Message from the Chairman

Dear Shareholder:

As the economy and local communities continue to recover from the impacts of COVID-19, we would like to reaffirm our commitment to providing our clients with the products and services that help them meet their investment goals and objectives. I am pleased to present the semiannual report to shareholders of ProFunds VPT Trust for the six months ended June 30, 2021.

U.S. Stock Market Recorded Impressive Gains

Equities climbed during the period as a result of strong corporate earnings, Congress's \$1.9 trillion coronavirus stimulus package, the lifting of restrictions on many businesses, and significant progress on administering vaccines. Value equities outperformed their growth counterparts by ten percentage points (0.10%) early in the period, their best performance in 20 years. The Nasdaq-100 lagged, gaining just 0.5% during the first quarter as a sharp rise in interest rates pressured growth stocks.

By June, the S&P 500 had reached a new all-time high with positive contributions from many industries. However, small-cap equities outperformed large-cap stocks. A 3.4% rise in consumer inflation (the highest in 14 years) in the second quarter as compared to the second quarter 2020 worried many investors. Nevertheless, the Fed states that

they remain committed to their accommodative policies of monthly bond purchases until the economy fully recovers, even though other countries have begun to taper their bond purchases.

Most major U.S. indexes posted robust returns over the six-month period. Large caps were strong, with the S&P 500 rising 15.2%, the DJIA® (Dow®) climbing 13.8% and the tech-heavy Nasdaq-100 Index gaining 13.3%. Mid-cap and small-cap stocks also did well, with the S&P MidCap 400® returning 17.6% and the Russell 2000® Index up 17.5%. All 10 Dow Jones U.S. Industry Indexes posted positive returns. The best-performing sectors were oil and gas (45.6%), financials (22.1%) and technology (17.8%).

Most International Equities Also Posted Positive Returns

Global economies began to return to their pre-pandemic peaks during the reporting period. The MSCI EAFE Index, which tracks developed markets outside North America, rose 8.8%, and the STOXX Europe 50 Index appreciated 11.5%. Europe benefited from the end of lockdowns, increased bond buying by the European Central Bank (ECB) and an anticipated large European stimulus program. Emerging markets, as measured by the BNY Mellon Emerging Markets 50 ADR Index, rose 3.7%, while the BNY China Select ADR and Japan's Nikkei 225 Index were among the few foreign markets that declined, falling 8.5% and 1.9%, respectively.

High Yield Bonds Were the Top Performers in Fixed Income

Yields rose and bond prices fell during the reporting period, especially for corporates and Treasuries, amid concerns about rising inflation and anticipation of more robust growth, but longer-term yields retreated slightly at quarter end. However, the demand for high-yield bonds boosted their prices. Long-term Treasury yields ticked slightly lower at the end of the second quarter of 2021.

Over the six months, the Bloomberg Barclays U.S. Aggregate Bond Index® fell 1.6%. The Ryan Labs Treasury 30-Year and 10-Year Indexes fell 9.1% and 4.1%, respectively. High-yield bonds rose 3.0%, based on the Markit iBoxx \$ Liquid High Yield Index. The U.S. dollar rose 2.0%, based on the Bloomberg Dollar Spot Index. In addition, oil prices rose 45% in the first six months of 2021 and approached \$80 a barrel for the first time since early 2019.

The Economy Continued to Emerge from the Pandemic

The U.S. economy grew at a robust pace during the reporting period. First-quarter real GDP grew by 6.4% annualized. Unemployment declined during the period, according to the U.S. Bureau of Labor Statistics, closing June at 5.9% as the economy added 850,000 new jobs.

U.S. Equity Investors Benefited from Market Performance, Especially in Small Caps

The robust economic recovery and strong U.S. equity market performance during the reporting period offered investors opportunities across a number of ProFunds VP funds that track major U.S. equity indexes. Russell 2000® Index investors, in particular, were rewarded by the strong performance in small caps during the period. Funds tracking the energy sector also posted strong returns. We are pleased that our insurance partners and their clients were able to take advantage of these trends during the period.

Also during the period, the Access VP High Yield Fund was reorganized from the former Access One Trust into ProFunds. We are confident this change should benefit investors by increasing the efficiency with which we can manage the fund. The name of the fund changed from the Access VP High Yield Fund to the ProFund Access VP High Yield. The fund's name change was seamless for investors, requiring no action on their part, and neither the fund's objective nor its investments changed as a result.

We thank you for the trust and confidence you have placed in us by choosing ProFunds VP and appreciate the opportunity to continue serving your investing needs.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Sapir". The signature is fluid and cursive, with the first name "Michael" written in a larger, more prominent script than the last name "Sapir".

See accompanying notes to financial statements.

- ^(a) When a credit event occurs as defined under the terms of the swap agreement, the Fund as a seller of credit protection will either (i) pay to the buyer of protection an amount equal to the par value of the defaulted reference entity and take delivery of the reference entity or (ii) pay a net amount equal to the par value of the defaulted reference entity less its recovery value.
- ^(b) Implied credit spread, represented in absolute terms, utilized in determining the value of the credit default swap agreements as of period end will serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default or other credit event for the credit derivative. The implied credit spread of a referenced entity reflects the cost of buying/selling protection and may include payments required to be made to enter into the agreement. Generally, wider credit spreads represent a perceived deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the swap agreement.
- ^(c) The notional amount represents the maximum potential amount the Fund could be required pay as a seller of credit protection if a credit event occurs, as defined under the terms of the swap agreement, for each security included in the CDX North America High Yield Index.

^(a) Per share net investment income (loss) has been calculated using the average daily shares method.

^(b) The amount shown for a share outstanding throughout the period does not accord with the change in aggregate gains and losses in the portfolio of securities during the period because of the timing of sales and purchases of fund shares in relation to fluctuating market values during the period.

^(c) Not annualized for periods less than one year.

^(d) During 2018, the Fund received a non-recurring reimbursement from a third party relating to expenses that were incurred in a prior year. Had this reimbursement not occurred, the net expense ratio and net investment income (loss) ratio would have been 1.67% and 0.57%, respectively, and the total return would have been (0.62)%.

^(e) Annualized for periods less than one year.

^(f) The expense ratio does not correlate to the applicable expense limits in place during the period given that the annual contractual expense limitation is applied for one year periods ended April 30th of each year, instead of coinciding with the December 31st year end. Details of the current expense limitation in effect can be found in Note 4 of the accompanying Notes to Financial Statements.

^(g) Portfolio turnover rate is calculated without regard to instruments having a maturity of less than one year from acquisition or derivative instruments (including swap agreements and futures contracts). The portfolio turnover rate can be high and volatile due to the amount and timing of sales and purchases of fund shares during the period.

See accompanying notes to financial statements.

^(a) Per share net investment income (loss) has been calculated using the average daily shares method.

^(b) Not annualized for periods less than one year.

^(c) During 2018, the Fund received a non-recurring reimbursement from a third party relating to expenses that were incurred in a prior year. Had this reimbursement not occurred, the net expense ratio and net investment income (loss) ratio would have been 1.68% and 0.17%, respectively, and the total return would have been (6.22)%.

^(d) Annualized for periods less than one year.

^(e) The expense ratio does not correlate to the applicable expense limits in place during the period given that the annual contractual expense limitation is applied for one year period ended April 30th of each year, instead of coinciding with the December 31st year end. Details of the current expense limitation in effect can be found in Note 4 of the accompanying Notes to Financial Statements.

^(a) Per share net investment income (loss) has been calculated using the average daily shares method.

^(b) Not annualized for periods less than one year.

^(c) During 2018, the Fund received a non-recurring reimbursement from a third party relating to expenses that were incurred in a prior year. Had this reimbursement not occurred, the net expense ratio and net investment income (loss) ratio would have been 1.67% and (0.40)%, respectively, and the total return would have been 0.60%.

^(d) Annualized for periods less than one year.

^(e) The expense ratio does not correlate to the applicable expense limits in place during the period given that the annual contractual expense limitation is applied for one year periods ended April 30th of each year, instead of coinciding with the December 31st year end. Details of the current expense limitation in effect can be found in Note 4 of the accompanying Notes to Financial Statements.

^(f) Portfolio turnover rate is calculated without regard to instruments having a maturity of less than one year from acquisition or derivative instruments (including swap agreements and futures contracts). The portfolio turnover rate can be high and volatile due to the amount and timing of sales and purchases of fund shares during the period.

^(a) Per share net investment income (loss) has been calculated using the average daily shares method.

^(b) Not annualized for periods less than one year.

^(c) During 2018, the Fund received a non-recurring reimbursement from a third party relating to expenses that were incurred in a prior year. Had this reimbursement not occurred, the net expense ratio and net investment income (loss) ratio would have been 1.67% and 0.41%, respectively, and the total return would have been (10.48)%.

^(d) Annualized for periods less than one year.

^(e) The expense ratio does not correlate to the applicable expense limits in place during the period given that the annual contractual expense limitation is applied for one year periods ended April 30th of each year, instead of coinciding with the December 31st year end. Details of the current expense limitation in effect can be found in Note 4 of the accompanying Notes to Financial Statements.

^(f) Portfolio turnover rate is calculated without regard to instruments having a maturity of less than one year from acquisition or derivative instruments (including swap agreements and futures contracts). The portfolio turnover rate can be high and volatile due to the amount and timing of sales and purchases of fund shares during the period.

See accompanying notes to financial statements.

^(b) Per share net investment income (loss) has been calculated using the average daily shares method.

^(c) Not annualized for periods less than one year.

^(d) Annualized for periods less than one year.

^(e) The expense ratio does not correlate to the applicable expense limits in place during the period given that the annual contractual expense limitation is applied for one year periods ended April 30th of each year, instead of coinciding with the December 31st year end. Details of the current expense limitation in effect can be found in Note 4 of the accompanying Notes to Financial Statements.

^(f) Portfolio turnover rate is calculated without regard to instruments having a maturity of less than one year from acquisition or derivative instruments (including swap agreements and futures contracts). The portfolio turnover rate can be high and volatile due to the amount and timing of sales and purchases of fund shares during the period.

Portfolio turnover rate ^(g)	—	—	—	—	—	—

^(a) As described in Note 8, share amounts have been adjusted for 1:4 reverse share split that occurred on December 5, 2016.

^(b) Per share net investment income (loss) has been calculated using the average daily shares method.

^(c) Not annualized for periods less than one year.

^(d) During 2018, the Fund received a non-recurring reimbursement from a third party relating to expenses that were incurred in a prior year. Had this reimbursement not occurred, the net expense ratio and net investment income (loss) ratio would have been 1.63% and 0.02%, respectively, and the total return would have been (11.71)%.

^(e) Annualized for periods less than one year.

^(f) The expense ratio does not correlate to the applicable expense limits in place during the period given that the annual contractual expense limitation is applied for one year periods ended April 30th of each year, instead of coinciding with the December 31st year end. Details of the current expense limitation in effect can be found in Note 4 of the accompanying Notes to Financial Statements.

