

Progress in the long battle against COVID-19 brightened the economic outlook in many parts of the world in the first six months of 2021, and that was reflected in the global equity markets. The MSCI World Index returned a healthy 13% as vaccination rates rose, many economies reopened, and recovery took hold, especially in the United States where vaccination accelerated dramatically.

Yet, this ride up was far from smooth. During the first half of 2021, investor sentiment seemed to alternate, often from day-to-day, between growing optimism over the economic rebound and worry over the downside risks that could derail the recovery, from uneven vaccine distribution to outbreaks of the virus in Europe and Asia and the emergence of more virus strains.

Increasingly, investors also became concerned with an "upside risk" that could result from faster economic growth: inflation. Amid supply-chain bottlenecks, surging commodity prices, and sharp increases in China's producer prices, inflation moved front and center in the second quarter. The key concern was that the huge fiscal stimulus in the United States, in particular, could drive inflation higher, forcing the Federal Reserve (the "Fed") and other central banks to retreat from their easy monetary policy before economic recovery is fully realized. In fact, the US Consumer Price Index (CPI) to date in 2021 jumped to an annualized 5% in May—the highest rate in more than a decade and well above the Fed's 2% target for inflation.

However, the Fed has maintained that recent higher inflation is temporary and due to the global economy restarting. At their meeting in June, the Federal Open Market Committee moved up its own median estimate for the timing of their next interest rate increase to 2023 from 2024, a signal that the economy is recovering more quickly than the central bank had expected, but also that it is not currently overheating, which would warrant action sooner. In sum, the Fed seemed to relieve many investors' concerns over inflation, for now.

In this tug-of-war market environment, the equity bulls won out as many companies reported higher earnings, brighter outlooks, or both. Although stock markets in both developed and emerging markets generally gained, developed markets generally performed better than emerging markets as vaccination rates and economic reopening advanced more quickly in developed markets. In the United States, the S&P 500 Index hit a series of new highs thanks in part to exceptionally strong corporate earnings.

We remain optimistic for the second half of 2021. The Fed expects US real gross domestic product ("GDP") growth to reach a staggering 7% for the year (after nearly –3.5% in 2020), and vaccination rates should continue to climb, helping to boost growth, particularly in the emerging markets. Still, like the past six months, the journey is likely to be bumpy. Inflation, economic data, and the path of recovery itself may seem volatile at times. As of the end of the semi-annual period, a highly infectious COVID-19 strain has become dominant around the world, a sobering reminder that we are still fighting the pandemic.

In the push-pull of the financial markets, we believe fundamental analysis and stock selection are crucial to staying on track. We value your continued confidence in us, and, as always, we will strive for long-term patterns of performance that are consistent with your expectations.

Sincerely,

Lazard Asset Management LLC

MSCI World Index	39.04%	14.83%	11.80% (Service Shares) 22.85% (Investor Shares)
GDMA Index	19.82%	8.68%	6.95% (Service Shares) 13.99% (Investor Shares)

<sup>†</sup> The inception date for the Service Shares was April 30, 2012 and for the Investor Shares was December 31, 2018.

#### Notes to Performance Overviews:

\* Total returns reflect reinvestment of all dividends and distributions, if any. Certain expenses of the Portfolio may have been waived or reimbursed by Lazard Asset Management LLC, the Fund's investment manager (the "Investment Manager"), State Street Bank and Trust Company, the Fund's administrator ("State Street"), or DST Asset Manager Solutions, Inc., the Fund's transfer agent and dividend disbursing agent ("DST"); without such waiver/reimbursement of expenses, the Portfolio's returns would have been lower. Performance information does not reflect the fees and charges imposed by participating insurance companies at the separate account level, and such charges will have the effect of reducing performance. Returns for a period of less than one year are not annualized.

Performance results do not include adjustments made for financial reporting purposes in accordance with US Generally Accepted Accounting Principles ("GAAP"), if any, and also exclude one-time adjustments related to reimbursed custodian out-of-pocket expenses (Note 3 in the Notes to Financial Statements) for Lazard Retirement

Emerging Markets Equity Portfolio and may differ from amounts reported in the financial highlights.

The performance quoted represents past performance. Current performance may be lower or higher than the performance quoted. Past performance is not indicative, or a guarantee, of future results; the investment return and principal value of the Portfolio will fluctuate, so that Portfolio shares, when redeemed, may be worth more or less than their original cost. Within the longer periods illustrated, there may have been short-term fluctuations, counter to the overall trend of investment results, and no single period of any length may be taken as typical of what may be expected in future periods.

The performance data of the indices have been prepared from sources and data that the Investment Manager believes to be reliable, but no representation is made as to their accuracy. The indices are unmanaged, have no fees or costs and are not available for investment.

The MSCI Emerging Markets Index is a free-float-adjusted market capitalization index that is designed to measure equity market performance in the global emerging markets. The MSCI Emerging Markets Index consists of 27 emerging markets country indices.

The MSCI EAFE Index (Europe, Australasia, Far East) is a free-float-adjusted market capitalization index that is designed to measure developed markets equity performance, excluding the United States and Canada. The MSCI EAFE Index consists of 21 developed markets country indices.

The Russell 2500 Index measures the performance of the small- to mid-cap segment of the US equity universe, commonly referred to as "smid" cap. The Russell 2500 Index is a subset of the Russell 3000® Index. The Russell 3000 Index measures the performance of the largest 3000 US companies, representing approximately 98% of the investable US equity market. The Russell 2500 Index includes approximately 2500 of the smallest securities based on a combination of their market cap and current index membership.

The MSCI World Index is a free-float-adjusted market capitalization index that is designed to measure global developed markets equity performance. The MSCI World Index consists of 23 developed markets country indices.

The GDMA Index is a blended index constructed by the Investment Manager that is comprised of 50% MSCI World Index and 50% Bloomberg Barclays Global Aggregate® Index and is rebalanced monthly. The Bloomberg Barclays Global Aggregate Index provides a broad-based measure of global investment-grade fixed-income debt markets, including government-related debt, corporate debt, securitized debt and global Treasury.

\*\* The performance of Service Shares and Investor Shares may vary, primarily based on the differences in fees borne by shareholders investing in different classes. Information About Your Portfolio's Expenses (unaudited)

#### **Expense Example**

As a shareholder in a Portfolio, you incur ongoing costs, including management fees, distribution and service (12b-1) fees (Service Shares only), and other expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in a Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the six month period from January 1, 2021 through June 30, 2021 and held for the entire period.

