

Invesco V.I. Balanced-Risk Allocation Fund

The Fund provides a complete list of its holdings four times in each fiscal year, at the quarter-ends. For the second and fourth quarters, the lists appear in the Fund's semiannual and annual reports to shareholders. For the first and third quarters, the Fund files the lists with the Securities and Exchange Commission (SEC) as an exhibit to its reports on Form N-PORT. The Fund's Form N-PORT filings are available on the SEC website, sec.gov. The SEC file numbers for the Fund are 811-07452 and 033-57340. The Fund's most recent portfolio holdings, as filed on Form N-PORT, have also been made available to insurance companies issuing variable annuity contracts and variable life insurance policies ("variable products") that invest in the Fund.

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities is available without charge, upon request, from our Client Services department at 800 959 4246 or at invesco.com/proxyguidelines. The information is also available on the SEC website, sec.gov.

Information regarding how the Fund voted proxies related to its portfolio securities during the most recent 12-month period ended June 30 is available at invesco.com/proxysearch. The information is also available on the SEC website, sec.gov.

Invesco Advisers, Inc. is an investment adviser; it provides investment advisory services to individual and institutional clients and does not sell securities. Invesco Distributors, Inc. is the US distributor for Invesco Ltd.'s retail mutual funds, exchange-traded funds and institutional money market funds. Both are wholly owned, indirect subsidiaries of Invesco Ltd.

This report must be accompanied or preceded by a currently effective Fund prospectus and variable product prospectus, which contain more complete information, including sales charges and expenses. Investors should read each carefully before investing.

Management's Discussion of Fund Performance

Performance summary

For the year ended December 31, 2020, Series I shares of Invesco V.I. Balanced-Risk Allocation Fund (the Fund) underperformed the Custom Invesco V.I. Balanced-Risk Allocation Index, the Fund's style-specific benchmark.

Your Fund's long-term performance appears later in this report.

Fund vs. Indexes

Total returns, 12/31/19 to 12/31/20, excluding variable product issuer charges. If variable product issuer charges were included, returns would be lower.

Market conditions and your Fund

For the year ended December 31, 2020, the Fund reported positive absolute performance as all three of the asset classes in which the Fund invests (stocks, bonds and commodities) contributed to Fund performance. The Fund invests in derivatives, such as swaps and futures, which, depending upon the type of derivative and its purpose, are generally expected to correspond to the performance of US and international fixed income, equity and commodity markets. The strategic allocation portion of the investment process involves first selecting representative assets for each asset class (equities, fixed income and commodities) from a universe of more than 50 investments. Next, we seek to construct the portfolio so that an approximately equal amount of risk comes from our equity, fixed income and commodity allocations. In the third step of the investment process, using a systematic approach based on fundamental principles, the portfolio management team analyzes the asset classes and investments, considering the following factors: valuation, economic environment and historic price movements. Tactical adjustments to the Fund's portfolio are then made on a monthly basis to try and take advantage of short-term market dynamics.

The Fund's strategic exposure to developed government bond markets, obtained through the use of futures, contributed to results for the year with all markets in which the Fund was invested delivering positive returns. Yields broadly fell over the course of the year on central bank assurances that rates will be held at exceptionally low levels for the foreseeable future. Canadian bonds led results as the Bank of Canada cut rates to 0.25%¹ and began weekly asset purchases of Canadian government and corporate bonds at the onset of the recovery. US Treasuries also contributed to performance as the Federal Reserve cut interest rates to zero² and, like Canada, implemented expanded asset purchases of government and corporate bonds. Australian bonds gained as the Reserve Bank of Australia announced an expansion of the

term funding facility to approximately \$200 billion Australia dollars at a fixed rate of 25 basis points for three years in order to keep funding costs low and bolster the supply of credit to lenders.³ UK Gilts also aided results as the Bank of England (BoE) cut interest rates from 0.75% to 0.10%⁴ and provided loans directly to businesses. The UK was hit harder by the Coronavirus ("COVID-19") pandemic than many other developed regions with multiple strict lockdowns leading the BoE to announce in November that it would further boost government bond purchases and would support negative interest rates if necessary. Germany and Japan were absent from the portfolio throughout the year due to the portfolio's yield skew adjustments. Tactical positioning in bonds benefited from overweight exposure relative to the strategic positioning during the February-March 2020 sell-off.