^(g) Portfolio turnover rate is calculated without regard to instruments having a maturity of less than one year from acquisition or derivative instruments (including swap agreements and futures contracts).

See accompanying notes to financial statements.

Investment Objective: The ProFund VP Large-Cap Growth seeks investment results, before fees and expenses, that correspond to the performance of the S&P 500® Growth Index.

^(a) Per share net investment income (loss) has been calculated using the average daily shares method.

^(b) The amount shown for a share outstanding throughout the period does not accord with the change in aggregate gains and losses in the portfolio of securities during the period because of the timing of sales and purchase of fund shares in relation to fluctuating market values during the period.

^(c) Not annualized for periods less than one year.

^(d) Annualized for periods less than one year.

^(e) Portfolio turnover rate is calculated without regard to instruments having a maturity of less than one year from acquisition or derivative instruments (including swap agreements and futures contracts). The portfolio turnover rate can be high and volatile due to the amount and timing of sales and purchases of fund shares during the period.

^(d) Annualized for periods less than one year.

^(e) The expense ratio does not correlate to the applicable expense limits in place during the period given that the annual contractual expense limitation is applied for one year periods ended April 30th of each year, instead of coinciding with the December 31st year end. Details of the current expense limitation in effect can be found in Note 4 of the accompanying Notes to Financial Statements.

^(f) Portfolio turnover rate is calculated without regard to instruments having a maturity of less than one year from acquisition or derivative instruments (including swap agreements and futures contracts). The portfolio turnover rate can be high and volatile due to the amount and timing of sales and purchases of fund shares during the period.

^(b) Not annualized for periods less than one year.

^(c) Annualized for periods less than one year.

^(d) The expense ratio does not correlate to the applicable expense limits in place during the period given that the annual contractual expense limitation is applied for one year periods ended April 30th of each year, instead of coinciding with the December 31st year end. Details of the current expense limitation in effect can be found in Note 4 of the accompanying Notes to Financial Statements.

^(e) Portfolio turnover rate is calculated without regard to instruments having a maturity of less than one year from acquisition or derivative instruments (including swap agreements and futures contracts). The portfolio turnover rate can be high and volatile due to the amount and timing of sales and purchases of fund shares during the period.

^(a) As described in Note 8, share amounts have been adjusted for 1:5 reverse share split that occurred on December 11, 2017.

^(b) Per share net investment income (loss) has been calculated using the average daily shares method.

^(c) Not annualized for periods less than one year.

^(d) During 2018, the Fund received a non-recurring reimbursement from a third party relating to expenses that were incurred in a prior year. Had this reimbursement not occurred, the net expense ratio and net investment income (loss) ratio would have been 1.59% and 0.27%, respectively, and the total return would have been 12.51%.

^(e) Annualized for periods less than one year.

^(f) The expense ratio does not correlate to the applicable expense limits in place during the period given that the annual contractual expense limitation is applied for the one year periods ended April 30th of each year, instead of coinciding with the December 31st year end. Details of the current expense limitation in effect can be found in Note 4 of the accompanying Notes to Financial Statements.

^(g) Portfolio turnover rate is calculated without regard to instruments having a maturity of less than one year from acquisition or derivative instruments (including swap agreements and futures contracts).

^(a) As described in Note 8, share amounts have been adjusted for 1:4 reverse share split that occurred on November 18, 2019.

^(b) Per share net investment income (loss) has been calculated using the average daily shares method.

^(c) Not annualized for periods less than one year.

^(d) During 2018, the Fund received a non-recurring reimbursement from a third party relating to expenses that were incurred in a prior year. Had this reimbursement not occurred, the net expense ratio and net investment income (loss) ratio would have been 1.67% and 0.07%, respectively, and the total return would have been (2.90)%.

^(e) Annualized for periods less than one year.

^(f) The expense ratio does not correlate to the applicable expense limits in place during the period given that the annual contractual expense limitation in applied for one year periods ended April 30th of each year, instead of coinciding with the December 31st year end. Details of the current expense limitation in effect can be found in Note 4 of the accompanying Notes to Financial Statements.

^(g) Portfolio turnover rate is calculated without regard to instruments having a maturity of less than one year from acquisition or derivative instruments (including swap agreements and futures contracts).

See accompanying notes to financial statements.

^(a) As described in Note 8, share amounts have been adjusted for 1:4 reverse share split that occurred on December 14, 2020.

^(b) Per share net investment income (loss) has been calculated using the average daily shares method.

^(c) The amount shown for a share outstanding throughout the period does not accord with the change in aggregate gains and losses in the portfolio of securities during the period because of the timing of sales and purchases of fund shares in relation to fluctuating market values during the period.

^(d) Not annualized for periods less than one year.

^(e) Annualized for periods less than one year.

^(f) The expense ratio does not correlate to the applicable expense limits in place during the period given that the annual contractual expense limitation is applied for one year periods ended April 30th of each year, instead of coinciding with the December 31st year end. Details of the current expense limitation in effect can be found in Note 4 of the accompanying Notes to Financial Statements.

^(g) Portfolio turnover rate is calculated without regard to instruments having a maturity of less than one year from acquisition or derivative instruments (including swap agreements and futures contracts). The portfolio turnover rate can be high and volatile due to the amount and timing of sales and purchases of fund shares during the period.

* Non-income producing security.

+ These securities were fair valued based on procedures approved by the Board of Trustees. As of June 30, 2021, these securities represented less than 0.00% of the net assets of the Fund.

^(a) All or part of this security was on loan as of June 30, 2021. The total value of securities on loan as of June 30, 2021 was \$234,299.

^(b) On November 12, 2020, Stryker Corp. acquired Wright Medical Group. As part of the acquisition, \$1.85 per acquired share was allocated 1:1 to Escrow Shares, contingent on whether the \$1.85 per share is determined to be payable to the Dutch Government; otherwise, the value of the Escrow Shares will be remitted to pre-acquisition shareholders of Wright Medical Group.

^(c) A portion of these securities were held in a segregated account for the benefit of swap counterparties in the event of default. At June 30, 2021, the aggregate amount held in a segregated account was \$7,673,000.

^(d) The ProFund VP invests in Repurchase Agreements jointly with other funds in the Trust. See “Repurchase Agreements” under Note 2 in the Notes to Financial Statements to view the details of each individual agreement and counterparty as well as a description of the securities subject to repurchase.

^(e) Securities were purchased with cash collateral held from securities on loan at June 30, 2021.

^(f) Rate periodically changes. Rate disclosed is the daily yield on June 30, 2021.

Notes to Financial Statements

1. Organization

ProFunds (the “Trust”) consists of 115 separate investment portfolios and is registered as an open-end management investment company under the Investment Company Act of 1940 (the “1940 Act”) and thus follows accounting and reporting guidance for investment companies. The Trust is organized as a Delaware statutory trust and is authorized to issue an unlimited number of shares of beneficial interest of no par value which may be issued in more than one class or series.

On December 10, 2020, the Trust’s Board of Trustees approved an agreement and plan of reorganization and termination pursuant to which the Access VP High Yield Fund (now named the ProFund Access VP High Yield) would reorganize into a corresponding newly created series within ProFunds (an affiliated trust). That transaction occurred on April 26, 2021.

These accompanying financial statements relate to the following portfolios of the Trust included in this report (collectively, the “ProFunds VP” and individually, a “ProFund VP”):

Classic ProFunds VP:

ProFund VP Asia 30	ProFund VP Large-Cap Value
ProFund VP Bull	ProFund VP Mid-Cap
ProFund VP Dow 30	ProFund VP Mid-Cap Growth
ProFund VP Emerging Markets	ProFund VP Mid-Cap Value
ProFund VP Europe 30	ProFund VP Nasdaq-100

ProFund VP Internet	

Non-Equity ProFunds VP:

ProFund Access VP High Yield	ProFund VP Rising Rates Opportunity
ProFund VP Falling U.S. Dollar	ProFund VP U.S. Government Plus

Money Market ProFund VP:

ProFund VP Government Money Market

The ProFunds VP, excluding ProFund VP Government Money Market, are referred to as the “non-money market ProFunds VP.” Each non-money market ProFund VP, other than ProFund VP Consumer Services, ProFund VP Europe 30, ProFund VP Industrials, ProFund VP Large-Cap Growth, ProFund VP Large-Cap Value, ProFund VP Mid-Cap Growth, ProFund VP Mid-Cap Value, ProFund VP Real Estate, ProFund VP Small-Cap Growth, ProFund VP Small-Cap Value, and ProFund VP Utilities, is classified as non-diversified under the 1940 Act. Each ProFund VP has one class of shares.

Under the Trust’s organizational documents, its Officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Trust. In addition, in the normal course of business, the Trust enters into contracts with its vendors and others that provide for general indemnifications. The Trust and ProFunds VP’s maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the ProFunds VP.

2. Significant Accounting Policies

The following is a summary of significant accounting policies followed by each ProFund VP in the preparation of its financial statements. These policies are in conformity with U.S. generally accepted accounting principles (“GAAP”). The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses

during the reporting period. The actual results could differ from those estimates.

Investment Valuation

The ProFunds VP record their investments at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The valuation techniques used to determine fair value are further described in Note 3.

Repurchase Agreements

Each ProFund VP may enter into repurchase agreements with financial institutions in pursuit of its investment objective, as “cover” for the investment techniques it employs, or for liquidity purposes. Repurchase agreements are primarily used by the ProFunds VP as short-term investments for cash positions. Under a repurchase agreement, a ProFund VP purchases a debt security and simultaneously agrees to sell the security back to the seller at a mutually agreed-upon future price and date, normally one business day. The resale price is greater than the purchase price, reflecting an agreed-upon market interest rate during the purchaser’s holding period. While the maturities of the underlying securities in repurchase transactions may be more than one year, the term of each repurchase agreement will always be less than one year.

The ProFund VP follow certain procedures designed to minimize the risks inherent in such agreements. These procedures include effecting repurchase transactions generally with major, global financial institutions whose creditworthiness is continuously monitored by ProFund Advisors LLC (the “Advisor”). In addition, the value of the collateral underlying the repurchase agreement will always be at least equal to the repurchase price, including any accrued interest earned on the repurchase agreement. Funds within the Trust invest in repurchase agreements jointly. Each ProFund VP, therefore, holds a pro rata share of the collateral and interest income based upon the dollar amount of the repurchase agreements entered into by each ProFund VP. The collateral underlying the repurchase agreement is held by the ProFund VP’s custodian. In the event of a default or bankruptcy by a selling financial institution, a ProFund VP will seek to liquidate such collateral which could involve certain costs or delays and, to the extent that proceeds from any sale upon a default of the obligation to repurchase were less than the repurchase price, the ProFund VP could suffer a loss. A ProFund VP also may experience difficulties and incur certain costs in exercising its rights to the collateral and may lose the interest the ProFund VP expected to receive under the repurchase agreement. Repurchase agreements usually are for short periods, such as one week or less, but may be longer. It is the current policy of the ProFunds VP not to invest in repurchase agreements that do not mature within seven days if any such investment, together with any other illiquid assets held by the ProFund VP, amounts to more than 15% of the ProFund VP’s total net assets. The investments of each of the ProFunds VP in repurchase agreements at times may be substantial when, in the view of the Advisor, liquidity, investment, regulatory, or other considerations so warrant. During periods of high demand for repurchase agreements, the ProFunds VP may be unable to invest available cash in these instruments to the extent desired by the Advisor.