#### **Actual Expenses**

For each share class of the Portfolios, the first line of the accompanying table provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000=8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

#### **Hypothetical Example for Comparison Purposes**

For each share class of the Portfolios, the second line of the accompanying table provides information about hypothetical account values and hypothetical expenses based on the class' actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Portfolio and other mutual funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other mutual funds.

Please note that you also bear fees and charges imposed by participating insurance companies at the separate account level, which are described in the separate prospectuses issued by the participating insurance companies. Such charges will have the effect of reducing account value.

Portfolio	Beginning Account Value 1/1/21	Ending Account Value 6/30/21	Expenses Paid During Period* 1/1/21- 6/30/21	Annualized Expense Ratio During Period 1/1/21- 6/30/21
Emerging Markets Equit	V			
Service Shares	•			
Actual	\$1,000.00	\$1,108.00	\$7.42	1.42%

# **Lazard Retirement Series, Inc.** Notes to Portfolios of Investments June 30, 2021 (unaudited)

- (\*) Non-income producing security.
- (‡) Security valued using Level 2 inputs, based on reference to a similar security which was trading on an active market, under GAAP hierarchy see Note 8 in the Notes to Financial Statements.
- (#) Pursuant to Rule 144A under the Securities Act of 1933, these securities may only be traded among "qualified institutional buyers." At June 30, 2021, these securities amounted to 0.7% of net assets of Lazard Retirement Global Dynamic Multi-Asset Portfolio.
- (§) Variable and floating rate securities are securities for which interest rate changes are based on changes in a designated base rate. The rates shown are those in effect on June 30, 2021.
- (») The Portfolio, at all times, maintains portfolio securities in sufficient amount to cover its obligations related to investments in forward currency contracts.

<sup>(</sup>d) Annualized for periods less than one year.

### 1. Organization

Lazard Retirement Series, Inc. was incorporated in Maryland on February 13, 1997 and is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company. The Fund, comprised of twenty-three no-load portfolios (each referred to as a "Portfolio"), is currently offered only to separate accounts established by insurance companies to fund variable annuity contracts and variable life insurance policies. Portfolio shares may also be offered to certain qualified pension and retirement plans and accounts permitting accumulation of assets on a tax-deferred basis. Currently only the following four Portfolios, each of which is "diversified", as defined in the 1940 Act, are offered: Lazard Retirement Emerging Markets Equity Portfolio ("Emerging Markets Equity Portfolio"), Lazard Retirement International Equity Portfolio ("International Equity Portfolio"), Lazard Retirement US Small-Mid Cap Equity Portfolio ("US Small-Mid Cap Equity Portfolio"), and Lazard Retirement Global Dynamic Multi-Asset Portfolio ("Global Dynamic Multi-Asset Portfolio"). Each of the other nineteen Portfolios had not commenced operations as of June 30, 2021. Effective January 31, 2006, the Fund designated its existing class of shares as Service Shares and commenced offering Investor Shares. Investor Shares and Service Shares are identical, except as to the services offered to, and expenses borne by, each class of shares. As of June 30, 2021, only the Emerging Markets Equity and Global Dynamic Multi-Asset Portfolios had issued Investor Shares.

### 2. Significant Accounting Policies

The accompanying financial statements are presented in conformity with GAAP. The Fund is an investment company and therefore applies specialized accounting guidance in accordance with Accounting Standards Codification Topic 946. The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of the financial statements:

(a) Valuation of Investments—Equity securities traded on a securities exchange or market, including exchange-traded option contracts, rights and warrants, are valued at the last reported sales price (for US listed equity securities) or the closing price (for non-

US listed equity securities) on the exchange or market on which the security is principally traded or, for securities trading on the NASDAQ National Market System ("NASDAQ"), the NASDAQ Official Closing Price. If there is no available closing price for a non-US listed equity security, the last reported sales price is used. If there are no reported sales of a security on the valuation date, the security is valued at the most recent quoted bid price on such date reported by such principal exchange or market. Forward currency contracts generally are valued using quotations from an independent pricing service. Investments in money market funds are valued at the fund's net asset value ("NAV") per share.

Bonds and other fixed-income securities that are not exchange-traded are valued on the basis of prices provided by independent pricing services which are based on, among other things, trading in securities with similar characteristics, brokers' quotations and/or a matrix system which considers such factors as other security prices, yields and maturities.

Calculation of a Portfolio's NAV may not take place contemporaneously with the determination of the prices of portfolio assets used in such calculation. Trading on certain non-US securities exchanges or markets, such as those in Europe and Asia, ordinarily may be completed before the close of business on each business day in New York (i.e., a day on which the New York Stock Exchange (the "NYSE") is open). In addition, securities trading in a particular non-US country or countries, may not take place on all business days in New York and on which the NAV of a Portfolio is calculated.

If a significant event materially affecting the value of securities occurs between the close of the exchange or market on which the security is principally traded and the time when a Portfolio's NAV is calculated, or when current market quotations otherwise are determined not to be readily available or reliable (including restricted or other illiquid securities such as certain derivative instruments), such securities will be valued at their fair value as determined by, or in accordance with procedures approved by, the Board of Directors (the "Board"). The fair value of non-US securities may be determined with the assistance of an independent pricing service using correlations between the movement of prices

of such securities and indices of US securities and other appropriate indicators, such as closing market prices of relevant ADRs or futures contracts. Certain non-US securities may trade on days when a Portfolio is not open for business, thus affecting the value of the Portfolio's assets on days when Portfolio shareholders may not be able to buy or sell Portfolio shares.

The Valuation Committee of the Investment Manager, which is subject to the oversight of the Board, may evaluate a variety of factors to determine the fair value of securities for which market quotations are determined not to be readily available or reliable. These factors include, but are not limited to, the type of security, the value of comparable securities, observations from financial institutions and relevant news events. Input from the Investment Manager's portfolio management team also will be considered.

The effect of using fair value pricing is that the NAV of a Portfolio will reflect the affected securities' values as determined in the judgment of the Board or its designee instead of being determined by the market. Using a fair value pricing methodology to price securities may result in a value that is different from the most recent closing price of a security and from the prices used by other investment companies to calculate their portfolios' NAVs.

(b) Portfolio Securities Transactions and Investment Income—Portfolio securities transactions are accounted for on trade date. Realized gain (loss) on sales of investments are recorded on a specific identification basis. Dividend income is recorded on the ex-dividend date except for certain dividends from non-US securities where the dividend rate is not available. In such cases, the dividend is recorded as soon as the information is received by a Portfolio. Interest income, if any, is accrued daily. A Portfolio amortizes premiums and accretes discounts on fixed-income securities using the effective yield method.