The Fund's strategic exposure to developed market equities, obtained through the use of swaps and futures, contributed to Fund performance for the year. The magnitude of recovery varied across regions, largely depending on sector exposure. US equities were the top contributor due primarily to the high allocation to technology and low energy exposure. US small-cap equities outperformed large-caps due to the late year rally in risky assets as increasing rates of growth and inflation was a good environment for small company stocks. Japanese equities were also a top contributor as investors cheered the election of Yoshihide Suga to the post of prime minister, replacing Shinzo Abe who retired for health reasons. A Suga administration is widely believed to be an extension of the Abe government, thus removing fears of Abe's policies being reversed. European equities posted subdued, but positive, performance after a second wave of infections reversed the recovery. European markets remain suppressed as lockdown measures remained more restricted while the scale of their fiscal and monetary response also lagged China and the US. UK equities were the sole market to deliver negative returns. The UK was slow

to contain the first and second wave of the COVID-19 and implemented extensive lockdowns too late, causing the economy to suffer more relative to other countries. The uncertainty around Brexit further compounded losses. The Fund's tactical positioning in equities contributed to Fund performance and also provided gains as overweights during the second half of the year proved timely.

The Fund's strategic exposure to commodities, obtained through the use of swaps, futures and commodity-linked notes, also added to Fund performance for the year despite commodity indexes declining. Energy was the sole complex to finish the year negative. The Fund's diversification within commodities and lower energy exposure helped buffer the losses. Commodities struggled to recover compared to stocks and bonds because prices are based on the current environment, whereas stocks and bonds are priced by discounting future cash flows. Performance across complexes was not uniform as evidenced by gold hitting all-time highs and crude reaching all-time lows, even dipping into negative territory for a brief period. Agriculture was the largest contributor to Fund performance with gains concentrated in grains (soymeal and soybeans) and softs, most notably cotton. The primary catalysts for the broad-based increase in prices included a weakening US dollar and improved demand from China along with some challenges in growing conditions. Precious metals were another top contributor with silver outpacing gold. Seen as a store of value, gold began to rise as economic growth slowed in 2019 and surged to a record high in August 2020 on a combination of a weakening US dollar, central bank promises of "lower for longer" policy rates and investor concerns of monetary debasement. Silver benefited for similar reasons along with its crossover use as an industrial metal. Industrial metals prices rose on increased manufacturing activity and demand resulting from projects related to fiscal stimulus. Exposure to energy detracted from Fund performance due to a combination of falling demand caused by COVID-19 containment efforts and rising supply triggered by an oil price war between Saudi Arabia and Russia. The Fund's tactical positioning in commodities benefited from our underweight exposure for the majority of the year and overweight exposure during the fourth quarter.

Please note that our strategy is principally implemented with derivative instruments that include futures, commodity-linked notes and total return swaps. Therefore, all or most of the performance of the strategy, both positive and negative, can be attributed to these instruments. Derivatives can be a cost-effective way to gain exposure to asset classes. However, derivatives may amplify traditional investment risks through the creation of leverage and may be less liquid than traditional securities.

The returns shown above include the returns of Invesco Van Kampen V.I. Global Tactical Asset Allocation Fund (the first predecessor fund) for the period June 1, 2010, to May 2, 2011, the date the first predecessor fund was reorganized into the Fund, and the returns of Van Kampen Life Investment Trust Global Tactical Asset Allocation Portfolio (the second predecessor fund) for the period prior to June 1, 2010, the date the second predecessor fund was reorganized into the first predecessor fund. The second predecessor fund was advised by Van Kampen Asset Management. Returns shown above for Series I and Series II shares are blended returns of the predecessor funds and Invesco V.I. Balanced-Risk Allocation Fund. Share class returns will differ from the predecessor funds because of different expenses.

The performance data quoted represent past performance and cannot guarantee future results; current performance may be

lower or higher. Please contact your variable product issuer or financial adviser for the most recent month-end variable product performance. Performance figures reflect Fund expenses, reinvested distributions and changes in net asset value. Performance figures do not reflect deduction of taxes a shareholder would pay on Fund distributions or sale of Fund shares. Investment return and principal value will fluctuate so that you may have a gain or loss when you sell shares.

Invesco V.I. Balanced-Risk Allocation Fund, a series portfolio of AIM Variable Insurance Funds (Invesco Variable Insurance Funds), is currently offered through insurance companies issuing variable products. You cannot purchase shares of the Fund directly. Performance figures given represent the Fund and are not intended to reflect actual variable product values. They do not reflect sales charges, expenses and fees assessed in connection with a variable product. Sales charges, expenses and fees, which are determined by the variable product issuers, will vary and will lower the total return.

The most recent month-end performance at the Fund level, excluding variable product charges, is available at 800 451 4246. As mentioned above, for the most recent month-end performance including variable product charges, please contact your variable product issuer or financial adviser.