Information concerning the counterparties, value of, collateralization and amounts due under repurchase agreement transactions may be found in the table below.

As of June 30, 2021, the ProFunds VP had undivided interest in joint repurchase agreements with the following counterparties, for the time periods and rates indicated. Amounts shown in the table below represent principal amount, cost and value for each respective repurchase agreement.

⁽⁴⁾ U.S. Treasury Inflation-Protected Securities (TIPS), 0.125%, due 4/15/22, total value \$26,714,447.

⁽⁵⁾ U.S. Treasury Notes, 2.25% to 2.625%, due 12/31/23 to 11/15/27, which had an aggregate value of \$66,843,098.

⁽⁶⁾ U.S. Treasury Notes, 1.125% to 2.25%, due 1/31/24 to 2/15/31, Federal Farm Credit Banks, 2.37% to 2.875%, due 12/21/23 to 2/27/24, Federal Home Loan Banks, 1.875% to 3.375%, due 12/8/23 to 3/8/24, which had an aggregate value of \$14,589,493.

Depository Receipts

Each ProFund VP, other than the ProFund VP Government Money Market, may invest in American Depositary Receipts ("ADRs"), New York Shares ("NYSs") and Global Depositary Receipts ("GDRs"). ADRs represent the right to receive securities of foreign issuers deposited in a bank or corresponding bank. ADRs are an alternative to purchasing the underlying securities in their national markets and currencies. For many foreign securities, U.S. dollar-denominated ADRs, which are traded in the United States

on exchanges or over-the-counter ("OTC"), are issued by domestic banks. NYs (or "direct shares") are foreign stocks denominated in U.S. dollars that trade on American exchanges without being converted to ADRs. GDRs are receipts for shares in a foreign-based corporation traded in capital markets around the world.

The ProFunds VP may invest in both sponsored and unsponsored depository receipts. Certain depository receipts, typically those designated as "unsponsored", require the holders thereof to bear most of the costs of such facilities, while issuers of "sponsored"

facilities normally pay more of the cost thereof. The depository of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited securities or to pass through the voting rights to facility holders with respect to the deposited securities, whereas the depository of a sponsored facility typically distributes shareholder communications and passes through the voting rights.

Real Estate Investment Trusts

Each ProFund (other than the Non-Equity ProFunds) may invest in real estate investment trusts ("REITs") which report information on the source of their distributions annually. Equity REITs invest primarily in real property while mortgage REITs invest in constructions, development and long-term mortgage loans. Their value may be affected by changes in the value of the underlying property of the REITs, the creditworthiness of the issuer, property taxes, interest rates, and tax regulatory requirements, such as those relating to the environment. REITs are dependent upon management skill, are not diversified and are subject to heavy cash flow dependency, default by borrowers, self-liquidation, the possibility of failing to qualify for tax-free pass-through of income under the Internal Revenue Code of 1986, as amended, and the possibility of failing to maintain exempt status under the 1940 Act. Certain distributions received from REITs during the year are recorded as realized gains or return of capital when such information becomes known.

Derivative Instruments

In seeking to achieve each ProFund VP's investment objective, the Advisor uses a mathematical approach to investing. Using this approach, the Advisor determines the type, quantity and mix of investment positions. Certain ProFunds VP may obtain investment exposure through derivative instruments such as futures contracts, forward currency contracts and swap agreements, that a ProFund VP should hold to approximate the daily performance, inverse performance, or multiple thereof, as applicable, of its benchmark. All derivative instruments held during the period ended June 30, 2021, were utilized to gain exposure or inverse exposure to each ProFund VP's benchmark (e.g., index, etc.) to meet its investment objective.

The ProFund Access VP High Yield maintains exposure to the high yield market (i.e., U.S. corporate high yield debt market), regardless of market conditions. This means ProFund Access VP High Yield does not adopt defensive positions in cash or other instruments in anticipation of an adverse market climate. The ProFund Access VP High Yield invests primarily in derivatives, money market instruments, and U.S. Treasury obligations that the Advisor believes, in combination, should provide investment results that correspond to the high yield market. During the period ended June 30, 2021, the ProFund Access VP High Yield held credit default swap agreements for credit exposure to the high yield market and futures contracts and/or treasury notes for interest rate exposure to meet the ProFund Access VP High Yield investment objective.

Each non-money market ProFund VP, other than the Classic ProFunds VP, the Sector ProFunds VP and the ProFund VP Falling U.S. Dollar, does not seek to achieve its investment objective over a period of time greater than a single day.

All open derivative positions at period end are reflected on each respective ProFund VP's Schedule of Portfolio Investments. The volume associated with derivative positions varies on a daily basis as each ProFund VP transacts in derivative contracts in order to achieve the appropriate exposure, as expressed in notional amount (contract value for forward currency contracts), in comparison to net assets consistent with each ProFund VP's investment objective.

Certain ProFunds VP utilized a varying level of derivative instruments in conjunction with the investment securities to meet their investment objective during the period ended June 30, 2021. With the exception of the ProFunds VP listed below, the notional amount of open derivative positions relative to each ProFund VP's net assets at year end is generally representative of the notional amount of open positions to net assets throughout the year. The volume associated with derivative positions in the ProFund VP Banks was 10% based on average monthly notional amounts in comparison to net assets during the period ended June 30, 2021.

In connection with its management of certain series of the Trust included in this report (ProFund VP UltraShort Dow 30 and ProFund VP UltraShort Nasdaq-100 (the "Commodity Pools")), the Advisor is registered as a commodity pool operator (a "CPO") and the Commodity Pools are commodity pools under the Commodity Exchange Act (the "CEA"). The Advisor also registered as a commodity trading advisor (a "CTA") under the CEA as a result of its role as subadvisor to funds outside the Trust. Accordingly, the Advisor is subject to registration and regulation as a CPO and CTA under the CEA, and must comply with various regulatory requirements under the CEA and the rules and regulations of the Commodity Futures Trading Commission ("CFTC") and the National Futures Association ("NFA"), including investor protection requirements, antifraud provisions, disclosure requirements and reporting and recordkeeping requirements. The Advisor is also subject to periodic inspections and audits by the CFTC and NFA. Compliance with these regulatory requirements could adversely affect the Commodity Pools' total return. In this regard, any further amendment to the CEA or its related regulations that subject the Advisor or the Commodity Pools to additional regulation may have adverse impacts on the Commodity Pools' operations and expenses.

The following is a description of the derivative instruments utilized by the ProFunds VP, including certain risks related to each instrument type.

Futures Contracts

Each non-money market ProFund VP may purchase or sell futures contracts as a substitute for a comparable market position in the underlying securities or to satisfy regulatory requirements. A cash-settled futures contract obligates the seller to deliver (and the purchaser to accept) an amount of cash equal to a specific dollar amount (the contract multiplier) multiplied by the difference between the final settlement price of a specific futures contract and the price at which the agreement is made. No physical delivery of the underlying asset is made.

Each ProFund VP generally engages in closing or offsetting transactions before final settlement of a futures contract, wherein a second identical futures contract is sold to offset a long position (or bought to offset a short position). In such cases, the obligation is to deliver (or take delivery of) cash equal to a specific dollar

amount (the contract multiplier) multiplied by the difference between the price of the offsetting transaction and the price at which the original contract was entered into. If the original position entered into is a long position (futures contract purchased), there will be a gain (loss) if the offsetting sell transaction is carried out at a higher (lower) price, inclusive of commissions. If the original position entered into is a short position (futures contract sold), there will be a gain (loss) if the offsetting buy transaction is carried out at a lower (higher) price, inclusive of commissions.

Whether a ProFund VP realizes a gain or loss from futures activities depends generally upon movements in the underlying currency, commodity, security or index. The extent of a ProFund VP's loss from an unhedged short position in futures contracts is potentially unlimited and investors may lose the amount that they invest plus any profits recognized on that investment. Each ProFund VP will engage in transactions in futures contracts that are traded on a U.S. exchange or board of trade or that have been approved for sale in the U.S. by the CFTC.

Upon entering into a futures contract, each ProFund VP will be required to deposit with the broker an amount of cash or cash equivalents in the range of approximately 5% to 10% of the contract amount for equity index futures and in the range of approximately 1% to 3% of the contract amount for treasury futures (this amount is subject to change by the exchange on which the contract is traded). This amount, known as "initial margin," is in the nature of a performance bond or good faith deposit on the contract and is returned to the ProFund VP upon termination of the futures contract, assuming all contractual obligations have been satisfied. Subsequent payments, known as "variation margin," to and from the broker will be made daily as the price of the asset underlying the futures contract fluctuates, making the long and short positions in the futures contract more or less valuable, a process known as "marking-to-market." At any time prior to expiration of a futures contract, a ProFund VP may elect to close its position by taking an opposite position, which will operate to terminate the ProFund VP's existing position in the contract.

The primary risks associated with the use of futures contracts are imperfect correlation between movements in the price of futures and the market value of the underlying assets, and the possibility of an illiquid market for a futures contract. Although each ProFund VP intends to sell futures contracts only if there is an active market for such contracts, no assurance can be given that a liquid market will exist for any particular contract at any particular time. Many futures exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day. Once the daily limit has been reached in a particular contract, no trades may be made that day at a price beyond that limit or trading may be suspended for specified periods during the day. Futures contract prices could move to the limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures positions and potentially subjecting a ProFund VP to substantial losses. If trading is not possible, or if a ProFund VP determines not to close a futures position in anticipation of adverse price movements, the ProFund VP will be required to make daily cash payments of variation margin. The risk that the ProFund VP will be unable to close out a futures position will be minimized by entering into such

transactions on a national exchange with an active and liquid secondary market. In addition, although the counterparty to a futures contract is often a clearing organization, backed by a group of financial institutions, there may be instances in which the counterparty could fail to perform its obligations, causing significant losses to a ProFund VP.

Forward Currency Contracts

The ProFund VP Falling U.S. Dollar may invest in forward currency contracts for investment or risk management purposes. A forward currency contract is an obligation to buy or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are entered into on the interbank market conducted directly between currency traders (usually large commercial banks) and their customers.