A Portfolio may be subject to taxes imposed by non-US countries in which it invests. Such taxes are generally based upon income earned or capital gains (realized and/or unrealized). An affected Portfolio accrues and applies such taxes to net investment income, net realized gains and net unrealized gains concurrent with the

recognition of income earned or capital gains (realized and/or unrealized) from the applicable portfolio securities.

As a result of several court cases in certain countries across the European Union, some Portfolios have filed tax reclaims for previously withheld taxes on dividends earned in certain European Union countries. These filings are subject to various administrative proceedings by the local jurisdictions' tax authorities within the European Union, as well as a number of related judicial proceedings. Uncertainty exists as to the ultimate resolution of these proceedings, the likelihood of receipt of these claims, and the potential timing of payment, and accordingly no amounts are reflected in the financial statements. Such amounts, if and when recorded, would reduce foreign withholding taxes and increase dividend income, potentially resulting in an increase in a Portfolio's NAV per share.

(c) Foreign Currency Translation and Forward Currency Contracts—
The accounting records of the Fund are maintained in US dollars.
Portfolio securities and other assets and liabilities denominated in a foreign currency are translated daily into US dollars at the prevailing rates of exchange. Purchases and sales of securities, income receipts and expense payments are translated into US dollars at the prevailing exchange rates on the respective transaction dates.

The Portfolios do not isolate the portion of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in their market prices. Such fluctuations are included in net realized and unrealized gain (loss) on investments.

A forward currency contract is an agreement between two parties to buy or sell currency at a set price on a future date. Daily fluctuations in the value of forward currency contracts are recorded as unrealized appreciation (depreciation) on forward currency contracts. When the contract is closed, the Portfolio records a realized gain (loss) equal to the difference between the value at the time it was opened and the value at the time it was closed. Net realized gain (loss) on foreign currency transactions and forward currency contracts represent net foreign currency gain (loss) from forward

currency contracts, disposition of foreign currencies, currency gain (loss) realized between the trade and settlement dates on securities transactions, and the difference between the amount of dividends, interest and foreign withholding taxes recorded on the Portfolios' accounting records and the US dollar equivalent amounts actually received or paid. Net change in unrealized appreciation (depreciation) on foreign currency reflects the impact of changes in exchange rates on the value of assets and liabilities, other than investments in securities, during the period.

During the period ended June 30, 2021, the Global Dynamic Multi-Asset Portfolio traded in forward currency contracts.

(d) Federal Income Taxes—The Fund's policy is for each Portfolio to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"), and to distribute all of its taxable income, including any net realized capital gains, to shareholders. Therefore, no federal income tax provision is required.

At December 31, 2020, the following Portfolio had unused realized capital loss carryovers which, for federal income tax purposes, could be used to offset future realized capital gains. with no expiration date as follows:

Portfolio	Short-Term	Long-Term
Emerging Markets Equity	\$13,134,879	\$55,827,050
Global Dynamic Multi-Asset	6,457,455	_

Under current tax law, post-October capital losses or certain lateyear ordinary losses, as defined by the Code, within the taxable year may be deferred and treated as occurring on the first day of the following tax year. For the tax year ended December 31, 2020, the Portfolios had no such losses to defer.

For federal income tax purposes, the aggregate cost, aggregate gross unrealized appreciation, aggregate gross unrealized depreciation and the net unrealized appreciation (depreciation) were as follows:

Portfolio	Aggregate Cost	Aggregate Gross Unrealized Appreciation	Aggregate Gross Unrealized Depreciation	Net Unrealized Appreciation (Depreciation)
Emerging Markets				
Equity	\$395,125,976	\$119,304,147	\$17,604,405	\$101,699,742
International Equity	119,319,754	27,175,920	2,536,429	24,639,491
US Small-Mid Cap				
Equity	42,874,115	12,307,196	381,067	11,926,129
Global Dynamic				
Multi-Asset	292,670,332	59,083,657	3,865,717	55,217,940

Management has analyzed the Portfolios' tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on tax returns filed for any open tax years (or expected to be taken on future tax returns). Open tax years are those that remain subject to examination and are based on each tax jurisdiction's statute of limitations. Each Portfolio files a US federal income tax return annually after its fiscal year-end, which is subject to examination by the Internal Revenue Service for a period of three years from the date of filing.

(e) Dividends and Distributions—For each Portfolio, income dividends if any, will be declared and paid annually. During any particular year, net realized gains from investment transactions in excess of available capital loss carryforwards would be taxable to the Portfolios, if not distributed. The Portfolios intend to declare and distribute these amounts, at least annually, to shareholders, but may be distributed more frequently. Differences in per share distributions, by class, are generally due to differences in class specific expenses.

Income and capital gains distributions are determined in accordance with federal income tax regulations which may differ from GAAP. These book/tax differences, which may result in distribution reclassifications, are primarily due to differing treatments of foreign currency transactions, certain expenses, currency straddles, wash sales, passive foreign investment companies, distributions redesignations, return of capital distributions, premium amortization, non-deductible organization expenses and distributions from real estate investment trusts. The book/tax differences relating to

shareholder distributions may result in reclassifications among certain capital accounts.

(f) Allocation of Expenses—Expenses common to the Fund, The Lazard Funds, Inc., and Lazard Global Total Return and Income Fund, Inc. (each a "Lazard Fund" and collectively, the "Lazard Fund Complex"), each a registered management investment company advised by the Investment Manager, not directly chargeable to one or more specific Lazard Funds are allocated to the Fund and among its Portfolios primarily on the basis of relative net assets. Expenses of the Fund not directly chargeable to one or more Portfolios are similarly allocated among the Portfolios primarily on the basis of relative net assets. Portfolios accrue distribution and service (12b-1) fees to Service Shares. Each Portfolio's income, expenses (other than class specific expenses) and realized and unrealized gains and losses are allocated proportionally each day between its classes (if applicable) based upon the relative net assets of each class.

(g) Estimates—The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets resulting from operations during the reporting period. Actual results could differ from those estimates.

(h) Net Asset Value—The NAV per share for each class of each Portfolio is determined each day the NYSE is open for trading as of the close of regular trading on the NYSE (generally 4:00 p.m. Eastern time). The Fund will not treat an intraday unscheduled disruption in NYSE trading as a closure of the NYSE, and will price its shares as of 4:00 p.m., if the particular disruption directly affects only the NYSE. The NAV per share of a class is determined by dividing the value of the total assets of the Portfolio represented by such class, less all liabilities, by the total number of Portfolio shares of such class outstanding.

