Commentary in this report is provided by the portfolio manager(s) of each Fund as of the date of this report and is subject to change at any time based on market or other conditions.

Third-party information has been obtained from sources that Nationwide Fund Advisors (NFA), the investment adviser to the Funds, deems reliable. Portfolio composition is accurate as of the date of this report and is subject to change at any time and without notice. NFA, one of its affiliated advisers or its employees may hold a position in the securities named in this report.

This report and the holdings provided are for informational purposes only and are not intended to be relied on as investment advice. Investors should work with their financial professional to discuss their specific situation.

Statement Regarding Availability of Quarterly Portfolio Holdings

The Trust files complete schedules of portfolio holdings for each Fund with the Securities and Exchange Commission (SEC) for the first and third quarters of each fiscal year on Form N-PORT. Additionally, the Trust files a schedule of portfolio holdings monthly for the NVIT Government Money Market Fund on Form N-MFP. Forms N-PORT and Forms N-MFP are available on the SEC's website at http://www.sec.gov. Forms N-PORT and Forms N-MFP may be reviewed and copied at the SEC's Public Reference Room in Washington, DC, and information on the operation of the Public Reference Room may be obtained by calling 800-SEC-0330. The Trust also makes this information available to investors on http://nationwide.com/mutualfundsnvit or upon request without charge.

Statement Regarding Availability of Proxy Voting Record

Federal law requires the Trust and each of its investment advisers and subadvisers to adopt procedures for voting proxies (the "Proxy Voting Guidelines") and to provide a summary of those Proxy Voting Guidelines used to vote the securities held by a Fund. The Funds' proxy voting policies and procedures and information regarding how the Funds voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 are available without charge (i) upon request, by calling 800-848-0920, (ii) on the Trust's website at http://nationwide.com/mutualfundsnvit or (iii) on the SEC's website at http://www.sec.gov.

Before purchasing a variable annuity, you should carefully consider the investment objectives, risks, charges and expenses of the annuity and its underlying investment options. The product prospectus and underlying fund prospectuses contain this and other important information. Underlying fund prospectuses can be obtained from your investment professional or by contacting Nationwide at 800-848-6331. Read the prospectus carefully before you make a purchase.

NVIT Funds are not sold to individual investors. These investment options are underlying subaccounts and cannot be purchased directly by the public. They are only available through variable products issued by life insurance companies.

Nationwide Funds Group (NFG) comprises Nationwide Fund Advisors, Nationwide Fund Distributors LLC and Nationwide Fund Management LLC. Together they provide advisory, distribution and administration services, respectively, to Nationwide Funds. Nationwide Fund Advisors (NFA) is the investment adviser to Nationwide Funds.

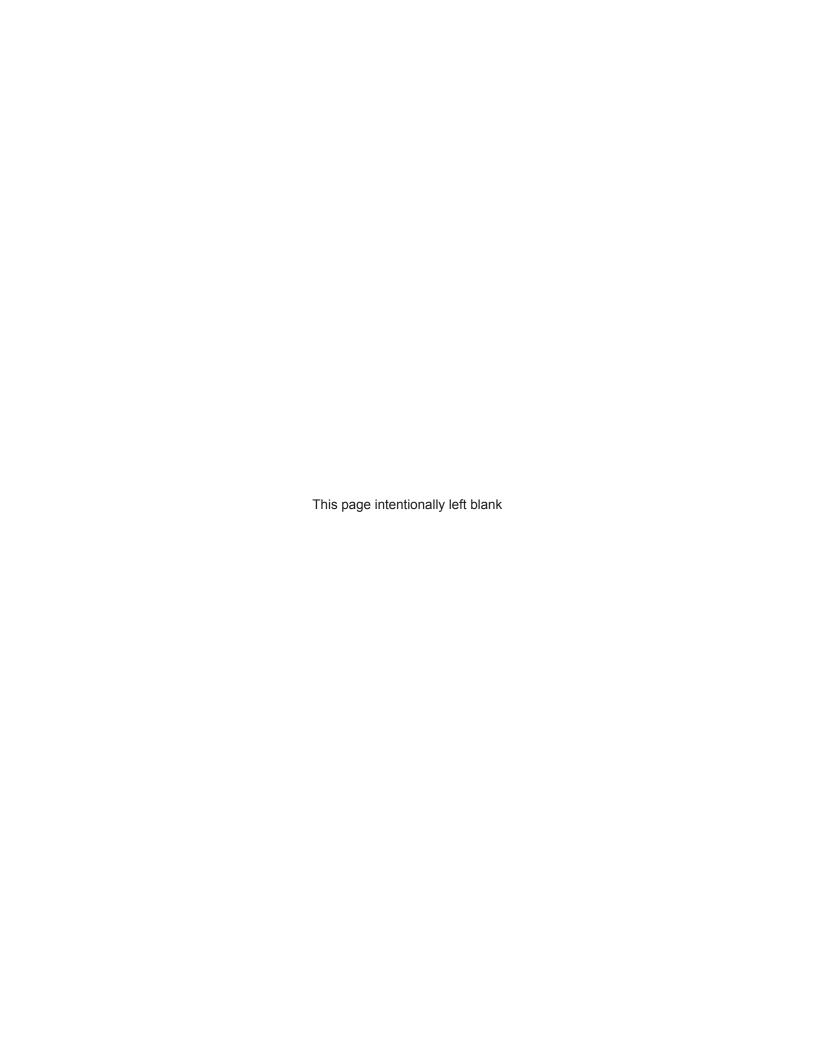

Variable products are issued by Nationwide Life Insurance Company or Nationwide Life and Annuity Insurance Company, Columbus, Ohio. The general distributor is Nationwide Investment Services Corporation (NISC), member FINRA.

Nationwide Funds distributed by Nationwide Fund Distributors LLC (NFD), member FINRA, Columbus, Ohio. NISC and NFD are not affiliated with any subadviser contracted by Nationwide Fund Advisors (NFA), with the exception of Nationwide Asset Management, LLC (NWAM).

Nationwide, the Nationwide N and Eagle, and Nationwide is on your side are service marks of Nationwide Mutual Insurance Company. ©2021

Dear Investor,

During this unprecedented time of challenge and volatility, Nationwide continues to diligently care for our associates, communities, and ultimately, you our investors. We remain steadfastly committed to protecting people, businesses and futures with extraordinary care. Equity markets experienced an unprecedented period of volatility during the annual reporting period ended December 31, 2020, as investors tried to make sense out of the coronavirus outbreak and the resulting economic lockdown.

Economic growth collapsed through the reporting period as a result of the shutdown before recovering as the period closed, with growth rates -5.0% in the first quarter of 2020, a record -31.4% in the second quarter and a record +33.1% in the third quarter. Economists estimate a continued rebound in 2021. Corporate profits collapsed, with a decline of 16% forecast for 2020 but is expected to recover within the next year as the economy continues to emerge from the shutdown.

U.S. economic activity faced unprecedented challenges spurred from the Pandemic outbreak, and the lasting implications remain unclear.

Asset Class

Markets experienced unprecedented volatility during the reporting period, with the coronavirus outbreak causing the sharpest bear market since the Great Depression and an impressive bounce in the second-half of the year. The S&P 500[®] Index ("S&P 500") started the period strong, as an accommodating Federal Reserve and steady economic growth drove a cumulative return of 5.0% through mid-February. This quickly reversed as the severity of the coronavirus outbreak began to take shape, with a 34% decline through March 23, 2020. Since 1950, there have been five previous occasions where the S&P 500 fell 30%, taking on average 297 trading days (roughly a year and 2 months), with 1987 the previous quickest decline at 70 days. This time, it took 20 days. Aggressive fiscal and monetary policy, paired with the prospect for an economic reopen, drove investor sentiment higher, with a 69% rally through the end of the period. For the full reporting period, the S&P 500 finished with a return of 18.4%, which is impressive given the severe disruption caused by COVID-19. Fixed income returns were positive, with a substantial drop in interest rates more than offsetting modestly wider credit spreads.

International markets followed a similar pattern as domestic, though the MSCI EAFE® Index continued to lag the S&P 500, returning just 7.8%, while the MSCI Emerging Markets® Index was roughly in line at 18.3%. The global outbreak and subsequent economic shutdown had a broad impact, though the strong economic rebound and aggressive global central bank stimulus led to strong performance in the second-half of the period.

The S&P 500 was higher in seven of the 12-months during the reporting period.

While much of 2020 was characterized by near-universal strong returns and low volatility for risk-assets, volatility dramatically improved through the reporting period, though most risk-assets delivered positive returns. Growth stocks substantially outperformed value stocks, while small-cap stocks staged an impressive rebound and modestly outperformed large cap stocks.

Fixed-income markets were higher, driven by a decline in interest rates to historic lows. The Federal Reserve aggressively added stimulus, first by bringing the Fed Funds target rate to effectively 0% by March 15, followed by an aggressive bond buying program that nearly doubled the balance sheet from \$4.2 trillion to \$7.4 trillion through the period. Fed Chair Powell has indicated that they will remain active in supporting the market, and there is no maximum to their balance sheet growth. Interest rates collapsed across the curve through the period, with the 10-year yield falling from 1.92% to a record-low of 0.50% as of March 9, 2020 before bouncing modestly to 0.92% by period-end. The 2-year yield dropped from 1.57% to 0.12%, widening the spread between the two yields to 0.80%.

The following chart provides returns for various market segments for the year ended December 31, 2020:

Index	Annual Total Return (as of December 31, 2020)
Bloomberg Barclays Emerging Markets USD Aggregate Bond	6.52%
Bloomberg Barclays Municipal Bond	5.21%
Bloomberg Barclays U.S. 1-3 Year Government/Credit Bond	3.33%
Bloomberg Barclays U.S. 10- 20 Year Treasury Bond	13.56%
Bloomberg Barclays U.S. Aggregate Bond	7.51%
Bloomberg Barclays U.S. Corporate High Yield	7.11%
MSCI EAFE®	7.82%
MSCI Emerging Markets®	18.31%
MSCI World ex USA	10.65%
Russell 1000® Growth	38.49%
Russell 1000® Value	2.8%
Russell 2000®	19.96%
S&P 500®	18.40%

As always, we feel that the best way for you to reach your financial goals is to consistently adhere to a disciplined and patient investment strategy. We urge investors to seek investments based on a sound asset allocation strategy, a long-term perspective and regular conversations with a financial professional.

At Nationwide, we continue to take a steady approach to seeking long-term growth. We remain confident in our ability to help investors navigate the markets for years to come. Thank you for investing with us. We deeply value your trust.

Sincerely,

Michael S. Spangler President and CEO

Nationwide Variable Insurance Trust

For the annual period ended December 31, 2020, the BlackRock NVIT Equity Dividend Fund (Class I) returned 3.63% versus 2.80% for its benchmark, the Russell 1000® Value Index. For broader comparison, the median return for the Fund's Morningstar® insurance funds peer category, Large Value (consisting of 1200 funds as of December 31, 2020), was 2.44% for the same period. Performance for the Fund's other share classes versus its benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

The largest contributor to relative performance was a combination of stock selection and an overweight to information technology ("IT"). Notably, stock selection and an overweight to the technology hardware, storage & peripherals industry proved beneficial. Investment decisions in software, IT services and communications equipment also added to relative return in the sector. In consumer discretionary, stock selection in specialty retail and multi-line retail boosted relative results, as did a combination of stock selection and an overweight to the household durables and automobiles industries. A lack of exposure to real estate, based on our view that fundamentals and valuations were unattractive, also added to relative performance.

At the stock level, top relative contributors included overweight positions in technology companies Samsung Electronics, Microsoft and Cognizant Technology Solutions. Samsung delivered strong performance in 2020, driven by improving fundamentals in the memory market and expected benefits from Huawei's share loss in mobile & networking. Microsoft outperformed during the period as the firm benefitted from both the transition of enterprise workloads to the cloud and the adoption of "software as a service" subscription-based sales models. Finally, Cognizant Technology performed well as IT services spending exceeded previous downward revisions in expectations, and as shareholders reacted favorably to new management's plans to reinvigorate the firm's sales growth. The Fund still holds positions in these companies.

At the sector level, the largest detractor from relative performance was stock selection in the health care sector. Notably, stock selection in the pharmaceuticals industry proved costly, as did the decision to not invest in the life sciences tools & services and biotechnology industries. In utilities, stock selection and an underweight to the electric utilities industry weighed on relative return. Lastly, stock selection and allocation decisions in communication services hindered relative performance, including our choice to not invest in the entertainment and interactive media & services industries.

At the stock level, top relative detractors included overweight postions in Wells Fargo, FirstEnergy and BP. Wells Fargo, a U.S. bank, underperformed during the year as earnings were hurt by falling interest rates and increased provisioning for loan losses amid the pandemic. FirstEnergy, a utility company, sold off sharply in July 2020 due to an FBI criminal complaint that alleged senior management was involved in bribing public officials. Although painful, we exited the stock following the announcement. Finally, oil & gas operator BP underperformed

during the period amid as COVID-driven reduction in global economic activity contributed to a challenging, lower oil price environment. The Fund still holds positions in Wells Fargo and RP

COVID-19 had a profound impact on stock returns in 2020, most notably contributing to significant relative outperformance of growth stocks versus value stocks. The pandemic, through mass social distancing and the transition to working from home, supercharged secular growth trends towards e-commerce, digitization and enterprise spending on cloud infrastructure. A narrow subset of U.S. stocks with high growth characteristics reaped the lion's share of financial gains from this sudden shift. Many of these companies also benefitted from a world characterized by lower nominal growth, lower interest rates, and low inflation. Meanwhile, many cyclical value stocks were temporarily hurt by the pandemic. Lockdown measures sharply reduced global economic activity, which notably weighed on portfolio holdings in the energy and financials sectors. We believe value's underperformance in 2020 creates outsized opportunity for the investment style entering 2021. Value stocks have attractive relative valuations versus history, and these businesses could enjoy a larger bounce as the vaccine rollout helps the economy to restart and gather steam in the vear ahead.

Subadviser:

BlackRock Investment Management, LLC

Portfolio Managers:

Tony DeSpirito; Franco Tapia and David Zhao

The Fund is subject to the risks of investing in equity securities, including small companies. Smaller companies involve greater risk than larger, more-established companies because smaller companies 1) usually are less stable in price, 2) are less liquid 3) are more vulnerable to adverse business and economic developments and 4) have more-limited resources. The Fund also is subject to the risks of investing in foreign securities (which are volatile, harder to price and less liquid than U.S. securities). The Fund may invest in more-aggressive investments such as convertible securities (which change in value as the market value of the underlying stock fluctuates), derivatives (which create investment leverage and are highly volatile) and real estate investment trusts (REITs) (which are subject to abrupt or erratic price movements and generally lack liquidity). The Fund may employ a contrarian investing style (investing in a manner that differs from current market trends), which may cause the Fund to miss opportunities for gains and result in losses. Value funds may underperform other funds that use different investing styles. Please refer to the most recent prospectus for a more detailed explanation of the Fund's principal risks.

A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

Investment return and principal value will fluctuate, and when redeemed, shares may be worth more or less than original cost. Past performance is no guarantee of future results and does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investing in mutual funds involves market risk, including loss of principal. Performance returns assume the reinvestment of all distributions.

Comparative performance of \$10,000 invested in Class I shares of the BlackRock NVIT Equity Dividend Fund versus performance of the Russell 1000® Value Index over the 10-year period ended 12/31/20. Unlike the Fund, the performance of the index does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

For the annual period ended December 31, 2020, the Neuberger Berman NVIT Multi Cap Opportunities Fund (Class I) returned 13.55% versus 18.40% for its benchmark, the S&P 500® Index (S&P 500). For broader comparison, the median return for the Fund's Morningstar® insurance funds peer category, Large Blend (consisting of 1363 funds as of December 31, 2020), was 14.84% for the same period. Performance for the Fund's other share class versus the Fund's benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

Strong stock selection within Communication Services, Financials, and Materials benefitted relative performance. Consumer Discretionary and Consumer Staples detracted from relative performance as select companies were impacted by the effects of social distancing due to COVID-19. Portfolio positioning benefitted relative performance. An underweight to Energy and Health Care, and zero exposure to Real Estate and Utilities sectors, positively contributed to relative performance. Relative performance was positively impacted by an overweight position to Financials.

The three largest individual detractors to performance were Aramark, Boeing, and US Foods. Boeing was exited during the year, while Aramark and US Foods remain in the Fund. The majority of the Fund's underperformance during the year was realized during the market drawdown that took place from the end of February through the third week of March due to COVID-19.

The top three individual contributors to performance were Apple, Microsoft, and PayPal, all of which remain core holdings. The Fund generated solid returns and outperformed its benchmark in both the third and fourth quarters of 2020. The Fund returned 27.54% in the second half of 2020, outperforming the S&P 500 Index by 538 basis points.

The U.S. government, through fiscal and monetary policy, acted swiftly in response to the pandemic by providing unprecedented support to U.S. consumers and businesses. As the year progressed, improvements in the labor market and GDP further contributed to the recovery of U.S. equities. The announcement of multiple highly effective COVID-19

vaccines and their subsequent authorization and distribution is beneficial for the continued growth of the economy. We believe the opening of the U.S. economy will progress as we advance through 2021, supporting U.S. corporate earnings growth. We believe the Fund is well positioned to likely benefit from the normalization of global economic activity and increasing investor focus on company fundamentals. We continue to apply disciplined fundamental research to identify high quality business models with attractive free cash flow characteristics trading at compelling valuations.

The Fund did not utilize derivatives during the reporting period.

The Fund did not experience any liquidity issues during the reporting period.

The Fund was not materially impacted by the pending replacement of LIBOR during the reporting period.

Investment return and principal value will fluctuate, and when redeemed, shares may be worth more or less than original cost. Past performance is no guarantee of future results and does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investing in mutual funds involves market risk, including loss of principal. Performance returns assume the reinvestment of all distributions.

Comparative performance of \$10,000 invested in Class I shares of the Neuberger Berman NVIT Multi Cap Opportunities Fund versus performance of the S&P 500® Index over the 10-year period ended 12/31/20. Unlike the Fund, the performance of the index does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

For the annual period ended December 31, 2020, the NVIT AQR Large Cap Defensive Style Fund (formerly NVIT Nationwide Fund) (Class I) returned 10.35% versus 18.40% for its benchmark, the S&P 500® Index (S&P 500). For broader comparison, the median return for the Fund's Morningstar® peer category, Large Blend (consisting of 1363 funds as of December 31, 2020), was 14.84% for the same period. Performance for the Fund's other share classes versus its benchmark is stated

in the Average Annual Total Return chart in this report's Fund Performance section.

The Fund ended the period with a highly diversified stock portfolio of 171 names. The largest sector overweights relative to the benchmark at the end of the period were in Utilities, Consumer Staples, and Health Care. Conversely, the Fund's primary underweights were in Information Technology, Consumer Discretionary, and Financials.

Top three individual contributors over the reporting period (gross of fees):

Security Name	Period Return (%)	Portfolio Impact (bps)
Zscaler	329.48%	48.50
Lululemon	50.23%	48.31
Progressive	41.52%	42.76

Source: AQR. Data from 1/1/2020 – 12/31/2020. Past performance is not a guarantee of future performance. Portfolio holdings are subject to change and are not a representation that they will or are likely to achieve profits or losses.

Top three individual detractors over the reporting period (gross of fees):

Security Name	Period Return (%)	Portfolio Impact (bps)
Apple	82.31%	-232.42
Tesla	743.44%	-155.24
Amazon.com	76.26%	-141.52

Source: AQR. Data from 1/1/2020 – 12/31/2020. Past performance is not a guarantee of future performance. Portfolio holdings are subject to change and are not a representation that they will or are likely to achieve profits or losses.

The NVITAQR Large Cap Defensive Style Fund underperformed its benchmark by -8.05% over the reporting period. Both stock selection within sectors and sector selection detracted from excess returns. Stock selection within Information Technology and Consumer Discretionary were the largest detractors. Specific to sector selection, the main detractors were an overweight position to Utilities and an underweight position to Information Technology. From a thematic viewpoint, low statistical risk and low market risk both detracted from Fund performance while low fundamental risk contributed to Fund performance. Stock selection within sectors drove underperformance while sector selection also detracted. Although these events tend to be relatively short-lived, the low statistical risk theme tends to underperform during these periods, as was the case during the first quarter resulting in a material amount of underperformance for the reporting period.

Finally, the low fundamental risk theme or quality theme contributed positively to performance in 2020, with most of the gains coming during the equity market sell-off in the first quarter as investors rotated into stocks with stronger businesses (e.g., lower earnings variability, higher margins, and lower default risk).

The uncertainty around Covid-19 certainly had an impact on markets throughout the year. Optimism around the arrival of effective vaccines, along with additional fiscal and monetary policy aimed at boosting the economy, was largely positive for US. equity markets. Although the NVIT AQR Large Cap

Defensive Style Fund benefitted from this rising equity market, it lagged the Russell 1000 Index over the 2020 period given its propensity to underperform its benchmark during short periods when the market experiences strong positive returns.

Fund performance was captured through equities and equity index futures. Derivatives performed as expected and allowed the Fund to gain exposure to the equity market.

The NVIT AQR Large Cap Defensive Style Fund does not have any exposure to instruments directly impacted by the LIBOR transition, thus we expect no impacts to the Fund. With respect to the industry, we do expect protocols to be in place to help with the transition globally, as has already begun. For general industry information on the transition from LIBOR we recommend visiting ISDA's new LIBOR reform and transition website, which has useful and regularly updated information.

- Current effective prospectus dated April 29, 2020 (as revised July 6, 2020). Please see the Fund's most recent prospectus for details. Please refer to the Financial Highlights for each respective share class' actual results.
- The returns reported above do not include the effect of sales charges or additional expenses imposed by variable annuity contracts.

Investment return and principal value will fluctuate, and when redeemed, shares may be worth more or less than original cost. Past performance is no guarantee of future results and does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investing in mutual funds involves market risk, including loss of principal. Performance returns assume the reinvestment of all distributions.

Comparative performance of \$10,000 invested in Class I shares of the NVIT AQR Large Cap Defensive Style Fund versus performance of the S&P 500® Index over the 10-year period ended 12/31/20. Unlike the Fund, the performance of this index does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

For the annual reporting period ended December 31, 2020, the NVIT J.P. Morgan Disciplined Equity Fund (Class II) returned 25.99%* versus 18.40% for its benchmark, the S&P 500® Index (S&P 500). For broader comparison, the median return for the Fund's Morningstar® insurance funds peer category, Large Blend (consisting of 1363 funds as of December 31, 2020), was 14.84% for the same reporting period. Performance for the Fund's other share class versus the Fund's benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

With incredibly resilient performance, the S&P 500 Index® ended the tumultuous year of 2020 up +18.40%. Information Technology was the largest contributor, rising by 43.89%, followed by Consumer Discretionary which returned 33.30%. Energy and Real Estate sectors were the largest detractors falling by -33.68% and -2.17%, respectively.

After a strong close to 2019, solid U.S. economic indicators continued to buoy the S&P 500 Index® in the beginning of the year 2020. However, as the COVID-19 outbreak continued to grow and ramp up globally, governments responded with economy-wide shutdowns, ultimately leading to a dramatic downturn for the markets in the first quarter. While extraordinary fiscal and monetary policy responses invigorated the market into a sharp recovery, disappointing economic data along with tensions between the U.S. and China generated frequent bouts of market volatility in the second quarter. Amid the pandemic, the U.S. Gross Domestic Product ("GDP") contracted throughout the first half of the year, ending more than a decadelong expansion, before the economic activity picked up in the third quarter. Corporate earnings also recovered dramatically during the year, after taking a hit in the first quarter. Meanwhile, investor optimism surrounding the vaccine development and their penchant for mega tech companies continued to uplift the markets through the summer. The year's final quarter began with concerns about the resurgence of the viral outbreak and increased focus on the upcoming U.S. Presidential Election. However, upbeat investor sentiment drove the markets to record highs in December as they anticipated reduced political uncertainty after Joe Biden was elected the 46th president of the United States. Although enormous stimulus support and the advances on the vaccine front have lifted consumer and business confidence, news of the emergence of new, potentially more contagious mutations of SARS-CoV-2 remains an important development to watch in the near term.