Fund performance reflects any applicable fee waivers and/or expense reimbursements. Had the adviser not waived fees

and/or reimbursed expenses currently or in the past, returns would have been lower. See current prospectus for more information.

Supplemental Information

Invesco V.I. Balanced-Risk Allocation Fund's investment objective is total return with a low to moderate correlation to traditional financial market indices.

- Unless otherwise stated, information presented in this report is as of December 31, 2020, and is based on total net assets.
- Unless otherwise noted, all data provided by Invesco.
- To access your Fund's reports/prospectus, visit invesco.com/fundreports.

About indexes used in this report

- The **MSCI World Index** is an unmanaged index considered representative of stocks of developed countries. The index is computed using the net return, which withholds applicable taxes for non-resident investors.
- The **Custom Invesco V.I. Balanced-Risk Allocation Index** is composed of the MSCI World Index and Bloomberg Barclays U.S. Aggregate Bond Index. Prior to May 2, 2011, the index comprised the MSCI World Index, JP Morgan GBI Global Index and FTSE US 3-Month Treasury Bill Index. The Bloomberg Barclays U.S. Aggregate Bond Index is considered representative of the US investment-grade, fixed-rate bond market. The FTSE US 3-Month Treasury Bill Index is considered representative of three-month US Treasury bills. The JP Morgan GBI Global Index tracks the performance of fixed-rate issuances from high-income developed market countries.
- The **Lipper VUF Absolute Return Funds Classification Average** represents an average of all variable insurance underlying funds in the Lipper Absolute Return Funds Classification.
- The Fund is not managed to track the performance of any particular index, including the index(es) described here, and consequently, the performance of the Fund may deviate significantly from the performance of the index(es).
- A direct investment cannot be made in an index. Unless otherwise indicated, index results include reinvested dividends, and they do not reflect sales charges. Performance of the peer group, if applicable, reflects fund expenses; performance of a market index does not.

Fund Information

Target Risk Contribution and Notional Asset Weights as of December 31, 2020

Asset Class	Target Risk Contribution*	Notional Asset Weights**
Equities	43.74%	42.29%
Fixed Income	20.75	58.49
Commodities	35.51	36.40
Total	100.00%	137.18%

* Reflects the risk that each asset class is expected to contribute to the overall risk of the Fund as measured by standard deviation and estimates of risk based on historical data. Standard deviation measures the annualized fluctuations (volatility) of monthly returns.

** Proprietary models determine the Notional Asset Weights necessary to achieve the Target Risk Contributions. Total Notional Asset Weight greater than 100% is achieved through derivatives and other instruments that create leverage.

Consolidated Statement of Assets and Liabilities

December 31, 2020

Assets:

Investments in securities, at value (Cost \$127,762,801)	\$140,196,562
Investments in affiliated money market funds, at value (Cost \$767,126,252)	767,126,252
Other investments:	
Swaps receivable – OTC	1,124,211
Unrealized appreciation on swap agreements – OTC	5,769,058
Deposits with brokers:	
Cash collateral – exchange-traded futures contracts	63,795,000
Cash collateral – OTC Derivatives	5,071,596
Foreign currencies, at value (Cost \$1,438)	1,513
Receivable for:	
Investments sold	6,740
Fund shares sold	866,499
Dividends	11,604
Investment for trustee deferred compensation and retirement plans	120,740
Total assets	984,089,775

Liabilities:

Other investments:	
Variation margin payable - futures contracts	102,599
Swaps payable – OTC	335,414
Unrealized depreciation on swap agreements-OTC	474,412
Payable for:	
Investments purchased	6,774
Fund shares reacquired	1,117,453
Amount due custodian	74,662
Accrued fees to affiliates	764,998
Accrued other operating expenses	453,935
Trustee deferred compensation and retirement plans	135,881
Total liabilities	3,466,128
Net assets applicable to shares outstanding	\$980,623,647

Net assets consist of:

Shares of beneficial interest	\$902,957,206
Distributable earnings	77,666,441
	\$980,623,647

Net Assets:

Series I	\$ 46,853,302
Series II	\$933,770,345

Shares outstanding, no par value, with an unlimited number of shares authorized:

Series I	4,471,723
Series II	90,770,070
Series I:	
Net asset value per share	\$ 10.48
Series II:	
Net asset value per share	\$ 10.29

Consolidated Statement of Operations

For the year ended December 31, 2020

Investment income:

Dividends from affiliated money market funds	\$ 2,934,003
Interest	884,014
Total investment income	3,818,017

Expenses:

Advisory fees	8,629,571

^(a) Calculated using average shares outstanding.