# 3. Investment Management, Administration, Custody, Distribution and Transfer Agency Agreements

The Fund, on behalf of the Portfolios, has entered into a management agreement (the "Management Agreement") with the Investment Manager. Pursuant to the Management Agreement, the Investment Manager manages the investment operations of each Portfolio and the assets of each Portfolio including the purchase, retention and disposition thereof, in accordance with the Portfolio's investment objective(s), policies, and restrictions, and provides the Portfolios with administrative, operational and compliance assistance services. For its services provided to the Portfolios, the Investment Manager earns a management fee, accrued daily as a percentage of each Portfolio's average daily net assets and payable by each Portfolio monthly, at the annual rate set forth below:

Portfolio	Annual Rate	
Emerging Markets Equity	1.00%	
International Equity	0.75	
US Small-Mid Cap Equity	0.75	
Global Dynamic Multi-Asset	0.80	

The Investment Manager has voluntarily agreed to waive its fees and, if necessary, reimburse each Portfolio until April 30, 2022 (or such other date as indicated below) if the aggregate direct expenses of the Portfolio, exclusive of taxes, brokerage, interest on borrowings, dividend and interest expenses on securities sold short, fees and expenses of "Acquired Funds" (as defined in Form N-1A), fees and expenses related to filing foreign tax reclaims, and extraordinary expenses, on behalf of the Portfolio, exceed the applicable percentage(s) of the value of the Portfolio's average daily net assets set forth opposite the Portfolio's name in the table below. The Fund, on behalf of the Portfolio, may deduct from the payment to be made to the Investment Manager under the Management Agreement, or the Investment Manager will bear, such excess expenses.

Portfolio	Service Shares	Investor Shares
Emerging Markets Equity	1.45%	1.20%
International Equity	1.10	N/A
US Small-Mid Cap Equity	1.15	N/A
Global Dynamic Multi-Asset	1.05	0.90(a)

<sup>(</sup>a) This agreement will continue in effect until on April 30, 2031 for Investor Shares.

During the period ended June 30, 2021, the Investment Manager waived its management fees and reimbursed the following Portfolios for other expenses as follows:

	Service Shares		Investor	Shares	
Portfolio	Management Fees Waived		enses oursed	Management Fees Waived	Expenses Reimbursed
International Equity	\$ 77,073	\$	_	_	_
US Small-Mid Cap Equity	45,180		_	_	_
Global Dynamic Multi-Asset	259,984		_	\$1,025	\$1,219

The aforementioned waivers and/or reimbursements are not subject to recoupment by the Investment Manager.

State Street serves as the Fund's custodian and provides the Fund with certain administrative services.

In December 2015, State Street announced that it had identified inconsistencies in the way in which clients were invoiced for custody out-of-pocket expenses from 1998 until 2015. The difference between what was charged and what should have been charged, plus interest, was recorded as a reimbursement when determined in 2016. Pursuant to the expense limitations described above, certain Portfolios experienced management fee waivers during the year ended December 31, 2016. Accordingly, the reimbursement of out-of-pocket expenses resulted in the reduction in the waiver of management fees for certain Portfolios for the year ended December 31, 2016.

The Fund has a distribution agreement with Lazard Asset Management Securities LLC (the "Distributor"), a wholly-owned subsidiary of the Investment Manager, to serve as the distributor for shares of each Portfolio. The Distributor bears, amongst other expenses, the cost of preparing and distributing materials used by the Distributor in connection with its offering Portfolio shares and other advertising and promotional expenses.

Under a distribution and servicing plan adopted pursuant to Rule 12b-1 under the 1940 Act, each Portfolio pays a monthly fee to the Distributor, at an annual rate of 0.25% of the average daily net assets of its Service Shares, for certain distribution activities and

providing services to holders of the Portfolio's Service Shares. The Distributor may make payments to participating insurance companies or to other third parties such as financial institutions, securities dealers and other industry professionals in respect of these services.

DST is the Fund's transfer agent and dividend disbursing agent.

#### 4. Directors' Compensation

Certain Directors of the Fund are officers of the Investment Manager. For 2021, the annual compensation for each Director who is not an affiliated person of the Investment Manager or any of its affiliates was paid by all of the funds in the Lazard Fund Complex is: (1) an annual retainer of \$237,000, (2) an additional annual retainer of \$33,700 to the lead Independent Director, and (3) an additional annual retainer of \$23,500 to the Audit Committee Chair. The Independent Directors (an "Independent Director" is a Director who is not an "interested person" (as defined in the 1940 Act) of the Fund) also may be paid additional fees for participation on ad hoc committees or other work performed on behalf of the Board. The Independent Directors are reimbursed for travel and other out-of-pocket expenses for attending Board and committee meetings or incurred in connection with work performed on behalf of the Board. The Directors do not receive benefits from the Fund pursuant to any pension, retirement or similar arrangement. Independent Directors' fees and expenses are allocated among the active Portfolios in the Lazard Fund Complex at a rate of \$5,000 per active portfolio with the remainder allocated among the active Portfolios on the basis of relative net assets. The Statement of Operations of each Portfolio shows the Independent Directors' compensation and expenses paid by each Portfolio.

#### 5. Securities Transactions and Transactions with Affiliates

Purchases and sales of portfolio securities (excluding short-term investments) for the period ended June 30, 2021 were as follows:

Portfolio	Purchases	Sales
Emerging Markets Equity	\$ 90,560,433	\$130,580,755
International Equity	31,590,966	39,651,826
US Small-Mid Cap Equity	18,552,751	24,535,651
Global Dynamic Multi-Asset	142,319,527	166,447,982
	US Treasury	Securities
Portfolio	Purchases	Sales
Global Dynamic Multi-Asset	\$1,545,563	\$2,844,312

For the period ended June 30, 2021, the Portfolios did not engage in any cross-trades in accordance with Rule 17a-7 under the 1940 Act, and no brokerage commissions were paid to affiliates of the Investment Manager or other affiliates of the Fund for portfolio transactions executed on behalf of the Fund.

### 6. Investment Risks

Not all risks described below apply to all Portfolios, or may not apply to the same degree for one or more Portfolios compared to one or more other Portfolios. In addition, not all risks applicable to an investment in a Portfolio are described below. Please see the current summary prospectus for the relevant Portfolio(s) or a current Portfolio prospectus for further information regarding a Portfolio's investment strategy and related risks.