It is possible that, under certain circumstances, this ProFund VP may have to limit its currency transactions to qualify as a "regulated investment company" ("RIC") under the Internal Revenue Code. The ProFund VP Falling U.S. Dollar does not intend to enter into a forward currency contract with a term of more than one year, or to engage in position hedging with respect to the currency of a particular country to more than the aggregate market value (at the time the hedging transaction is entered into) of their portfolio securities denominated in (or quoted in or currently convertible into or directly related through the use of forward currency contracts in conjunction with money market instruments to) that particular currency.

At or before the maturity of a forward currency contract, the ProFund VP Falling U.S. Dollar may either sell a portfolio security and make delivery of the currency, or retain the security and terminate its contractual obligation to deliver the currency by buying an "offsetting" contract obligating it to buy, on the same maturity date, the same amount of the currency. If this ProFund VP engages in an offsetting transaction, it may later enter into a new forward currency contract to sell the currency.

If the ProFund VP Falling U.S. Dollar engages in offsetting transactions it will incur a gain or loss, to the extent that there has been movement in forward currency contract prices. If forward prices go down during the period between the date the ProFund VP Falling U.S. Dollar enters into a forward currency contract for the sale of a currency and the date it enters into an offsetting contract for the purchase of the currency, the ProFund VP will realize a gain to the extent that the price of ProFund VP currency it has agreed to sell exceeds the price of the currency it has agreed to buy. If forward prices go up, the ProFund VP will suffer a loss to the extent the price of the currency it has agreed to buy exceeds the price of the currency it has agreed to sell.

The ProFund VP Falling U.S. Dollar collateralizes forward currency contracts with cash and certain securities as indicated on the Statement of Assets and Liabilities and the Schedule of Portfolio Investments, respectively. Such collateral is held for the benefit of the counterparty in a segregated tri-party account at the custodian, to protect the counterparty against non-payment by the respective ProFund VP. Similarly, the ProFund VP Falling U.S. Dollar has sought to mitigate credit risk by generally requiring that the counterparties to the ProFund VP post collateral for the benefit of the ProFund VP in a segregated account at the custodian, marked

to market daily, in an amount equal to what the counterparty owes the ProFund VP, subject to certain minimum thresholds. In the event of a default by the counterparty, the ProFund VP will seek withdrawal of this collateral from the segregated account and may incur certain costs exercising its right with respect to the collateral. If a counterparty becomes bankrupt or fails to perform its obligations, the ProFund VP Falling U.S. Dollar may experience significant delays in obtaining any recovery in a bankruptcy or other reorganization proceeding. The ProFund VP Falling U.S. Dollar may obtain only limited recovery or may obtain no recovery in such circumstances. The ProFund VP Falling U.S. Dollar will enter into forward currency contracts only with financial institutions that meet the credit quality standards and monitoring policies established by the Advisor. As of June 30, 2021, there was no collateral posted by counterparties.

Credit Default Swap (“CDS”) Agreements

As of June 30, 2021, the ProFund Access VP High Yield invested in centrally cleared CDS as a substitute for investing directly in bonds in order to gain credit exposure to the high yield market.

In a CDS, the agreement will reference one or more debt securities or reference entities. The protection “buyer” in a credit default contract is generally obligated to pay the protection “seller” a periodic stream of payments over the term of the contract until a credit event, such as a default, on a reference entity has occurred. If a credit event occurs, the seller generally must pay the buyer: a) the full notional value of the swap; or b) the difference between the notional value of the defaulted reference entity and the recovery price/rate for the defaulted reference entity. CDS are designed to reflect changes in credit quality, including events of default. A CDS may require premium (discount) payments as well as daily payments (receipts) related to the interest leg of the swap or to the default or change in price of a reference entity.

The counterparty risk for cleared swap agreements is generally lower than for uncleared over-the-counter swap agreements because, generally, a clearing organization becomes substituted for each counterparty to a cleared swap agreement and, in effect, guarantees each party’s performance under the contract as each party to a trade looks only to the clearing organization for performance of financial obligations. However, there can be no assurance that the clearing organization, or its members, will satisfy its obligations to the ProFund Access VP High Yield.

If the ProFund Access VP High Yield is a seller of a CDS contract (also referred to as a seller of protection or as a buyer of risk), the ProFund Access VP High Yield would be required to pay the par (or other agreed upon) value of a referenced obligation to the counterparty in the event of a default or other credit event. In return, the ProFund Access VP High Yield would receive from the counterparty a daily stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the ProFund Access VP High Yield would keep the stream of payments and would have no payment obligations. As the seller, the ProFund Access VP High Yield would be subject to investment exposure on the notional amount of the swap.

If the ProFund Access VP High Yield is a buyer of a CDS contract (also referred to as a buyer of protection or a seller of risk), the ProFund Access VP High Yield would have the right to deliver a reference obligation and receive the par (or other agreed-upon)

value of such obligation from the counterparty in the event of a default or other credit event (such as a credit downgrade). In return, the ProFund Access VP High Yield would pay the counterparty a daily stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the counterparty would keep the stream of payments and would have no further obligations to the ProFund Access VP High Yield.

The ProFund Access VP High Yield enters into a CDS with multiple reference entities, in which case payments and settlements in respect of any defaulting reference entity would typically be dealt with separately from the other reference entities.

Upon entering into a centrally cleared CDS, the ProFund Access VP High Yield may be required to deposit with the broker an amount of cash or cash equivalents in the range of approximately 3% to 6% of the notional amount for CDS on high yield debt issuers (this amount is subject to change by the clearing organization that clears the trade). This amount, known as “initial margin,” is in the nature of a performance bond or good faith deposit on the CDS and is returned to the ProFund Access VP High Yield upon termination of the CDS, assuming all contractual obligations have been satisfied. Subsequent payments, known as “variation margin,” to and from the broker will be made daily as the price of the CDS fluctuates, making the long and short positions in the CDS contract more or less valuable, a process known as “marking-to-market.” The premium (discount) payments are built into the daily price of the CDS and thus are amortized through the variation margin. The variation margin payment also includes the daily portion of the periodic payment stream.

Swap Agreements (other than CDS)

Each non-money market ProFund VP may enter into swap agreements to gain exposure to an underlying asset without actually purchasing such asset (or shorting such asset), or to hedge a position, including in circumstances in which direct investment is restricted for legal reasons or is otherwise impracticable. Swap agreements are two-party contracts entered into primarily by institutional investors for periods ranging from a day to more than one year. In a standard “swap” transaction, two parties agree to exchange the return (or differentials in rates of return) earned or realized on particular pre-determined investments or instruments. The gross return to be exchanged or “swapped” between the parties is calculated with respect to a “notional amount,” e.g., the return on or increase in value of a particular dollar amount invested in a “basket” of securities or an ETF representing a particular index or group of securities.

On a typical long swap, the counterparty will generally agree to pay the ProFund VP the amount, if any, by which the notional amount of the swap agreement would have increased in value had it been invested in the particular underlying assets (e.g., securities comprising the relevant benchmark index), plus the dividends or interest that would have been received on those assets. The ProFund VP will agree to pay to the counterparty a floating rate of interest on the notional amount of the swap agreement plus the amount, if any, by which the notional amount would have decreased in value had it been invested in such assets, plus, in certain circumstances, commissions or trading spreads on the notional amount. Therefore, the return to the ProFund VP on any swap agreement should be the gain or loss on the notional amount plus

dividends or interest on the assets less the interest paid by the ProFund VP on the notional amount. As a trading technique, the Advisor may substitute physical securities with a swap agreement having investment characteristics substantially similar to the underlying securities. Some ProFunds VP may also enter into swap agreements that provide the opposite return of their benchmark or security ("short" the benchmark or security). Their operations are similar to that of the swaps disclosed above except that the counterparty pays interest to each ProFund VP on the notional amount outstanding and that dividends or interest on the underlying instruments reduce the value of the swap, plus, in certain instances, each ProFund VP will agree to pay to the counterparty commissions or trading spreads on the notional amount.

Most swap agreements entered into by a ProFund VP calculate and settle the obligations of the parties to the agreement on a "net basis" with a single payment. Consequently, a ProFund VP's current obligations (or rights) under a swap agreement will generally be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the "net amount"). When investing in index swap agreements, the ProFunds VP may hold or gain exposure to only a representative sample of securities in the index, or to a component of the index.

A ProFund VP's current obligations under a swap agreement, will be accrued daily (offset against any amounts owed to the ProFund VP) and any accrued but unpaid net amounts owed to a swap counterparty will be covered by segregating or earmarking cash and/or securities determined to be liquid, but typically no payments will be made until the settlement date. Each ProFund VP reserves the right to modify its asset segregation policies in the future, including modifications to comply with any changes in the positions articulated by the SEC or its staff regarding asset segregation. Swap agreements that cannot be terminated of in the ordinary course of business within seven days at approximately the amount a ProFund VP has valued the asset may be considered to be illiquid for purposes of a ProFund VP's illiquid investment limitations.

A ProFund VP bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. If such a default occurs, a ProFund VP will have contractual remedies pursuant to the swap agreements, but such remedies may be subject to bankruptcy and insolvency laws that could affect the ProFund VP's rights as a creditor. A ProFund VP will only enter into swap agreements with counterparties that meet the ProFund VP's standard of creditworthiness (generally, such counterparties would have to be eligible counterparties under the terms of the ProFund VP's repurchase agreement guidelines). The counterparty to an uncleared swap agreement will typically be a major, global financial institution.

Payments may be made at the conclusion of a swap agreement. Swap agreements do not involve the delivery of securities or other underlying assets. Accordingly, the risk of loss with respect to swap agreements is limited to the net amount of payments that a ProFund VP is contractually obligated to make. If the other party to a swap agreement defaults, a ProFund VP's risk of loss consists of the net amount of payments that such ProFund VP is contractually entitled to receive, if any. The net amount of the

excess, if any, of a ProFund VP's obligations over its entitlements with respect to each equity swap will be accrued on a daily basis and an amount of cash or liquid assets, having an aggregate NAV at least equal to such accrued excess will be earmarked or segregated by a ProFund VP's custodian.