^(b) Includes adjustments in accordance with accounting principles generally accepted in the United States of America and as such, the net asset value for financial reporting purposes and the returns based upon those net asset values may differ from the net asset value and returns for shareholder transactions. Total returns are not annualized for periods less than one year, if applicable, and do not reflect charges assessed in connection with a variable product, which if included would reduce total returns.

^(c) Portfolio turnover is calculated at the fund level and is not annualized for periods less than one year, if applicable.

^(d) Ratios are based on average daily net assets (000's omitted) of \$44,107 and \$893,900 for Series I and Series II shares, respectively.

^(e) In addition to the fees and expenses which the Fund bears directly; the Fund indirectly bears a pro rata share of the fees and expenses of the underlying funds in which the Fund invests. Because the underlying funds have varied expenses and fee levels and the Fund may own different proportions at different times, the amount of fees and expenses incurred indirectly by the Fund will vary. Estimated underlying fund expenses are not expenses that are incurred directly by your Fund. They are expenses that are incurred directly by the underlying funds and are deducted from the value of the funds your Fund invests in. The effect of the estimated underlying fund expenses that you bear indirectly is included in your Fund's total return. Estimated acquired fund fees from underlying funds were 0.15%, 0.15%, 0.16%, 0.15% and 0.12% for the years ended December 31, 2020, 2019, 2018, 2017 and 2016, respectively.

See accompanying Notes to Consolidated Financial Statements which are an integral part of the financial statements.

Notes to Consolidated Financial Statements

December 31, 2020

NOTE 1—Significant Accounting Policies

Invesco V.I. Balanced-Risk Allocation Fund (the “Fund”) is a series portfolio of AIM Variable Insurance Funds (Invesco Variable Insurance Funds) (the “Trust”). The Trust is a Delaware statutory trust registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as an open-end series management investment company. Information presented in these consolidated financial statements pertains only to the Fund and the Subsidiary. Matters affecting the Fund or each class will be voted on exclusively by the shareholders of the Fund or each class. Current Securities and Exchange Commission (“SEC”) guidance, however, requires participating insurance companies offering separate accounts to vote shares proportionally in accordance with the instructions of the contract owners whose investments are funded by shares of each Fund or class.

The Fund will seek to gain exposure to the commodity markets primarily through investments in the Invesco Cayman Commodity Fund IV Ltd. (the “Subsidiary”), a wholly-owned subsidiary of the Fund organized under the laws of the Cayman Islands. The Subsidiary was organized by the Fund to invest in commodity-linked derivatives and other securities that may provide leveraged and non-leveraged exposure to commodities. The Fund may invest up to 25% of its total assets in the Subsidiary.

The Fund's investment objective is total return with a low to moderate correlation to traditional financial market indices.

The Fund currently offers two classes of shares, Series I and Series II, both of which are offered to insurance company separate accounts funding variable annuity contracts and variable life insurance policies (“variable products”).

The Fund is an investment company and accordingly follows the investment company accounting and reporting guidance in accordance with Financial Accounting Standards Board Accounting Standards Codification Topic 946, *Financial Services – Investment Companies*.

The following is a summary of the significant accounting policies followed by the Fund in the preparation of its consolidated financial statements.

A. Security Valuations – Securities, including restricted securities, are valued according to the following policy.

Debt obligations (including convertible securities) and unlisted equities are fair valued using an evaluated quote provided by an independent pricing service. Evaluated quotes provided by the pricing service may be determined without exclusive reliance on quoted prices, and may reflect appropriate factors such as institution-size trading in similar groups of securities, developments related to specific securities, dividend rate (for unlisted equities), yield (for debt obligations), quality, type of issue, coupon rate (for debt obligations), maturity (for debt obligations), individual trading characteristics and other market data. Pricing services generally value debt obligations assuming orderly transactions of institutional round lot size, but a fund may hold or transact in the same securities in smaller, odd lot sizes. Odd lots often trade at lower prices than institutional round lots. Debt obligations are subject to interest rate and credit risks. In addition, all debt obligations involve some risk of default with respect to interest and/or principal payments.

A security listed or traded on an exchange (except convertible securities) is valued at its last sales price or official closing price as of the close of the customary trading session on the exchange where the security is principally traded, or lacking any sales or official closing price on a particular day, the security may be valued at the closing bid price on that day. Securities traded in the over-the-counter market are valued based on prices furnished by independent pricing services or market makers. When such securities are valued by an independent pricing service they may be considered fair valued. Futures contracts are valued at the final settlement price set by an exchange on which they are principally traded. Listed options are valued at the mean between the last bid and asked prices from the exchange on which they are principally traded. Options not listed on an exchange are valued by an independent source at the mean between the last bid and asked prices. For purposes of determining net asset value (“NAV”) per share, futures and option contracts generally are valued 15 minutes after the close of the customary trading session of the New York Stock Exchange (“NYSE”).