(a) Market Risk—A Portfolio may incur losses due to declines in one or more markets in which it invests. These declines may be the result of, among other things, political, regulatory, market, economic or social developments affecting the relevant market(s). To the extent that such developments impact specific industries, market sectors, countries or geographic regions, a Portfolio's investments in such industries, market sectors, countries and/or geographic regions can be expected to be particularly affected, especially if such investments are a significant portion of its investment portfolio. In addition, turbulence in financial markets and reduced liquidity in equity, credit and/or fixed income markets

may negatively affect many issuers, which could adversely affect a Portfolio. Global economies and financial markets are increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers worldwide. As a result, local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, recessions or other events could have a significant negative impact on global economic and market conditions. The coronavirus disease 2019 (COVID-19) global pandemic and the aggressive responses taken by many governments or voluntarily imposed by private parties, including closing borders, restricting travel and imposing prolonged quarantines or similar restrictions, as well as the closure of, or operational changes to, many retail and other businesses, has had negative impacts, and in many cases severe negative impacts, on markets worldwide. It is not known how long such impacts, or any future impacts of other significant events described above, will or would last, but there could be a prolonged period of global economic slowdown, which may be expected to impact a Portfolio and its investments.

- (b) Non-US Securities Risk—A Portfolio's performance will be influenced by political, social and economic factors affecting the non-US countries and companies in which the Portfolio invests. Non-US securities carry special risks, such as less developed or less efficient trading markets, political instability, a lack of company information, differing auditing and legal standards, and, potentially, less liquidity.
- (c) Emerging Market Risk—Emerging market countries generally have economic structures that are less diverse and mature, and political systems that are less stable, than those of developed countries. The economies of countries with emerging markets may be based predominantly on only a few industries, may be highly vulnerable to changes in local or global trade conditions, and may suffer from extreme debt burdens or volatile inflation rates. The securities markets of emerging market countries have historically been extremely volatile. These market conditions may continue or worsen. Significant devaluation of emerging market currencies against the US dollar may occur subsequent to acquisition of investments denominated in emerging market currencies.

(d) Foreign Currency Risk—Investments denominated in currencies other than US dollars may experience a decline in value, in US dollar terms, due solely to fluctuations in currency exchange rates. A Portfolio's investments could be adversely affected by delays in, or a refusal to grant, repatriation of funds or conversion of emerging market currencies.

(e) Fixed-Income and Debt Securities Risk—The market value of a debt security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. The debt securities market can be susceptible to increases in volatility and decreases in liquidity. Liquidity can decline unpredictably in response to overall economic conditions or credit tightening.

Prices of bonds and other debt securities tend to move inversely with changes in interest rates. Interest rate risk is usually greater for fixed-income securities with longer maturities or durations. A rise in interest rates (or the expectation of a rise in interest rates) may result in periods of volatility, decreased liquidity and increased redemptions, and, as a result, the Portfolio may have to liquidate portfolio securities at disadvantageous prices.

A Portfolio's investments in lower-rated, higher-yielding securities ("junk bonds") are subject to greater credit risk than its higher-rated investments. Credit risk is the risk that the issuer will not make interest or principal payments, or will not make payments on a timely basis. Non-investment grade securities tend to be more volatile, less liquid and are considered speculative. If there is a decline, or perceived decline, in the credit quality of a debt security (or any guarantor of payment on such security), the security's value could fall, potentially lowering a Portfolio's share price. The prices of non-investment grade securities, unlike investment grade debt securities, may fluctuate unpredictably and not necessarily inversely with changes in interest rates. The market for these securities may be less liquid and therefore these securities may be harder to value or sell at an acceptable price, especially during times of market volatility or decline.

Some debt securities may give the issuer the option to call, or redeem, the securities before their maturity, and during a time of declining interest rates, a Portfolio may have to reinvest the proceeds of called or redeemed securities in an investment offering a lower yield (and the Portfolio may not fully benefit from any increase in the value of its portfolio holdings as a result of declining interest rates).

Structured notes are privately negotiated debt instruments where the principal and/or interest is determined by reference to a specified asset, market or rate, or the differential performance of two assets or markets. Structured notes can have risks of both debt securities and derivatives transactions.

(f) Derivatives and Hedging Risk—Derivatives transactions, including those entered into for hedging purposes (i.e., seeking to protect Portfolio investments), may increase volatility, reduce returns, limit gains or magnify losses, perhaps substantially, particularly since most derivatives have a leverage component that provides investment exposure in excess of the amount invested. Swap agreements; forward currency contracts; over-the-counter options on securities, indexes, currencies and structured notes; and other over-the-counter derivatives transactions are subject to the risks of the creditworthiness of, and default by, the counterparty and consequently may lose all or a portion of their value due solely to the creditworthiness of, or default by, the counterparty. Over-thecounter derivatives frequently may be illiquid and difficult to value. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for derivatives. These derivatives transactions, as well as the exchange-traded futures and options in which a Portfolio may invest, are subject to many of the risks of, and can be highly sensitive to changes in the value of the related reference asset, index or rate. As such, a small investment could have a potentially large impact on a Portfolio's performance. In fact, many derivatives may be subject to greater risks than those associated with investing directly in the underlying or other reference asset. Derivatives transactions incur costs, either explicitly or implicitly, which reduce returns, and costs of engaging in such transactions may outweigh any gains or any losses averted

from hedging activities. Successful use of derivatives, whether for hedging or for other investment purposes, is subject to the Investment Manager's ability to predict correctly movements in the direction of the relevant reference asset or market and, for hedging activities, correlation of the derivative instruments used with the investments seeking to be hedged. Use of derivatives transactions, even if entered into for hedging purposes, may cause a Portfolio to experience losses greater than if the Portfolio had not engaged in such transactions. The SEC recently adopted Rule 18f-4 under the 1940 Act, which will regulate the use of derivatives for certain funds and may require one or more Portfolios to alter, perhaps materially, its use of derivatives.

(g) ETF Risk—Shares of exchange-traded funds ("ETFs") may trade at prices that vary from their net asset values, sometimes significantly. The shares of ETFs may trade at prices at, below or above their most recent net asset value. In addition, the performance of an ETF pursuing a passive index-based strategy may diverge from the performance of the index. A Portfolio's investments in ETFs are subject to the risks of such ETF's investments, as well as to the general risks of investing in ETFs. Portfolio shares will bear not only a Portfolio's management fees and operating expenses, but also a Portfolio's proportional share of the management fees and operating expenses of the ETFs in which a Portfolio invests. A Portfolio may be limited by the 1940 Act in the amount of its assets that may be invested in ETFs unless another ETF has received an exemptive order from the US Securities and Exchange Commission (the "SEC") on which a Portfolio may rely or an exemption is available. New Rule 12d1-4 under the 1940 Act will allow a Portfolio to acquire the securities of another investment company, including ETFs, in excess of the limitations imposed by Section 12 of the 1940 Act without obtaining an exemptive order from the SEC, subject to certain limitations and conditions. The aforementioned exemptive orders will be rescinded effective January 19, 2022, and by such date a Portfolio will have to comply with the requirements of Rule 12d1-4 in order to rely on its exemptions from the requirements of Section 12.