Large cap stocks as represented by the S&P 500 Index® underperformed the small cap Russell 2000 Index®, as they returned 18.40% vs. 19.96%, respectively. Value underperformed Growth as the Russell 3000 Value Index® returned 2.86% and the Russell 3000 Growth Index® rose by 38.26%.

The Disciplined Equity portfolio outperformed the benchmark during the year as stock selection in semiconductor & hardware, telecommunications and big banks & brokers sectors contributed to performance, while stock selection in the industrial cyclical, pharma/medical technology and health services & system sectors detracted from performance.

On the positive side, within the auto & transportation sector, our overweight in Tesla ("TSLA") contributed to performance during the year. Strong earnings, improved production and delivery figures, an August stock split, and S&P 500 inclusion helped buoy the shares. We continue to view TSLA as being wellpositioned to ride the wave of global electric vehicle adoption and we believe that the runway for growth, particularly as it relates to software, is underappreciated by the market. Within semiconductors & hardware, our underweight position in Intel ("INTC") contributed to performance. The stock underperformed following a tough year with investor concerns lingering around their 7nm strategy ("7nm" is usually referring to Taiwan Semiconductor Manufacturing Company's process, which is what new CPUs are based on.) Continued enterprise weakness and a weaker mix within lower-end PCs also weighed on the stock. We are expecting the weakness in the PC business to persist into next year. Additionally, Advanced Micro Devices ("AMD")'s momentum continues to be a threat in datacenter. We remain comfortable with our current underweight position in INTC. Within semiconductors & hardware, an overweight in NVidia ("NVDA") contributed to the portfolio during the year. Shares of NVDA outperformed SPX following a strong year helped by gaming and datacenter revenue. While we continue to own the name, we are mindful of the relatively high valuation and increased risk of a revenue miss as growth decelerates over the next few quarters.

On the negative side, within industrial cyclicals, our overweight in Northrop Grumman ("NOC") detracted from performance during the year led by overall worries regarding defense budgets under a Biden administration. However, we believe NOC's program mix (B-21, GBSD and Space) likely has the best growth prospects amongst its peers, meaning they can continue to grow even if budget growth slows. We remain positive on NOC's long-term growth outlook, as the portfolio will likely benefit in a flat budget environment. Within pharma/medical technology, our overweight position in Boston Scientific ("BSX") detracted from performance due to a negative COVID-19 impact on business, in addition to the recent discontinuation of Lotus. The failure of Lotus, one of BSX's more well-known products, brings into question the company's long-term growth strategy. However, we continue to believe in their long term growth strategy and that the "reopening trade" will benefit BSX disproportionally. We remain overweight for these reasons. Within software & services an overweight in Automated Data Processing ("ADP") detracted from the portfolio during the year. ADP reported a string of disappointing quarterly results, driven by weaker bookings. We feel either the market has pivoted slightly towards easier to use/mobile friendly solutions or at least ADP is finding it more difficult than others to cope with work from home trends.

We continue to focus on fundamentals of the economy and company earnings. Unemployment and other uncertainties, such as fiscal stimulus, COVID-19 vaccine distribution, and the conclusion of the U.S. Senate elections in Georgia, will be integral to investor sentiment moving forward.

While we believe the economy will recover, it will first need time to heal, and hence we remain balanced and continue to monitor incremental risks that could represent headwinds for U.S. stocks. Through the volatility, we continue to increase our exposure to quality, focus on high conviction stocks, and take advantage of market dislocations for compelling stock selection opportunities.

Futures are used to hedge cash positions. The Index futures held in the account have a notional amount of less than 1.5% of the total AUM, hence they result in very minimal exposure to additional risk factors.

The Fund did not experience any liquidity issues during the reporting period.

The Fund did not experience any issues related to the LIBOR transition during the reporting period.

*High double digit returns are unusual and cannot be sustained.

The Fund is subject to the risks of investing in equity securities, including small companies. Smaller companies: i) are usually less stable in price and less liquid than larger, more-established companies; ii) are more vulnerable than larger companies to adverse business and economic developments; and iii) may have more-limited resources. Therefore, they generally involve greater risk. The Fund may invest in more-aggressive investments such as derivatives (which create investment leverage and are highly volatile). The Fund also is subject to the risks of investing in foreign securities (which are volatile, harder to price and less liquid than U.S. securities). The Fund uses a value style of investing and may underperform other funds that use different investing styles. Please refer to the most recent prospectus for a more detailed explanation of the Fund's principal risks.

Russell Investment Group is the source and owner of the trademarks, service marks and copy rights related to the Russell Indexes. Comparative performance of \$10,000 invested in Class II shares of the NVIT J.P. Morgan Disciplined Equity Fund from inception through 12/31/20 versus the S&P 500® Index for the same period. Unlike the Fund, the performance of the index does not reflect any fees, expenses, or sales charges. Investors cannot invest directly in market indexes. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

For the annual period ended December 31, 2020, the NVIT Jacobs Levy Large Cap Growth Fund (formerly NVIT Multi-Manager Large Cap Growth Fund) (Class II) returned 29.92%* versus 38.49% for its benchmark, the Russell 1000® Growth Index. For broader comparison, the median return for the Fund's Morningstar® insurance funds peer category, Large Growth (consisting of 1289 funds as of December 31, 2020), was 34.89% for the same period. Performance for the Fund's other share classes versus its benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

In 2020, U.S. equities hit an all-time high in February, crashed into a bear market by mid-March, then surged to record highs by year-end, as equity markets gained almost 21% for the year. The COVID-19 pandemic disrupted the global economy, which lead to pain in stocks tied to the physical economy and inflated a bubble in the virtual economy stay-at-home stocks. Through the third quarter, the market exhibited very narrow performance leadership, with outsized gains concentrated among the "FAAMNG" stocks. Shares of high-momentum, large cap growth stocks, mostly in the technology and consumer discretionary sectors outperformed, while small cap and value stocks lagged.

Jacobs Levy's investment process is engineered to combine human insight and intuition, finance and behavioral theory, and quantitative and statistical methods. The firm's stock selection process entails sophisticated modeling of a large number of stocks and proprietary factors using financial statements, analyst forecasts, corporate management signals, economic data and security pricing, as well as alternative data sources. Based on the fundamental valuations and opportunities discovered by our factor models, we forecast expected returns for every security in our investment universe. Portfolios are diversified across individual stocks, industries, and sectors.

As COVID-induced dislocations unfolded, our dynamic investment process positioned the portfolio to take advantage of the significant opportunities created. Our investment system increased our exposure to factors it found attractive, including value, smallness, financial leverage, and reversals, while decreasing our exposure to factors it found unattractive such as growth, momentum, and low volatility. The portfolio did not experience any liquidity events that had a material impact on performance.

In 2020, security selection in Information Technology, Industrials, and Consumer Discretionary detracted from performance, although security selection in Real Estate and Communication Services benefited the portfolio. An overweight of Financials hurt. The portfolio underperformed in 2020 as a result of stock prices that disconnected from company fundamentals and extreme security valuations that were particularly prevalent among large growth stocks.

A 130-30 portfolio permits a modest amount of short exposure in conjunction with a predominantly long portfolio. The 130-30 portfolio allocates approximately 130% of capital to long

equity exposures and approximately 30% of capital to short equity exposures, thus maintaining 100% net exposure to the underlying benchmark's systematic risk and return. This portfolio structure enables us to exploit security valuation insights more fully.

In selecting stocks for either the long portfolio or short portfolio, Jacobs Levy employs an evaluation process that focuses on modeling a large number of stocks and proprietary factors, using financial statements, security analyst forecasts, corporate management signals, economic releases, and security prices. This investment approach is intended to seek diversification across market inefficiencies, securities, industries, and sectors, while seeking to manage overall portfolio risk exposures relative to the Russell 1000 Growth Index.

To implement this strategy, your portfolio is invested in a combination of direct U.S. equity positions and individual total return swaps on U.S. equity securities. Short exposure to equity securities is gained through the use of swap contracts and long exposure to equity positions is gained by investing 100% of the portfolio directly in stocks and approximately 30% of the portfolio through swaps.

While the strategy utilizes swaps as part of the implementation, stock selection and risk management are determined at the overall portfolio level through a unified investment process. For this reason, performance attribution of the swap positions is not a meaningful measure and should not be evaluated as a separate component of the portfolio's total return.

The London Interbank Offered Rate, which is an interest rate used as a benchmark for short-term borrowing is set to be phased out beginning in January 2022. LIBOR is used as a reference rate for swap transactions we use for the 130-30 accounts we manage for Nationwide. The Federal Reserve has asked market participants to transition away from LIBOR to alternative benchmarks. We have been in communication with the swap counterparty we use for your 130-30 accounts and they have indicated they will be migrating contracts to a new reference rate. They expect to discuss the specific benchmarks and timing of the transition in the coming months before the end of LIBOR.

While the transition to a new benchmark has been slow across the market, alternatives such as the Secured Overnight Financing Rate are beginning to emerge. Once a new reference rate for these types of transactions emerges and becomes more widely used, we do not expect a significant impact on the equity derivatives market.

We will keep you updated on our discussions regarding the LIBOR transition.

Comparative performance of \$10,000 invested in Class II shares of the NVIT Multi-Manager Large Cap Growth Fund versus performance of the Russell 1000® Growth Index over the 10-year period ended 12/31/20. Unlike the Fund, the performance of this index does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

For the annual period ended December 31, 2020, the NVIT Mellon Dynamic US Core Fund (formerly NVIT Dynamic U.S. Growth Fund) (Class I) returned 18.90%* versus 18.40% for its benchmark, the S&P 500® Index (S&P 500). For broader comparison, the median return for the Fund's Morningstar® insurance funds peer category, Large Blend (consisting of 1363 funds as of December 31, 2020), was 14.84% for the same period. Performance for the Fund's other share classes versus its benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

The Fund does not take any exposure outside of index fund exposure and Treasury bond exposure. Therefore, there is no impact from individual security, sector, country or currency factors.

The Fund invested in derivatives as it is a standard feature of the strategy. The strategy utilizes both futures and options to express our investment views. Typically, the strategy deploys a modest amount of financial leverage (up to 50% maximum) in its approach and utilizes index level futures and options to gain appropriate market exposure. Despite surging COVID-19 cases worldwide and renewed lockdowns, equity market's upward march continued in the fourth quarter of 2020 on successful vaccine trials and initial rollout plan. For the majority of year, our target equity allocation ranged from 90% to 100% against a backdrop of improving but mostly lackluster fundamental and macro environment. However, through the deployment of the out-of-the money call options, the strategy was able to participate more than it otherwise would have as our effective allocation rose with the surge in stock prices. By contrast, the bond positioning mostly held steady near the 10% level.

Despite surging COVID-19 cases worldwide and renewed lockdowns, equity market's upward march continued in the fourth quarter of 2020 on successful vaccine trials and initial rollout plan. Additional fiscal stimulus, passed by the Senate, also buoyed investor enthusiasm. Against a backdrop of a global zero rate environment and improving fundamental and macro conditions, investors are increasingly eyeing stocks "as the only game in town". The S&P 500 gained 12.15% in the fourth quarter of 2020 to close out a strong year where market rallied from depths of the first quarter drawdown to end the year up 18.40%. Looking back at the full year, at its lowest point back in March 22, the S&P 500 was down more than -30%. Since that time to the end of year (March 23rd – December 31st), the S&P gained an astronomical 70%.

The Bloomberg Barclays Long Treasury Index (Long Treasury) fell 3.0% in the fourth quarter of 2020 amid the equity rally, but produced strong returns for the full year (up +17.7%) on the back of a notable rally in the first quarter of 2020. Long Treasury yields started 2020 at 2.3% and narrowed to 1.31% by end of the first quarter, translating to a first quarter total return of 20.9% (thus providing a perfect hedge to the S&P 500 drawdown). This first quarter rally is also consistent history where we've also witnessed strong returns to treasuries in periods of equity market distress. The strategy largely participated in the fourth quarter's equity rally, but modestly lagged the S&P 500, wholly due to the underperformance of long treasuries. For the full

year, the strategy outperformed the S&P 500 on the back of the strong downside protection in the first quarter of 2020.

The strategy provided strong downside protection and outperformed the S&P 500 in the first quarter of 2020. Intelligent use of options quickly de-risked the equity exposure in the first quarter's sudden sell-off. While Dynamic U.S. Equity ("DUSE") began the year with a target equity allocation 110%, it quickly and "automatically" decreased to below 100% as the options positions eliminated the levered position. DUSE's long treasury exposure, averaging 15% in the first quarter of 2020, provided a well-needed tailwind for the strategy as investors fled to the safety of treasuries. For the remainder of year, our target equity allocation ranged from 90% to 100% against a backdrop of improving but mostly lackluster fundamental and macro environment. However, through the deployment of the out-ofthe money call options the strategy was able to participate more than it otherwise would have as our effective allocation rose with the surge in stock prices. By contrast, the bond positioning mostly held steady near the 10% level.

It is important to note that the performance contour experienced in 2020 was very much in line with history in that the strategy provided the downside protection in the first quarter of 2020 and largely participated (but to a slightly lesser degree) in the subsequent rally.

From an operational and implementation view, COVID-19 environment had little to no impact to the strategy. While the COVID-19 environment has led to a spike in volatility, from a performance perspective, the Fund behaved as expected. One of the hallmarks of this strategy is its downside protection and the strategy held up well relative to the index during the first quarter of 2020 2020's COVID driven downturn. Over the course of the first quarter, the strategy positioning turned cautious/defensive as both earnings and macro data weakened during this period. The strategy has participated in market's rally from the second to the fourth quarter of 2020, but did lag slightly. Overall for one year period, the strategy outperformed the S&P 500 Index.

The Fund did not experience any liquidity events that had a material impact on Fund performance.

There were no industry impacts on the Fund from LIBOR.

A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

For the annual period ended December 31, 2020, the NVIT Mellon Dynamic US Equity Income Fund (formerly American Century NVIT Multi Cap Value Fund) (Class I) returned 1.49% versus 2.80% for its benchmark, the Russell 1000® Value Index. For broader comparison, the median return for the Fund's Morningstar® insurance funds peer category, Large Value (consisting of 1200 funds as of December 31, 2020), was 2.44% for the same period. Performance for the Fund's other share class versus the Fund's benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

Please note that American Century Investment Management, Inc. was subadviser to the Fund from 1/1/2020 to 4/6/2020. Therefore, the following commentary reflects the time period from 1/1/2020-4/6/2020.

Pandemic fears caused equity markets to plunge. Broad U.S. equity markets rose to record highs in mid-February, lifted by positive economic and earnings news. However in late February, markets plunged dramatically on pandemic fears and heightened global economic uncertainty. This historic volatility continued into March, and stocks rapidly entered bear market territory as coronavirus containment efforts disrupted economic activity and fueled massive unemployment. Stocks recovered some ground late in March after the Fed intervened with several aggressive stimulus measures and Congress passed a \$2 trillion economic relief package. Nevertheless, U.S. stocks ended the quarter down significantly.

Defensive sectors outperformed. While all sectors declined during the first quarter, defensive sectors, including consumer staples, health care and utilities, declined the least. Cyclical sectors generally underperformed the broad market. The energy sector was hit the hardest as waning global demand and a price war between Saudi Arabia and Russia drove oil prices to record lows. Financials also lagged due to falling interest rates and deteriorating economic conditions. The significant decline in the financials and energy sectors, together with the relative strength of information technology stocks, contributed to value's continued underperformance versus growth.

Large-cap and higher-quality stocks outperformed. Concerns over economic disruption due to COVID-19 led to the outperformance of large-cap stocks versus small- and midcap stocks in the first quarter. The uncertain environment and worries over the pandemic's impact on corporate profits also led higher-quality stocks (rated B+ or better) to outperform lower-quality stocks (rated B or worse).

Exposure to the Energy sector detracted from performance. As oil prices fell dramatically in the first quarter, our overweight position was in energy. The Energy sector was a key driver of the portfolio's underperformance. Stock selection in the sector also detracted from returns. Schlumberger was a notable detractor as investors became concerned about the company's ability to maintain its dividend.

An underweight position was in utilities. The Utilities sector pressured returns. We believe many utilities stocks remain richly valued. This underweight hurt relative performance as investors looked to utilities as defensive investments.

The Information technology contributed to the Fund's performance. Our holdings in the information technology sector positively impacted relative performance. Oracle was a key contributor as investors rewarded the company for its positive earnings report and recurring revenues during a period of economic uncertainty.

Primary detractors to the Fund included Schlumberger, Noble Energy and Devon Energy.

With regard to Schlumberger, lower oil and gas prices caused Schlumberger's customers to aggressively reduce spending, leading investors to question the sustainability of the company's dividend. We added to our position in this large oil field services company as the stock declined and its risk/reward profile became more attractive.

In the case of Noble Energy, the global exploration and production company declined. We added to our position given the stock's more attractive valuation. Noble underperformed during the quarter as lower oil prices weighed on the company's free cash flow and return on invested capital generation capabilities.

Devon Energy is a shale-focused exploration and production company. Along with other energy stocks, Devon underperformed as lower oil prices weighed on the company's free cash flow and return on invested capital generation capabilities. We added to the position as the risk/reward profile improved.

The key contributors to the Fund included Exxon Mobil, Oracle and Pfizer.

With Exxon Mobil, lack of exposure to this large integrated oil company was beneficial to performance. Exxon underperformed its integrated peers as it continued to struggle with execution. Also, Exxon embarked on a large capital spending program that weighed on its free cash flow, return on capital and balance sheet health.

Oracle, a software company, outperformed following a positive earnings report that highlighted its recurring business model. Recurring revenues may allow for less relative downside through the pandemic. We believe Oracle has an opportunity to grow its application and autonomous database businesses as the company continues to transition from a license to a subscription model.

Regarding Pfizer, the company held up relatively well considering the uncertain economic environment. Particularly, the market sell-off due to inelastic demand for its pharmaceutical products and vaccines. Pfizer also offers a solid balance sheet and pays an attractive dividend that we believe is secure.

The portfolio buys foreign exchange forward hedge contracts to offset the inherent currency risks of holding foreign securities. Exposure to derivatives did not have a material effect on performance in the period.

The portfolio did not experience any liquidity events that had a material impact on performance.

There has been no material financial impact as LIBOR is phased out.

Subadviser:

American Century Investment Management, Inc.

Portfolio Managers:

Phillip N. Davidson, Michael Liss, CFA, CPA; Philip Sundell, CFA; Kevin Toney, CFA; and Brian Woglom, CFA

Please note that Mellon Investments Corporation took over as subadviser to the Fund on 4/6/2020. Therefore, the following commentary reflects the time period from 4/6/20-12/31/2020.

The top three sectors that contributed to Fund performance were Materials, Financials and Information Technology. In the Materials sector, an overweight and stock selection in metals & mining contributed the most to performance. An out of benchmark position in paper & forest products also supported performance. In the Financial sector, an overweight and stock selection in capital markets added to relative performance. Within Information Technology, effective security selection in semiconductors & semiconductor equipment segment also made contributions to performance. The top securities held during the reporting period were Freeport-McMoRan, Inc., Morgan Stanley and Lennar Corporation (Class A). The Fund still holds these.

The bottom three sectors that detracted from Fund performance were Health Care, Communication Services and Industrials. In Health Care, challenging stock selection in health care equipment & supplies detracted from relative returns. With regard to Communication Services, lack of exposure to the entertainment segment had the effect of diminishing the Fund's performance, as did stock selection in media. In Industrials, an overweighted position and the stock selection in aerospace & defense also weighed on performance during the period. The bottom three securities held were Becton, Dickinson and Company, L3Harris Technologies Inc. and the Walt Disney Company. The Fund still holds Becton, Dickinson and Company and L3Harris Technologies. The Fund did not own Walt Disney over the entire time period, which detracted as the shares outperformed the Index.

From an operational and implementation view, the COVID-19 environment had little to no impact on the strategy. From an equity standpoint, value stocks tend to do better in the early recovery phases of the market cycle, and low valuations and depressed current earnings remain a compelling combination for our value approach to investing. The fourth quarter witnessed a pronounced rotation from growth to value, with

value names moving higher in anticipation of a more robust reopening of the global economy. As such, investor sentiment is shifting from technology and internet stocks, which had led the market for some time, to cyclically-oriented value stocks. Investor sentiment should also improve around the ability and willingness for lower valued companies that maintain solid balance sheets to resume the growth in their dividend programs.

The Fund invested in derivatives as it is a standard feature of the strategy. The strategy utilizes both futures and options to express our investment views. Typically, the strategy deploys a modest amount of financial leverage (up to 50% maximum) in its approach, and utilizes index level futures and options to gain appropriate market exposure. Despite surging COVID-19 cases worldwide and renewed lockdowns, the equity market's upward march continued in the fourth quarter of 2020 on successful vaccine trials and the initial rollout plan. For the majority of the year, our target equity-allocation ranged from 90% to 100% against a backdrop of an improving, but mostly lackluster, fundamental and macro environment. However, through the deployment of the out-of-the money call options, the strategy was able to participate more than it otherwise would have, as our effective allocation rose with the surge in stock prices. By contrast, the bond positioning mostly held steady near the 10% level.

The Fund did not experience any liquidity events that had a material impact on Fund performance.

The Fund did not experience any industry impacts from LIBOR.

Subadviser

Mellon Investments Corporation

Portfolio Managers:

John C. Bailer, CFA; Brian C. Ferguson; David S. Intoppa; Vassilis Dagioglu; James H. Stavena

The Fund is subject to the risks of investing in equity securities, including small companies. Smaller companies involve greater risk than larger, more-established companies because smaller companies 1) usually are less stable in price, 2) are less liquid 3) are more vulnerable to adverse business and economic developments and 4) have more-limited resources. The Fund also is subject to the risks of investing in foreign securities (which are volatile, harder to price and less liquid than U.S. securities). The fund is also subject to risk from the use of derivatives, as many derivatives create investment leverage and are highly volatile. Value funds may underperform other funds that use different investing styles. Please refer to the most recent prospectus for a more detailed explanation of the Fund's principal risks.

Investment return and principal value will fluctuate, and when redeemed, shares may be worth more or less than original cost. Past performance is no guarantee of future results and does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investing in mutual funds involves market risk, including loss of principal. Performance returns assume the reinvestment of all distributions.

Comparative performance of \$10,000 invested in Class I shares of the American Century NVIT Multi Cap Value Fund versus performance of the Russell 1000® Value Index over the 10-year period ended 12/31/20. Unlike the Fund, performance of the index does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmarks can be found on the Market Index Definitions page at the back of this book.

For the annual period ended December 31, 2020, the NVIT Multi-Manager Mid Cap Value Fund (Class II) returned -1.14% versus 4.96% for its benchmark, the Russell Midcap® Value Index. For broader comparison, the median return for the Fund's Morningstar® peer category, Mid-Cap Value (consisting of 415 funds as of December 31, 2020), was 2.80% for the same period. Performance for the Fund's other share classes versus the Fund's benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

This Fund uses a multi-manager approach, allocating portions of its assets to several different subadvisers. The Fund strives to benefit from the subadvisers' specializations and diverse investment strategies. Therefore, the views of the individual managers are independent and may appear to be contradictory. Please note that each subadviser wrote its commentary to explain the performance of the portion of the Fund that it manages.

This Fund is subadvised by:

American Century Investment Management, Inc.; Thompson, Siegel & Walmsley LLC; and WEDGE Capital Management, L.L.P.

The following commentary is provided by American Century Investment Management, Inc.:

Portfolio Review

Equity markets rose. Broad U.S. equity markets ended the year higher despite volatility in the first quarter, when markets plunged dramatically on pandemic fears and heightened global economic uncertainty. Stocks rapidly entered bear market territory as coronavirus containment efforts disrupted economic activity and fueled massive unemployment. Stocks recovered ground in the second quarter after the Fed intervened with several aggressive stimulus measures and Congress passed a \$2 trillion economic relief package. This market recovery extended through the second half of the year, supported by stronger-than-expected economic and earnings growth. The approval of several COVID-19 vaccines and the passage of additional fiscal stimulus measures supported robust fourth-quarter gains. Against this backdrop, large-cap stocks outperformed mid- and small-cap stocks. Growth stocks outperformed value.