Investments in open-end and closed-end registered investment companies that do not trade on an exchange are valued at the end-of-day net asset value per share. Investments in open-end and closed-end registered investment companies that trade on an exchange are valued at the last sales price or official closing price as of the close of the customary trading session on the exchange where the security is principally traded.

Swap agreements are fair valued using an evaluated quote, if available, provided by an independent pricing service. Evaluated quotes provided by the pricing service are valued based on a model which may include end-of-day net present values, spreads, ratings, industry, company performance and returns of referenced assets. Centrally cleared swap agreements are valued at the daily settlement price determined by the relevant exchange or clearinghouse.

Foreign securities' (including foreign exchange contracts) prices are converted into U.S. dollar amounts using the applicable exchange rates as of the close of the NYSE. If market quotations are available and reliable for foreign exchange-traded equity securities, the securities will be valued at the market quotations. Because trading hours for certain foreign securities end before the close of the NYSE, closing market quotations may become unreliable. If between the time trading ends on a particular security and the close of the customary trading session on the NYSE, events occur that the investment adviser determines are significant and make the closing price unreliable, the Fund may fair value the security. If the event is likely to have affected the closing price of the security, the security will be valued at fair value in good faith using procedures approved by the Board of Trustees. Adjustments to closing prices to reflect fair value may also be based on a screening process of an independent pricing service to indicate the degree of certainty, based on historical data, that the closing price in the principal market where a foreign security trades is not the current value as of the close of the NYSE. Foreign securities' prices meeting the approved degree of certainty that the price is not reflective of current value will be priced at the indication of fair value from the independent pricing service. Multiple factors may be considered by the independent pricing service in determining adjustments to reflect fair value and may include information relating to sector indices, American Depositary Receipts and domestic and foreign index futures. Foreign securities may have additional risks including exchange rate changes, potential for sharply devalued currencies and high inflation, political and economic upheaval, the relative lack of issuer information, relatively low market liquidity and the potential lack of strict financial and accounting controls and standards.

Securities for which market prices are not provided by any of the above methods may be valued based upon quotes furnished by independent sources. The last bid price may be used to value equity securities. The mean between the last bid and asked prices is used to value debt obligations, including corporate loans.

Securities for which market quotations are not readily available or became unreliable are valued at fair value as determined in good faith by or under the supervision of the Trust's officers following procedures approved by the Board of Trustees. Issuer specific events, market trends, bid/asked quotes of brokers and information providers and other market data may be reviewed in the course of making a good faith determination of a security's fair value.

The Fund may invest in securities that are subject to interest rate risk, meaning the risk that the prices will generally fall as interest rates rise and, conversely, the prices will generally rise as interest rates fall. Specific securities differ in their sensitivity to changes in interest rates depending on their individual characteristics. Changes in interest rates may result in increased market volatility, which may affect the value and/or liquidity of certain Fund investments.

Valuations change in response to many factors including the historical and prospective earnings of the issuer, the value of the issuer's assets, general market conditions which are not specifically related to the particular issuer, such as real or perceived adverse economic conditions, changes in the general outlook for revenues or corporate earnings, changes in interest or currency rates, regional or global instability, natural or environmental disasters, widespread disease or other public health issues, war, acts of terrorism or adverse investor sentiment generally and market liquidity. Because of the inherent uncertainties of valuation, the values reflected in the consolidated financial statements may materially differ from the value received upon actual sale of those investments.

B. Securities Transactions and Investment Income – Securities transactions are accounted for on a trade date basis. Realized gains or losses on sales are computed on the basis of specific identification of the securities sold. Interest income (net of withholding tax, if any) is recorded on an accrual basis from settlement date. Bond premiums and discounts are amortized and/or accreted over the lives of the respective securities. Pay-in-kind interest income and non-cash

dividend income received in the form of securities in-lieu of cash are recorded at the fair value of the securities received. Dividend income (net of withholding tax, if any) is recorded on the ex-dividend date.

The Fund may periodically participate in litigation related to Fund investments. As such, the Fund may receive proceeds from litigation settlements. Any proceeds received are included in the Consolidated Statement of Operations as realized gain (loss) for investments no longer held and as unrealized gain (loss) for investments still held.