- (h) Depositary Receipts Risk—ADRs and similar depositary receipts typically will be subject to certain of the risks associated with direct investments in the securities of non-US companies, because their values depend on the performance of the underlying non-US securities. However, currency fluctuations will impact investments in depositary receipts differently than direct investments in non-US dollar-denominated non-US securities, because a depositary receipt will not appreciate in value solely as a result of appreciation in the currency in which the underlying non-US dollar security is denominated.
- (i) Sector Risk—Implementation of certain Portfolios' investment strategy may, during certain periods, result in the investment of a significant portion of such Portfolios' assets in a particular market sector, and a Portfolio would be expected to be affected by developments in that sector.
- (j) Cybersecurity Risk—The Portfolios and their service providers are susceptible to operational and information security and related risks of cybersecurity incidents. Cybersecurity attacks include, but are not limited to, gaining unauthorized access to digital systems (e.g., through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data or causing operational disruption. Cybersecurity incidents affecting the Investment Manager, transfer agent or custodian or other service providers such as financial intermediaries have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, including by impediments to a Portfolio's investment trading; the inability of Portfolio shareholders to purchase and redeem Portfolio shares; interference with a Portfolio's ability to calculate its NAV; violations of applicable privacy, data security or other laws; regulatory fines and penalties; reputational damage; reimbursement or other compensation or remediation costs; legal fees; or additional compliance costs. Similar adverse consequences could result from cybersecurity incidents affecting issuers of securities in which a Portfolio invests; counterparties with which a Portfolio engages in transactions; governmental and other regulatory authorities, exchange and other financial market operators; and banks, bro-

kers, dealers, insurance companies and other financial institutions and other parties. There are inherent limitations in any cybersecurity risk management systems or business continuity plans, including the possibility that certain risks have not been identified.

#### 7. Contractual Obligations

The Fund enters into contracts in the normal course of business that contain a variety of indemnification provisions. A Portfolio's maximum exposure under these arrangements is unknown. Management has reviewed the Fund's existing contracts and expects the risk of loss to be remote.

#### 8. Fair Value Measurements

Fair value is defined as the price that a Portfolio would receive to sell an asset, or would pay to transfer a liability, in an orderly transaction between market participants at the date of measurement. The Fair Value Measurements and Disclosures provisions of GAAP also establish a framework for measuring fair value, and a three-level hierarchy for fair value measurement that is based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer, broadly, to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability, developed based on the best information available in the circumstances. The fair value measurement level within the fair value hierarchy for the assets and liabilities of the Fund is based on the lowest level of any input that is significant to the overall fair value measurement. The three-level hierarchy of inputs is summarized below:

- Level 1 unadjusted quoted prices in active markets for identical assets and liabilities
- Level 2 other significant observable inputs (including unadjusted quoted prices for similar assets and liabilities, interest rates, prepayment speeds, credit risk, etc.)

 Level 3 – significant unobservable inputs (including the Fund's own assumptions in determining the fair value of assets and liabilities)

Changes in valuation methodology or inputs may result in transfers into or out of the current assigned level within the hierarchy.

The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in these securities.

The following table summarizes the valuation of the Portfolios' assets and liabilities by each fair value hierarchy level as of June 30, 2021:

Description	Unadjusted Quoted Prices in Active Markets for Identical Assets and Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of June 30, 2021

 <sup>\*</sup> Please refer to Portfolios of Investments and Notes to Portfolios of Investments for portfolio holdings by country and industry.
 † Other financial instruments are derivative instruments which are valued at their respective unrealized appreciation (depreciation).

Certain equity securities to which footnote (‡) in the Notes to Portfolios of Investments applies are included in Level 2 and were valued based on reference to similar securities that were trading on active markets.

#### 9. Derivative Instruments

The Global Dynamic Multi-Asset Portfolio may use derivative instruments, including forward currency contracts.

Forward currency contracts may be used for hedging purposes or to seek to increase returns.

During the period ended June 30, 2021, the approximate average monthly notional exposure for derivative instruments was as follows:

Forward currency contracts: Average amounts purchased Average amounts sold

\$89,900,000 \$77,900,000

The following table summarizes the fair value of derivative instruments on the Statement of Assets and Liabilities as of June 30, 2021:

Assets—Derivative Financial Instruments		Total
Forward currency contracts	Unrealized appreciation on forward currency contracts	\$1,063,079
Liabilities—Derivative Financial Instruments		
Forward currency contracts	Unrealized depreciation on forward currency contracts	\$1,226,413

The effect of derivative instruments on the Statement of Operations for the period ended June 30, 2021 was:

Net Realized Gain (Loss) from:	Total
Forward currency contracts	<u>\$(1,903,180</u> )
Net Change in Unrealized Appreciation (Depreciation) on:	Total
Forward currency contracts	\$ 326,873

None of the other Portfolios traded in derivative instruments during the period ended June 30, 2021.

As of June 30, 2021, the Global Dynamic Multi-Asset Portfolio held derivative instruments that are eligible for offset in the Statement of Assets and Liabilities and are subject to master netting arrangements. A master netting arrangement is an agreement between two counterparties who have multiple contracts with each other that provides for the net settlement of all contracts, as well as any cash collateral, through a single payment in the event of default on, or termination of, any one contract.

The required information for the affected Portfolio is presented in the below table, as of June 30, 2021:

Description	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Statement of Assets and Liabilities	in the Statement of
Forward Currency Contracts	\$1,063,079	\$ —	\$1,063,079

# 10. Accounting Pronouncements

On March 12, 2020, the Financial Accounting Standards Board concluded its reference rate reform project with the issuance of Accounting Standards Update No. 2020-04, Reference Rate Reform (Topic 848) – Facilitation of the Effects of Reference Rate Reform on Financial Reporting ("ASU No. 2020-04"). ASU No. 2020-04 provides elective temporary financial reporting relief from the effect of certain types of contract modifications due to the planned discontinuation of LIBOR and other interbank offered based reference rates as of the end of 2021. ASU No. 2020-04 is effective for certain reference rate- related contract modifications that occur during the period March 12, 2020 through December 31, 2022. Management is currently evaluating the impact, if any, of applying ASU No. 2020-04.

#### 11. Subsequent Events

Management has evaluated subsequent events potentially affecting the Portfolios through the issuance of the financial statements and has determined that there were no subsequent events that required adjustment or disclosure.

#### **Proxy Voting**

A description of the policies and procedures used to determine how proxies relating to Fund portfolio securities are voted is available (1) without charge, upon request, by calling (800) 823-6300 or (2) on the SEC website at https://www.sec.gov.