Materials detracted from Fund performance. The Fund's lack of exposure to the cyclical metals and mining and chemicals industries detracted from returns. An underweight in communication services dampened results. Not owning outperforming stocks in the interactive media and services industry weighed on relative performance, as those stocks were strong performers during the pandemic.

Real estate was an area of strength. The Fund continued its notable underweight in the real estate sector, which positively impacted performance. Stock selection in information technology also aided relative performance. Comerica

underperformed for the reporting period. Lower interest rates and increased credit risk from worsening economic conditions in the first half of the year drove this bank stock to underperform. Another detractor was the company, Newmont. Lack of exposure to the gold mining stock detracted from performance. Market speculation over lower U.S. interest rates, the dollar's weakness and geopolitical tensions in the Middle East boosted the price of gold and gold mining stocks. ConocoPhillips. This energy exploration and production company underperformed on concerns regarding lower oil prices, which would negatively impact the company's free cash flow and return on invested capital.

Applied Materials contributed to performance. This semiconductor equipment company benefited from strong trends in key end markets and demand for connectivity during the pandemic. Hologic, a medical device company outperformed due to significant sales for its COVID-19 test. The economics of the test are extremely favorable as Hologic is able to capture three times the revenue of its core diagnostics tests with better gross margins. Also, Xcel Energy helped Fund performance. Along with other utilities, this Minnesota-based electric and gas company held its value better during the first-quarter market decline. Xcel also outperformed many other utilities because it is a fully regulated, higher-quality utility with a low range of outcomes.

Positioning for the Future

We do not rely on impending catalysts in our process. Investors wonder if there are impending catalysts that might bring about a long-awaited and lasting shift toward value stocks. We believe value catalysts are embedded in our security selection. Our process involves buying higher-quality companies trading at a discount to fair value. We believe our fundamental analysis leads us to companies that are undervalued for transitory reasons, and their shares will inherently revert at some point. Relying on catalysts can be precarious. When a catalyst becomes recognizable to the market, the corresponding securities may have already become less attractive on a relative risk/reward basis.

Value opportunities in health care. Positive long-term demographic trends support demand for companies in the health care sector. We prefer more stable companies such as pharmaceutical distributors and those offering discretionary products and services that are likely to rebound in a post-pandemic economy.

Notable exposure to consumer staples. Companies in the consumer staples sector generally offer strong defensive characteristics. Furthermore, we believe many of our holdings have taken steps to improve operations and strengthen their balance sheets.

Significant exposure to financials. We believe the financials sector offers select higher-quality companies that fit our process. We prefer trust banks and other financials that risk minimal capital as part of their business model. Our exposure

to banks focuses on those we think are more likely to manage credit successfully through the ups and downs of the business cycle.

Disruption themes continue in 2021. The pandemic accelerated paradigm-shifting structural trends. For example, dedensification has reshaped the real estate market as millennials migrate from urban cores, boosted by low mortgage interest rates and the acceptance of work-from-home practices. Declining technology costs and growing environmental concerns have created opportunities for utilities to transition power generation from coal and natural gas to renewable sources such as solar and wind. In addition, we believe government entities will support renewables by enacting policies intended to combat global warming. These and other significant themes may create investment opportunities while increasing the importance of fundamental analysis and security selection.

The Fund invests in derivatives through the foreign exchange forward hedge contracts to offset the inherent currency risks of holding foreign securities. Exposure to derivatives did not have a material effect on performance in the period.

The Fund did not experience any liquidity events that had a material impact on performance.

There has been no material financial impact as LIBOR is phased out.

Phillip N. Davidson, CFA; Michael Liss, CFA; Kevin Toney, CFA; and Brian Woglom, CFA

The following commentary is provided by Thompson, Siegel & Walmsley LLC:

The TSW sleeve of the NVIT Multi-Manager Mid Cap Value Fund underperformed the benchmark over the past twelve months, but the performance shortfall of 63 basis points (gross of fees) was less than we expected given the significant headwinds for value investing. For broader context, while growth has outperformed value for more than a decade, in most of this period the markets have generally rewarded stocks exhibiting superior fundamentals, growth prospects, and attractive valuations. However, this changed beginning in early to mid-2017 and has continued through 2020 where valuation has been severely penalized to a degree we have not seen in our investment careers. As a reminder, TSW applies a consistent value approach focused on identifying stocks we believe are mispriced and have potential to re-rate based on our identification of meaningful catalysts - with this approach our Fund has remained at a consistent valuation discount to the index which has posed a headwind in the current environment. In 2020, it has been a continuation of the backdrop described over the last few years, and arguably an escalation of the disconnect described. Though the market's disconnect with

valuation remains, we believe it presents a fantastic opportunity set for our disciplined approach.

The 2020 market environment was marked by significant rotation into what was in or out of favor and severe penalization for valuation. The market has also undoubtedly been hyper short-term focused, which combined with the lack of valuation consideration has provided ample opportunity on a relative basis from a risk/reward perspective. Our approach in this environment has been to be acutely aware of the financial health and sustainability of a business given the uncertainty, and to look past near-term headwinds and conduct valuation based on normalized cash flow levels over the medium- to long-term. Ultimately, our ability to transact quickly and adherence to sound risk management through construction of a balanced Fund of idiosyncratic names, has helped the strategy keep up in an environment that otherwise was acutely unfavorable.

The leading economic industries, in terms of contribution to the Mid Cap Value Fund's relative return, were Energy, Health Care, and Real Estate. Within Energy we continued to benefit from our underweight to oil producers given weakness in the sector, and overall positive stock selection across a diversified mix of companies. Our top holdings included two primarily natural gas producers, Antero Resources and EQT, both of which benefited from a more positive natural gas backdrop driven by reduced supply in the sector and improvement in cash flow generation. We eliminated Antero Resources in the third quarter for more favorable risk/reward opportunities.

Within Health Care we had fairly broad-based success across the industry. Top performers included Alexion Pharmaceuticals and United Therapeutics. Alexion Pharmaceuticals, a biotechnology company focused on the development of drugs treating rare auto-immune diseases, outperformed the index and peers given its attractive high margin business, competitive position among peers, and strong balance sheet. It later received a take-out offer from AstraZeneca. United Therapeutics (UTHR), a biotechnology company focused primarily on drug development treating pulmonary hypertension, moved higher on positive development in their drug line-up, a generally inelastic demand profile, and more recently sent a positive signal to the marketplace for their voucher payment to the FDA to expedite the review process of their Tyvaso drug.

Lastly, within Real Estate, our underweight allocation was the primary driver of relative performance due to continued weakness in the industry.

The primary detractors from relative performance were Utilities, Basic Materials, and Industrials. Within Utilities, our primary detractor was FirstEnergy Corp. (FE) and specific positions in more non-traditional Utilities that did not garner demand, despite no notable change in their fundamental outlook. FE separated its power generation business, First Energy Solutions (FES), in 2019. Recently, allegations have been made that through the separation process, payments were inappropriately made to a controversial political action committee that is at the center of an investigation. Our investment thesis has been centered on

an expected re-rating of the stock following the likely separation of FES, which would allow the market to appropriately value the remaining regulated utility business in-line with peers. We continue to believe the risk/reward is attractive at current levels but acknowledge the uncertainty which is why we reduced the position.

Within Basic Materials, our underweight allocation to the outperforming industry was the sole driver of detraction from relative return. Lastly, within Industrials, our underperformance was almost exclusively driven by our underweight position and ultimately by names we did not own in sectors such as machinery and building products where valuation has remained at a premium. At the stock level, Alliance Data Systems, a provider of transaction-based marketing and customer loyalty solutions, was the primary detractor driven by exposure to the retail sector and a likely delay in the sale of their loyalty business. We ultimately eliminated the position in the third quarter for more favorable risk/reward opportunities.

Derivatives were not utilized in the TSW sleeve of the NVIT Multi-Manager Mid Cap Value Fund.

Subadviser:

Thompson, Siegel & Walmsley LLC

Portfolio Managers:

R. Michael Creager, CFA and Brett P. Hawkins, CFA

The following commentary is provided by WEDGE Capital Management, L.L.P.:

The top contributors for the year-to-date period ending in October included stock selection within Retail (Qurate Retail was up 40%), Energy (EQT Corporation was up 40%), and Telecom (Liberty Broadband was up 28%). WEDGE continues to hold all three securities within these three sectors.

The top detractors through October included stock selection within Finance (EPR Properties fell 65% and AerCap Holdings dropped 60%), Healthcare (Universal Health Services was down 24%), and Utilities (FirstEnergy Corporation fell 39%). WEDGE continues to hold all of these securities with the exception of FirstEnergy Corporation.

The relative underperformance was caused by poor stock selection within Finance, Healthcare, and Utilities. In hindsight, a deeper unpredictable linkage existed as the Mid Cap Fund performance was negatively impacted by the uniqueness of the market downturn during the first part of the year. WEDGE's investment process employs robust due diligence on what the downside risk is for each company in the Fund during potential times of recession. However, the economic downturn as a result of the public health response to COVID-19 was not a

normal recession. Businesses which have previously been considered high-quality safe havens were forced to shore-up cash on their balance sheets and access their credit revolvers. And contrary to previous stock market collapses, low valuation failed to protect on the downside as the stocks with the lowest price/earnings multiples fell the farthest.

The WEDGE sleeve did not invest in any derivative instruments during the reporting period.

The Fund did not experience any liquidity events during the reporting period.

The Fund did not experience any impacts from LIBOR.

Ash Shah, CFA, CPA; and Ronald J. Zibelli Jr., CFA

The following commentary is provided by Wellington Management Company LLP:

United States (U.S.) equities, as measured by the S&P 500® Index posted positive results over the trailing 12-month period ending December 31, 2020. U.S. equities ended the first quarter sharply lower after achieving record-highs in February, as the coronavirus spread rapidly throughout the country, causing unprecedented market disruptions and financial damage, and heightening fears of a severe economic downturn. Many states adopted extraordinary measures to fight the contagion, while companies shuttered stores and production, withdrew earnings guidance, and drew down credit lines at a record pace as borrowing costs soared. Volatility surged to extreme levels, and the S&P 500 Index suffered its fastest-ever decline into a bear market.

U.S. equities ended the second quarter higher after an extraordinary rally drove U.S. stocks to their largest quarterly gain since the fourth quarter of 1998. The unprecedented scale of the fiscal and monetary stimulus implemented by Congress and the U.S. Federal Reserve (Fed) in response to the pandemic was the most influential driver of the market's rebound in the second quarter. Risk sentiment eased at the end of the quarter on concerns about a sharp rise in infections in some southern and western states, the rapid speed of the market's rebound, and cautious economic-outlook comments from the Fed.

In the third quarter, U.S. equities extended their strong rally, with markets bolstered by substantial monetary support from the Fed, a broadening U.S. economic recovery, better-than-expected corporate earnings, and promising trials for COVID-19 vaccines. The U.S. economy gradually recovered during the quarter; however, the path to a sustainable economic recovery was clouded by concerns about a resurgence in COVID-19 infections in many areas of the country, an undetermined timeline for vaccines, high unemployment, elevated debt burdens, and uncertainty about additional fiscal stimulus. In September, the S&P 500 Index declined for the first time in five months. The Fed signalled that it expects to hold interest rates near zero until inflation is on track to moderately exceed 2%.

During the fourth quarter U.S. equities rallied, bolstered by better-than-expected third-quarter earnings, economic resilience, substantial monetary support from the Fed, and optimism that vaccines will support a broad reopening of the U.S. economy in 2021. A sharp escalation in COVID-19 infections across the country and renewed restrictions to curb the spread of the virus were overshadowed by highly encouraging vaccine developments. In December, the government unveiled a long-awaited fifth stimulus package, worth approximately U.S. \$900 billion. The Fed committed to purchasing at least U.S. \$120 billion of U.S. government debt per month. Joe Biden was elected president after a closely contested election, removing a key element of uncertainty for the market. Third quarter earnings results for companies in the S&P 500 Index were significantly better than expected.

Returns during the period varied by market-cap. Small-cap stocks, as measured by the Russell 2000 Index, and large-cap stocks, as measured by the S&P 500 Index, outperformed midcap stocks, as measured by the S&P MidCap 400 Index.

The Wellington-managed portion of the portfolio underperformed the Russell 2000 Growth Index during the period. Weak selection within industrials, financials, and real estate detracted from relative performance and was partially offset by stronger selection within the consumer staples, communication services, and information technology sectors. Sector allocation, a residual of our bottom-up stock selection process, slightly detracted from relative performance. Overweight allocations to consumer discretionary, financials, and consumer staples detracted most from relative performance. This was partially offset by underweight positions in utilities and real estate, as well as an overweight to industrials.

The top relative detractors from performance were an underweight to Plug Power (industrials), not owning benchmark constituent Quidel (health care), and an out of benchmark position in Caleres (consumer discretionary). Plug Power is an alternative energy provider. Shares of the company rose over the period. Shares of Quidel rose following the U.S. Food and Drug Administration (FDA)'s authorization for the company's rapid-result COVID-19 tests. For the third quarter of 2020, the healthcare company reported revenue of \$476.1 million, an impressive \$276% year-over-year increase and earnings per share rose to \$5.33 compared to the \$0.38 it recorded during the prior-year quarter. Shares of Caleres, a footwear apparel company, fell during the period. Shares fell sharply in the first quarter of 2020 as a slowdown in retail demand throughout the U.S. in response to COVID-19 weighed on the stock price. Share prices partially recovered towards the end of the year. The company announced fiscal third quarter revenues and profits that beat expectations. The Fund eliminated its position in the stock during the period.

Among the top contributors to relative performance during the period were overweight positions in Five9 (information technology), MyoKardia (health care) and Cardlytics (communication services). Shares of Five9, a provider of cloud-based software for contact centers, ended the period higher. The stay-at-home economy as a result of the COVID-19 pandemic benefitted the stock price. Shares of Cardlytics, a purchase-intelligence technology company, ended the period higher. Recently, the company reported third quarter results that beat revenue and EPS consensus estimates. Financial institution monthly active users grew 26% over the period. Several sell-side analysts subsequently raised their price targets, pushing shares higher. MyoKardia shares also rose during the period. The company announced in October that Bristol Myers Squibb will acquire the pharmaceutical firm for \$13.1 billion. The acquisition was successfully completed in November.

The portfolio utilized exchange traded Funds (ETFs) during the period to equitize cash. The positions did not have a material impact on the Fund during the period.

There was no impact to the portfolio performance as a result of the change to LIBOR.

In addition to the above, which discusses portfolio performance, we would highlight that our exposure to banks and stock selection in industrials had an impact to portfolio performance as a result of COVID-19.

*High double-digit returns are unusual and cannot be sustained.

The Fund is subject to the risks of investing in equity securities (including small companies). Smaller companies involve greater risk than larger, more-established companies because smaller companies: 1) usually are less stable in price, 2) are less liquid 3) are more vulnerable to adverse business and economic developments and 4) have more-limited resources. The Fund may invest in initial public offerings (IPOs), which often are subject to greater and more-unpredictable price changes than more-established stocks. The Fund also is subject to the risks of investing in foreign securities (which are

volatile, harder to price and less liquid than U.S. securities). The Fund may concentrate on specific sectors, subjecting it to greater volatility than that of other mutual funds. Growth funds may underperform other funds that use different investing styles. Please refer to the most recent prospectus for a more detailed explanation of the Fund's principal risks.

Each of the Fund's Subadviser makes investment decisions independently, and it is possible that the security selection process of one Subadviser will not complement that of another Subadviser. As a result, the Fund's exposure to a given security, industry sector or market capitalization could be smaller or larger than if the Fund were managed by a single Subadviser, which could affect the Fund's performance.

Russell Investment Group is the source and owner of the trademarks, service marks and copy rights related to the Russell Indexes. Current effective prospectus dated April 29, 2020 (as revised July 6. 2020). The difference between gross and net operating expenses reflects contractual waivers in place through July 31, 2021. Please see the Fund's most recent prospectus for details. Please refer to the Financial Highlights for each respective share class' actual results.

The returns reported above do not include the effect of sales charges or additional expenses imposed by variable annuity contracts.

Investment return and principal value will fluctuate, and when redeemed, shares may be worth more or less than original cost. Past performance is no guarantee of future results and does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investing in mutual funds involves market risk, including loss of principal. Performance returns assume the reinvestment of all distributions.

Comparative performance of \$10,000 invested in Class I shares of the NVIT Multi-Manager Small Cap Growth Fund versus performance of the Russell 2000® Growth Index over the 10-year period ended 12/31/20. Unlike the Fund, the performance of this index does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

For the annual period ended December 31, 2020, the NVIT Multi-Manager Small Cap Value Fund (Class I) returned 5.15% versus 4.63% for its benchmark, the Russell 2000® Value Index. For broader comparison, the return for the Fund's Morningstar® insurance funds peer category, Small Value (consisting of 416 funds as of December 31, 2020), was 3.78% for the same period. Performance for the Fund's other share classes versus the Fund's benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

This Fund uses a multi-manager approach, allocating portions of its assets to different subadvisers. The Fund strives to benefit from the subadvisers' specializations and diverse investment strategies. Therefore, the views of the individual managers are independent and may appear to be contradictory. Please note that each subadviser wrote its commentary to explain the performance of the portion of the Fund that it manages.

The Fund is managed by Jacobs Levy Equity Management Inc., and WCM Investment Management.

The following commentary is provided by Jacobs Levy Equity Management Inc.:

Market Conditions

In 2020, U.S. equities hit an all-time high in February, crashed into a bear market by mid-March, then surged to record highs by year-end, as the broad equity market gained almost 21% for the year. The Covid-19 pandemic disrupted the global economy, which led to pain in stocks tied to the physical economy and inflated a bubble in the virtual economy stay-at-home stocks. Through the third quarter, the market exhibited very narrow performance leadership, with outsized gains concentrated among the "FAAMNG" stocks. Shares of high-momentum, large cap growth stocks, mostly in the technology and consumer discretionary sectors outperformed, while small cap and value stocks lagged. For example, the Russell Top 200 Growth Index was up nearly 27% year-to-date through September 30, 2020. while the Russell 2000 Value Index was down more than 21%—a 48 percentage point return difference that exceeded the differential reached during the internet bubble.

Jacobs Levy's investment process is engineered to combine human insight and intuition, finance and behavioural theory, and quantitative and statistical methods. The firm's stock selection process entails sophisticated modelling a large number of stocks and proprietary factors using financial statements, analyst forecasts, corporate management signals, economic data and security pricing, as well as alternative data sources. Based on the fundamental valuations and opportunities discovered by our factor models, we forecast expected returns for every security in our investment universe. Portfolios are diversified across individual stocks, industries, and sectors.

As COVID-induced dislocations unfolded, our dynamic investment process positioned the Fund to take advantage of the significant opportunities created. Our investment system increased our exposure to factors it found attractive, including

value, smallness, financial leverage, and reversals, while decreasing our exposure to factors it found unattractive such as growth, momentum, and low volatility. The Fund did not experience any liquidity events that had a material impact on performance.

Attribution Summary

In 2020, security selection in Financials, Information Technology, and Industrials benefited the Fund, although security selection in Energy and Real Estate detracted from performance. An underweight of Utilities and an overweight of Health Care helped, while an underweight of Consumer Staples hurt.

Jacobs Levy did not use derivatives in the management of the Fund.

Jacobs Levy invests exclusively in equity securities publicly traded in the United States. NVIT Multi Manger Small Cap Value Fund managed by Jacobs Levy is a long only Fund benchmarked against the Russell 2000 Value Index. We do not anticipate the LIBOR transition event having any impact on the Fund.

Subadviser:

Jacobs Levy Equity Management Inc.

Portfolio Managers:

Bruce I. Jacobs, Ph.D. and Kenneth N. Levy, CFA

The following commentary is provided by WCM Investment Management:

The top three contributing sectors to the Fund from January 1, 2020 to December 31, 2020 were Financials, Energy and Utilities. Within Financials, stock selection was the primary contributor to performance. Our avoidance of the poor performing Energy and Utilities sectors positively impacted performance as well.

The top three contributing securities over that time period were Focus Financial Partners (FOCS), Virtus Investment Partners (VRTS) and Emergent BioSolutions (EBS). The Fund continues to hold all three securities.

The bottom three detracting sectors to the Fund from January 1, 2020 to December 31, 2020 were Industrials, Consumer Discretionary and Communication Services. Within Industrials, our exposure to the Business Services Industry left us with several businesses that saw revenues stop earlier in the year. While those companies detracted from performance in 2020, we believe they are set up well for a recovery. Additional detractors included stock selection within the Consumer Discretionary and Communication Services sector.

The bottom three detracting securities over that time period were Emerald Holding Inc. (EEX), SP Plus Corporation (SP) and Jones Lang LaSalle Inc. (JLL). The Fund sold Emerald Holding Inc. (EEX) back in March, as the company was facing a

potential multi-year recovery due to the major impact COVID-19 had on the business. The Fund continues to hold the other two securities.

The pandemic hurt several businesses in the Fund when the stay-at-home orders were in place. The uncertainty surrounding when lockdowns would be lifted caused revenues to virtually stop in some industries and stock prices to tumble. In other, higher-growth areas, however, the opposite occurred. The pandemic was helpful to businesses that helped people work / educate from home, biotech firms searching for treatments or vaccines, and other health care-related companies. As these are areas typically underrepresented in the Fund due to its quality value investing style, the Fund's sleeve underperformed relative to the benchmark.

The Fund's sleeve did not invest in derivatives during the reporting period.

The Fund did not experience any liquidity events that had a material impact on Fund performance.

- Current effective prospectus dated April 29, 2020 (as revised July 6, 2020). The difference between gross and net operating expenses reflects contractual waivers in place through July 31, 2021. Please see the Fund's most recent prospectus for details. Please refer to the Financial Highlights for each respective share class' actual results.
- The returns reported above do not include the effect of sales charges or additional expenses imposed by variable annuity contracts.

Investment return and principal value will fluctuate, and when redeemed, shares may be worth more or less than original cost. Past performance is no guarantee of future results and does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investing in mutual funds involves market risk, including loss of principal. Performance returns assume the reinvestment of all distributions.

Comparative performance of \$10,000 invested in Class I shares of the NVIT Multi-Manager Small Company Fund versus performance of the Russell 2000® Index over the 10-year period ended 12/31/20. Unlike the Fund, the performance of this index does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

For the annual period ended December 31, 2020, the NVIT Newton Sustainable U.S. Equity Fund (formerly Neuberger Berman NVIT Socially Responsible Fund) (Class II) returned 13.34% versus 18.40% for its benchmark, the S&P 500® Index (S&P 500). For broader comparison, the median return for the Fund's Morningstar® insurance funds peer category, Large Blend (consisting of 1363 funds as of December 31, 2020), was 14.84% for the same period. Performance for the Fund's other share classes versus its benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

Newton became the subadviser to the fund on May 11, 2020. This commentary offers performance commentary for the reporting period from May 11, 2020 ended December 31, 2020.

Stock picking proved a source of strength in financials and information technology ("IT"). An overweight to IT was beneficial, as was an underweight to the health care sector. A void in energy aided relative performance as oil production cuts failed to adequately compensate for the demand destruction arising from the coronavirus pandemic.

Qualcomm benefited as investors grew increasingly appreciative of its exposure to a 5G cycle that can see the company's chip business return to peak-profitability. Shares surged after the chipmaker posted strong revenue projections and announced a long-term licensing deal with China's Huawei. The stock received a further boost as a U.S. appellate court reversed an earlier antitrust ruling against the chipmaker in a case brought by the U.S. Federal Trade Commission.

Positive sentiment around companies in the electric vehicle ("EV") supply chain extended to lithium miner Albemarle. The stock rose swiftly following a victory for Joe Biden in the U.S. Presidential election given the potential for more favourable EV-related policy. We chose to take some profit over the end of the year. Although we retain our long-term conviction in the company, we felt that the upwards move in the stock may limit short-term upside.

Robust demand from consumers online continued to support shares in Nike as investors also found comfort in the company's strong digital presence and the prospects for its e-commerce business.

Stock selection in health care and communication services disappointed, while an underweight to industrials also detracted from performance. The small portion of the portfolio held in cash acted as a drag against a backdrop of strongly rising equities.