In the normal course of business, a ProFund VP enters into International Swap Dealers Association, Inc. ("ISDA") agreements with certain counterparties for derivative transactions. These agreements contain, among other conditions, events of default and termination events, and various covenants and representations. Certain of the ProFund VP's ISDA agreements contain provisions that require the ProFund VP to maintain a pre-determined level of net assets, and/or provide limits regarding the decline of the ProFund VP's NAV over specific periods of time, which may or may not be exclusive of redemptions. If the ProFund VP were to trigger such provisions and have open derivative positions, at that time counterparties to the ISDA agreements could elect to terminate such ISDA agreements and request immediate payment in an amount equal to the net liability positions, if any, under the relevant ISDA agreement. Pursuant to the terms of its ISDA agreements, the ProFund VP will have already collateralized its liability under such agreements, in some cases only in excess of certain threshold amounts. Such collateral is held for the benefit of the counterparty in a segregated tri-party account at the custodian, to protect the counterparty against non-payment by the respective ProFund VP. The ProFunds VP seek to mitigate risks by generally requiring that the counterparties for each ProFund VP agree to post collateral for the benefit of the ProFund VP, marked to market daily, in an amount approximately equal to what the counterparty owes the ProFund VP, subject to certain minimum thresholds, although the ProFunds VP may not always be successful. To the extent any such collateral is insufficient or there are delays in accessing the collateral, the ProFunds VP will be exposed to the risks described above, including possible delays in recovering amounts as a result of bankruptcy proceedings. As of June 30, 2021, the collateral posted by counterparties consisted of U.S. Treasury securities and cash.

The use of swaps, including CDS, is a highly specialized activity which involves investment techniques and risks in addition to and in some cases different from those associated with ordinary portfolio securities transactions. The primary risks associated with the use of swap agreements are mispricing or improper valuation, imperfect correlation between movements in the notional amount and the price of the underlying investments, and the inability of the counterparties to perform. If a counterparty's creditworthiness for an over-the-counter swap declines, the value of the swap would likely decline. The Advisor, under the supervision of the Trust's Board of Trustees, is responsible for determining and monitoring the liquidity of a ProFund VP's transactions in swap agreements.

Offsetting Assets and Liabilities

The ProFunds VP are subject to master netting agreements for swap agreements (other than centrally cleared CDS) and forward currency contracts that allow for amounts owed between the ProFund VP and the counterparty to be netted upon early termination. The party that has the larger payable pays the excess of the larger amount over the smaller amount to the other party. The master netting agreements do not apply to amounts owed to/from different counterparties.

As described above, the ProFunds VP utilize derivative instruments to achieve their investment objective during the period. The amounts shown in the Statements of Assets and Liabilities generally do not take into consideration the effects of legally enforceable master netting agreements.

Asset (Liability) amounts shown in the table below represent amounts owed to (by) the ProFunds VP for swap agreements (other than centrally cleared CDS) and forward currency contracts as of June 30, 2021. These amounts may be collateralized by cash or financial instruments, segregated for the benefit of the ProFunds VP or the counterparties, depending on whether the related contracts are in an

appreciated or depreciated position at period end. Amounts shown in the column labeled “Net Amount” represent the un-collateralized portions of these amounts at period end. Any un-collateralized amounts are due to timing differences related to market movements or subject to certain minimum thresholds for collateral movement, as further described above.

* The actual financial instruments and cash collateral (received) pledged may be in excess of the amounts shown in the table. The table only reflects collateral amounts up to the amount of the financial instrument disclosed on the Statement of Assets and Liabilities.

** Financial instruments and cash collateral received are not disclosed on the Statement of Assets and Liabilities because the Fund does not have effective control of the collateral.

Securities Lending:

Each ProFund VP may lend securities to brokers, dealers and financial organizations in exchange for initial collateral in the amount of at least 102% of the value of U.S. dollar-denominated securities loaned or at least 105% of the value of non-U.S. dollar-denominated securities loaned, marked to market daily. Each security loaned will be secured continuously by collateral in the form of cash, money market instruments or U.S. Government securities with a market value of at least 100% of the market value of the loaned securities. When a ProFund VP lends its securities, it continues to receive payments equal to the dividends and interest paid on the securities loaned and simultaneously may earn interest on the reinvestment of the cash collateral. Any cash collateral received by the ProFund VP in connection with these loans may be reinvested in a variety of short-term investments. Any non-cash collateral received by the ProFund VP in connection with these loans may not be sold or pledged by the ProFund VP and, accordingly, is not reflected in the ProFund VP's assets and liabilities. The ProFunds VP may incur fees and expenses in connection with the reinvestment of cash collateral. For security loans collateralized by cash, borrowers may be entitled to receive a fee based on the amount of collateral. The ProFunds VP are typically compensated by the difference between the amount earned on the reinvestment of cash collateral and any fees paid to the borrower. Although voting and other rights attendant to securities loaned pass to the borrower, such loans may be recalled so that the securities may be voted by the ProFund VP if a material event affecting the ProFund VP's investment in the securities on loan is to occur. Security loans are subject to termination by the ProFund VP or the borrower at any time. No securities loan shall

be made on behalf of a ProFund VP if, as a result, the aggregate value of all securities loaned by the particular ProFund VP exceeds one-third of the value of such ProFund VP's total assets (including the value of the collateral received).

Securities lending involves exposure to certain risks, including "gap" risk (i.e., the risk of a mismatch between the return on cash collateral reinvestments and any fees a ProFund VP has agreed to pay a borrower), operational risk (i.e., the risk of losses resulting from problems in the settlement and the accounting process), legal, counterparty and credit risk. If a securities lending counterparty were to default, a ProFund VP would be subject to the risk of a possible delay in receiving collateral or in recovering the loaned securities, or to a possible loss of rights in the collateral. In the event a borrower does not return a ProFund VP's securities as agreed, the ProFund VP may experience losses if the proceeds received from liquidating the collateral do not at least equal the value of the loaned security at the time the collateral is liquidated, plus the transaction costs incurred in purchasing replacement securities. This event could trigger adverse tax consequences for a ProFund VP. The investment of cash collateral deposited by the borrower is subject to inherent market risks such as interest rate risk, credit risk, liquidity risk, and other risks that are present in the market. A ProFund VP could lose money if its short-term reinvestment of the collateral declines in value over the period of the loan. The market value of the loaned securities is determined at the close of each business day of the ProFund VP and any additional required collateral is delivered to the ProFund VP, or excess collateral returned by the ProFund VP, on the next business day.

The following table is a summary of the ProFunds VP securities lending transactions as of June 30, 2021:

	Value of Securities on Loan	Value of Cash Collateral Received*

Investment Transactions and Related Income

Throughout the reporting period, investment transactions are accounted for no later than one business day following the trade date. For financial reporting purposes, investment transactions are accounted for on trade date on the last business day of the reporting period. Interest income is recognized on an accrual basis and includes, where applicable, the amortization of premium or accretion of discount. Dividend income is recorded

on the ex-dividend date except in the case of depositary receipts, in which case dividends are recorded as soon as such information becomes available. Pay-in-kind interest income and non-cash dividend income received in the form of securities in-lieu of cash, if any, are recorded at the fair value of the securities received. Gains or losses realized on sales of securities are determined using the specific identification method by comparing the identified cost of the security lot sold with the net sales proceeds.

Allocations

Expenses directly attributable to a ProFund VP are charged to that ProFund VP, while expenses which are attributable to more than one fund in the Trust, or jointly with an affiliate, are allocated among the respective funds in the Trust and/or affiliate based upon relative net assets or another reasonable basis.

Distributions to Shareholders

Each of the ProFunds VP (except ProFund VP Government Money Market, ProFund VP Real Estate, and ProFund VP U.S. Government Plus) intends to declare and distribute net investment income at least annually, if any. ProFund VP Government Money Market and ProFund VP U.S. Government Plus declare dividends from net investment income daily, if any, and pay dividends on a monthly basis. ProFund VP Real Estate declares and pays dividends from net investment income quarterly, if any. Net realized capital gains, if any, will be distributed annually.

The amount of distributions from net investment income and net realized gains are determined in accordance with federal income tax regulations which may differ from GAAP. These “book/tax” differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature (e.g., return of capital, net operating loss, distribution reclassification, and equalization), such amounts are reclassified within the composition of net assets based on their federal tax-basis treatment; temporary differences (e.g., wash sales) do not require a reclassification. The ProFunds VP may utilize equalization accounting for tax purposes and designate earnings and profits, including net realized gains distributed to shareholders on redemption of shares, as a part of the dividends paid deduction for income tax purposes. To the extent they exceed net investment income and net realized capital gains for tax purposes, they are reported as distribution of capital.

Federal Income Taxes

Each of the ProFunds VP intends to continue to qualify each year as a RIC under Subchapter M of the Internal Revenue Code of 1986, as amended. A RIC generally is not subject to federal income tax on income and gains distributed in a timely manner to its shareholders. The ProFunds VP intend to make timely distributions in order to avoid tax liability. Accordingly, no provision for federal income taxes is required in the financial statements. The ProFunds VP have a calendar tax year end.

Management of the ProFunds VP has reviewed tax positions taken in tax years that remain subject to examination by all major tax jurisdictions, including federal (i.e., the last four tax year ends and the interim tax period since then, as applicable). Management believes that there is no tax liability resulting from unrecognized tax benefits related to uncertain tax positions taken and the ProFunds VP are not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

Other

Expense offsets to custody fees that arise from credits on cash balances maintained on deposit are reflected on the Statement of Operations, as applicable, as “Fees paid indirectly.”

Expense Reimbursement from a Third Party

During 2018, certain ProFunds VP received a non-recurring reimbursement from a third party relating to expenses that were incurred in a prior year. The corresponding impacts to the respective ProFund VP’s Total Return and Ratios to Average Net Assets in the Financial Highlights are disclosed in a footnote to that ProFund VP’s Financial Highlights.

3. Investment Valuation Summary

The valuation techniques employed by the ProFunds VP, described below, maximize the use of observable inputs and minimize the use of unobservable inputs in determining fair value. These valuation techniques distinguish between market participant assumptions developed based on market data obtained from sources independent of the ProFunds VP (observable inputs) and the ProFunds’ VP own assumptions about market participant assumptions developed based on the best information available under the circumstances (unobservable inputs). The inputs used for valuing the ProFunds’ VP investments are summarized in the three broad levels listed below:

- **Level 1**—quoted prices in active markets for identical assets
- **Level 2**—other significant observable inputs (including quoted prices for similar securities, interest rates, prepayments speeds, credit risk, etc.)
- **Level 3**—significant unobservable inputs (including the ProFunds’ VP own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing investments are not necessarily an indication of the risk associated with investing in those investments. For example, repurchase agreements are generally valued at amortized cost. Generally, amortized cost approximates the current fair value of a security, but since the valuation is not obtained from a quoted price in an active market, such securities are reflected as Level 2. Fair value measurements may also require additional disclosure when the volume and level of activity for the asset or liability have significantly decreased, as well as when circumstances indicate that a transaction is not orderly. Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The Trust determines transfers between fair value hierarchy levels at the reporting period end.

Security prices are generally valued at their market value using information provided by a third party pricing service or market quotations or other procedures approved by the Trust’s Board of Trustees. The securities in the portfolio of a non-money market ProFund VP, except as otherwise noted, that are listed or traded on a stock exchange or the Nasdaq National Market System (“Nasdaq/NMS”), are valued at the official closing price, if available, or the last sale price, on the exchange or system where the security is principally traded. If there have been no sales for that day on the exchange or system where the security is principally traded, then the value may be determined with reference to the last sale price, or the official closing price, if applicable, on any other exchange or system. In each of these situations, valuations are typically categorized as a Level 1 in the fair value hierarchy. If there have been no sales for that day on any exchange or system, the security will be valued using fair value procedures in accordance with procedures approved by the Trust’s Board of Trustees as described below.