The Fund's proxy voting record for the most recent 12-month period ended June 30 is available (1) without charge, upon request, by calling (800) 823-6300 or (2) on the SEC's website at https://www.sec.gov. Information as of June 30 each year will generally be available by the following August 31.

#### **Schedule of Portfolio Holdings**

The Fund files each Portfolio's holdings with the SEC for the first and third quarters of each fiscal year as an exhibit to its reports on Form N-PORT. The Fund's Form N-PORT reports are available on the SEC's website at <a href="https://www.sec.gov">https://www.sec.gov</a>.

### **Board Consideration of Management Agreement**

All Portfolios except Lazard Retirement US Sustainable Equity Portfolio

At meetings of the Board held on May 26, 2021 and June 23, 2021, the Board considered the approval, for an additional annual period, of the Management Agreement between the Fund, on behalf of each of the Portfolios, and the Investment Manager. The Independent Directors were assisted in their review by independent legal counsel, who advised the Board on relevant legal standards and met with the Independent Directors in executive sessions separate from representatives of the Investment Manager.

Representatives of the Investment Manager discussed with the Board the Investment Manager's written materials provided in advance of the meetings, including, at the June 23, 2021 meeting, additional information requested by the Independent Directors at the May 26, 2021 meeting.

#### Services Provided

The Investment Manager's materials addressed, among other matters, the nature, extent and quality of services that the Investment Manager provides the Fund, including a discussion of the Investment Manager and its clients (of which the Lazard Funds complex of 35 active funds comprised approximately \$26 billion of the approximately \$265 billion of total assets under the management of the Investment Manager and its global affiliates as of March 31, 2021).

The Board considered the various services provided by the Investment Manager including the Investment Manager's research, portfolio management and trading capabilities and oversight of day-to-day operations, including supervision of fund accounting and administration-related services and assistance in meeting legal and regulatory requirements, as well as regular reporting to, and support of, the Board. The Investment Manager's representatives stated that the Investment Manager believes that the Fund and its shareholders continue to be able to obtain significant benefits as a result of the resources and support of the Investment Manager's global research, portfolio management, trading, operations, risk management, technology and legal and compliance infrastructure. The Board also considered information provided by the Investment Manager regarding its personnel, resources, financial condition and experience; the Fund's distribution channels and the relationships with various intermediaries; marketing and shareholder servicing activities on behalf of the Portfolios; and Portfolio asset flows and the growth or decline in asset levels. The Board accepted the assertion of representatives of the Investment Manager that the Fund benefits from the services and infrastructure provided by the Investment Manager and that such services and infrastructure are greater than those typically provided to a \$26 billion fund complex not managed by a large, global firm such as the Investment Manager.

Comparative Fee, Expense Ratio and Performance Information
Only the Emerging Markets Equity, Global Dynamic Multi-Asset,
International Equity and US Small-Mid Cap Equity Portfolios (the
"active Portfolios") had commenced operations. For all other
Portfolios (the "inactive Portfolios") the Board determined to defer
consideration of advisory fees in the Management Agreement
(and review of net expense ratios) until a Portfolio was to com-

mence operations, at which time current information regarding the advisory fee and the estimated net expense ratio would be considered. Accordingly, the following discussion of advisory fees, expense ratios and performance was limited to those of the four active Portfolios (and therefore all references in the discussion to one or more Portfolios refer to active Portfolio(s) unless otherwise stated), although it was noted that the Investment Manager proposed to lower the expense limitation for the Emerging Markets Strategic Equity Portfolio (an inactive Portfolio).

Strategic Insight Advisory Fee and Expense Ratio Comparisons. The Board reviewed, for each Portfolio, information prepared by Strategic Insight, an independent provider of investment company data, including, among other information, each Portfolio's contractual advisory fee (*i.e.*, without giving effect to any fee waivers) and net expense ratio (*i.e.*, after giving effect to the Portfolio's expense limitation agreed to by the Investment Manager) to those of:

- a group of variable annuity underlying funds (i.e., funds offered only through variable annuity contracts, variable life insurance policies and/or certain qualified pension or retirement plans or other accounts permitting accumulation of assets on a taxdeferred basis) not advised by the Investment Manager selected by Strategic Insight as comparable, for expense comparison purposes, to the Portfolio in terms of relevant criteria as appropriate (the "Expense Peer Group"); and
- the variable annuity underlying funds within the broad category of funds to which the Portfolio has been assigned by Morningstar, Inc., an independent third party service that ranks and rates funds ("Morningstar"), with certain exclusions as specified by Strategic Insight (the "Expense Category").

<sup>1</sup> The Strategic Insight materials outlined the process for constructing the Expense Peer Groups, as well the Expense Categories, Performance Peer Groups and Performance Categories (all as defined herein). Representatives of the Investment Manager and independent legal counsel had previously discussed with the Board in further detail the methodologies used by Strategic Insight in constructing the Expense Peer Groups, Expense Categories, Performance Peer Groups and Performance Categories, including how the methodologies could affect the results of the comparisons.

Representatives of the Investment Manager discussed the results of the Strategic Insight advisory fee and net expense ratio comparisons with the Board, which showed that the advisory fees and net expense ratios of the Portfolios were generally competitive within each Portfolio's respective Expense Peer Group. The Board considered the comparisons, additional perspectives in information prepared by, and in discussions with, representatives of the Investment Manager and that the Investment Manager continues to voluntarily enter into expense limitation agreements for all of the active and inactive Portfolios, pursuant to which the Investment Manager was waiving advisory fees and/or reimbursing expenses for certain Portfolios.

Other Accounts Advisory Fee Comparisons. The Board also considered the actual advisory fees paid to the Investment Manager by other accounts of the Investment Manager that are comparable to each Portfolio in terms of investment objectives, strategies and policies, if any (including other investment companies and other pooled investment vehicles, "Other Accounts"). Representatives of the Investment Manager discussed the nature of the Other Accounts and the significant differences in services provided by the Investment Manager to the different types of Other Accounts as compared to the services provided to the Portfolios. The Board considered the relevance of the fee information provided for Other Accounts, in light of the Investment Manager's discussion of the significant differences in services provided, to evaluate the advisory fees of the relevant Portfolios.

Strategic Insight Performance Comparisons. The Board reviewed information prepared by Strategic Insight including, among other information, each Portfolio's performance for the one-, three-, five-and ten-year periods ended March 31, 2021, as applicable, compared to performance for the same time periods of that of:

 a group of variable annuity underlying funds not advised by the Investment Manager selected by Strategic Insight as comparable, for performance comparison purposes, to the Portfolio in terms of relevant criteria as appropriate (the "Performance Peer Group");

- the variable annuity underlying funds within the broad category of funds to which the Portfolio has been assigned by Morningstar (the "Performance Category"); and
- the Portfolio's benchmark index.