Gilead Sciences detracted from relative returns. While sentiment around the stock had been aided over the start of the year by the development of its drug Remdesivir to treat coronavirus, some doubts persisted around the durability of the opportunity and long-term impact of the product. Second-quarter results also underwhelmed somewhat on account of coronavirus-related headwinds to the company's HIV and HCV franchises. We exited the stock during the fourth quarter given

our sense that its recent \$21 billion acquisition in the oncology area may not be enough to assuage concerns around the company's growth outlook in the nearer term.

International Flavors & Fragrances declined given some lingering concern around the exposure of some of its categories to coronavirus disruption. However, with the pandemic impacting many facets of our lives, we believe that people will continue to contemplate changes to their lifestyle in terms of their eating habits, healthiness, and overall wellness, a trend that bodes well for an innovative company such as IFF.

Cisco Systems released a disappointing set of results over the third quarter as its core infrastructure division witnessed year-on-year revenue declines. Guidance also underwhelmed as management adopted a downbeat view on the market that the company is selling into. Although we found pressure on the business to be cyclical in nature, structural concerns drove our decision to sell. The company appears to be on the wrong side of technological changes, such as the shift to cloud computing, and market share is likely to be lost, in what are predominantly ex-growth end markets, unless management are prepared to accept lower margins.

Since 2015, The Bank of England (the Bank) has been working with the industry to identify an alternative Risk Free Rate (RFR) to replace the London Interbank Offered Rate (LIBOR), a global mandate set by the Financial Stability Board (FSB). In April 2018, the Bank's Working Group on Sterling Risk-Free Reference Rates, (a group of major dealers active in sterling interest rate swap markets), selected the Sterling Overnight Index Average (SONIA) for use in sterling derivatives and relevant financial contracts.

For US domiciled products with USD performance benchmarks, SOFR (Secured Overnight Financing Rate) has been identified as the most likely replacement to LIBOR USD ahead of LIBOR's decommissioning at the end of 2021. However, this will require discussion with Nationwide ahead of any such adoption.

The US equity market has been a strong performer, supported by the unprecedented array of stimulus that has been deployed by central banks and governments globally in response to the impact of coronavirus. The pandemic has undoubtedly shone a light on those businesses with outdated software and infrastructure, thus allowing for the digital transformation highlighted by our 'Net Effects' theme to be embraced even more fully. Indeed, with the pandemic serving as an accelerator of change, businesses are responding rapidly in order to become more adaptive. Having aided relative performance, particularly over the start of the review period, we continue to hold positions in companies that are benefitting from this shift, supported by our 'Net Effects' and 'Smart Revolution' themes.

While the portfolio ceded some outperformance over the end of the review period as a vaccine-driven market rotation into those cyclical stocks more sensitive to economic reopening proved a modest headwind, we do have an exposure to those businesses with more leverage to an eventual recovery in a

range of industries. For example, the likes of Citigroup and Goldman Sachs have contributed strongly over recent months.

The Fund did not invest in derivatives during the reporting period.

The Fund did not experience any liquidity events that had a material impact on Fund performance.

Past performance is no guarantee of future results and does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investing in mutual funds involves market risk, including loss of principal. Performance returns assume the reinvestment of all distributions.

Comparative performance of \$10,000 invested in Class II shares of the NVIT Newton Sustainable U.S. Equity Fund versus performance of the S&P 500® Index over the 10-year period ended 12/31/20. Unlike the Fund, the performance of the index does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

For the annual period ended December 31, 2020, the NVIT Real Estate Fund (Class I) returned -5.39% versus -11.20% for its benchmark, the Dow Jones U.S. Select Real Estate Securities Index. For broader comparison, the median return for the Fund's Morningstar® peer category, Real Estate (consisting of 248 funds as of December 31, 2020), was -4.97% for the same period. Performance for the Fund's other share classes versus its benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

United States ("U.S.") equities, as measured by the S&P 500® Index posted positive results over the trailing 12-month period ended December 31, 2020. U.S. equities ended the first quarter sharply lower after achieving record highs in February, as the coronavirus spread rapidly throughout the country, causing unprecedented market disruptions and financial damage and heightening fears of a severe economic downturn. Many states adopted extraordinary measures to fight the contagion, while companies shuttered stores and production, withdrew earnings guidance, and drew down credit lines at a record pace as borrowing costs soared. Volatility surged to extreme levels, and the S&P 500 Index suffered its fastest-ever decline into a bear market.

U.S. equities ended the second quarter higher after an extraordinary rally drove U.S. stocks to their largest quarterly gain since the fourth quarter of 1998. The unprecedented scale of the fiscal and monetary stimulus implemented by Congress and the U.S. Federal Reserve ("Fed") in response to the pandemic was the most influential driver of the market's rebound in the second quarter. Risk sentiment eased at the end of the quarter on concerns about a sharp rise in infections in some southern and western states, the rapid speed of the market's rebound, and cautious economic-outlook comments from the Fed.

In the third quarter, U.S. equities extended their strong rally, with markets bolstered by substantial monetary support from the Fed, a broadening U.S. economic recovery, better-than-expected corporate earnings, and promising trials for COVID-19 vaccines. The U.S. economy gradually recovered during the quarter; however, the path to a sustainable economic recovery was clouded by concerns over a resurgence in COVID-19 infections in many areas of the country, an undetermined timeline for vaccines, high unemployment, elevated debt burdens, and uncertainty about additional fiscal stimulus. In September, the S&P 500 Index declined for the first time in five months. The Fed signaled that it expects to hold interest rates near zero until inflation is on track to moderately exceed 2%.

During the fourth quarter U.S. equities rallied, bolstered by better-than-expected third-quarter earnings, economic resilience, substantial monetary support from the Fed, and optimism that vaccines will support a broad reopening of the U.S. economy in 2021. A sharp escalation in COVID-19 infections across the country and renewed restrictions to curb the spread of the virus were overshadowed by highly encouraging vaccine developments. In December, the government unveiled a long-awaited fifth stimulus package, worth approximately U.S. \$900 billion. The Fed committed to purchasing at least \$120 billion

of U.S. government debt per month. Joe Biden was elected president after a closely contested election, removing a key element of uncertainty for the market. Third quarter earnings results for companies in the S&P 500 Index were significantly better than expected.

The portfolio outperformed the Dow Jones U.S. Select Real Estate Securities Index during the twelve-month period ending December 31, 2020. Sector allocation was the primary driver of relative outperformance. An overweight position in real estate technology and underweight to retail-malls contributed most to relative returns, while underweight positions in self-storage facilities and warehouse/logistics partially offset positive relative performance. Security selection also contributed to relative performance. Strong selection in office and multi-family was partially offset by weaker selection in lodging and real estate technology.

Top contributors to relative performance during the period included out of benchmark holdings in Equinix, Inc. (real estate technology) and American Tower Corporation (real estate technology), as well as an overweight position in Alexandria Real Estate Equities, Inc. (office). Shares of U.S. Real Estate Investment Trust ("REIT") Equinix ended the period higher. The company reported strong third quarter revenue and profit that topped analyst's expectations and issued solid 2020 guidance. Data center REITs fell during the period after positive data from another COVID-19 vaccine prompted investors to sell stocks that outperformed during the first year of the pandemic, and to buy retail and travel related REITs. The U.S. REIT, American Tower, also reported strong third-quarter results and raised its full-year 2020 outlook. The merger between T-Mobile and Sprint, which closed this April, drove contractual lease cancelations and non-renewals due to its tower site overlap for American Tower. Despite the near-term slowdown, the company is expected to remain on a solid growth trajectory over the medium-term. Alexandria also contributed to relative results. The U.S. office REIT recently reported solid third-quarter results. There are no signs of work from home pressures for the life sciences office REIT as the company's occupancy is up year-over-year, rent collections are effectively 100%, and leasing for the quarter was robust with 1.2 million square feet leased in just the third quarter alone.

Top detractors from relative returns during the period included an underweight position in Public Storage (self-storage facilities), an out of benchmark holding in Red Rock Resorts, Inc. (lodging), and an overweight position in Essential Properties Realty Trust, Inc. (specialty finance). The Fund eliminated shares of Public Storage in March. The self-storage company recently appointed two independent trustees to its board and said activist investor Elliott Management has withdrawn its board nominees. The Fund sold its position initially as supply of selfstorage facilities had appeared to outpace demand resulting in a balanced risk-reward profile with limited upside in a cyclical rally environment. Red Rock Resorts was held in the Fund for a brief period in February. We eliminated the shares as gaming and casino operators were dramatically affected by business closures and state lockdown procedures. Shares rallied into the end of the year as news of a vaccine prompted prior COVID

losers to drive higher. The Fund eliminated shares of Essential Properties Realty in May as single-tenant leisure and dining tenants were the target of many social distancing and lockdown restrictions passed on by the states. Shares have rallied as lockdown measures have been lessened, but questions still remain on whether we will fully reach prior utilization rates or settle somewhere lower.

The U.S. continues to struggle to contain COVID while Europe is potentially experiencing another surge. Suburban and rural locals are seeing a surge in migration as people leave cities for more space due to work and school from home. We believe this trend may persist, driven in part by millennials shifting preferences. Suburbanization offers numerous investment opportunities as households seek more space, including: single family rental, manufactured housing, home builders, timber, and self-storage. We have increased our exposure broadly to this group of stocks.

The high efficacy and subsequent approval of multiple vaccines provided a bottom in the markets in the fourth quarter of 2020 and the road map for a global economic recovery. For the most part markets are looking past near-term surges in COVID-19 case counts. While a positive second derivative in growth and inflation is firmly in place for the next couple of quarters given easy comparisons, we anticipate the recovery will be uneven both by sector and geography. We believe markets will transition from risk off/risk on in 2020 to idiosyncratic in 2021.

The Fund did not invest in derivatives during the reporting period.

There were no industry impacts to the Fund from LIBOR during the reporting period.

Subadviser:

Wellington Management Company LLP

Portfolio Manager:

Bradford D. Stoesser

The Fund is a non-diversified fund, which means that a relatively high percentage of the Fund's assets may be invested in a limited number of issuers.

The Fund is subject to the risks of investing in equity securities (including small companies). Smaller companies involve greater risk than larger, more-established companies because smaller companies 1) usually are less stable in price, 2) are less liquid 3) are more vulnerable to adverse business and economic developments and 4) have more-limited resources. The Fund concentrates on investments in the real estate investment trust (REIT) sector, subjecting it to greater volatility than that of other mutual funds. Please refer to the most recent prospectus for a more detailed explanation of the Fund's principal risks.

A description of the benchmarks can be found on the Market Index Definitions page at the back of this book.

The returns reported above do not include the effect of sales charges or additional expenses imposed by variable annuity contracts.

Investment return and principal value will fluctuate, and when redeemed, shares may be worth more or less than original cost. Past performance is no guarantee of future results and does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investing in mutual funds involves market risk, including loss of principal. Performance returns assume the reinvestment of all distributions.

Comparative performance of \$10,000 invested in Class I shares of the NVIT Real Estate Fund versus performance of the Dow Jones U.S. Select Real Estate Securities Index (RESI) over the 10-year period ended 12/31/20. Unlike the Fund, the performance of this index does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

For the annual period ended December 31, 2020, the NVIT Wells Fargo Discovery Fund (formerly NVIT Multi-Manager Mid Cap Growth Fund) (Class I) returned 60.90%* versus 40.47% for its benchmark, the Russell 2500® Growth Index. For broader comparison, the median return for the Fund's Morningstar® insurance funds peer category, Mid-Cap Growth (consisting of 604 funds as of December 31, 2020), was 37.08% for the same period. Performance for the Fund's other share classes versus its benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

During the reporting period, strong security selection within the health care, consumer discretionary, and information technology sectors drove performance. Substantial contributors included iRhythm Technologies, Inc., MercadoLibre, Inc. and Twilio, Inc., all of which the Fund still holds. Detractors from investment results were dispersed across sectors. Select holdings in the consumer staples and industrials sectors – particularly with WillScot Mobile Mini Holdings Corp, US Foods Holding Corp and Lamb Weston Holdings, Inc. - hindered performance. The Fund no longer hold positions in these three stocks.

The Fund was favorably positioned for the COVID-19 market environment. By emphasizing companies on the "right side of change", the Fund was able to take advantage of the massive shift to themes such as telemedicine, digital payments, and ecommerce. These trends will likely continue for the foreseeable future. As economic growth remains scarce, secular growth stocks, such as those that outperformed during 2020, should have defensive qualities and continue to be rewarded with premium valuations. Deep fundamental research is needed to locate who is winning and losing in a world of rapid disruption. While we are cautious on the markets overall, we remain optimistic and confident in innovative companies that are positioned on the "right side of change".

During the reporting period, the Fund did not invest in derivatives.

Additionally, the Fund did not experience any liquidity events or any impact from LIBOR during the reporting period.

Comparative performance of \$10,000 invested in Class I shares of the NVIT Wells Fargo Discovery Fund versus performance of the Russell 2500® Growth Index (current benchmark) and Russell Midcap® Growth Index (former benchmark) over the 10-year period ended 12/31/20. Unlike the Fund, the performance of this index does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) paid on purchase payments and redemption fees; and (2) ongoing costs, including investment advisory fees, administration fees, distribution fees and other Fund expenses. The examples below are intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. Per Securities and Exchange Commission ("SEC") requirements, the examples assume that you had a \$1,000 investment in the Class at the beginning of the reporting period (July 1, 2020) and continued to hold your shares at the end of the reporting period (December 31, 2020).

Actual Expenses

For each Class of the Fund in the table below, the first line provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid from July 1, 2020 through December 31, 2020. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line of each Class under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Expenses for Comparison Purposes

The second line of each Class in the table below provides information about hypothetical account values and hypothetical expenses based on the Class' actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Class' actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period from July 1, 2020 through December 31, 2020. You may use this information to compare the ongoing costs of investing in the Class of the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transaction costs, such as sales charges (loads) or redemption fees. If these transaction costs were included, your costs would have been higher. Therefore, the second line for each Class in the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. The examples also assume all dividends and distributions are reinvested.

Schedule of Shareholder Expenses

⁽a) The Example does not include charges that are imposed by variable insurance contracts. If these charges were reflected, the expenses listed below would be higher.

Expenses are equal to the Fund's annualized expense ratio multiplied by the average account value from July 1, 2020 through December 31, 2020 multiplied by 184/366 to reflect one-half year period. The expense ratio presented represents a six-month, annualized ratio in accordance with Securities and Exchange Commission guidelines.

⁽c) Represents the hypothetical 5% return before expenses.

⁽d) Actual expenses are equal to the Fund's annualized expense ratio multiplied by the average account value from September 8,2020 through December 31,2020 multiplied by 115/366 to reflect the period from commencement of operations.

(e) Hypothetical expenses are equal to the Fund's annualized expense ratio multiplied by the average account value from July 1,2020 through December 31,2020 multiplied by 184/366 to reflect one half year period. The expense ratio presented represents a six month, annualized ratio in accordance with Securities and Exchange Commission guidelines..

- Denotes a non-income producing security.
- Value determined using significant unobservable inputs.
- ∞ Fair valued security.
- † Amount rounds to less than 0.1%.
- (a) The security or a portion of this security is on loan at December 31, 2020. The total value of securities on loan at December 31, 2020 was \$26,982,074, which was collateralized by cash used to purchase repurchase agreements with a total value of \$11,141,488 and by \$16,675,347 of collateral in the form of U.S. Government Treasury Securities, interest rates ranging from 0.00% 8.00%, and maturity dates ranging from 1/14/2021 8/15/2050, a total value of \$27,816,835.
- (b) Security was purchased with cash collateral held from securities on loan. The total value of securities purchased with cash collateral as of December 31, 2020 was \$11,141,488.
- (c) Please refer to Note 2 for additional information on the joint repurchase agreement.

CVR
Reg. S
Regulation S - Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States.
Such security cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933 or pursuant to an exemption from registration.
Currently there is no restriction on trading this security.

Per share calculations were performed using average shares method. Amounts designated as "—" are zero or have been rounded to zero.

Not annualized for periods less than one year

The total returns do not include charges that are imposed by variable insurance contracts. If these charges were reflected, returns would be lower than those shown. Annualized for periods less than one year.

During the period, certain fees may have been waived and/or reimbursed. If such waivers/reimbursements had not occurred, the ratios would have been as indicated. Portfolio turnover is calculated on the basis of the Fund as a whole without distinguishing among the classes of shares. G G G G G G

> Per share calculations were performed using average shares method. (a) (c) (c) (d) (d) (d)

Not annualized for periods less than one year

The total returns do not include charges that are imposed by variable insurance contracts. If these charges were reflected, returns would be lower than those shown.

Portfolio turnover is calculated on the basis of the Fund as a whole without distinguishing among the classes of shares. Includes adjustments in accordance with accounting principles generally accepted in the United States of America and as such, the net asset values for financial reporting purposes and the returns based upon those net asset values may differ from the net asset values and returns for shareholder transactions.

Amounts designated as "—" are zero or have been rounded to zero.

Per share calculations were performed using average shares method.

Not annualized for periods less than one year.

The total returns do not include charges that are imposed by variable insurance contracts. If these charges were reflected, returns would be lower than those shown.

Annualized for periods less than one year.

During the period, certain fees may have been waived and/or reimbursed. If such waivers/reimbursements had not occurred, the ratios would have been as indicated. Portfolio turnover is calculated on the basis of the Fund as a whole without distinguishing among the classes of shares. (a) (c) (c) (d) (d) (d) (d)

Per share calculations were performed using average shares method.

(a) (c) (c) (d) (d) (d)

The total returns do not include charges that are imposed by variable insurance contracts. If these charges were reflected, returns would be lower than those shown.

Annualized for periods less than one year.

During the period, certain fees may have been waived and/or reimbursed. If such waivers/reimbursements had not occurred, the ratios would have been as indicated. Portfolio turnover is calculated on the basis of the Fund as a whole without distinguishing among the classes of shares.

Per share calculations were performed using average shares method. Amounts designated as "—" are zero or have been rounded to zero.

Not annualized for periods less than one year

The total returns do not include charges that are imposed by variable insurance contracts. If these charges were reflected, returns would be lower than those shown. Annualized for periods less than one year.

During the period, certain fees may have been waived and/or reimbursed. If such waivers/reimbursements had not occurred, the ratios would have been as indicated. Portfolio turnover is calculated on the basis of the Fund as a whole without distinguishing among the classes of shares.

The accompanying notes are an integral part of these financial statements.

1. Organization

Nationwide Variable Insurance Trust ("NVIT" or the "Trust") is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company, organized as a statutory trust under the laws of the State of Delaware. The Trust has authorized an unlimited number of shares of beneficial interest ("shares"), without par value. The Trust currently offers shares to life insurance company separate accounts to fund the benefits payable under variable life insurance policies and variable annuity contracts. As of December 31, 2020, the Trust operates sixty-five (65) separate series, or mutual funds, each with

its own objective(s) and investment strategies. This report contains the financial statements and financial highlights for the fourteen (14) series listed below (each, a "Fund"; collectively, the "Funds").

Nationwide Fund Advisors ("NFA") serves as investment adviser to the Funds. NFA is a wholly owned subsidiary of Nationwide Financial Services, Inc. ("NFS"), a holding company which is a direct wholly owned subsidiary of Nationwide Corporation. Nationwide Corporation, in turn, is owned by Nationwide Mutual Insurance Company and Nationwide Mutual Fire Insurance Company.

- BlackRock NVIT Equity Dividend Fund ("Equity Dividend")
- Neuberger Berman NVIT Multi Cap Opportunities Fund ("Multi Cap Opportunities")
- NVIT AQR Large Cap Defensive Style Fund (formerly, NVIT Nationwide Fund) ("Defensive Style")
- NVIT J.P. Morgan Disciplined Equity Fund ("Disciplined Equity")
- NVIT Jacobs Levy Large Cap Growth Fund (formerly, NVIT Multi-Manager Large Cap Growth Fund) ("Large Cap Growth")
- NVIT Mellon Dynamic U.S. Core Fund (formerly, NVIT Dynamic U.S. Growth Fund) ("U.S. Core")
- NVIT Mellon Dynamic U.S. Equity Income Fund (formerly, American Century NVIT Multi Cap Value Fund) ("U.S. Equity Income")
- NVIT Multi-Manager Mid Cap Value Fund ("Mid Cap Value")
- NVIT Multi-Manager Small Cap Growth Fund ("Small Cap Growth")
- NVIT Multi-Manager Small Cap Value Fund ("Small Cap Value")
- NVIT Multi-Manager Small Company Fund ("Small Company")
- NVIT Newton Sustainable U.S. Equity Fund (formerly, Neuberger Berman NVIT Socially Responsible Fund) ("Sustainable U.S. Equity")
- NVIT Real Estate Fund ("Real Estate")
- NVIT Wells Fargo Discovery Fund (formerly, NVIT Multi-Manager Mid Cap Growth Fund) ("Discovery")

Only separate accounts established by Nationwide Life Insurance Company ("NLIC"), a wholly owned subsidiary of NFS, hold shares of Disciplined Equity. Only separate accounts established by NLIC and Nationwide Life and Annuity Insurance Company ("NLAIC"), a wholly owned subsidiary of NLIC, hold shares of Equity Dividend, Multi Cap Opportunities, Large Cap Growth, U.S. Core, U.S. Equity Income, Small Cap Growth, Small Cap Value, Real Estate, and Discovery. Shares of Defensive Style, Mid Cap Value, Small Company, and Sustainable U.S. Equity are held by separate accounts established by NLIC and NLAIC and other unaffiliated insurance companies.

The Funds, as applicable, currently offer Class I, Class II, Class IV, Class X, Class Y and Class Z shares. Each share class of a Fund represents interests in the same portfolio of investments of that Fund and the classes are identical except for any differences in the distribution or service fees, administrative services fees, class specific expenses, certain voting rights, and class names or designations.

Each Fund, except Real Estate, is a diversified fund as defined in the 1940 Act. Real Estate is a non-diversified fund, as defined in the 1940 Act.

Effective January 27, 2020, NVIT Multi-Manager Large Cap Growth Fund was renamed "NVIT Jacobs Levy Large Cap

Growth Fund " and NVIT Multi-Manager Mid Cap Growth Fund was renamed "NVIT Wells Fargo Discovery Fund".

Effective April 1, 2020, American Century NVIT Multi Cap Value Fund was renamed "NVIT Mellon Dynamic U.S. Equity Income Fund".

Effective April 30, 2020, NVIT Nationwide Fund was renamed "NVIT AQR Large Cap Defensive Style Fund" and NVIT Dynamic U.S. Growth Fund was renamed "NVIT Mellon Dynamic U.S. Core Fund".

Effective May 8, 2020, Neuberger Berman NVIT Socially Responsible Fund was renamed "NVIT Newton Sustainable U.S. Equity Fund".

2. Summary of Significant Accounting Policies

The following is a summary of significant accounting policies followed by the Funds in the accounting and the preparation of their financial statements. The Funds are investment companies and follow accounting and reporting guidance in the Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946 ("ASC 946"). The policies are in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP"), including, but not limited to, ASC 946. The preparation of financial statements requires fund management to make estimates and assumptions

that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expenses for the period. The Funds utilize various methods to measure the value of their investments on a recurring basis. Amounts received upon the sale of such investments could differ from those estimated values and those differences could be material.

(a) Security Valuation

U.S. GAAP defines fair value as the price that a Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. Pursuant to procedures approved by the Board of Trustees of the Trust (the "Board of Trustees"), NFA assigns a fair value, as defined by U.S. GAAP, to a Fund's investments in accordance with a hierarchy that prioritizes the various types of inputs used to measure fair value. The hierarchy gives the highest priority to readily available unadjusted quoted prices in active markets for identical assets (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements) when market prices are not readily available or reliable.

The three levels of the hierarchy are summarized as follows.

- Level 1 Quoted prices in active markets for identical assets
- Level 2 Other significant observable inputs (including quoted prices of similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 Significant unobservable inputs (including a Fund's own assumptions in determining the fair value of investments)

Changes in valuation techniques may result in transfers into or out of an investment's assigned level within the hierarchy.

An investment's categorization within the hierarchy is based on the lowest level of any input that is significant to the fair valuation in its entirety. The inputs or methodology used to value investments are not intended to indicate the risk associated with investing in those investments.