Brokerage commissions and mark ups are considered transaction costs and are recorded as an increase to the cost basis of securities purchased and/or a reduction of proceeds on a sale of securities. Such transaction costs are included in the determination of net realized and unrealized gain (loss) from investment securities reported in the Consolidated Statement of Operations and the Consolidated Statement of Changes in Net Assets and the net realized and unrealized gains (losses) on securities per share in the Consolidated Financial Highlights. Transaction costs are included in the calculation of the Fund's net asset value and, accordingly, they reduce the Fund's total returns. These transaction costs are not considered operating expenses and are not reflected in net investment income reported in the Consolidated Statement of Operations and the Consolidated Statement of Changes in Net Assets, or the net investment income per share and the ratios of expenses and net investment income reported in the Consolidated Financial Highlights, nor are they limited by any expense limitation arrangements between the Fund and the investment adviser.

The Fund allocates income and realized and unrealized capital gains and losses to a class based on the relative net assets of each class.

C. Country Determination – For the purposes of making investment selection decisions and presentation in the Consolidated Schedule of Investments, the investment adviser may determine the country in which an issuer is located and/or credit risk exposure based on various factors. These factors include the laws of the country under which the issuer is organized, where the issuer maintains a principal office, the country in which the issuer derives 50% or more of its total revenues and the country that has the primary market for the issuer's securities, as well as other criteria. Among the other criteria that may be evaluated for making this determination are the country in which the issuer maintains 50% or more of its assets, the type of security, financial guarantees and enhancements, the nature of the collateral and the sponsor organization. Country of issuer and/or credit risk exposure has been determined to be the United States of America, unless otherwise noted.

D. Distributions – Distributions from net investment income and net realized capital gain, if any, are generally declared and paid to separate accounts of participating insurance companies annually and recorded on the ex-dividend date.

E. Federal Income Taxes – The Fund intends to comply with the requirements of Subchapter M of the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"), necessary to qualify as a regulated investment company and to distribute substantially all of the Fund's taxable earnings to shareholders. As such, the Fund will not be subject to federal income taxes on otherwise taxable income (including net realized capital gain) that is distributed to shareholders. Therefore, no provision for federal income taxes is recorded in the consolidated financial statements.

The Fund recognizes the tax benefits of uncertain tax positions only when the position is more likely than not to be sustained. Management has analyzed the Fund's uncertain tax positions and concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions. Management is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next 12 months.

The Subsidiary is classified as a controlled foreign corporation under Subchapter N of the Internal Revenue Code. Therefore, the Fund is required to increase its taxable income by its share of the Subsidiary's income. Net investment losses of the Subsidiary cannot be deducted by the Fund in the current period nor carried forward to offset taxable income in future periods.

The Fund files tax returns in the U.S. Federal jurisdiction and certain other jurisdictions. Generally the Fund is subject to examinations by such taxing authorities for up to three years after the filing of the return for the tax period.

F. Expenses – Fees provided for under the Rule 12b-1 plan of a particular class of the Fund and which are directly attributable to that class are charged to the operations of such class. All other expenses are allocated among the classes based on relative net assets.

G. Accounting Estimates – The financial statements are prepared on a consolidated basis in conformity with accounting principles generally accepted in the United States of America ("GAAP"), which requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period including estimates and assumptions related to taxation. Actual results could differ from those estimates by a significant amount. The accompanying financial statements reflect the financial position of the Fund and its Subsidiary and the results of operations on a consolidated basis. All inter-company accounts and transactions have been eliminated in consolidation.

In addition, the Fund monitors for material events or transactions that may occur or become known after the period-end date and before the date the consolidated financial statements are released to print.

H. Indemnifications – Under the Trust's organizational documents, each Trustee, officer, employee or other agent of the Trust, and under the Subsidiary's organizational documents, the directors and officers of the Subsidiary, are indemnified against certain liabilities that may arise out of the performance of their duties to the Fund and/or the Subsidiary, respectively. Additionally, in the normal course of business, the Fund enters into contracts, including the Fund's servicing agreements, that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. The risk of material loss as a result of such indemnification claims is considered remote.

I. Structured Securities – The Fund may invest in structured securities. Structured securities are a type of derivative security whose value is determined by reference to changes in the value of underlying securities, currencies, interest rates, commodities, indices or other financial indicators ("reference instruments"). Most structured securities are fixed-income securities that have maturities of three years or less. Structured securities may be positively or negatively indexed (i.e., their principal value or interest rates may increase or decrease if the underlying reference instrument appreciates) and may have return characteristics similar to direct investments in the underlying reference instrument.