When evaluating the performance of each Portfolio, the Board considered Strategic Insight's performance analysis along with other information provided by the Investment Manager, including additional information regarding performance expectations, as well as additional perspectives in information prepared by, and in discussions with, representatives of the Investment Manager. The Board also received and would continue to receive regular updates and/or additional information from the Investment Manager in respect of Portfolios with relative underperformance or Portfolios which otherwise are not performing in accordance with expectations, as well as any other Portfolios for which the Board requested additional information.

#### Investment Manager Profitability and Economies of Scale

The Board reviewed information prepared by the Investment Manager for each active Portfolio concerning the estimated profitability percentage of the Management Agreement to the Investment Manager and its affiliates for the calendar year ended December 31, 2020 and the Investment Manager's cost allocation methodology to compute an estimate of each active Portfolio's costs to the Investment Manager. The Investment Manager's representatives reviewed with the Board information provided on the Investment Manager's brokerage practices and the active Portfolios' brokerage allocation, commission payments and soft dollar commissions and benefits. The Investment Manager's representatives stated that neither the Investment Manager nor its affiliates receive any significant benefits from the Investment Manager acting as investment manager to the Portfolios other than, in connection with the management of certain active Portfolios, the benefit of soft dollar commissions. The representatives of the Investment Manager reminded the Board that the Investment Manager is continuing to support distribution relationships through direct payments from its or its affiliates' own resources to third parties in

connection with distribution and shareholder servicing and/or administrative and recordkeeping services, and noted that the Fund does not bear any related costs other than the 0.25% 12b-1 fee pursuant to the Distribution and Servicing Plan adopted for the Portfolios' Service Shares.

The profitability percentages were within ranges determined by relevant court cases not to be so disproportionately large that they bore no reasonable relationship to the services rendered. The Board (1) considered the Investment Manager's estimated profitability percentage with respect to each active Portfolio as part of their evaluation of the Portfolio's fee under the Management Agreement, considered in relation to the mix of services provided by the Investment Manager (including the nature, extent and quality of such services), and (2) evaluated the profitability percentage in light of the relevant circumstances for each active Portfolio. Representatives of the Investment Manager and the Board discussed ways economies of scale could be realized and how they could be shared, including the Investment Manager's reinvestment of profits back into its business, waiving or reducing Portfolio management fees and/or reimbursing expenses, adding discounts to a Portfolio's management fee schedule as a Portfolio's assets increase or by instituting management fees at inception that account for future scale. As the assets of each active Portfolio as of the end of the most recently-completed calendar year had decreased from the Portfolio's assets as of the end of the previous calendar year, the potential that the Investment Manager may have realized any material economies of scale was reduced.

#### **Conclusions and Determinations**

At the conclusion of these discussions, the Board expressed the opinion that it had been furnished with such information as may reasonably be necessary to make an informed business decision with respect to evaluation of the renewal of the Management Agreement. Based on its discussions and considerations as described above, with the assistance of independent legal counsel and in the exercise of its business judgment, the Board made the following conclusions and determinations.

- The Board concluded that the nature, extent and quality of the services provided by the Investment Manager are adequate and appropriate, noting the benefits of the significant services and infrastructure associated with an approximately \$265 billion global asset management business.
- For the active Portfolios, the Board concluded that each Portfolio's fee paid to the Investment Manager was appropriate under the circumstances and in light of the factors and the totality of the services provided.
- The Board, after considering the information provided and the totality of the relevant circumstances for each active Portfolio, concluded that the investment performance of each active Portfolio was acceptable or that, for any Portfolios that were not performing in accordance with expectations, the Board accepted that the Investment Manager was taking steps intended to improve performance and the Board would continue to monitor performance.
- The Board recognized that economies of scale may be realized, particularly as the assets of the active Portfolios increase and determined that it would continue to consider potential material economies of scale.

In evaluating the Management Agreement, the Board relied on the information described above, in addition to information provided by the Investment Manager throughout the year relating to the operations of the Fund and the investment management and other services provided under the Management Agreement, including information on the investment performance of the active Portfolios in comparison to similar mutual funds and benchmark performance indices over various time periods as well as information regarding the expected pattern of performance for the Portfolios in different market conditions and/or as compared to the performance of other funds that may be included in a Portfolio's Performance Peer Group and/or Performance Category; general market outlook as applicable to the Portfolios; and compliance reports. The Board also relied on its previous knowledge, gained through meetings and other interactions with the Investment Manager, of

the Investment Manager and the services provided to the Fund by the Investment Manager. The Board considered these conclusions and determinations in their totality and determined to approve the Fund's Management Agreement for each Portfolio. In deciding whether to vote to approve the Management Agreement for each Portfolio, each Director may have accorded different weights to different factors so that each Director may have had a different basis for his or her decision.

# Statement Regarding Liquidity Risk Management Program

The Fund has adopted a liquidity risk management program (the "LRMP") pursuant to the requirements of Rule 22e-4 under the 1940 Act, which requires registered open-end funds (other than money market funds) to adopt and implement a written liquidity risk management program that is reasonably designed to assess and manage liquidity risk. The rule is designed to promote effective liquidity risk management and reduce liquidity risk—*i.e.*, the risk that a fund could not meet requests to redeem shares issued by the fund without significant dilution of remaining investors' interests in the fund.

The Board approved the Investment Manager to administer the LRMP (the "Program Administrator"). As Program Administrator, the Investment Manager delegates the day-to-day activities required by the LRMP to a Valuation and Liquidity Committee comprised of various Fund officers and senior personnel of the Investment Manager. In addition, the Fund has contracted with a third party liquidity assessment vendor to support the classification of Portfolio investments.

Pursuant to the requirements of Rule 22e-4, the Board must review, no less frequently than annually, a written report prepared by the Program Administrator that, among other things, addresses the operation of the LRMP and assesses its adequacy and effectiveness of implementation and any material changes to the LRMP. The Board received a written report in June 2021 (the "Annual Report"). The Annual Report included, among other things, a statement that the Investment Manager, as the Program Administrator, acting primarily through the Valuation and Liquidity Committee,

has reviewed the operation of the LRMP and believes that the LRMP is reasonably designed to assess and manage the Portfolios' liquidity risk and is adequate and effective in its implementation. There were no material compliance matters relating to compliance with Rule 22e-4 identified in the Annual Report.