Securities for which market-based quotations are readily available are valued at the current market value as of "Valuation Time." Valuation Time is as of the close of regular trading on the New York Stock Exchange (usually 4:00 p.m. Eastern time). Equity securities are generally valued at the last quoted sale price or official closing price, or, if there is no such price, the last quoted bid price provided by an independent pricing service approved by the Board of Trustees. Prices are taken from the primary market or exchange on which each security trades. Shares of registered open-end management investment companies are valued at net asset value ("NAV") as reported by such company. Shares of exchange traded funds are generally valued at the last quoted sale price or official closing price, or, if there is no such price, the last quoted bid price provided by an independent pricing service. Master limited

partnerships ("MLPs") are publicly traded partnerships and are treated as partnerships for U.S. federal income tax purposes. Investments in MLPs are valued at the last quoted sale price or official closing price, or, if there is no such price, the last quoted bid price provided by an independent pricing service. Equity securities, shares of registered open-end management investment companies, shares of exchange traded funds and MLPs valued in this manner are generally categorized as Level 1 investments within the hierarchy. Repurchase agreements are valued at amortized cost, which approximates fair value, and are generally categorized as Level 2 investments within the hierarchy.

Debt and other fixed-income securities are generally valued at the bid evaluation price provided by an independent pricing service as approved by the Board of Trustees. Evaluations provided by independent pricing service providers may be determined without exclusive reliance on quoted prices and may use broker-dealer quotations, individual trading characteristics and other market data, reported trades or valuation estimates from their internal pricing models. The independent pricing service providers' internal models use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates, anticipated timing of principal repayments, and quoted prices for similar assets and are generally categorized as Level 2 investments within the hierarchy. Debt obligations generally involve some risk of default with respect to interest and/or principal payments.

The Board of Trustees has delegated authority to NFA, and the Trust's administrator, Nationwide Fund Management LLC ("NFM"), to assign a fair value under certain circumstances, as described below, pursuant to valuation procedures approved by the Board of Trustees. NFA and NFM have established a Fair Valuation Committee ("FVC") to assign these fair valuations. The fair value of a security may differ from its quoted or published price. Fair valuation of portfolio securities may occur on a daily basis.

Securities may be fair valued in certain circumstances, such as where (i) market-based quotations are not readily available; (ii) an independent pricing service does not provide a value or the value provided by an independent pricing service is determined to be unreliable in the judgment of NFA/NFM or its designee; (iii) a significant event has occurred that affects the value of a Fund's securities after trading has stopped (e.g., earnings announcements or news relating to natural disasters affecting an issuer's operations); (iv) the securities are illiquid; (v) the securities have defaulted or been delisted from an exchange and are no longer trading; or (vi) any other circumstance in which the FVC believes that market-based quotations do not accurately reflect the value of a security.

The FVC will assign a fair value according to fair value methodologies. Information utilized by the FVC to obtain a fair value may include, among others, the following: (i) a multiple of earnings; (ii) the discount from market value of a similar, freely traded security; (iii) the yield-to-maturity for debt issues; or (iv) a combination of these and other methods. Fair valuations may also take into account significant events that occur before

Valuation Time but after the close of the principal market on which a security trades that materially affect the value of such security. To arrive at the appropriate methodology, the FVC may consider a non-exclusive list of factors, which are specific to the security, as well as whether the security is traded on the domestic or foreign markets. The FVC monitors the results of fair valuation determinations and regularly reports the results to the Board of Trustees. Each Fund attempts to establish a price that it might reasonably expect to receive upon the current sale of that security. That said, there can be no assurance that the fair value assigned to a security is the price at which a security could have been sold during the period in which the particular fair value was used to value the security. To the extent the significant inputs used are observable, these securities are classified as Level 2 investments; otherwise, they are classified as Level 3 investments within the hierarchy.

Equity securities listed on a non-U.S. exchange ("non-U.S. securities") are generally fair valued daily by an independent fair value pricing service approved by the Board of Trustees. The fair valuations for non-U.S. securities may not be the same as guoted or published prices of the securities on the exchange on which such securities trade. Such securities are categorized as Level 2 investments within the hierarchy. If daily fair value prices from the independent fair value pricing service are not available, such non-U.S. securities are generally valued at the last quoted sale price at the close of an exchange on which the security is traded and categorized as Level 1 investments within the hierarchy. Values of foreign securities, currencies, and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars at the exchange rate of said currencies against the U.S. dollar, as of Valuation Time, as provided by an independent pricing service approved by the Board of Trustees.

The following tables provide a summary of the inputs used to value the Funds' net assets as of December 31, 2020. Please refer to the Statements of Investments for additional information on portfolio holdings.

Amounts designated as "— ", which may include fair valued securities, are zero or have been rounded to zero.

^{*} Swap contracts are included in the table at value, with the exception of centrally cleared swap contracts which are included in the table at unrealized appreciation/(depreciation).

During the year ended December 31, 2020, Small Cap Value held one common stock investment that was categorized as a Level 3 investment which was valued at \$0.

During the year ended December 31, 2020, Small Company held two corporate bonds, three common stocks, one preferred stock and one rights investment that were categorized as Level 3 investments which were each valued at \$0.

The FVC continues to evaluate any information that could cause an adjustment to the fair value for these investments, such as market news, the progress of judicial and regulatory proceedings, and subadviser recommendations.

(b) Cash Overdraft

Certain Funds may have overdrawn U.S. dollar and/or foreign currency balances with the Funds' custodian bank, JPMorgan Chase Bank, N.A. ("JPMorgan"). To offset the overdraft, JPMorgan advanced an amount equal to the overdraft. Consistent with the Funds' borrowing policy, the advance is deemed a temporary loan to the Funds. Such loans are payable upon demand and bear interest from the date of such advance to the date of payment at the rate agreed upon with JPMorgan under the custody agreement. These advances are separate from, and were not made pursuant to, the credit agreement discussed in Note 4. A Fund with an overdraft is subject to a lien by JPMorgan on the Fund's account and JPMorgan may charge the Fund's account for any amounts owed to JPMorgan. JPMorgan also has the right to set off as appropriate and apply all deposits and credits held by or owing to JPMorgan against such amount, subject to the terms of the custody agreement.

At December 31, 2020, the Funds did not have overdrawn balances.

(c) Foreign Currency Transactions

The accounting records of the Funds are maintained in U.S. dollars. The Funds may, nevertheless, engage in foreign currency transactions. In those instances, a Fund will convert foreign currency amounts into U.S. dollars at the current rate of exchange between the foreign currency and the U.S. dollar in order to determine the value of the Funds' investments, assets, and liabilities.

Purchases and sales of securities, receipts of income, and payments of expenses are converted at the prevailing rate of exchange on the respective date of such transactions. The accounting records of a Fund do not differentiate that portion of the results of operations resulting from changes in foreign exchange rates from those resulting from changes in the market prices of the relevant securities. Each portion contributes to the net realized gains or losses from transactions in investment securities and net change in unrealized appreciation/ depreciation in the value of investment securities. Net currency gains or losses, realized and unrealized, that are a result of differences between the amount recorded on a Fund's accounting records, and the U.S. dollar equivalent amount actually received or paid for interest or dividends, receivables and payables for investments sold or purchased, and foreign cash, are included in the Statements of Operations under "Net realized gains (losses) from foreign currency transactions"

and "Net change in unrealized appreciation/depreciation in the value of translation of assets and liabilities denominated in foreign currencies", if applicable.

(d) Options

Certain Funds purchased and/or wrote options on futures contracts and/or indexes. Such option investments are utilized to manage currency exposures and/or hedge against movements in the values of the foreign currencies in which the portfolio securities are denominated, to gain exposure to and/or hedge against changes in interest rates, to capitalize on the return-generating features of selling options (short volatility) while simultaneously benefiting from the risk-control attributes associated with buying options (long volatility), and/or to generate consistent outperformance, as applicable, to meet each Fund's stated investment strategies as shown in the Fund's Prospectus.

Options traded on an exchange are valued at the settlement price provided by an independent pricing service as approved by the Board. If a settlement price is not available, such options are valued at the last quoted sale price, if available, and otherwise at the average bid/ask price. Exchange-traded options are generally categorized as Level 1 investments within the hierarchy. Options traded in the over-the-counter ("OTC") market, and which are not quoted by NASDAQ, are valued at the last quoted bid price, and are generally categorized as Level 2 investments within the hierarchy. The value of an option position reflects, among other things, the implied price volatility of the underlying investment, the current market value of the underlying investment, the time remaining until expiration of the option, the relationship of the strike price to the market price of the underlying investment, and general market conditions. Options that expire unexercised have no value. American-style options can be exercised at any time prior to the expiration date of the option. European-style options can only be exercised at expiration of the option.

A Fund effectively terminates its right or obligation under an option by entering into a closing transaction. Closing transactions permit a Fund to realize the profit or limit the loss on an option position prior to its exercise or expiration.

If a Fund is unable to affect a closing transaction for an option it purchased, it would have to exercise the option to realize any profit. The inability to enter into a closing purchase transaction for a covered call option written by a Fund could cause material losses because a Fund would be unable to sell the investment used as a cover for the written option until the option expires or is exercised.

The writing and purchasing of options is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. Imperfect correlation between options and the securities markets may detract from the effectiveness of attempted hedging. Transactions using OTC options (other than options purchased by a Fund) expose a Fund to counterparty risk. To the extent required by Securities and Exchange Commission ("SEC") guidelines, a Fund will not enter into any options transactions unless it owns either (i) an offsetting ("covered") position in securities, other options, or futures or (ii) cash and liquid obligations with a value sufficient at all times to cover its potential obligations to the extent not covered as provided in (i) above. A Fund will also earmark or set aside cash and/or appropriate liquid assets in a segregated custodial account as required by SEC and U.S. Commodity Futures Trading Commission regulations. Assets used as cover or held in a segregated account cannot be sold while the position in the corresponding option or futures contract is open, unless they are replaced with similar assets. As a result, the commitment of a large portion of a Fund's assets to earmarking or segregated accounts as a cover could impede portfolio management or a Fund's ability to meet redemption requests or other current obligations.

The Funds' purchased options are disclosed in the Statements of Assets and Liabilities under "Investment securities, at value", in the Statement of Investments and in the Statements of Operations under "Net realized gains (losses) from transactions in investment securities" and "Net change in unrealized appreciation/depreciation in the value of investment securities", as applicable.

(e) Swap Contracts

Total Return Swap Contracts — Certain Funds entered into total return swap contracts to take long and short positions in equities, to obtain exposure to a foreign market and/or foreign index without owning such securities or investing directly in that foreign market and/or foreign index, as applicable, to meet each Fund's stated investment strategies as shown in the Fund's Prospectus. Total return swap contracts are agreements in which the Fund and the counterparty each agree to pay the other party the difference between the relative investment performance that would have been achieved if the notional amount of the total return swap contract had been invested in the particular foreign market and/or foreign indices and the return for payments equal to the fixed or floating rate of interest. The counterparty to a total return swap contract is a financial institution. Each Fund has segregated liquid assets to cover its obligations under the total return swap contract.

Total return swaps are designed to function as a portfolio of direct investments in long and short equity positions. This means that a Fund has the ability to trade in and out of these long and short positions within the swap and will receive the economic benefits and risks equivalent to direct investment in these positions, subject to certain adjustments due to events related to the counterparty. Benefits and risks include capital appreciation (depreciation), corporate actions and dividends

received and paid, all of which are reflected in the swap's market value.

The market value also includes interest charges and credits ("financing fees") related to the notional values of the long and short positions and cash balances within the swap. These interest charges and credits are based on a specified benchmark rate plus or minus a specified spread determined based upon the country and/or currency of the positions in the portfolio. Positions within the swap and financing fees are reset periodically. During a reset, any unrealized appreciation (depreciation) on positions and accrued financing fees become available for cash settlement between a Fund and the counterparty. Cash settlement in and out of the swap may occur at a reset date or any other date, at the discretion of a Fund and the counterparty, over the life of the agreement. Certain swaps have no stated expiration and can be terminated by either party at any time.

Total return swap contracts are marked-to-market daily based on valuations from an independent pricing service. An independent pricing service can utilize daily swap curves and models that incorporate a number of market data factors, such as, but not limited to, discounted cash flows, trades, and values of the underlying reference instruments, such as the foreign market and /or foreign index.

Total return swap contracts are generally categorized as Level 2 investments within the hierarchy.

The Funds' swap agreements are disclosed in the Statements of Assets and Liabilities under "Swap contracts, at value" for over-the counter ("OTC") swaps and under "Receivable/payable for variation margin on centrally cleared swap contracts" for centrally cleared swaps, in a table in the Statement of Investments, and in the Statements of Operations under "Net realized gains (losses) from expiration or closing of swap contracts" and "Net change in unrealized appreciation/depreciation in the value of swap contracts", as applicable.

(f) Forward Foreign Currency Contracts

Certain Funds entered into forward foreign currency contracts in connection with planned purchases or sales of securities denominated in a foreign currency and/or to hedge the U.S. dollar value of portfolio securities denominated in a foreign currency, to express a view on a foreign currency vs. the U.S. dollar or other foreign currency and/or to hedge the U.S. dollar value of portfolio securities denominated in a foreign currency, as applicable, to meet each Fund's stated investment strategies as shown in the Fund's Prospectus.

A forward foreign currency contract involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. Forward foreign currency contracts are generally valued at the mean of the last quoted bid and ask prices, as provided by an independent pricing service approved by the Board of Trustees, and are generally categorized as Level 2

investments within the hierarchy. The market value of a forward foreign currency contract fluctuates with changes in foreign currency exchange rates. All commitments are marked-to-market daily at the applicable exchange rates and any resulting unrealized appreciation or depreciation is recorded. Realized gains or losses are recorded at the time the forward foreign currency contract matures or at the time of delivery of the currency. Forward foreign currency contracts entail the risk of unanticipated movements in the value of the foreign currency relative to the U.S. dollar, and the risk that the counterparties to the contracts may be unable to meet their obligations under the contract.

The Funds' forward foreign currency contracts are disclosed in the Statements of Assets and Liabilities under "Unrealized appreciation/(depreciation) on forward foreign currency contracts", in a table in the Statement of Investments and in the Statements of Operations under "Net realized gains (losses) from settlement of forward foreign currency contracts" and "Net change in unrealized appreciation/depreciation in the value of forward foreign currency contracts", as applicable.

(g) Futures Contracts

Certain Funds are subject to equity price and/or interest rate risk in the normal course of pursuing their objectives. Certain Funds entered into financial futures contracts ("futures contracts") to manage currency risk, to equitize cash balances, to more efficiently manage the portfolio, to modify exposure to volatility, to increase or decrease the baseline equity exposure, to gain exposure to and/or hedge against changes in interest rates, for the purpose of reducing active risk in the portfolio, to gain exposure to and/or hedge against the value of equities and/or to gain exposure to foreign currencies, as applicable, to meet each Fund's stated investment strategies as shown in the Fund's Prospectus. Futures contracts are contracts for delayed delivery of securities or currencies at a specific future date and at a specific price or currency amount.

Upon entering into a futures contract, a Fund is required to segregate an initial margin deposit of cash and/or other

assets equal to a certain percentage of the futures contract's notional value. Under a futures contract, a Fund agrees to receive from or pay to a broker an amount of cash equal to the daily fluctuation in value of the futures contract. Subsequent receipts or payments, known as "variation margin" receipts or payments, are made each day, depending on the fluctuation in the fair value of the futures contract, and are recognized by a Fund as unrealized gains or losses. Futures contracts are generally valued daily at their settlement price as provided by an independent pricing service approved by the Board of Trustees, and are generally categorized as Level 1 investments within the hierarchy.

A "sale" of a futures contract means a contractual obligation to deliver the securities or foreign currency called for by the contract at a fixed price or amount at a specified time in the future. A "purchase" of a futures contract means a contractual obligation to acquire the securities or foreign currency at a fixed price at a specified time in the future. When a futures contract is closed, a Fund records a realized gain or loss equal to the difference between the value of the futures contract at the time it was opened and its value at the time it was closed.

Should market conditions change unexpectedly, a Fund may not achieve the anticipated benefits of futures contracts and may realize a loss. The use of futures contracts for hedging purposes involves the risk of imperfect correlation in the movements in the price of the futures contracts and the underlying assets. A Fund's investments in futures contracts entail limited counterparty credit risk because a Fund invests only in exchange-traded futures contracts, which are settled through the exchange and whose fulfillment is guaranteed by the credit of the exchange.

The Funds' futures contracts are reflected in the Statements of Assets and Liabilities under "Receivable/Payable for variation margin on futures contracts", in a table in the Statement of Investments and in the Statements of Operations under "Net realized gains (losses) from expiration or closing of futures contracts" and "Net change in unrealized appreciation/depreciation in the value of futures contracts", as applicable.

The following is a summary of the Funds' derivative instruments categorized by risk exposure as of December 31, 2020:

Fair Values of Derivatives not Accounted for as Hedging Instruments as of December 31, 2020:

Amounts designated as "-" are zero or have been rounded to zero.

- (a) Includes cumulative appreciation/(depreciation) of futures contracts as reported in the Statement of Investments. Only current day's variation margin is reported within the Statements of Asset and Liabilities.
- (b) Swap contracts are included in the table at value, with the exception of centrally cleared swap contracts which are included in the table at unrealized appreciation/(depreciation). For centrally cleared swaps, only the variation margin on swap contracts is reported in the Statements of Asset and Liabilities.

The Funds are required to disclose information about offsetting and related arrangements to enable users of the financial statements to understand the effect of those arrangements on the Funds' financial position. In order to better define its contractual rights and to secure rights that will help certain Funds mitigate their counterparty risk, certain Funds entered into an International Swaps and Derivatives Association, Inc. Master Agreement ("ISDA Master Agreement") or a similar agreement with each of their derivative contract counterparties. An ISDA Master Agreement is a bilateral agreement between certain Funds and a counterparty that governs OTC derivatives and forward foreign currency contracts and typically contains, among other things, collateral posting items, if applicable, and netting provisions in the event of a default and/or termination event. Under an ISDA Master Agreement, certain Funds may, under certain circumstances, offset with the counterparty certain derivative financial instrument's payables and/or receivables with collateral held and/or posted and create one single net payment. The provisions of the ISDA Master Agreement typically permit a single net payment in the event of default (close-out netting) including the bankruptcy or insolvency of the counterparty. However, bankruptcy or insolvency laws of a particular jurisdiction may impose restrictions on or prohibitions against the right of offset in bankruptcy, insolvency or other events. The counterparty is a financial institution.

At December 31, 2020, certain Funds may have entered into futures contracts. The futures contract agreements do not provide for netting arrangements.

For financial reporting purposes, certain Funds do not offset derivative assets and derivative liabilities that may be subject to netting arrangements on the "Statements of Assets and Liabilities."

The following tables set forth certain Funds' net exposure by counterparty for forward foreign currency contracts and OTC swap contracts, as applicable, that are subject to enforceable master netting arrangements or similar arrangements as of December 31, 2020:

(h) Securities Lending

During the year ended December 31, 2020, certain Funds entered into securities lending transactions. To generate additional income, the Funds lent their portfolio securities, up to 33 1/3% of the total assets of a Fund, to brokers, dealers, and other financial institutions.

JPMorgan serves as securities lending agent for the securities lending program for the Funds. Securities lending transactions are considered to be overnight and continuous and can be terminated by a Fund or the borrower at any time.

The Funds receive payments from JPMorgan equivalent to any dividends and/or interest while on loan, in lieu of income which is included as "Dividend income" and/or "Interest income", as applicable, on the Statements of Operations. The Funds also receive interest that would have been earned on the securities loaned while simultaneously seeking to earn income on the investment of cash collateral or receiving a fee with respect to the receipt of non-cash collateral. Securities lending income includes any fees charged to borrowers less expenses associated with the loan. Income from the securities lending program is recorded when earned from JPMorgan and reflected in the Statements of Operations under "Income from securities lending." There may be risks of delay or restrictions in recovery of the securities or disposal of collateral should the borrower of the securities fail financially. Loans are made, however, only to borrowers deemed by JPMorgan to be of good standing and creditworthy. Loans are subject to termination by the Funds or the borrower at any time, and, therefore, are not considered to be illiquid investments. For Funds to which JPMorgan is not an affiliate, JPMorgan receives a fee based on a percentage of earnings (less any rebates paid to the borrower) derived from the investment of cash collateral, or a percentage of the fee paid by the borrower for loans collateralized by noncash collateral. For Funds to which JPMorgan is an affiliate, JPMorgan receives a flat fee based on a percentage of the market value of loaned securities.

In accordance with guidance presented in FASB Accounting Standards Update 2014-11, Balance Sheet (Topic) 860: Repurchaseto-Maturity Transactions, Repurchase Financings, and Disclosures, liabilities under the outstanding securities lending transactions as of December 31, 2020, which were comprised of repurchase agreements purchased with cash collateral, were as follows:

Presented in the Statements of Assets

Amounts of Liabilities

Fund	and Liabilities
Large Cap Growth	\$ 8,880,273
U.S. Core	10,723,445
U.S. Equity Income	3,082,695
Mid Cap Value	10,450,614
Small Cap Growth	13,781,940
Small Cap Value	11,141,488
Small Company	26,302,993
Discovery	48,544,410

The Trust's securities lending policies and procedures require that the borrower (i) deliver cash or U.S. Government securities as collateral with respect to each new loan of U.S. securities, equal to at least 102% of the value of the portfolio securities loaned, and with respect to each new loan of non-U.S. securities, collateral of at least 105% of the value of the portfolio securities loaned; and (ii) at all times thereafter markto-market the collateral on a daily basis so that the market value of such collateral is at least 100% of the value of securities loaned. Cash collateral received is generally invested in joint repurchase agreements and shown in the Statement of Investments and included in calculating the Fund's total assets. U.S. Government securities received as collateral, if any, are held in safe-keeping by JPMorgan or The Bank of New York Mellon and cannot be sold or repledged by the Funds and accordingly are not reflected in the Fund's total assets. For additional information on the non-cash collateral received, if any, please refer to the Statement of Investments.

The Securities Lending Agency Agreement between the Trust and JPMorgan provides that in the event of a default by a borrower with respect to any loan, the Fund may terminate

the loan and JPMorgan will exercise any and all remedies provided under the applicable borrower agreement to make the Fund whole. These remedies include purchasing replacement securities by applying the collateral held from the defaulting borrower against the purchase cost of the replacement securities. If, despite such efforts by JPMorgan to exercise these remedies, the collateral is less than the purchase cost of the replacement securities, JPMorgan is responsible for such shortfall, subject to certain limitations which are set forth in detail in the Securities Lending Agency Agreement.

At December 31, 2020, the Securities Lending Agency Agreement does not permit the Funds to enforce a netting arrangement.

(i) Joint Repurchase Agreements

During the year ended December 31, 2020, certain Funds, along with other series of the Trust, pursuant to procedures adopted by the Board of Trustees and applicable guidance from the SEC, transferred cash collateral received from securities lending transactions, through a joint account at JPMorgan, the Funds' custodian, the daily aggregate balance of which is

invested in one or more joint repurchase agreements ("repo" or collectively "repos") collateralized by U.S. Treasury or federal agency obligations. For repos, each Fund participates on a pro rata basis with other clients of JPMorgan in its share of the underlying collateral under such repos and in its share of proceeds from any repurchase or other disposition of the underlying collateral. In repos, the seller of a security agrees to repurchase the security at a mutually agreed-upon time and price, which reflects the effective rate of return for the term of the agreement. For repos, The Bank of New York Mellon or JPMorgan takes possession of the collateral pledged for

investments in such repos. The underlying collateral is valued daily on a mark-to-market basis to ensure that the value is equal to or greater than the repurchase price, including accrued interest. In the event of default of the obligation to repurchase, the Funds have the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation. If the seller defaults and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Funds may be delayed or limited.

Gross Amounts

At December 31, 2020, the joint repos on a gross basis were as follows:

Bank of America NA, 0.08%, dated 12/31/2020, due 1/4/2021, repurchase price \$69,800,620, collateralized by U.S. Government Agency Securities, 4.00%, maturing 3/20/2050; total market value \$71,196,000.