Securities regularly traded in the OTC markets, including securities listed on an exchange, but that are primarily traded OTC other than those traded on the Nasdaq/NMS, are generally valued on the basis

of the mean between the bid and asked quotes furnished by dealers actively trading those instruments. Fixed-income securities are generally valued according to prices as furnished by an independent pricing service, generally at the mean of the bid and asked quotes for those instruments. Short-term fixed-income securities maturing in sixty days or less, and of sufficient credit quality, may be valued at amortized cost, which approximates market value. For the ProFund VP Government Money Market, investments are valued at amortized cost, in accordance with Rule 2a-7 of the 1940 Act. Under the amortized cost method, premium or discount, if any, is amortized or accreted, respectively, on a constant basis to the maturity of the security. In each of these situations, valuations are typically categorized as Level 2 in the fair value hierarchy.

Derivatives are generally valued using independent pricing services and/or agreements with counterparties or other procedures approved by the Trust's Board of Trustees. Futures contracts are generally valued at their last sale price prior to the time at which the net asset value per share of a ProFund VP is determined and are typically categorized as Level 1 in the fair value hierarchy. Swap agreements are generally valued using independent sources and/or agreements with counterparties. Forward currency contracts are valued at their quoted daily prices obtained from an independent pricing service. These valuations are typically categorized as Level 2 in the fair value hierarchy. If there was no sale on that day, fair valuation procedures as described below may be applied.

When the Advisor determines that the market price of a security is not readily available or deemed unreliable (e.g., an approved pricing service does not provide a price, a furnished price is in error, certain stale prices, or an event occurs that materially affects the furnished price), it may in good faith establish a fair value for that security in accordance with procedures established by and under the general supervision and responsibility of the Trust's Board of Trustees. Fair value pricing may require subjective determinations about the value of a security. While the Trust's policy is intended to result in a calculation of a ProFund VP's NAV that fairly reflects security values as of the time of pricing, the Trust cannot ensure that fair values determined by the Advisor or persons acting at their direction would accurately reflect the price that a ProFund VP could obtain for a security if it were to dispose of that security as of the time of pricing (for instance, in a forced or distressed sale). The prices used by a ProFund VP may differ from the value that would be realized if the securities were sold and the differences could be material to the financial statements. Depending on the source and relative significance of valuation inputs, these instruments may be classified as Level 2 or Level 3 in the fair value hierarchy.

For the period ended June 30, 2021, there were no Level 3 investments for which significant unobservable inputs were used to determine fair value.

A summary of the valuations as of June 30, 2021, based upon the three levels defined above, is included in the table below while the breakdown, by category, of equity securities is disclosed on the Schedule of Portfolio Investments for each ProFund VP:

4. Fees and Transactions with Affiliates and Other Parties

The ProFunds VP have entered into an Investment Advisory Agreement with the Advisor. Under this agreement, the ProFunds VP (excluding ProFund VP U.S. Government Plus) each pay the Advisor a fee at an annualized rate of 0.75% of the average daily net assets of each respective ProFund VP. The ProFund VP U.S. Government Plus pays the Advisor a fee at an annualized rate of 0.50% of its average daily net assets.

In addition, subject to the condition that the aggregate daily net assets of the Trust be equal to or greater than \$10 billion, the Advisor has agreed to the following fee reductions with respect to each individual ProFund VP: 0.025% of the ProFund VP's daily net assets in excess of \$500 million to \$1 billion, 0.05% of the ProFund VP's daily net assets in excess of \$1 billion to \$2 billion, and 0.075% of the ProFund VP's net assets in excess of \$2 billion. During the period ended June 30, 2021, no Fund's annual investment advisory fee was subject to such reductions.

Citi Fund Services Ohio, Inc. ("Citi") acts as the Trust's administrator (the "Administrator"). For its services as Administrator, the Trust pays Citi an annual fee based on the Trust's

aggregate average net assets at a tier rate ranging from 0.00375% to 0.05%, and a base fee for certain filings. Administration fees also include additional fees paid to Citi by the Trust for additional services provided, including support of the Trust's compliance program.

Citi also acts as fund accounting agent for the Trust. For these services, the Trust pays Citi an annual fee based on the Trust's aggregate average net assets at a tier rate ranging from 0.00375% to 0.03%, a base fee, and reimbursement of certain expenses.

FIS Investor Services LLC ("FIS") acts as transfer agent for the Trust. For these services, the Trust pays FIS a base fee, service charges, fees based on the number of VP Funds, and reimbursement of certain expenses.

ProFunds Distributors, Inc. (the "Distributor"), a wholly owned subsidiary of the Advisor, serves as the Trust's distributor. Under a Distribution and Shareholder Services Plan, adopted by the Trust's Board of Trustees pursuant to Rule 12b-1 under the 1940 Act, each ProFund VP may pay financial intermediaries such as broker-dealers, insurance companies and the Distributor up to 0.25%, on an annualized basis, of the average daily net assets as compensation for the distribution-related activities and/or shareholder services.

Distribution Fees were suspended throughout the period ended June 30, 2021 for ProFund VP Government Money Market to maintain a more competitive net yield. If ProFund VP Government Money Market had paid an amount equal to 0.25% of its average daily net assets, the Distribution Fees would have been \$53,003 for the period ended June 30, 2021. The Distributor may reinstate all or a portion of the Distribution Fees for ProFund VP Government Money Market at any time.

The Advisor, pursuant to a separate Management Services Agreement, performs certain client support services and other administrative services on behalf of the ProFunds VP. For these services, each ProFund VP pays the Advisor a fee at the annual rate of 0.10% of its average daily net assets.

The Trust, on behalf of the ProFunds VP, has entered into an administrative services agreement with certain insurance companies, pursuant to which the insurance companies will provide administrative services with respect to the ProFunds VP. For these services, the ProFunds VP may pay the insurance companies administrative services fees, a monthly/quarterly fee equal on an annual basis of up to 0.35% of their average daily net assets as reflected on the Statement of Operations as "Administrative services fees." Throughout the period ended June 30, 2021, the administrative services fees of ProFund VP Government Money Market were suspended to maintain a more competitive net yield. If ProFund VP Government Money Market had paid an amount equal to the full amount per the administrative services agreements, the administrative services fees would have been \$43,975 for the period ended June 30, 2021. All or a portion of the Administrative services fees of

ProFund VP Government Money Market may be reinstated at any time.

Certain Officers and a Trustee of the Trust are affiliated with the Advisor or the Administrator. Except as noted below with respect to the Trust's Chief Compliance Officer, such Officers and Trustee receive no compensation from the ProFunds VP for serving in their respective roles. The Trust, together with affiliated Trusts, pays each Independent Trustee compensation for his services at an annual rate of \$185,000. Independent Trustees also receive \$10,000 for attending each regularly quarterly in-person meeting, \$3,000 for attending each special meeting, and \$3,000 for attending each telephonic meeting. During the period ended June 30, 2021, actual Trustee compensation was \$346,500 in aggregate from the Trust and affiliated trusts. There are certain employees of the Advisor, such as the Trust's Chief Compliance Officer and staff who administer the Trust's compliance program, in which the ProFunds VP reimburse the Advisor for their related compensation and certain other expenses incurred as reflected on the Statement of Operations as "Compliance services fees."

The Advisor has contractually agreed to waive advisory and management services fees, and if necessary, reimburse certain other expenses of the ProFunds VP in order to limit the annual operating expenses (exclusive of brokerage costs, interest, taxes, dividends (including dividend expenses on securities sold short), litigation, indemnification, and extraordinary expenses) to an annualized rate of 1.35% of the average daily net assets of ProFund VP Government Money Market, 1.38% of the average daily net assets of ProFund VP U.S. Government Plus and 1.68% of the average daily net assets of each other ProFund VP. These expense limitations remain in effect until at least April 30, 2022.

The Advisor may recoup the advisory and management services fees contractually waived or limited and other expenses reimbursed by it within three years from the contractual period; however, such recoupment will be limited to the lesser of any expense limitation in place at the time of recoupment or the expense limitation in place at the time of waiver or reimbursement. Any amounts recouped by the Advisor during the period are reflected on the Statement of Operations as "Recoupment of prior expenses reduced by the Advisor." As of June 30, 2021, the recoupments that may potentially be made by the ProFunds VP are as follows:

The Advisor has contractually agreed to waive advisory and management services fees, and if necessary, reimburse certain other expenses of ProFund VP Government Money Market through April 30, 2022 to the extent necessary to maintain a certain minimum net yield as determined by the Advisor.

The Advisor may recoup the advisory and management services fees contractually waived or limited and other expenses reimbursed by it within three years from the minimum yield limit period in which they were taken. Such recoupments shall be made monthly, but only to the extent that such recoupments would not cause the ProFund VP Government Money Market's net yield to fall below the highest previously determined minimum yield, and such recoupment will be limited to the lesser of any expense limitation in place at the time of recoupment or the expense limitation in place at the time of waiver or reimbursement. Any amounts recouped by the Advisor during the period are reflected on the Statement of Operations as "Recoupment of prior expenses reduced by the Advisor." As of June 30, 2021, the recoupments that may potentially be made by ProFund VP Government Money Market are as follows:

6. Investment Risks

Some risks apply to all ProFunds VP, while others are specific to the investment strategy of certain ProFunds VP. Each ProFund VP may be subject to other risks in addition to these identified risks. This section discusses certain common principal risks encountered by the ProFunds VP. The risks are presented in an order intended to facilitate readability, and their order does not imply that the realization of one risk is likely to occur more frequently than another risk, nor does it imply that the realization of one risk is likely to have a greater adverse impact than another risk.

Risks Associated with the Use of Derivatives

Certain ProFunds VP may obtain investment exposure through derivatives. Investing in derivatives may be considered aggressive and may expose the ProFund VP to greater risks and may result in larger losses or smaller gains than investing directly in the reference asset(s) underlying those derivatives (e.g., securities in the Index). These risks include counterparty risk, liquidity risk and increased correlation risk. When the ProFund VP uses derivatives, there may be imperfect correlation between the value of the reference asset(s) underlying the derivative (e.g., securities in the Index) and the derivative, which may prevent the ProFund VP from achieving its investment objective. Because derivatives often require only a limited initial investment, the use of derivatives also may expose the ProFund VP to losses in excess of those amounts initially invested.