Structured securities may entail a greater degree of market risk than other types of debt securities because the investor bears the risk of the reference instruments. In addition to the credit risk of structured securities and the normal risks of price changes in response to changes in interest rates, the principal amount of structured notes or indexed securities may decrease as a result of changes in the value of the underlying reference instruments. Changes in the daily value of structured securities are recorded as unrealized gains (losses) in the Consolidated Statement of Operations. When the structured securities mature or are sold, the Fund recognizes a realized gain (loss) on the Consolidated Statement of Operations.

J. Foreign Currency Translations – Foreign currency is valued at the close of the NYSE based on quotations posted by banks and major currency dealers. Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts at the date of valuation. Purchases and sales of portfolio securities (net of foreign taxes withheld on disposition) and income items denominated in foreign currencies are translated into U.S. dollar amounts on the respective dates of such transactions. The Fund does not separately account for the portion of the results of operations resulting from changes in foreign exchange rates on investments and the fluctuations arising from changes in market prices of securities held. The combined results of changes in foreign exchange rates and the fluctuation of market prices on investments (net of estimated foreign tax withholding) are included with the net realized and unrealized gain or loss from investments in the Consolidated Statement of Operations. Reported net realized foreign currency gains or losses arise from (1) sales of foreign currencies, (2) currency gains or losses realized between the trade and settlement dates on securities transactions, and (3) the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net

unrealized foreign currency gains and losses arise from changes in the fair values of assets and liabilities, other than investments in securities at fiscal period end, resulting from changes in exchange rates.

The Fund may invest in foreign securities, which may be subject to foreign taxes on income, gains on investments or currency repatriation, a portion of which may be recoverable. Foreign taxes, if any, are recorded based on the tax regulations and rates that exist in the foreign markets in which the Fund invests and are shown in the Consolidated Statement of Operations.

- K. Forward Foreign Currency Contracts** – The Fund may engage in foreign currency transactions either on a spot (i.e. for prompt delivery and settlement) basis, or through forward foreign currency contracts, to manage or minimize currency or exchange rate risk.

The Fund may also enter into forward foreign currency contracts for the purchase or sale of a security denominated in a foreign currency in order to “lock in” the U.S. dollar price of that security, or the Fund may also enter into forward foreign currency contracts that do not provide for physical settlement of the two currencies, but instead are settled by a single cash payment calculated as the difference between the agreed upon exchange rate and the spot rate at settlement based upon an agreed upon notional amount (non-deliverable forwards). The Fund will set aside liquid assets in an amount equal to the daily mark-to-market obligation for forward foreign currency contracts.

A forward foreign currency contract is an obligation between two parties (“Counterparties”) to purchase or sell a specific currency for an agreed-upon price at a future date. The use of forward foreign currency contracts does not eliminate fluctuations in the price of the underlying securities the Fund owns or intends to acquire but establishes a rate of exchange in advance. Fluctuations in the value of these contracts are measured by the difference in the contract date and reporting date exchange rates and are recorded as unrealized appreciation (depreciation) until the contracts are closed. When the contracts are closed, realized gains (losses) are recorded. Realized and unrealized gains (losses) on the contracts are included in the Consolidated Statement of Operations. The primary risks associated with forward foreign currency contracts include failure of the Counterparty to meet the terms of the contract and the value of the foreign currency changing unfavorably. These risks may be in excess of the amounts reflected in the Consolidated Statement of Assets and Liabilities.

- L. Futures Contracts** – The Fund may enter into futures contracts to equitize the Fund’s cash holdings or to manage exposure to interest rate, equity, commodity and market price movements and/or currency risks. A futures contract is an agreement between Counterparties to purchase or sell a specified underlying security, currency or commodity (or delivery of a cash settlement price, in the case of an index future) for a fixed price at a future date. The Fund currently invests only in exchange-traded futures and they are standardized as to maturity date and underlying financial instrument. Initial margin deposits required upon entering into futures contracts are satisfied by the segregation of specific securities or cash as collateral at the futures commission merchant (broker). During the period the futures contracts are open, changes in the value of the contracts are recognized as unrealized gains or losses by recalculating the value of the contracts on a daily basis. Subsequent or variation margin payments are received or made depending upon whether unrealized gains or losses are incurred. These amounts are reflected as receivables or payables on the Consolidated Statement of Assets and Liabilities. When the contracts are closed or expire, the Fund recognizes a realized gain or loss equal to the difference between the proceeds from, or cost of, the closing transaction and the Fund’s basis in the contract. The net realized gain (loss) and the change in unrealized gain (loss) on futures contracts held during the period is included on the Consolidated Statement of Operations. The primary risks associated with futures contracts are market risk and the absence of a liquid secondary market. If the Fund were unable to liquidate a futures contract and/or enter into an offsetting closing transaction, the Fund would continue to be subject to market risk with respect to the value of the contracts and continue to be required to maintain the margin deposits on the futures contracts. Futures contracts have minimal Counterparty risk since the exchange’s clearinghouse, as Counterparty to all exchange-traded futures, guarantees the futures against default. Risks may exceed amounts recognized in the Consolidated Statement of Assets and Liabilities.