BofA Securities, Inc., 0.08%, dated 12/31/2020, due 1/4/2021, repurchase price \$19,000,169, collateralized by U.S. Government Agency Securities, ranging from 2.00% - 4.00%, maturing 12/25/2029 - 8/25/2050; total market value \$19,380,000.

Cantor Fitzgerald & Co., 0.08%, dated 12/31/2020, due 1/4/2021, repurchase price \$115,014,935, collateralized by U.S. Government Agency and Treasury Securities, ranging from 0.00% - 7.00%, maturing 4/1/2021 - 2/20/2067; total market value \$117,314,192.

CF Secured, LLC, 0.08%, dated 12/31/2020, due 1/4/2021, repurchase price \$51,000,453, collateralized by U.S. Government Agency and Treasury Securities, ranging from 0.00% - 5.00%, maturing 11/30/2022 - 11/20/2070; total market value \$52,020,504.

HSBC Bank plc, 0.10%, dated 12/31/2020, due 1/4/2021, repurchase price \$347,341,670, collateralized by U.S. Government Treasury Securities, ranging from 0.00% - 5.00%, maturing 9/9/2021 - 8/15/2050; total market value \$354,427,338.

NatWest Markets Securities, Inc., 0.08%, dated 12/28/2020, due 1/4/2021, repurchase price \$50,000,078, collateralized by U.S. Government Treasury Securities, ranging from 0.00% - 1.00%, maturing 1/15/2021 - 7/15/2030; total market value \$51,000,806.

Pershing LLC, 0.12%, dated 12/31/2020, due 1/4/2021, repurchase price \$53,000,707, collateralized by U.S. Government Agency and Treasury Securities, ranging from 0.00% - 10.00%, maturing 2/15/2021 - 5/20/2070; total market value \$54,060,000.

At December 31, 2020, certain Funds' investment in joint repos was subject to an enforceable netting arrangement. The Funds' proportionate holding in joint repos was as follows:

(j) Security Transactions and Investment Income

Security transactions are accounted for on the date the security is purchased or sold. Security gains and losses are calculated on the identified cost basis. Interest income is recognized on the accrual basis and includes, where applicable, the amortization of premiums or accretion of discounts, and is recorded as such on a Fund's Statement of Operations. Dividend income and expenses, as applicable, are recorded on the ex-dividend date and are recorded as such on a Fund's Statement of Operations, except for certain dividends from foreign securities, which are recorded as soon as the Trust is informed on or after the exdividend date.

Foreign income and capital gains may be subject to foreign withholding taxes, a portion of which may be reclaimable, and capital gains taxes at various rates. Under applicable foreign law, a withholding tax may be imposed on interest and dividends paid by a foreign security and capital gains from the sale of a foreign security. Foreign income or capital gains subject to foreign withholding taxes are recorded net of the applicable withholding tax.

For certain securities, including a real estate investment trust ("REIT"), a Fund records distributions received in excess of earnings and profits of such security as a reduction of cost of investments and/or realized gain (referred to as a return of

^{*} At December 31, 2020, the value of the collateral received exceeded the market value of the Fund's proportionate holding in the joint repos. Please refer to the Statement of Investments for the Fund's undivided interest in each joint repo and related collateral.

capital). Additionally, a REIT may characterize distributions it pays as long-term capital gains. Such distributions are based on estimates if actual amounts are not available. Actual distributions of income, long-term capital gain and return of capital may differ from the estimated amounts. A Fund will recharacterize the estimated amounts of the components of distributions as necessary, once the issuers provide information about the actual composition of the distributions. Any portion of a distribution deemed a return of capital is generally not taxable to a Fund.

A Fund records as dividend income the amount characterized as ordinary income and records as realized gain the amount characterized by a REIT as long-term capital gain in the Statements of Operations. The amount characterized as return of capital is a reduction to the cost of investments in the Statements of Assets and Liabilities if the security is still held; otherwise it is recorded as an adjustment to realized gains (losses) from transactions in investment securities in the Statements of Operations. These characterizations are reflected in the accompanying financial statements.

(k) Distributions to Shareholders

Distributions from net investment income, if any, are declared and paid quarterly. Distributions from net realized capital gains, if any, are declared and distributed at least annually. All distributions are recorded on the ex-dividend date.

Dividends and distributions to shareholders are determined in accordance with federal income tax regulations, which may differ from U.S. GAAP. These "book/tax" differences are considered either permanent or temporary. Permanent differences are reclassified within the capital accounts based on their nature for federal income tax purposes; temporary differences do not require reclassification. The permanent differences as of December 31, 2020 are primarily attributable to investments in real estate investment trusts, non-taxable distributions, investments in partnerships, foreign currency gain/loss, merger transactions, net operating loss netting to short-term gains, tax equalization, treatment of notional principal contracts, investments in passive foreign investment companies ("PFICs"), and net operating losses. Temporary differences arise when certain items of income, gain, or loss are recognized in different periods for financial statement and tax purposes; these differences will reverse at some time in the future. The temporary differences as of December 31, 2020 may primarily be attributable to outstanding wash sale loss deferrals, investments in partnerships, treatment of notional principal contracts, and investments in PFICs. These reclassifications have no effect upon the NAV of a Fund. Any distribution in excess of current and accumulated earnings and profits for federal income tax purposes is reported as a return of capital distribution.

Total

Reclassifications for the year ended December 31, 2020 were as follows:

		iotai

(I) Federal Income Taxes

Each Fund elected to be treated as, and intends to qualify each year as, a "regulated investment company" ("RIC") by complying with the requirements of Subchapter M of the U.S. Internal Revenue Code of 1986 (the "Code"), as amended, and to make distributions of net investment income and net realized capital gains sufficient to relieve a Fund from all, or substantially all, federal income taxes. The aforementioned distributions may be made in cash or via consent dividends. Consent dividends, when authorized, become taxable to the shareholders as if they were paid in cash.

A Fund recognizes a tax benefit from an uncertain position only if it is more likely than not that the position is sustainable, based solely on its technical merits and consideration of the relevant taxing authorities' widely understood administrative practices and precedents. Each year, a Fund undertakes an affirmative evaluation of tax positions taken or expected to be taken in the course of preparing tax returns to determine whether it is more likely than not (i.e., greater than 50 percent) that each tax position will be sustained upon examination by a taxing authority. The Funds are not aware of any tax positions for which it is reasonably possible that the total amounts of

unrecognized tax benefits will significantly change in the next twelve months.

The Funds file U.S. federal income tax returns and, if applicable, returns in various foreign jurisdictions in which they invest. Generally, a Fund is subject to examinations by such taxing authorities for up to three years after the filing of the return for the tax period.

Expenses directly attributable to a Fund are charged to that Fund. Expenses not directly attributable to a Fund are allocated proportionally among various or all series of the Trust. Income, fund level expenses, and realized and unrealized gains or losses are allocated to each class of shares of a Fund based on the value of the outstanding shares of that class relative to the total value of the outstanding shares of that Fund. Expenses specific to a class (such as Rule 12b-1 and administrative services fees) are charged to that specific class.

(m) Allocation of Expenses, Income and Gains and Losses

3. Transactions with Affiliates

Under the terms of the Trust's Investment Advisory Agreement, NFA manages the investments of the assets and supervises the daily business affairs of the Funds in accordance with policies and procedures established by the Board of Trustees. NFA has selected the subadviser for each Fund as noted below, and provides investment management evaluation services in monitoring, on an ongoing basis, the performance of the subadvisers.

As of December 31, 2020, the subadviser for each Fund is as follows:

Fund	Subadviser
Equity Dividend	BlackRock Investment Management, LLC
Multi Cap Opportunities	Neuberger Berman Investment Advisers LLC
Defensive Style	AQR Capital Management, LLC
Disciplined Equity	J.P. Morgan Investment Management Inc.
Large Cap Growth	Jacobs Levy Equity Management, Inc. ("Jacobs Levy")(a)

From these fees, pursuant to the subadvisory agreement, NFA pays fees to the unaffiliated subadvisers.

The Trust and NFA have entered into a written Expense Limitation Agreement that limits certain Funds' operating expenses, (excluding any interest, taxes, brokerage commissions and other costs incurred in connection with the purchase and sales of portfolio securities, acquired fund fees and expenses, short sale dividend expenses, Rule 12b-1 fees, fees paid pursuant to an Administrative Services Plan, excludable sub administration fees, other expenditures which are capitalized in accordance with U.S. GAAP, expenses incurred by a Fund in connection with any merger or reorganization, and other non-routine expenses not incurred in the ordinary course of a Fund's business) from exceeding the amounts listed in the following table until April 30, 2021.

		Amount
Fund	Classes	(annual rate)
Equity Dividend	All Classes	0.65%
Disciplined Equity	All Classes	0.44%
Large Cap Growth	All Classes	0.66%
Mid Cap Value	All Classes	0.79%
Small Cap Growth	All Classes	0.94%
Small Cap Value	All Classes	0.91%
Sustainable U.S. Equity	All Classes	0.78%
Discovery	All Classes	0.78%

^{*} Please see above for additional information regarding contractual waivers.

^{**} Voluntary waivers may be discontinued at any time at the discretion of NFA.

The Trust and NFA have entered into a written Expense Limitation Agreement that limits certain Funds' operating expenses, without any exclusions for Rule 12b-1 fees or administrative services fees, from exceeding the amounts listed in the following table until April 30, 2021.

		Amount
Fund	Classes	(annual rate)
U.S. Core	Class I	0.65%
	Class II	0.90%
	Class P	0.75%
	Class Y	0.50%
U.S. Equity Income	Class I	0.92%
	Class II	1.09%
	Class X(a)	0.79%
	Class Z(a)	1.04%

(a) Until April 30, 2022.

NFA may request and receive reimbursement from a Fund for advisory fees waived or other expenses reimbursed by NFA pursuant to the Expense Limitation Agreement at a date not to exceed three years from the month in which the corresponding waiver or reimbursement to the Fund was made. However, no reimbursement may be made unless: (i) the Fund's assets exceed \$100 million and (ii) the total annual expense ratio of the class making such reimbursement is no higher than the

amount of the expense limitation that was in place at the time NFA waived the fees or reimbursed the expenses and does not cause the expense ratio to exceed the current expense limitation. Reimbursement by a Fund of amounts previously waived or reimbursed by NFA is not permitted except as provided for in the Expense Limitation Agreement. The Expense Limitation Agreement may be changed or eliminated only with the consent of the Board of Trustees.

As of December 31, 2020, the cumulative potential reimbursements for certain Funds, listed by the period or year in which NFA waived fees or reimbursed expenses to certain Funds are:

Fund	Fiscal Year Fiscal Year 2018 Amount 2019 Amount		Fiscal Year 2020 Amount	Total

Amounts designated as "—" are zero or have been rounded to zero.

(a) For the period from October 7, 2019 (commencement of operations) through December 31, 2019.

During the year ended December 31, 2020, no amounts were reimbursed to NFA pursuant to the Expense Limitation Agreement.

NFM, a wholly owned subsidiary of NFS Distributors, Inc. ("NFSDI") (a wholly owned subsidiary of NFS), provides

various administrative and accounting services for the Funds and serves as Transfer and Dividend Disbursing Agent for the Funds. NFM has entered into agreements with third-party service providers to provide certain sub-administration and sub-transfer agency services to the Funds. NFM pays the service providers a fee for these services.

Under the terms of a Joint Fund Administration and Transfer Agency Agreement, the fees for such services are based on the sum of the following: (i) the amount payable by NFM to its sub-administrator and sub-transfer agent; and (ii) a percentage of the combined average daily net assets of the Trust and Nationwide Mutual Funds ("NMF"), a Delaware statutory trust and registered investment company that is affiliated with the Trust, according to the following fee schedule.

Combined Fee Schedule

Up to \$25 billion	0.025%
\$25 billion and more	0.020%

For the year ended December 31, 2020, NFM earned an aggregate of \$2,439,940 in fees from the Funds under the Joint Fund Administration and Transfer Agency Agreement.

In addition, the Trust pays out-of-pocket expenses reasonably incurred by NFM in providing services to the Funds and the Trust, including, but not limited to, the cost of pricing services that NFM utilizes.

Under the terms of the Joint Fund Administration and Transfer Agency Agreement and a letter agreement between NFM and the Trust, the Trust has agreed to reimburse NFM for certain costs related to each Fund's portion of ongoing administration, monitoring and annual (compliance audit) testing of the Trust's Rule 38a-1 Compliance Program subject to the pre-approval of the Trust's Audit Committee. These costs are allocated among the series of the Trust based upon their relative net assets. For the year ended December 31, 2020, the Funds' aggregate portion of such costs amounted to \$21,059.

Under the terms of a Distribution Plan pursuant to Rule 12b-1 under the 1940 Act, Nationwide Fund Distributors LLC ("NFD"), the Funds' principal underwriter, is compensated by the Funds for expenses associated with the distribution of certain classes of shares of the Funds. NFD is a wholly owned subsidiary of NFSDI. These fees are based on average daily net assets of the respective class of the Funds at an annual rate as listed in the following table.

Fund	Class II Shares	Class Z Shares

The Trust and NFD have entered into a written contract waiving distribution fees for Class II shares of the Funds according to the following schedule until at least April 30, 2021:

	Distribution Fee Waiver
Fund	(Annual Rate)
U.S. Equity Income(a)	0.08%
Sustainable U.S. Equity	0.16%
(a) Until July 31, 2021.	

During the year ended December 31, 2020, each Fund's waiver of such distribution fees by NFD, for which NFD shall not be entitled to reimbursement by the Funds for any amount waived, were as follows:

Fund	Amount
U.S. Equity Income	\$ 103,098
Sustainable U.S. Equity	161,044

Under the terms of an Administrative Services Plan, the Funds pay fees to servicing organizations, such as broker-dealers, including NFS, and financial institutions, that agree to provide administrative support services to the shareholders of certain classes. These services may include, but are not limited to, the following: (i) establishing and maintaining shareholder accounts; (ii) processing purchase and redemption transactions; (iii) arranging bank wires; (iv) performing shareholder sub-accounting; (v) answering inquiries regarding the Funds; and (vi) other such services. These fees are calculated at an annual rate of up to 0.25% of the average daily net assets of Class I shares of the Fund, up to 0.20% of the average daily net assets of Class IV shares and up to 0.12% of the average daily net assets of Class X and Class Z shares of each Fund.

For the year ended December 31, 2020, the effective rates for administrative services fees were as follows:

Fund	Class I	Class II	Class IV	Class X	Class Z
Equity Dividend	0.15%	0.15%	0.15%	N/A	N/A

4. Line of Credit and Interfund Lending

Effective July 9, 2020, the Trust and NMF (together, the "Trusts") have renewed the credit agreement with JPMorgan, The Bank of New York Mellon, and Wells Fargo Bank National Association (the "Lenders"), permitting the Trusts, in aggregate, to borrow up to \$100,000,000. Advances taken by a Fund under this arrangement would be primarily for temporary or emergency purposes, including the meeting of redemption requests that otherwise might require the untimely disposition of securities, and are subject to the Fund's borrowing restrictions. The line of credit requires a commitment fee of 0.15% per year on \$100,000,000. Such commitment fee shall be payable quarterly in arrears on the last business day of each March, June, September and December and on the termination date. Effective July 9, 2020, borrowings under this arrangement accrue interest at a rate of 1.25% per annum plus the higher

of (a) if ascertainable and available, the Eurodollar Rate as of such day for a transaction settling two business days after such day, (b) the Federal Funds Effective Rate in effect on such day and (c) the Overnight Bank Funding Rate in effect on such day: provided, however, that if the Federal Funds Rate calculated in accordance with the foregoing shall be less than zero, such rate shall be deemed to be zero percent (0%) for the purposes of this Agreement. If an Index Rate Unavailability Event occurs in respect of the Eurodollar Rate, the Federal Funds Rate shall be determined without reference to clause (a) of this definition. Prior to July 9, 2020, borrowings under this arrangement accrued interest at a rate of 1.00% per annum plus the higher of (a) the one-month London Interbank Offered Rate or (b) the Federal Funds Rate. Interest costs, if any, would be shown on the Statement of Operations. No compensating balances are required under the terms of the line of credit. In addition,

a Fund may not draw any portion of the line of credit that is provided by a bank that is an affiliate of the Fund's subadviser, if applicable. In addition to any rights and remedies of the Lenders provided by law, each Lender has the right, upon any amount becoming due and payable by the Fund, to set-off as appropriate and apply all deposits and credits held by or owing to such Lender against such amount, subject to the terms of the credit agreement. The line of credit is renewed annually, and next expires on July 8, 2021. During the year ended December 31, 2020, the Funds had no borrowings under the line of credit.

Pursuant to an exemptive order issued by the SEC (the "Order"), the Funds may participate in an interfund lending program among Funds managed by NFA. The program allows

the participating Funds to borrow money from and loan money to each other for temporary purposes, subject to the conditions in the Order. A loan can only be made through the program if the interfund loan rate on that day is more favorable to both the borrowing and lending Funds as compared to rates available through short-term bank loans or investments in overnight repurchase agreements and money market funds, respectively, as detailed in the Order. Further, a Fund may participate in the program only if and to the extent that such participation is consistent with its investment objectives and limitations. Interfund loans have a maximum duration of seven days and may be called on one business day's notice. During the year ended December 31, 2020, none of the Funds engaged in interfund lending.

5. Investment Transactions

For the year ended December 31, 2020, purchases and sales of securities (excluding short-term securities) were as follows:

Fund	Purchases	Sales
Equity Dividend	\$ 194,248,874	\$ 166,054,927
Multi Cap Opportunities	46,344,316	68,507,483
Defensive Style	183,006,498	278,425,592
Disciplined Equity	17,531,259	8,797,463
Large Cap Growth	352,067,688	388,756,498
U.S. Core	148,376,726	145,095,588
U.S. Equity Income	429,790,326	506,880,123
Mid Cap Value	289,567,847	312,812,697
Small Cap Growth	86,533,572	101,018,618
Small Cap Value	78,419,644	85,123,483
Small Company	175,693,213	211,450,694
Sustainable U.S. Equity	111,466,453	125,772,952
Real Estate	167,289,789	192,538,446
Discovery	517,707,579	602,515,173

6. Portfolio Investment Risks

Risks Associated with Foreign Securities and Currencies

Investments in securities of foreign issuers carry certain risks not ordinarily associated with investments in securities of U.S. issuers. These risks include foreign currency fluctuations, future disruptive political and economic developments and the possible imposition of exchange controls or other unfavorable foreign government laws and restrictions. In addition, investments in certain countries may carry risks of expropriation of assets, confiscatory taxation, political or social instability, or diplomatic developments that adversely affect investments in those countries.

Certain countries also may impose substantial restrictions on investments in their capital markets by foreign entities, including restrictions on investments in issuers in industries deemed sensitive to relevant national interests. These factors may limit the investment opportunities available and result in a

lack of liquidity and high price volatility with respect to securities of issuers from developing countries.

Risks Associated with REIT and Real Estate Investments

Investments in REITs and in real estate securities carry certain risks associated with direct ownership of real estate and with the real estate industry in general. These risks include possible declines in the value of real estate, possible lack of availability of mortgage funds, unexpected vacancies of properties, and the relative lack of liquidity associated with investments in real estate.

Risks Associated with Interest Rates

Prices of fixed-income securities generally increase when interest rates decline and decrease when interest rates increase. Prices of longer-term securities generally change more in response to interest rate changes than prices of shorter-term securities. To the extent a Fund invests a substantial portion of its assets in fixed-income securities with longer-term maturities, rising interest rates are more likely to cause the value of the Fund's investments to decline significantly.

Risks Associated with Social Policy

The Fund's social policy may cause it to underperform similar mutual funds that do not have a social policy. This can occur because:

- undervalued stocks that do not meet the social criteria could outperform those that do;
- economic or political changes could make certain companies less attractive for investment; or
- the social policy could cause the Fund to seek or avoid stocks that subsequently perform well.

7. Indemnifications

Under the Trust's organizational documents, the Trust's Officers and Trustees are indemnified by the Trust against certain liabilities arising out of the performance of their duties to the Trust. In addition, the Trust has entered into indemnification agreements with its Trustees and certain of its Officers. Trust Officers receive no compensation from the Trust for serving as its Officers. In addition, in the normal course of business, the Trust enters into contracts with its vendors and others that provide for general indemnifications. The Trust's maximum liability under

these arrangements is unknown, as this would involve future claims made against the Trust. Based on experience, however, the Trust expects the risk of loss to be remote.

8. New Accounting Pronouncements and Other Matters

On July 27, 2017, the United Kingdom's Financial Conduct Authority announced its intention to cease sustaining LIBOR after 2021. US Federal Reserve Bank's Alternative Reference Rates Committee (the "SOFR committee") selected Secured Overnight Financing Rate (SOFR) as the preferred alternative to the U.S. dollar LIBOR. The SOFR committee has noted the stability of the repurchase market on which the rate is based. New York Federal Reserve began publication of the rate in April 2018. Markets are slowly developing in response to these new reference rates. Uncertainty related to the liquidity impact of the change in rates, and how to appropriately adjust these rates at the time of transition, poses risks for the Fund. These risks are likely to persist until new reference rates and fallbacks for both legacy and new instruments and contracts are commercially accepted and market practices become settled. Management is currently evaluating the implications of the change and its impact on financial statement disclosures and reporting requirements.

9. Recaptured Brokerage Commissions and Investment Research Reimbursement

The Funds have entered into agreements with brokers whereby the brokers will return a portion of the Funds' brokerage commissions on behalf of certain Funds. Such amounts, under such agreements, are included in net realized gains (losses) from transactions in investment securities presented in the Funds' Statements of Operations. During the year ended December 31, 2020, the Funds recaptured the following amounts of brokerage commissions:

Fund	Amount
Equity Dividend	\$ _
Multi Cap Opportunities	2,813
Defensive Style	_
Disciplined Equity	8
Large Cap Growth	376
U.S. Core	_
U.S. Equity Income	119
Mid Cap Value	23,736
Small Cap Growth	252
Small Cap Value	3,643
Small Company	_
Sustainable U.S. Equity	_
Real Estate	333
Discovery	8,726

Amounts designated as "—" are zero or have been rounded to zero.

Massachusetts Financial Services Company, a subadviser to the Large Cap Growth(the "Subadviser"), has voluntarily undertaken to reimburse Large Cap Growth from its own resources on a quarterly basis for the cost of investment research embedded in the cost of the Large Cap Growth's securities trades. This agreement may be rescinded at any time. For the year ended December 31, 2020, these reimbursements amounted to \$23,404, which is included in net realized gains (losses) from transactions in investment securities presented in Large Cap Growth's Statement of Operations.

10. Mergers

At close of business on September 14, 2020, NVIT Mellon Dynamic U.S. Equity Income Fund ("Acquiring Fund") acquired all of the net assets of NVIT Multi-Manager Large Cap Value Fund ("Target Fund"), each a series of the Trust, pursuant to a plan of reorganization approved by the Board of Trustees at a meeting held on June 10, 2020. The reorganization of the Target Fund was not required to be approved by the shareholders of the Target Fund. The purpose of the reorganization was to combine funds managed by NFA that had comparable objectives and investment strategies. The reorganization was

accomplished by a tax free exchange of 8,521,906 shares of the Acquiring Fund, valued at \$107,715,821, for the assets of the Target Fund. The investment portfolio of the Target Fund, with a fair value of \$105,573,505 and identified cost of \$100,978,208 at September 14, 2020, was the principal asset acquired by the Acquiring Fund. The net assets of the Acquiring Fund immediately before the acquisition were \$307,063,811. The net assets of the Acquiring Fund immediately following the acquisition were \$414,779,632. For financial reporting

purposes, assets received and shares issued by the Acquiring Fund were recorded at the then current fair values; however, the cost basis of the investments received was carried forward to align ongoing reporting of the Acquiring Fund's realized and unrealized gains and losses with amounts distributable to shareholders for tax purposes. Shareholders of Class I and Class II shares of the Target Fund received a number of shares proportional to their ownership of Class X and Class Z of the Acquiring Fund.

The following are summaries of Shares Outstanding, Net Assets, Net Asset Value Per Share and Net Unrealized Appreciation/ (Depreciation) immediately before and after each of the reorganizations.