Certain ProFunds VP may use a combination of swaps on the Index and swaps on an ETF that is designed to track the performance of the Index. The performance of an ETF may not track the performance of the Index due to embedded costs and other factors. Thus, to the extent the ProFund VP invests in swaps that use an ETF as the reference asset, the ProFund VP may be subject to greater correlation risk and may not achieve as high a degree of correlation with the Index as it would if the ProFund VP only used swaps on the Index.

Moreover, with respect to the use of swap agreements, if the Index has a dramatic intraday move that causes a material decline in a ProFund VP's net assets, the terms of a swap agreement between the ProFund VP and its counterparty may permit the counterparty to immediately close out the transaction with the ProFund VP. In that event, the ProFund VP may be unable to enter into another swap agreement or invest in other derivatives to achieve the desired exposure consistent with the ProFund VP's investment objective. This, in turn, may prevent the ProFund VP from achieving its investment objective, even if the Index reverses all or a portion of its intraday move by the end of the day. As a result,

the value of an investment in the ProFund VP may change quickly and without warning. Any costs associated with using derivatives will also have the effect of lowering the ProFund VP's return.

Compounding Risk

Certain ProFunds VP are "geared" funds ("Geared Funds") in the sense that the ProFund VP has an investment objective to match a multiple, the inverse, or an inverse multiple of the performance of a benchmark on a single day, not for any other period. A "single day" is measured from the time a ProFund VP calculates its net asset value ("NAV") to the time of the ProFund VP's next NAV calculation. These Geared Funds are subject to all of the correlation risks described below. In addition, because these ProFunds VP have a single day investment objective, for periods greater than one day, the effect of compounding may cause the performance of a ProFund VP to vary from the benchmark performance (or the inverse of the benchmark performance) times the stated multiple in the ProFund VP objective, as applicable, before accounting for fees and ProFund VP expenses. As explained in greater detail in their Prospectuses, as a result of compounding, Geared Funds are unlikely to provide a simple multiple (e.g. -1x, 2x, or -2x) of a benchmark's return over periods longer than a single day.

Leverage Risk

Certain ProFunds VP utilize leverage (i.e., obtain investment exposure in excess of their assets) in seeking to achieve their investment objective and will lose more money in market environments adverse to their daily objective than similar funds that do not employ leverage.

Because the ProFunds VP that utilize leverage include either multipliers of 2x or 1.25x (or sometimes the inverse thereof), a single day adverse price movement of more than 50% or 80%, respectively, in a relevant benchmark, could result in the total loss of an investor's investment.

Active Investor Risk

Each ProFund VP permits short-term trading of its securities. In addition, the Advisor expects a significant portion of the assets invested in a ProFund VP to come from professional money managers and investors who use the ProFund VP as part of active trading or tactical asset allocation strategies. These strategies often call for frequent trading to take advantage of anticipated changes in market conditions, which could increase portfolio turnover, and may result in additional costs for the ProFund VP. In addition, large movements of assets into and out of the ProFund VP may have a

negative impact on the ProFund VP's ability to achieve its investment objective or maintain a consistent level of operating expenses. In certain circumstances, the ProFund VP's expense ratio may vary from current estimates or the historical ratio disclosed in the ProFund VP's prospectus.

Active Management Risk

ProFund Access VP High Yield Fund is actively managed, and its performance reflects the investment decisions that ProFund Advisors makes for the Fund. ProFund Advisors' judgements about the Fund's investments may prove to be incorrect. If the investments selected and strategies employed by the Fund fail to produce the intended results, the Fund could underperform or have negative returns as compared to other funds with a similar investment objective and/or strategies.

Concentration Risk

Certain non-money market ProFunds VP may be subject to concentration risk. Concentration risk results from maintaining concentrated exposure to certain types of issuers, industries, market sectors, countries or geographical regions. A ProFund VP that concentrates its investments will be more susceptible to risks associated with that concentration. With respect to the Sector ProFunds VP, a ProFund VP may have significant exposure to an individual industry that constitutes a significant portion of that ProFund VP's benchmark. Such a ProFund VP will be more susceptible to the risks associated with that specific industry, which may be different from the risks generally associated with other benchmarks. Each ProFund VP will concentrate its investments in a particular industry or group of industries to approximately the same extent as its benchmark, up to the extent permitted by applicable regulatory guidance. Additionally, certain ProFunds VP that focus their investments in particular countries or geographic regions may be particularly susceptible to economic, political or regulatory events affecting those countries or regions. These ProFunds VP may be more volatile than a more geographically diversified ProFund VP. The Schedule of Portfolio Investments includes information on each ProFund VP's holdings, including industry and/or geographical composition, as relevant.

Correlation Risk

There is no guarantee that a ProFund VP will achieve a high degree of correlation with its benchmark. Failure to achieve a high degree of correlation may prevent a ProFund VP from achieving its investment objective, and the percentage change of the ProFund VP's NAV each day may differ, perhaps significantly, from the percentage change of the ProFund VP's benchmark on such day. This may be due, among other reasons, to the impact of a limited trading market in the underlying component securities on the calculation of the benchmark.

In order to achieve a high degree of correlation with the Index, a ProFund VP seeks to rebalance its portfolio daily to keep exposure consistent with its investment objective. Being materially under- or overexposed to the Index may prevent the ProFund VP from achieving a high degree of correlation with the Index. Market disruptions or closure, regulatory restrictions, market volatility and other factors will adversely affect the ProFund VP's ability to adjust exposure to requisite levels. The target amount of portfolio exposure is impacted dynamically by the Index's movements.

Because of this, it is unlikely that the ProFund VP will have perfect leveraged exposure at the end of each day and the likelihood of being materially under- or overexposed is higher on days when the Index level is volatile at or near the close of the trading day.

A number of other factors may adversely affect a ProFund VP's correlation with its benchmark, including material over- or underexposure, fees, expenses, transaction costs, financing costs associated with the use of derivatives, income items, valuation methodology, accounting standards and disruptions or illiquidity in the markets for the securities or financial instruments in which a ProFund VP invests. A ProFund VP may not have investment exposure to all securities in its benchmark, or its weighting of investment exposure to stocks or industries may be different from that of the benchmark. In addition, a ProFund VP may invest in securities not included in the benchmark or in financial instruments. Each ProFund VP may take or refrain from taking positions in order to improve tax efficiency or comply with regulatory restrictions, either of which may negatively affect the ProFund VP's correlation with its benchmark. A ProFund VP may also be subject to large movements of assets into and out of the ProFund VP, potentially resulting in the ProFund VP being over- or underexposed to its benchmark, and may be impacted by index reconstitutions and index rebalancing events. Additionally, a ProFund VP's underlying holdings or reference assets may trade on markets that may or may not be open on the same day as the ProFund VP. Each ProFund VP (other than the Classic ProFunds VP, the Sector ProFunds VP, ProFund VP Falling U.S. Dollar and ProFund VP Government Money Market) seeks to rebalance its portfolio daily to keep its leveraged, inverse or inverse leveraged exposure to the benchmark consistent with its investment objective. Any of these factors could decrease correlation between the performance of a ProFund VP and may hinder a ProFund VP's ability to meet its investment objective on or around that day.

Counterparty Risk

A ProFund VP that will invest in financial instruments involving third parties (i.e., counterparties) is subject to counterparty risk. The use of financial instruments, such as swap agreements or futures contracts, involves risks that are different from those associated with ordinary portfolio securities transactions. Certain ProFunds VP will be subject to credit risk (i.e., the risk that a counterparty is unwilling or unable to make timely payments to meet its contractual obligations) with respect to the amount they expect to receive from counterparties to financial instruments and repurchase agreements entered into by the ProFunds VP. Each ProFund VP generally structures the agreement such that either party can terminate the contract without penalty prior to the termination date. A ProFund VP may be negatively impacted if a counterparty becomes bankrupt or otherwise fails to perform its obligations, the value of an investment in each ProFund VP may decline. A ProFund VP may experience significant delays in obtaining any recovery in a bankruptcy or other reorganization proceeding and a ProFund VP may obtain only limited recovery or may obtain no recovery in such circumstances.

The ProFunds VP typically enter into transactions with counterparties whose credit rating at the time of the transaction is investment grade, as determined by a nationally recognized statistical rating organization, or, if unrated, judged by the Advisor to be of comparable quality. These are usually major, global financial institutions. Although the counterparty to an exchange-traded

futures contract is often backed by a futures commission merchant (“FCM”) or clearing organization that is further backed by a group of financial institutions, there may be instances in which the FCM or the clearing organization could fail to perform its obligations, causing significant losses to the ProFund VP. For example, a ProFund VP could lose margin payments it has deposited with a clearing organization as well as gains owed but not paid to the ProFund VP if the clearing organization becomes insolvent or otherwise fails to perform its obligations.

Under current CFTC regulations, a FCM maintains customers’ assets in a bulk segregated account. If a FCM fails to do so, or is unable to satisfy a substantial deficit in a customer account, its other customers may be subject to risk of loss of their funds in the event of that FCM’s bankruptcy. In that event, in the case of futures, the FCM’s customers are entitled to recover, even in respect of property specifically traceable to them, only a proportional share of all property available for distribution to all of that FCM’s customers. In the case of cleared swaps, customers of a FCM in bankruptcy are entitled to recover assets specifically attributable to them pursuant to new CFTC regulations, but may nevertheless risk loss of some or all of their assets due to accounting or operational issues or due to legal risk in connection with the application of bankruptcy law to cleared swaps.

Natural Disaster/Epidemic Risk

Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes, tsunamis and other severe weather-related phenomena generally, and widespread disease, including pandemics and epidemics (for example, the novel coronavirus (COVID-19)), have been and can be highly disruptive to economies and markets and have recently led, and may continue to lead, to increased market volatility and significant market losses. Such as natural disaster and health crises could exacerbate political, social, and economic risks previously mentioned, and result in significant breakdowns, delays, shutdowns, social isolation, and other disruptions to important global, local and regional supply chains affected, with potential corresponding results on the operating performance of the Fund and its investments. A climate of uncertainty and panic, including the contagion of infectious viruses or diseases, may adversely affect global, regional, and local economies and reduce the availability of potential investment opportunities, and increases the difficulty of performing due diligence and modeling market conditions, potentially reducing the accuracy of financial projections. Under these circumstances, the Fund may have difficulty achieving its investment objective which may adversely impact performance. Further, such events can be highly disruptive to economies and markets, significantly disrupt the operations of individual companies (including, but not limited to, the Fund’s investment advisor and third party service providers), sectors, industries, markets, securities and commodity exchanges, currencies, interest and inflation rates, credit ratings, investor sentiment, and other factors affecting the value of the Fund’s investments. These factors can cause substantial market volatility, exchange trading suspensions and closures and can impact the ability of the Fund to complete redemptions and otherwise affect Fund performance and Fund trading in the secondary market. A widespread crisis may also affect the global economy in ways that cannot necessarily be foreseen at the current time. How long such events will last and whether they will continue or recur cannot be predicted. Impacts from these events

could have significant impact on the Fund’s performance, resulting in losses to your investment.

Risk that Current Assumptions and Expectations Could Become Outdated As a Result of Global Economic Shocks

The onset of the novel coronavirus (COVID-19) has caused significant shocks to global financial markets and economies, with many governments taking extreme actions to slow and contain the spread of COVID-19. These actions have had, and likely will continue to have, a severe economic impact on global economies as economic activity in some instances has essentially ceased. Financial markets across the globe are experiencing severe distress. In March 2020, U.S. equity markets entered a bear market in the fastest such move in the history of U.S. financial markets. Contemporaneous with the onset of the COVID-19 pandemic in the US, oil experienced shocks to supply and demand, impacting the price and volatility of oil. The global economic shocks being experienced as of the date hereof may cause the underlying assumptions and expectations of the Fund to become outdated quickly or inaccurate, resulting in significant losses.

Debt Instruments Risk

The ProFunds VP may invest in, or seek exposure to, debt instruments. Debt instruments are subject to adverse issuer, political, regulatory, market and economic developments, as well as developments that affect specific economic sectors, industries or segments of the fixed income market. Additionally, the credit quality of the issuer of a debt instrument (including the risk of a potential default) can also affect the price of a debt instrument. The perceived or actual inability of issuers, guarantors, or liquidity providers of debt instruments to make scheduled interest payments can negatively impact the performance of the ProFund VP. Debt instruments may have varying levels of sensitivity to changes in interest rates.

Typically, the price of outstanding debt instruments falls when interest rates rise. Without taking into account other factors, the prices of debt instruments with longer maturities may fluctuate more in response to interest rate changes than those of debt instruments with shorter maturities. Many types of debt instruments are subject to prepayment risk, which is the risk that the issuer of the security will repay principal (in part or in whole) prior to the maturity date. Debt instruments allowing prepayment may offer less potential for gains during a period of declining interest rates, as a ProFund VP may be required to reinvest the proceeds received at lower interest rates. These factors may cause the value of an investment in the ProFund VP to change. Also, the securities of certain U.S. government agencies, authorities or instrumentalities are neither issued by nor guaranteed as to principal and interest by the U.S. government, and may be exposed to more credit risk than those issued by and guaranteed as to principal and interest by the U.S. government. All U.S. government securities are subject to credit risk. It is possible that the U.S. government may not be able to meet its financial obligations or that securities issued by the U.S. government may experience credit downgrades. Such a credit event may also adversely impact the financial markets. Certain ProFunds VP are inversely correlated to bond prices and will typically respond differently to the above factors than would a ProFund VP positively correlated to bond prices.

High Yield Risk

Investment in or exposure to high yield (lower rated) debt instruments (also known as “junk bonds”) may involve greater levels of interest rate, credit, liquidity and valuation risk than for higher rated instruments. High yield debt instruments may be more sensitive to economic changes, political changes, or adverse developments specific to a company than other fixed income instruments. These securities are subject to greater risk of loss, greater sensitivity to economic changes, valuation difficulties, and a potential lack of a secondary or public market for securities. High yield debt instruments are considered predominantly speculative with respect to the issuer’s continuing ability to make principal and interest payments and, therefore, such instruments generally involve greater risk of default or price changes than higher rated debt instruments. An economic downturn or period of rising interest rates could adversely affect the market for these securities and reduce market liquidity (liquidity risk). Less active markets may diminish a ProFund VP’s ability to obtain accurate market quotations when valuing the portfolio securities and thereby give rise to valuation risk. High yield debt instruments may also present risks based on payment expectations. For example, these instruments may contain redemption or call provisions. If an issuer exercises these provisions in a declining interest rate market, the ProFund VP would have to replace the security with a lower yielding security, resulting in a decreased return for investors. If the issuer of a security is in default with respect to interest or principal payments, the issuer’s security could lose its entire value. Furthermore, the transaction costs associated with the purchase and sale of high yield debt instruments may vary greatly depending upon a number of factors and may adversely affect a ProFund VP’s performance.

Index Performance Risk

Certain ProFunds VP linked to an index will be subject to index performance risk. There is no guarantee or assurance that the methodology used by the third-party provider to create the Index will result in the ProFund VP achieving high, or even positive, returns. Further, there can be no guarantee that the methodology underlying the Index or the daily calculation of the Index will be free from error. It is also possible that the value of the Index may be subject to intentional manipulation by third-party market participants. The Index may underperform, and the ProFund VP could lose value, while other indices or measures of market performance increase in value.

Liquidity Risk

In certain circumstances, such as the disruption of the orderly markets for the securities or financial instruments in which a ProFund VP invests, the ProFunds VP might not be able to acquire or dispose of certain holdings quickly or at prices that represent true fair value in the judgment of the Advisor. Markets for the securities or financial instruments in which a ProFund VP invests may be disrupted by a number of events, including but not limited to economic crises, natural disasters, new legislation, or regulatory changes inside or outside of the U.S. For example, regulation limiting the ability of certain financial institutions to invest in certain securities would likely reduce the liquidity of those securities. These situations may prevent a ProFund VP from limiting losses, realizing gains, or from achieving a high correlation (or inverse correlation) with its underlying benchmark.

* All or a portion are limited as a result of changes in the ProFund VP ownership during the year and in prior years.

Unused limitations accumulate and increase limited CLCFs available for use in offsetting net capital gains. The tax character of current year distribution paid and the tax basis of the current components of accumulated earnings (deficit) and any CLCFs will be determined at the end of the current tax year. The Board does not intend to authorize a distribution of any realized gain for a ProFund VP until any applicable CLCF has been offset or expires.

8. Share Splits and Reverse Share Splits

Effective December 14, 2020, the ProFund VP UltraNasdaq-100 underwent a 2-for-1 share split, the ProFund VP Short Small-Cap, ProFund VP UltraBull, ProFund VP UltraShort Nasdaq-100 each underwent a 1-for-4 reverse share split and the ProFund VP UltraShort Dow 30 underwent a 1-for-5 reverse share split.

Effective November 18, 2019, the ProFund VP Internet underwent a 3-for-1 share split, the ProFund VP Short Dow 30, the ProFund VP Short International, and the ProFund VP Short Nasdaq-100 each underwent a 1-for-4 reverse share split, and the ProFund VP UltraShort Dow 30 underwent a 1-for-8 reverse share split.

Effective December 11, 2017, the ProFund VP Short Emerging Markets underwent a 1-for-5 reverse share split, and the ProFund VP UltraShort Nasdaq-100 underwent a 1-for-8 reverse share split.

Effective December 5, 2016, the ProFund VP Japan and ProFund VP Telecommunications underwent a 1-for-4 reverse share split, the ProFund VP Bear underwent a 1-for-5 reverse share split, the ProFund VP Short Mid-Cap underwent a 1-for-8 reverse share split, and the ProFund VP Rising Rates Opportunity underwent a 1-for-10 reverse share split.

The effect of the share split transactions was to multiply the number of outstanding shares of the ProFund VP by the respective split factor, with a corresponding decrease in net asset value per share; and the effect of the reverse share split transactions was to divide the number of outstanding shares of the ProFunds VP by the respective reverse split factor, with a corresponding increase

in the net asset value per share. These transactions did not change the net assets of these ProFunds VP or the value of a shareholder's investment.

The historical share transactions presented in the Statements of Changes in Net Assets and per share data presented in the Financial Highlights have been adjusted retroactively to give effect to the share splits and reverse share splits.

9. Shareholder Concentration

Ownership of more than 25% of the voting securities for a fund creates presumptions of control of the fund, under Section 2(a)(9) of the 1940 Act. As of June 30, 2021, the Advisor was deemed a significant shareholder of each of ProFund VP Short Dow, and ProFund VP UltraShort Dow as the Advisor's ownership of total shares outstanding of each ProFund VP was 64%, and 87% respectively.

10. Subsequent Events

On July 28, 2021, the Bitcoin Strategy ProFund commenced operations, increasing the number of separate investment portfolios in the Trust to 116. The ProFunds VP have evaluated the need for additional disclosures or adjustments resulting from subsequent events through the date these financial statements were issued. Based on this evaluation, there were no additional subsequent events to report that would have a material impact on the ProFunds VP' financial statements.

Liquidity Risk Management Program

ProFunds (the “Trust”) has implemented a liquidity risk management program (“Liquidity Program”) to identify illiquid investments pursuant to Rule 22e-4 of the Investment Company Act of 1940, as amended. The Board of Trustees of the Trust (“the Board”) has approved the designation of ProFund Advisors LLC (the “Program Administrator”) to administer the Trust’s Liquidity Program, subject to the oversight of the Board.

On September 14 – 15, 2020, during a meeting of the Board, the Chief Compliance Officer of the Trust provided to the Board the annual report on the Trust’s Liquidity Program (the “Liquidity Report”). The Liquidity Report, which covered the period from January 1, 2020 through June 30, 2020, addressed the operation of the Trust’s Liquidity Program and assessed the adequacy and effectiveness of the Liquidity Program’s implementation. This Liquidity Report supplemented a report provided on March 12,

2020 for the June 1, 2019 through December 31, 2019 period; future reports will cover a full June – June period.

The Liquidity Report affirmed that the Program Administrator believes that: (1) the Liquidity Program continues to be reasonably designed to effectively assess and manage each Fund’s liquidity risk; (2) each Fund’s liquidity risk continues to be appropriate in light of the Fund’s investment objective and strategies and each Fund’s investment strategies continue to be appropriate for an open-end management investment company; and (3) the Liquidity Program has been adequately and effectively implemented with respect to each Fund during the reporting period. The Liquidity Report also affirmed that there have been no material changes to the operation of the Liquidity Program since its initial approval and that no material changes were being recommended at that time.

Expense Examples

As a ProFund VP shareholder, you may incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees; distribution fees; and other ProFund VP expenses. These examples are intended to help you understand your ongoing costs (in dollars) of investing in a ProFund VP and to compare these costs with the ongoing cost of investing in other mutual funds. Please note that the expenses shown in the tables are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the examples are useful in comparing ongoing costs only and will not help you determine the relative total cost of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. These examples also do not reflect fees associated with insurance company or insurance contracts. If those fees were reflected, expenses would be higher.

Actual Expenses

The actual examples are based on an investment of \$1,000 invested at the beginning of a six-month period and held throughout the entire period ended June 30, 2021.

The columns below under the heading entitled “Actual” provide information about actual account values and actual expenses. You may use this information, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the table under the heading entitled “Actual Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

Hypothetical Expenses for Comparison Purpose

The hypothetical expense examples are based on an investment of \$1,000 invested at the beginning of a six-month period and held throughout the entire period ended June 30, 2021.

The columns below under the heading entitled “Hypothetical” provide information about hypothetical account values and hypothetical expenses based on each ProFund VP’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not each ProFund VP’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your ProFund VP and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.