Fund/Class	Shares Outstanding	Net Assets	Net Asset Value Per Share	Net Unrealized Appreciation/ (Depreciation)
Target Fund				
NVIT Multi-Manager Large Cap Value Fund				\$4,595,298
Class I	7,170,550	\$28,962,269	\$4.0391	
Class II	19,859,579	78,753,552	3.9655	
Class X	_	_	_	
Class Z	_	_	_	

Acquiring Fund

7 to qui ing 1 una				
NVIT Mellon Dynamic U.S. Equity Income Fund				\$61,542,265
Class I	12,704,237	\$161,860,781	\$12.7407	
Class II	11,519,151	145,193,207	12.6045	
Class X	385	4,912	12.7412	
Class Z	390	4,911	12.6030	
After Reorganization				
NVIT Mellon Dynamic U.S. Equity Income Fund				\$66,137,563
Class I	12,704,237	\$161,860,781	\$12.7407	
Class II	11,519,151	145,193,207	12.6045	
Class X	2,273,528	28,967,181	12.7412	
Class Z	6,249,153	78,758,463	12.6030	

The following pro forma information for the year ended December 31, 2020 is provided as though the reorganizations had been completed on January 1, 2020, the beginning of the annual reporting period for the Fund:

- Net investment income (loss) \$5,903,470;
- Net gains (losses) on investments \$(19,090,430);
- Net change in unrealized appreciation/depreciation \$21,009,640; and
- Net increase (decrease) in net assets resulting from operations \$7,822,680.

Because the Fund's combined investment portfolio has been managed as a single integrated portfolio since the reorganization was completed, it is not practical to separate the amounts of revenue and earnings of the Target Fund that have been included in the Acquiring Fund's Statement of Operations since September 14, 2020.

11. Federal Tax Information

The tax character of distributions paid during the year ended December 31, 2020 was as follows:

	Distributio	Distributions paid from			
Fund	Ordinary Income*	Net Long-Term Capital Gains	Total Taxable Distributions	Return of Capital	Total Distributions Paid

As of December 31, 2020, for federal income tax purposes, the Funds have capital loss carryforwards available to offset future capital gains, if any, to the extent provided by the U.S. Treasury regulations and in any given year may be limited due to large shareholder redemptions or contributions. Capital loss carryforwards do not expire. The following table represents capital loss carryforwards available as of December 31, 2020.

Fund	Amount
U.S. Equity Income	\$(44,415,417)
Mid Cap Value	(21,269,371)
Small Cap Value	(8,754,434)
Real Estate	(14,184,752)

12. Coronavirus (COVID-19) Pandemic

The global pandemic outbreak of an infectious respiratory illness caused by a novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption, affecting the global economy and the financial health of individual companies in significant and unforeseen ways. COVID-19 has resulted in, among other things, travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, prolonged quarantines, significant disruptions to business operations, market closures, cancellations and restrictions, supply chain disruptions, lower consumer demand, and significant volatility and declines in global financial markets, as well as general concern and uncertainty. Instability in the United States, European and other credit markets has made it more difficult for borrowers to obtain financing or refinancing on attractive terms or at all. In particular, because of the current conditions in the credit markets, borrowers may be subject to increased interest expenses for borrowed money and tightening underwriting standards. In addition, stock prices as well as yield could be negatively impacted to the extent that issuers of equity securities cancel or announce the suspension of dividends or share buybacks.

The COVID-19 pandemic could continue to inhibit global, national and local economic activity, and constrain access to capital and other sources of funding. Various recent government

interventions have been aimed at curtailing the distress to financial markets caused by the COVID-19 outbreak. There can be no guarantee that these or other economic stimulus plans (within the United States or other affected countries throughout the world) will be sufficient or will have their intended effect. In addition, an unexpected or quick reversal of such policies could increase market volatility, which could adversely affect a Fund's investments. The duration and future impact of COVID-19 are currently unknown, which may exacerbate the other risks that apply to a Fund and could negatively affect Fund performance and the value of your investment in a Fund.

13. Subsequent Events

On December 18, 2020, the Board of Trustees approved the renaming of certain Funds. The change will be effective April 30, 2021 (the "Effective Date"). As of the Effective Date, BlackRock NVIT Equity Dividend Fund, NVIT J.P. Morgan Disciplined Equity Fund and Neuberger Berman NVIT Multi Cap Opportunities Fund will be renamed "NVIT BlackRock Equity Dividend Fund", "NVIT J.P. Morgan U.S. Equity Fund" and "NVIT Neuberger Berman Multi Cap Opportunities Fund", respectively.

Management has evaluated the impact of subsequent events on the Funds and has determined that there are no additional subsequent events requiring recognition or disclosure in the financial statements. To the Board of Trustees of Nationwide Variable Insurance Trust and Shareholders of BlackRock NVIT Equity Dividend Fund, Neuberger Berman NVIT Multi Cap Opportunities Fund, NVIT AQR Large Cap Defensive Style Fund, NVIT J.P. Morgan Disciplined Equity Fund, NVIT Jacobs Levy Large Cap Growth Fund, NVIT Mellon Dynamic U.S. Core Fund, NVIT Mellon Dynamic U.S. Equity Income Fund, NVIT Multi-Manager Mid Cap Value Fund, NVIT Multi-Manager Small Cap Growth Fund, NVIT Multi-Manager Small Cap Value Fund, NVIT Multi-Manager Small Company Fund, NVIT Newton Sustainable U.S. Equity Fund, NVIT Real Estate Fund and NVIT Wells Fargo Discovery Fund

Opinions on the Financial Statements

We have audited the accompanying statements of assets and liabilities, including the statements of investments, of the funds listed in the table below (fourteen of the funds constituting Nationwide Variable Insurance Trust, hereafter collectively referred to as the "Funds") as of December 31, 2020, the related statements of operations and of changes in net assets for each of the periods indicated in the table below, including the related notes, and the financial highlights for each of the periods indicated therein (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds as of December 31, 2020, the results of each of their operations and the changes in each of their net assets for the periods indicated in the table below, and each of the financial highlights for each of the periods indicated therein, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinions

These financial statements are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2020 by correspondence with the custodian and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

/s/PricewaterhouseCoopers LLP Philadelphia, Pennsylvania February 18, 2021

We have served as the auditor of one or more investment companies of Nationwide Funds, which includes the investment companies of Nationwide Variable Insurance Trust, since 1997.

Continuation of Advisory (and Sub-Advisory) Agreements

The Trust's investment advisory agreements with its Investment Adviser (the "Adviser") and its Sub-Advisers (together, the "Advisory Agreements") must be approved for each series of the Trust (individually a "Fund" and collectively the "Funds") for an initial term no greater than two years, and may continue in effect thereafter only if such continuation is approved at least annually, (i) by the vote of the Trustees or by a vote of the shareholders of the Fund in question, and (ii) by the vote of a majority of the Trustees who are not parties to the Advisory Agreements or "interested persons" of any party thereto (the "Independent Trustees"), cast in person at a meeting called for the purpose of voting on such approval. As a result of the current and potential effects of the COVID-19 pandemic, however, the Securities and Exchange Commission issued an exemptive order suspending the in-person voting requirements of the Investment Company Act of 1940, as amended for approval of investment advisory agreements, subject to certain conditions.

The Trustees relied on this order in connection with their 2020. meeting to approve the Advisory Agreements.

The Board of Trustees (the "Board") has five regularly scheduled meetings each year and takes into account throughout the year matters bearing on the Advisory Agreements. The Board and its standing committees consider at each meeting factors that are relevant to the annual continuation of each Fund's Advisory Agreements, including investment performance, Sub-Adviser updates and reviews, reports with respect to compliance monitoring and the services and support provided to the Fund and its shareholders.

In preparation for the Board's meetings in 2020 to consider the continuation of the Advisory Agreements, the Trustees requested and were furnished with a wide range of information to assist in their deliberations. These materials included:

- · A summary report for each Fund that sets out a variety of information regarding the Fund, including performance, expense, and profitability information for the past three years.
- Reports from Broadridge Financial Solutions, ("Broadridge"), a leading independent source of mutual fund industry data, describing, on a Fund-by-Fund basis, for each Fund's largest share class, the Fund's (a) performance rankings (over multiple periods ended June 30, 2020) compared with performance universes created by Broadridge of similar or peer group funds, and (b) expense rankings comparing the Fund's fees and expenses with expense groups created by Broadridge of similar or peer group funds. An independent consultant retained by the Board provided input to Broadridge as to the composition of the various performance universes, expense groups and peer funds.
- · Information regarding voluntary or contractual expense limitations or reductions and the relationship of expenses to any expense limitation.
- · Information provided by the Adviser as to the Adviser's profitability in providing services under the Advisory Agreements.
- · Information from the Adviser regarding economies of scale and breakpoints, including information provided by the Adviser as to the circumstances under which specific actions intended to share the benefits of economies of scale might be appropriate.

The Trustees met with representatives of the Adviser at the Trustees' regular quarterly meetings in September and December 2020 to discuss matters related to the continuation of the Advisory Agreements. In addition, the Trustees met with independent legal counsel to the Independent Trustees ("Independent Legal Counsel") in October and in November. to review information and materials provided to them, and to formulate requests for additional information. The Trustees submitted supplemental information requests to the Adviser following each meeting. At the Trustees' regular quarterly meeting in December 2020, the Trustees met to give final

consideration to information bearing on the continuation of the Advisory Agreements.

The Trustees considered, among other things, information provided by the Adviser in response to their previous information requests. The Trustees engaged in discussion and consideration among themselves, and with the Adviser, Trust counsel, and Independent Legal Counsel regarding the various factors that may contribute to the determination of whether the continuation of the Advisory Agreements should be approved.

In considering this information with respect to each of the Funds, the Trustees took into account, among other things, the nature, extent, and quality of services provided by the Adviser and relevant Sub-Adviser. In evaluating the Advisory Agreements for the Funds, the Trustees also reviewed information provided by the Adviser concerning the following:

- The terms of the Advisory Agreements and a summary of the services performed by the Adviser and Sub-Advisers.
- The activities of the Adviser in selecting, overseeing, and evaluating each Sub-Adviser; reporting by the Adviser to the Trustees regarding the Sub-Advisers; and steps taken by the Adviser, where appropriate, to identify replacement Sub-Advisers and to put those Sub-Advisers in place.
- The investment advisory and oversight capabilities of the Adviser, including, among other things, its expertise in investment, economic, and financial analysis.
- The Adviser's and Sub-Advisers' personnel and methods; the number of the Adviser's advisory and analytical personnel; general information about the compensation of the Adviser's advisory personnel; the Adviser's and Sub-Advisers' investment processes; the Adviser's risk assessment and risk management capabilities; and the Adviser's valuation and valuation oversight capabilities.
- The financial condition and stability of the Adviser and the Adviser's assessment of the financial condition and stability of the Sub-Advisers.
- Potential ancillary benefits, in addition to fees for serving as investment adviser, derived by the Adviser as a result of being investment adviser for the Funds, including, where applicable, information on fees inuring to the Adviser's affiliates for serving as the Trust's administrator, fund accountant, and transfer agent and fees or other payments relating to shareholder servicing or sub-transfer agency services provided by or through the Adviser or its affiliates.

Based on information provided by Broadridge and the Adviser, the Trustees reviewed expense information for the each of the Funds and the total return investment performance of each of the Funds as well as the performance of peer groups of funds over various time periods.

The Trustees considered that DoubleLine NVIT Total Return Tactical Fund, NVIT AllianzGI International Growth Fund, NVIT AQR Large Cap Defensive Style Fund, NVIT Core Bond Fund,

NVIT Core Plus Bond Fund, NVIT Emerging Markets Fund, NVIT GS International Equity Insights Fund, NVIT GS Large Cap Equity Insights Fund, NVIT GS Small Cap Equity Insights Fund, NVIT iShares® Fixed Income ETF Fund, NVIT iShares® Global Equity ETF Fund, NVIT Jacobs Levy Large Cap Growth Fund, NVIT JP Morgan Disciplined Equity Fund, NVIT JP Morgan Mozaic Multi-Asset Fund, NVIT Mellon Dynamic U.S. Core Fund, NVIT Mellon Dynamic U.S. Equity Income Fund, NVIT Real Estate Fund, NVIT Short Term Bond Fund, and NVIT Wells Fargo Discovery Fund were each shown to pay actual management fees and to have total expense ratios (including 12b-1/non-12b-1 fees) at levels below or equal to their peer group medians or within a generally acceptable range above the Fund's peer group median. In addition, the Trustees considered that, with the exception of the Funds referred to below in this paragraph, each of those Funds was shown to have experienced three-year performance for the period ended June 30, 2020 (or, if shorter, for the period since the Fund's inception) at or above its peer group median, or within the third quintile of its peer group. With respect to NVIT Core Bond Fund, the Trustees noted that the Fund had experienced three-year performance in the fourth quintile of its peer group and considered management's statement that the Fund's underperformance was substantially the result of the Fund's portfolio having a lower allocation to corporate credit risk and higher credit quality compared to its peer group. With respect to NVIT GS International Equity Insights Fund, NVIT GS Large Cap Equity Insights Fund, NVIT GS Small Cap Equity Insights Fund, NVIT iShares® Fixed Income ETF Fund NVIT iShares® Global Equity ETF Fund, NVIT JP Morgan Disciplined Equity Fund, and NVIT JP Morgan Mozaic Multi-Asset Fund, the Trustees considered that these Funds had been relatively recently organized and did not have three years of performance. With respect to NVIT Jacobs Levy Large Cap Growth Fund and NVIT Mellon Dynamic U.S. Equity Income Fund, the Trustees considered that a new subadviser was appointed to the Fund in May 2020 and April 2020, respectively, and additional time was necessary to evaluate each Fund's performance under the new subadviser. The Trustees determined on the basis of all of the information presented to them that the expense and performance information of each of these Funds was consistent with the continuation of the Fund's Advisory Agreement.

With respect to Amundi NVIT Multi-Sector Bond Fund, BlackRock NVIT Managed Global Allocation Fund, Federated NVIT High Income Bond Fund, Neuberger Berman NVIT Multi-Cap Opportunities Fund, NVIT Columbia Overseas Value Fund, NVIT Government Bond Fund, NVIT Government Money Market Fund, NVIT International Equity Fund, NVIT Managed American Funds Asset Allocation Fund, NVIT Newton Sustainable U.S. Equity Fund, and NVIT U.S. 130/30 Equity Fund, the Trustees considered that, although each Fund was shown to pay actual management fees higher than its peer group median, its total expense ratio (including 12b-1/non-12b-1 fees) was equal to or lower than or within a generally acceptable range of the Fund's peer group median. The Trustees considered that each of Federated NVIT High Income Bond, Neuberger Berman NVIT Multi-Cap Opportunities Fund, NVIT Columbia Overseas Value Fund, NVIT Government Bond Fund, NVIT Government Money Market Fund, and NVIT Managed American Funds Asset Allocation Fund had experienced three-year performance for the period ended June 30, 2020 at or above its peer group median, or within the third quintile of its peer group. With respect to Amundi NVIT Multi-Sector Bond Fund, the Trustees noted that the Fund had experienced three-year performance in the fifth quintile of its peer group and considered that in February 2019 the Fund's prior sub-adviser was replaced. With respect to BlackRock NVIT Managed Global Allocation Fund, the Trustees noted that the Fund had experienced three-year performance below its peer group median and considered the Adviser's statements that the volatility overlay that is part of the Fund's investment strategy will have the effect of causing the Fund to underperform its peers under various market conditions, including those experienced in recent periods. With respect to NVIT International Equity Fund, the Trustees noted that the Fund had experienced three-year performance in the fifth quintile of its peer group and considered the Adviser's statement that it is considering future opportunities for the Fund in light of its recent underperformance and its stronger longterm (ten-year) performance. With respect to NVIT Newton Sustainable U.S. Equity Fund, the Trustees noted that the Fund had experienced three-year performance below its peer group median and considered that a new sub-adviser was appointed in May 2020 and additional time was necessary to evaluate the Fund's performance under the new subadviser. With respect to NVIT U.S. 130/30 Equity Fund, the Trustees considered that the Fund had been relatively recently organized and did not have three years of performance. The Trustees determined on the basis of all of the information presented to them, including any remedial efforts taken or to be taken by the Adviser, that the expense and performance information of each of these Funds was consistent with the continuation of the Fund's Advisory Agreement.

With respect to BlackRock NVIT Equity Dividend Fund, the Trustees noted that the Fund was shown to pay actual management fees at a level higher than its peer group median and that the Fund's total expense ratio (including 12b-1/non-12b-1 fees) was in the fifth quintile of its peer group. The Trustees considered that, although the Fund pays relatively high total expenses, the Fund's overall expense arrangements appeared acceptable, particularly in light of its favorable levels of three-year investment performance shown to be within the second quintile of its peer group. The Trustees determined on the basis of all of the information presented to them that the expense and performance information of the Fund was consistent with the continuation of the Fund's advisory agreement.

With respect to NVIT Managed American Funds Growth & Income Fund, the Trustees considered that, although the Fund's total expense ratio (including 12b-1/non-12b-1 fees) was higher than the Fund's peer group median, the Fund was shown to pay actual management fees at a level lower than its peer group. They noted that the Fund had experienced three-year performance below its peer group median and considered the Adviser's statements that the volatility overlay that is part of the Fund's investment strategy will have the effect of causing the Fund to underperform its peers under various market conditions, including those experienced in recent periods. The Trustees determined on the basis of all

of the information presented to them that the expense and performance information of the Fund was consistent with the continuation of the Fund's Advisory Agreement.

The Trustees considered whether each of the Funds may benefit from any economies of scale realized by the Adviser in the event of growth in assets of the Fund. The Trustees noted that each Fund's advisory fee rate schedule, with the exception of Blackrock NVIT Managed Global Allocation Fund, NVIT iShares® Fixed Income ETF Fund, and NVIT iShares® Global Equity ETF Fund, is subject to contractual advisory fee breakpoints. The Trustees determined to continue to monitor the fees paid by the Funds without breakpoints to determine whether breakpoints might in the future become appropriate.

Based on all relevant information and factors, the Trustees unanimously approved the continuation of the Advisory Agreements at their meeting in December 2020.

NVIT Multi-Manager Mid Cap Value Fund NVIT Multi-Manager Small Cap Growth Fund NVIT Multi-Manager Small Cap Value Fund NVIT Multi-Manager Small Company Fund

Continuation of Advisory (and Sub-Advisory) Agreements

The Trust's investment advisory agreements with its Investment Adviser (the "Adviser") and its Sub-Advisers (together, the "Advisory Agreements") must be approved for each series of the Trust (individually a "Fund" and collectively the "Funds") for an initial term no greater than two years, and may continue in effect thereafter only if such continuation is approved at least annually, (i) by the vote of the Trustees or by a vote of the shareholders of the Fund in question, and (ii) by the vote of a majority of the Trustees who are not parties to the Advisory Agreements or "interested persons" of any party thereto (the "Independent Trustees"), cast in person at a meeting called for the purpose of voting on such approval. As a result of the current and potential effects of the COVID-19 pandemic, however, the Securities and Exchange Commission issued an exemptive order suspending the in-person voting requirements of the Investment Company Act of 1940, as amended for approval of investment advisory agreements, subject to certain conditions. The Trustees relied on this order in connection with their 2020 meeting to approve the Advisory Agreements.

The Board of Trustees (the "Board") has five regularly scheduled meetings each year and takes into account throughout the year matters bearing on the Advisory Agreements. The Board and its standing committees consider at each meeting factors that are relevant to the annual continuation of each Fund's Advisory Agreements, including investment performance, Sub-Adviser updates and reviews, reports with respect to compliance monitoring and the services and support provided to the Fund and its shareholders.

In preparation for the Board's meetings in 2020 to consider the continuation of the Advisory Agreements, the Trustees

requested and were furnished with a wide range of information to assist in their deliberations. These materials included:

- A summary report for each Fund that sets out a variety of information regarding the Fund, including performance, expense, and profitability information for the past three years.
- Reports from Broadridge Financial Solutions, Inc. ("Broadridge"), a leading independent source of mutual fund industry data, describing, on a Fund-by-Fund basis, for each Fund's largest share class, the Fund's (a) performance rankings (over multiple periods ended June 30, 2020) compared with performance universes created by Broadridge of similar or peer group funds, and (b) expense rankings comparing the Fund's fees and expenses with expense groups created by Broadridge of similar or peer group funds. An independent consultant retained by the Board provided input to Broadridge as to the composition of the various performance universes, expense groups and peer funds.
- Information regarding voluntary or contractual expense limitations or reductions and the relationship of expenses to any expense limitation.
- Information provided by the Adviser as to the Adviser's profitability in providing services under the Advisory Agreements.
- Information from the Adviser regarding economies of scale and breakpoints, including information provided by the Adviser as to the circumstances under which specific actions intended to share the benefits of economies of scale might be appropriate.

The Trustees met with representatives of the Adviser at the Trustees' regular quarterly meetings in September and December 2020 to discuss matters related to the continuation of the Advisory Agreements. In addition, the Trustees met with independent legal counsel to the Independent Trustees ("Independent Legal Counsel") in October and in November, to review information and materials provided to them, and to formulate requests for additional information. The Trustees submitted supplemental information requests to the Adviser following each meeting. At the Trustees' regular quarterly meeting in December 2020, the Trustees met to give final consideration to information bearing on the continuation of the Advisory Agreements.

The Trustees considered, among other things, information provided by the Adviser in response to their previous information requests. The Trustees engaged in discussion and consideration among themselves, and with the Adviser, Trust counsel, and Independent Legal Counsel regarding the various factors that may contribute to the determination of whether the continuation of the Advisory Agreements should be approved.

In considering this information with respect to each of the Funds, the Trustees took into account, among other things, the nature, extent, and quality of services provided by the Adviser and Sub-Adviser (if applicable). In evaluating the Advisory Agreements

for the Funds, the Trustees also reviewed information provided by the Adviser concerning the following:

- The terms of the Advisory Agreements and a summary of the services performed by the Adviser and Sub-Advisers.
- The activities of the Adviser in selecting, overseeing, and evaluating each Sub-Adviser; reporting by the Adviser to the Trustees regarding the Sub-Advisers; and steps taken by the Adviser, where appropriate, to identify replacement Sub-Advisers and to put those Sub-Advisers in place.
- The investment advisory and oversight capabilities of the Adviser, including, among other things, its expertise in investment, economic, and financial analysis.
- The Adviser's and Sub-Advisers' personnel and methods; the number of the Adviser's advisory and analytical personnel; general information about the compensation of the Adviser's advisory personnel; the Adviser's and Sub-Advisers' investment processes; the Adviser's risk assessment and risk management capabilities; and the Adviser's valuation and valuation oversight capabilities.
- The financial condition and stability of the Adviser and the Adviser's assessment of the financial condition and stability of the Sub-Advisers.
- Potential ancillary benefits, in addition to fees for serving as investment adviser, derived by the Adviser as a result of being investment adviser for the Funds, including, where applicable, information on fees inuring to the Adviser's affiliates for serving as the Trust's administrator, fund accountant, and transfer agent and fees or other payments relating to shareholder servicing or sub-transfer agency services provided by or through the Adviser or its affiliates.

Based on information provided by Broadridge and the Adviser, the Trustees reviewed expense information for the each of the Funds and the total return investment performance of each of the Funds as well as the performance of peer groups of funds over various time periods. The Trustees considered that, with respect to each of the Funds, the Adviser had agreed to cap the Fund's total expenses at the level in effect immediately prior to redemptions from the Fund by a number of Nationwide funds of funds in late 2019 and early 2020.

The Trustees considered that NVIT Multi-Manager Mid Cap Value Fund was shown to pay actual management fees and to have total expense ratios at levels below its peer group median. The Trustees noted that the Fund had experienced three-year performance for the period ended June 30, 2020 within the fifth quintile of its peer group and considered that the Adviser had recommended the termination of one of the Fund's three sub-advisers, effective November 2020, in light of the Fund's performance.

With respect to NVIT Multi-Manager Small Cap Growth Fund and NVIT Multi-Manager Small Company Fund, the Trustees noted that although each Fund was shown to pay actual management fees at a level higher than its peer group median, each Fund's

total expense ratio was within a generally acceptable range of the Fund's peer group median. The Trustees noted that each of the Funds was shown to have experienced three-year performance for the period ended June 30, 2020 above its peer group median.

The Trustees considered that although NVIT Multi-Manager Small Cap Value Fund was shown to pay actual management fees higher than its peer group median, its total expense ratio was within a generally acceptable range of the Fund's peer group median. The Trustees noted that the Fund had experienced three-year performance for the period ended June 30, 2020 within the fifth quintile of its peer group and considered that the Adviser had recommended the replacement of two of the Fund's sub-advisers in November 2019 in light of the Fund's performance.

The Trustees determined on the basis of all of the information presented to them that the expense and performance information for each of these Funds, including the Adviser's explanation regarding the underperformance of certain Funds and remedial actions taken to address the underperformance, were sufficient to support approval of the continuation of the Funds' Advisory Agreement.

The Trustees also considered whether each of the Funds may benefit from any economies of scale realized by the Adviser in the event of growth in assets of the Funds. The Trustees noted that all of the Funds' advisory fee rate schedules are subject to contractual advisory fee breakpoints.

Based on all relevant information and factors, the Trustees unanimously approved the continuation of the Advisory Agreements at their meeting in December 2020.

Other Federal Tax Information

For the year ended December 31, 2020 certain dividends paid by the Funds may be subject to a maximum tax rate of 20% as provided for by the Jobs and Growth Tax Relief Reconciliation Act of 2003. The Funds intend to designate the maximum amount allowable as taxed at a maximum rate of 15%. Complete information will be reported in conjunction with your 2020 Form 1099-DIV.

For the taxable year ended December 31, 2020, the following percentages of income dividends paid by the Funds qualify for the dividends received deduction available to corporations:

	Dividends Received
Fund	Deduction
Equity Dividend	85.88%
Multi Cap Opportunities	100.00
Defensive Style	100.00
Disciplined Equity	22.33
Large Cap Growth	55.28
U.S. Core	30.69
U.S. Equity Income	83.62
Mid Cap Value	83.58
Small Cap Growth	
Small Cap Value	100.00
Small Company	100.00
Sustainable U.S. Equity	50.34
Real Estate	3.03
Discovery	99.88

Amounts designated as "-" are zero or have been rounded to zero.

The Funds designate the following amounts, or the maximum amount allowable under the Internal Revenue Code, as long term capital gain distributions qualifying for the maximum 20% income tax rate for individuals:

Fund	Amount
Equity Dividend	\$ 14,017,435
Multi Cap Opportunities	18,113,070
Defensive Style	46,020,116
Disciplined Equity	121
Large Cap Growth	77,657,772
U.S. Core	101,738,495
U.S. Equity Income	5,465,099
Mid Cap Value	_
Small Cap Growth	16,269,042

Fund	,	Amount
Small Cap Value	\$	854,474
Small Company		11,848,352
Sustainable U.S. Equity		6,998,582
Real Estate		1,087,878
Discovery		83,364,193

Amounts designated as "-" are zero or have been rounded to zero.

Each Trustee who is deemed an "interested person," as such term is defined in the 1940 Act, is referred to as an "Interested Trustee." Those Trustees who are not "interested persons," as such term is defined in the 1940 Act, are referred to as "Independent Trustees." The name, year of birth, position and length of time served with the Trust, number of portfolios overseen, principal occupation(s) and other directorships/trusteeships held during the past five years, and additional information related to experience, qualifications, attributes, and skills of each Trustee and Officer are shown below. There are 65 series of the Trust, all of which are overseen by the Board of Trustees and Officers of the Trust. The address for each Trustee and Officer is c/o Nationwide Funds Group, One Nationwide Plaza, Mail Code 5-02-210, Columbus, OH 43215.

Independent Trustees

Paula H. J. Cholmondeley		
Year of Birth	Positions Held with Trust and Length of Time	Number of Portfolios Overseen in the
	Served ¹	Nationwide Fund Complex
1947	Trustee since July 2000	112

Principal Occupation(s) During the Past Five Years (or Longer)

Ms. Cholmondeley focuses full time on corporate governance. She sits on public company boards and is also on the faculty of the National Association of Corporate Directors. She has served as a Chief Executive Officer of Sorrel Group (management consulting company) since January 2004. From April 2000 through December 2003, Ms. Cholmondeley was Vice President and General Manager of Sappi Fine Paper North America.

Other Directorships held During the Past Five Years²

Director of Dentsply International, Inc. (dental products) from 2002 to 2016, Terex Corporation (construction equipment) from 2004 to present, Bank of the Ozarks, from 2016 to present, and Kapstone Paper and Packaging Corporation from 2016 to 2018.

Ms. Koken has significant board experience and significant executive, legal and regulatory experience, including past service as a cabinet-level state insurance commissioner and general counsel of a national life insurance company

- Length of time served includes time served with the Trust's predecessors. The tenure of each Trustee is subject to the Board's retirement policy, which states that a Trustee shall retire from the Boards of Trustees of the Trusts effective on December 31 of the calendar year during which he or she turns 75 years of age; provided this policy does not apply to a person who became a Trustee prior to September 11, 2019.
- Directorships held in: (1) any other investment companies registered under the 1940 Act, (2) any company with a class of securities registered pursuant to Section 12 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), or (3) any company subject to the requirements of Section 15(d) of the Exchange Act, which are required to be disclosed in the SAI. In addition, certain other directorships not meeting the aforementioned requirements may be included for certain Trustees such as board positions on non-profit organizations.
- Ms. Koken is considered an interested person of the Trust because she is a Director of the parent company of, and several affiliates of, the Trust's investment adviser and distributor.

Bloomberg Barclays Emerging Markets USD Aggregate Bond Index: An unmanaged index comprising fixed-rate and floating-rate U.S. dollar-denominated bonds from sovereign, quasi-sovereign and corporate emerging market issuers; the countries considered to be emerging markets are determined by annual review using rules-based classifications from the World Bank income group and the International Monetary Fund.

Bloomberg Barclays Long U.S. Treasury Index: An ETF tracking index that includes all publicly issued U.S. Treasury securities 10 or more years remaining until maturity, are rated as investment grade and have an outstanding face-value of \$250 million or more.

Bloomberg Barclays Municipal Bond Index: An unmanaged index that covers the U.S. dollar-denominated, long-term, tax-exempt bond market. The index has four main sectors: state and local general obligation bonds, revenue bonds, insured bonds and pre-refunded bonds.

Bloomberg Barclays U.S. 10-20 Year Treasury Bond Index: An unmanaged index that measures the performance of U.S. Treasury securities with a remaining maturity of 10 to 20 years.

Bloomberg Barclays U.S. Aggregate Bond Index: An unmanaged, market value-weighted index of U.S. dollar-denominated investment-grade, fixed-rate, taxable debt issues, which includes Treasuries, government-related and corporate securities, mortgage-backed securities (agency fixed-rate and hybrid adjustable-rate mortgage pass-throughs), asset-backed securities and commercial mortgage-backed securities (agency and non-agency).

Bloomberg Barclays U.S. Corporate High Yield 2% Issuer Capped Index: An unmanaged index that measures the performance of high-yield corporate bonds, with a maximum allocation of 2% to any one issuer.

Bloomberg Barclays U.S. Corporate High Yield Index: An unmanaged index that measures the performance of U.S. dollar-denominated, non-investment-grade, fixed-rate, taxable corporate bonds with at least \$150 million par value outstanding, a maximum credit rating of Ba1 and a remaining maturity of one year or more; gives a broad look at how high-yield ("junk") bonds have performed.

Bloomberg Barclays U.S. 1-3 Year Government/Credit Bond Index: An unmanaged index that measures the performance of the non-securitized component of the U.S. Aggregate Bond Index with maturities of 1 to 3 years, including Treasuries, government-related issues and corporates.

Bloomberg Barclays U.S. Treasury Inflation-Protected Securities (TIPS) IndexSM: An index that measures the performance of the US Treasury Inflation Protected Securities (TIPS) market.

Bloomberg Barclays Mortgage-Backed Securities Index: A market value-weighted index comprising agency mortgage-backed pass-through securities of the Government National Mortgage Association (Ginnie Mae), the Federal National Mortgage Association (Fannie Mae), and the Federal Home Loan Mortgage Corporation (Freddie Mac) with a minimum \$150 million par amount outstanding and a weighted-average maturity of at least 1 year.

Citigroup Non-US Dollar World Government Bond Index (Citigroup WGBI Non-US): An unmanaged, market capitalization-weighted index that reflects the performance of fixed-rate investment-grade sovereign bonds with remaining maturities of one year or more issued outside the United States; generally considered to be representative of the world bond market.

Citigroup US Broad Investment-Grade Bond Index (USBIG®): An unmanaged, market capitalization-weighted index that measures the performance of U.S. dollar-denominated bonds issued in the U.S. investment-grade bond market; includes fixed-rate, U.S. Treasury, government-sponsored, collateralized and corporate debt with remaining maturities of one year or more.

Citigroup US High-Yield Market Index: An unmanaged, market capitalization-weighted index that reflects the performance of the North American high-yield market; includes U.S. dollar-denominated, fixed-rate, cash-pay and deferred-interest securities with remaining maturities of one year or more, issued by corporations domiciled in the United States or Canada.

Citigroup World Government Bond Index (WGBI) (Unhedged): An unmanaged, market capitalization-weighted index that is not hedged back to the U.S. dollar and reflects the performance of the global sovereign fixed-income market; includes local currency, investment-grade, fixed-rate sovereign bonds issued in 20-plus countries, with remaining maturities of one year or more.

Note about Citigroup Indexes

ICE BofA Merrill Lynch Global High Yield Index (USD Hedged): An unmanaged, market capitalization-weighted index that gives a broad-based measurement of global high-yield fixed-income markets; measures the performance of below-investment-grade, corporate debt with a minimum of 18 months remaining to final maturity at issuance that is publicly issued in major domestic or euro bond markets, and is denominated in U.S. dollars, Canadian dollars, British pounds and euros. The index is hedged against the fluctuations of the constituent currencies versus the U.S. dollar.

ICE BofA Merrill Lynch US High Yield Master II Index: An unmanaged index made up of over 1,200 high yield bonds representing high-yield bond markets as a whole. It includes zero-coupon bonds and payment-in-kind ("PIK") bonds.

ICE BofA Merrill Lynch AAA U.S. Treasury/Agency Master Index: An unmanaged index that gives a broad look at how fixed-rate U.S. government bonds with a remaining maturity of at least one year have performed.

ICE BofA Merrill Lynch Current 5-Year US Treasury Index: An unmanaged, one-security index, rebalanced monthly, that measures the performance of the most recently issued 5-year U.S. Treasury note; a qualifying note is one auctioned on or before the third business day prior to the final business day of a month.

Morningstar® Lifetime Allocation Indexes: A series of unmanaged, multi-asset-class indexes designed to benchmark target-date investment products. Each index is available in three risk profiles: aggressive, moderate and conservative. The index asset allocations adjust over time, reducing equity exposure and shifting toward traditional income-producing investments. The strategic asset allocation of the indexes is based on the Lifetime Asset Allocation methodology developed by Ibbotson Associates, a Morningstar company.

Morningstar® Lifetime Moderate Income Index: An index representing a portfolio of global equities, bonds and traditional inflation hedges such as commodities and Treasury Inflation-Protected Securities. This portfolio is held in proportions appropriate for a U.S. investor who is at least ten years into retirement.

Morningstar® Target Risk Indexes: A series consisting of five asset allocation indexes that span the risk spectrum from conservative to aggressive. The securities selected for the asset allocation indexes are driven by the rules-based indexing methodologies that power Morningstar's comprehensive index family.

- Aggressive Target Risk Index
- · Moderately Aggressive Target Risk Index
- · Moderate Target Risk Index
- Moderately Conservative Target Risk Index
- Conservative Target Risk Index

MSCIACWI®: An unmanaged, free float-adjusted, market capitalization-weighted index that is designed to measure the performance of large-cap and mid-cap stocks in global developed and emerging markets as determined by MSCI.

MSCI EAFE® Small Cap Index: An equity index which captures small cap representation across Developed Markets countries including Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland and the UK around the world, excluding the US and Canada.

MSCI EAFE® Value Index: An unmanaged, free float-adjusted, market capitalization-weighted index that is designed to measure the performance of large-cap and mid-cap value stocks in developed markets as determined by MSCI; excludes the United States and Canada.

MSCI Emerging Markets® Index: An unmanaged, free float-adjusted, market capitalization-weighted index that is designed to measure the performance of large-cap and mid-cap stocks in emerging-country markets as determined by MSCI.

NYSE Arca Tech 100 Index: A price-weighted index composed of common stocks and American Depository Receipts ("ADRs" a form of equity security that was created specifically to simplify foreign investing for American investor) of technology-related

companies listed on US stock exchanges. This index is maintained by the New York Stock Exchange, but also includes stocks that trade on exchanges other than the NYSE.

NYSE Russell 1000® Growth Index: An unmanaged index that measures the performance of the large-capitalization growth segment of the U.S. equity universe; includes those Russell 1000® Index companies with higher price-to-book ratios and higher forecasted growth values.

Russell 1000® Value Index: An unmanaged index that measures the performance of the large-capitalization value segment of the U.S. equity universe; includes those Russell 1000® Index companies with lower price-to-book ratios and lower forecasted growth values.

Russell 2000[®] **Growth Index:** An unmanaged index that measures the performance of the small-capitalization growth segment of the U.S. equity universe; includes those Russell 2000[®] Index companies with higher price-to-book ratios and higher forecasted growth values.

Russell 2000® Index: An unmanaged index that measures the performance of the small-capitalization segment of the U.S. equity universe.

Russell 2000® **Value Index:** An unmanaged index that measures the performance of the small-capitalization value segment of the U.S. equity universe; includes those Russell 2000® Index companies with lower price-to-book ratios and lower forecasted growth values.

Russell 3000® Growth Index: A market-capitalization weighted index based on the Russell 3000 Index. Includes companies that show signs of above-average growth.

Russell 3000® Index: a capitalization-weighted stock market index, maintained by FTSE Russell, that seeks to be a benchmark of the entire U.S stock market

Russell Midcap® Growth Index: An unmanaged index that measures the performance of the mid-capitalization growth segment of the U.S. equity universe; includes those Russell Midcap® Index companies with higher price-to-book ratios and higher forecasted growth values.

Russell Midcap® Value Index: An unmanaged index that measures the performance of the mid-capitalization value segment of the U.S. equity universe; includes those Russell Midcap® Index companies with lower price-to-book ratios and lower forecasted growth values.

Note about Russell Indexes

Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. S&P 500[®] **Index:** An unmanaged, market capitalization-weighted index of 500 stocks of leading large-cap U.S. companies in leading industries; gives a broad look at the U.S. equities market and those companies' stock price performance.

The S&P/Citi International Treasury Bond ex-US Index: An index measuring performance of treasury bonds in local currencies. The bonds are issued by developed market countries outside the U.S.

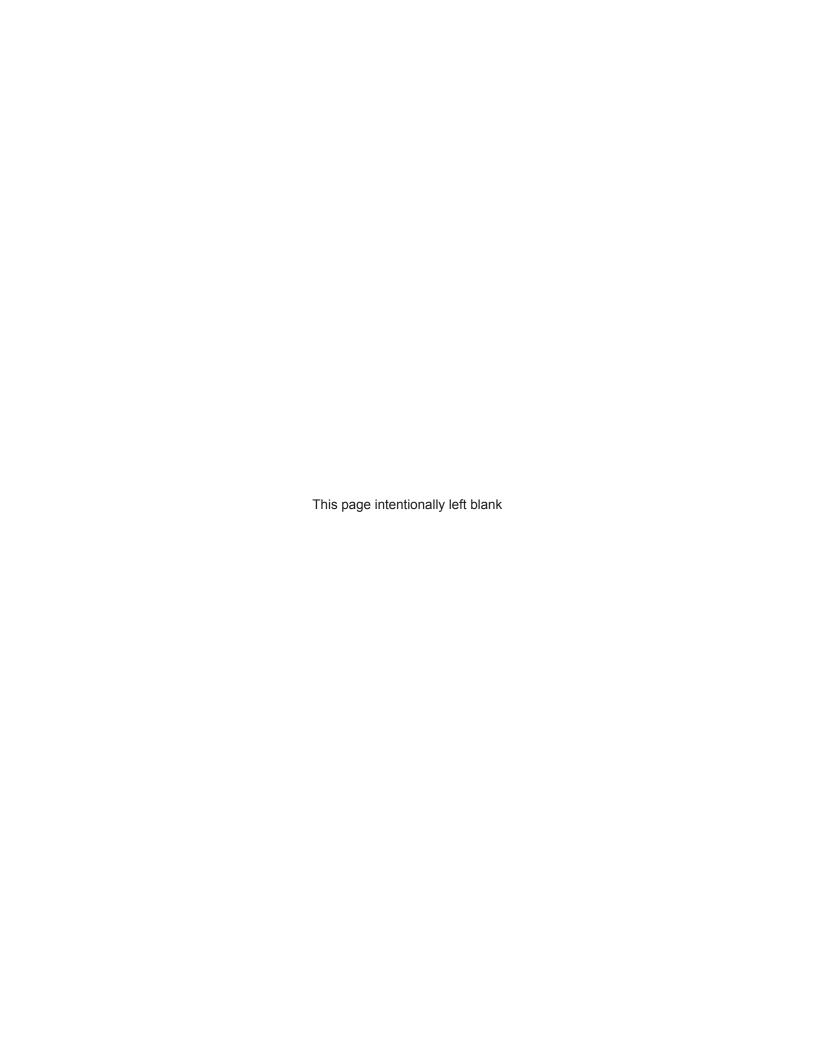

S&P MidCap 400® (**S&P 400**) Index: An unmanaged index that measures the performance of 400 stocks of medium-sized U.S. companies (those with a market capitalization of \$1.4 billion to \$5.9 billion).

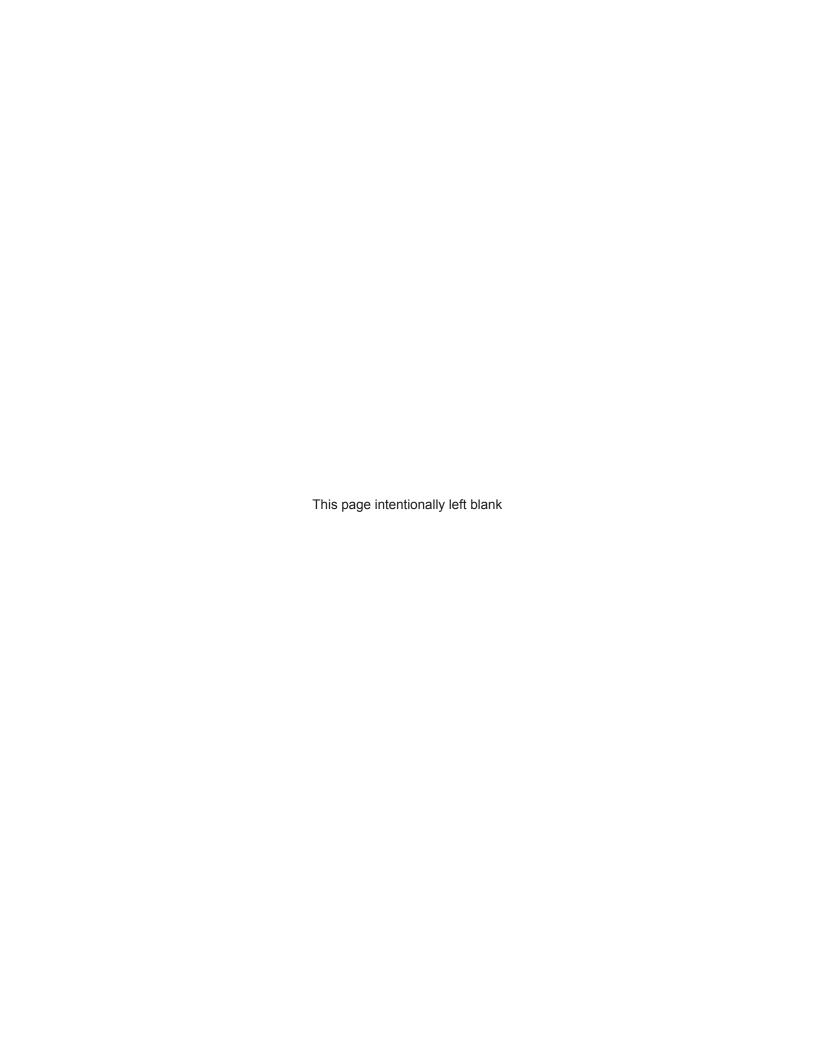

S&P North American Technology Sector Index[™]: An index that represents U.S. securities classified under GICS® information technology sector as well as internet & direct marketing retail, interactive home entertainment, and interactive media & services sub-industries.

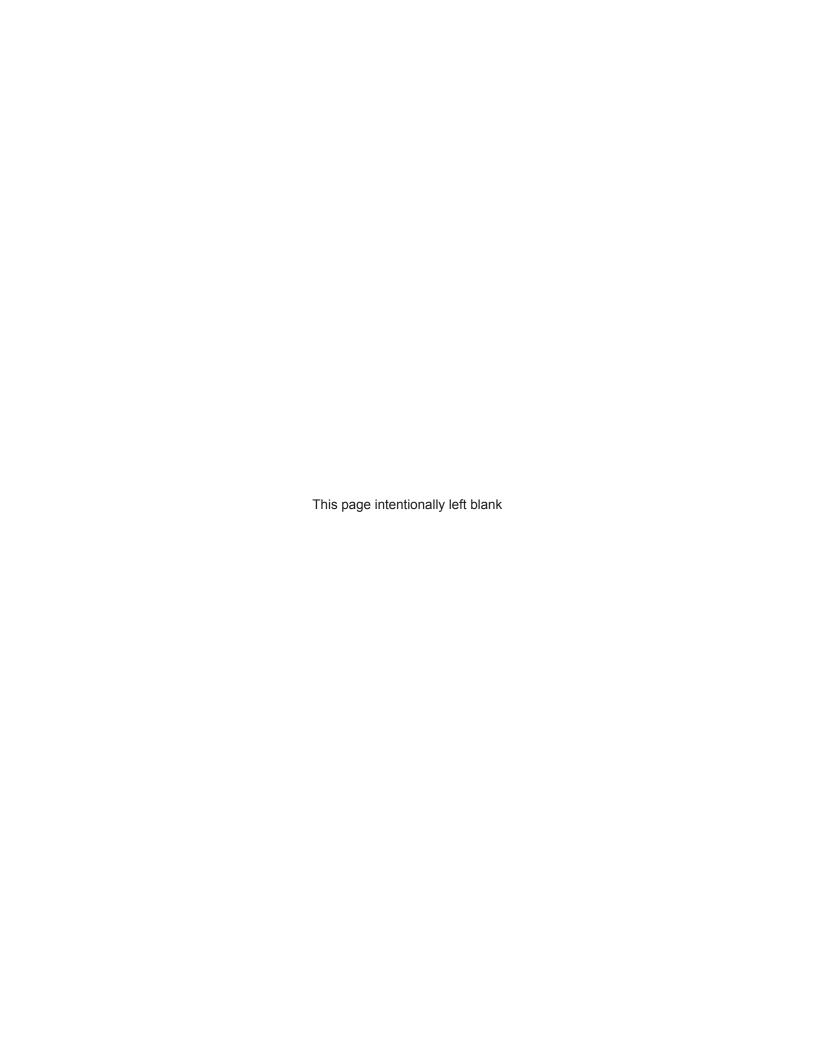

S&P Biotechnology Select Industry Index: An index that represents performance of narrow GICS® sub-industries. Made up of stocks from the S&P Total Market Index that are classified with biotechnology as a sub-industry.

S&P Target Date® To Indexes: A series of 12 unmanaged, multi-asset class indexes consisting of the Retirement Income Index plus 11 indexes that correspond to a specific target retirement date (ranging from 2010 through 2060+). The series reflects a subset of target date funds, each of which generally has an asset allocation mix and glide path featuring relatively conservative total equity exposure near retirement and static total equity exposure after retirement. Each index in the series reflects varying levels of exposure to equities, bonds, and other asset classes and becomes more conservative with the approach of the target retirement date.

S&P Total Market Index: An index comprised of securities to track the broad equity market, including large-, mid-, small-, and micro-cap stocks.