- M. Swap Agreements** – The Fund may enter into various swap transactions, including interest rate, total return, index, currency and credit default swap contracts (“CDS”) for investment purposes or to manage interest rate, currency, commodity or credit risk. Such transactions are agreements between Counterparties. These agreements may contain among other conditions, events of default and termination events, and various covenants and representations such as provisions that require the Fund to maintain a pre-determined level of net assets, and/or provide limits regarding the decline of the Fund’s NAV over specific periods of time. If the Fund were to trigger such provisions and have open derivative positions at that time, the Counterparty may be able to terminate such agreement and request immediate payment in an amount equal to the net liability positions, if any.

Interest rate, total return, index, and currency swap agreements are two-party contracts entered into primarily to exchange the returns (or differentials in rates of returns) earned or realized on particular predetermined investments or instruments. The gross returns to be exchanged or “swapped” between the parties are calculated with respect to a notional amount, i.e., the return on or increase in value of a particular dollar amount invested at a particular interest rate or return of an underlying asset, in a particular foreign currency, or in a “basket” of securities representing a particular index.

An interest rate swap is an agreement between Counterparties pursuant to which the parties exchange a floating rate payment for a fixed rate payment based on a specified notional amount.

A total return swap is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income generated and capital gains, if any. The unrealized appreciation (depreciation) on total return swaps includes dividends on the underlying securities and financing rate payable from the Counterparty. At the maturity date, a net cash flow is exchanged where the total return is equivalent to the return of the underlying reference less a financing rate, if any. As a receiver, the Fund would receive payments based on any positive total return and would owe payments in the event of a negative total return. As the payer, the Fund would owe payments on any net positive total return, and would receive payment in the event of a negative total return.

Changes in the value of swap agreements are recognized as unrealized gains (losses) in the Consolidated Statement of Operations by “marking to market” on a daily basis to reflect the value of the swap agreement at the end of each trading day. Payments received or paid at the beginning of the agreement are reflected as such on the Consolidated Statement of Assets and Liabilities and may be referred to as upfront payments. The Fund accrues for the fixed payment stream and amortizes upfront payments, if any, on swap agreements on a daily basis with the net amount, recorded as a component of realized gain (loss) on the Consolidated Statement of Operations. A liquidation payment received or made at the termination of a swap agreement is recorded as realized gain (loss) on the Consolidated Statement of Operations. The Fund segregates cash or liquid securities having a value at least equal to the amount of the potential obligation of a Fund under any swap transaction. Cash held as collateral is recorded as deposits with brokers on the Consolidated Statement of Assets and Liabilities. Entering into these agreements involves, to varying degrees, lack of liquidity and elements of credit, market, and Counterparty risk in excess of amounts recognized on the Consolidated Statement of Assets and Liabilities. Such risks involve the possibility that a swap is difficult to sell or liquidate; the Counterparty does not honor its obligations under the agreement and unfavorable interest rates and market fluctuations. It is possible that developments in the swaps market, including potential government regulation, could adversely affect the Fund’s ability to terminate existing swap agreements or to realize amounts to be received under such agreements. Additionally, an International Swaps and Derivatives Association Master Agreement (“ISDA Master Agreement”) includes credit related contingent features which allow Counterparties to OTC derivatives to terminate derivative contracts prior to maturity in the event that, for example, the Fund’s net assets decline by a stated percentage or the Fund fails to meet the terms of its ISDA master agreements, which would cause the Fund to accelerate payment of any net liability owed to the Counterparty. A short position in a security poses more risk than holding the same security long. As there is no limit on how much the price of the security can increase, the Fund’s exposure is unlimited.

- N. Other Risks** - The Fund will seek to gain exposure to commodity markets primarily through an investment in the Subsidiary and through investments in commodity futures and swaps, commodity related exchange-traded funds and exchange-traded notes and commodity linked notes, some or all of which will be owned through the Subsidiary. The Subsidiary, unlike the Fund, may invest without limitation in commodities, commodity-linked derivatives and other securities,

such as exchange-traded and commodity-linked notes, that may provide leveraged and non-leveraged exposure to commodity markets. The Fund is indirectly exposed to the risks associated with the Subsidiary's investments.

The current low interest rate environment was created in part by the Federal Reserve Board (FRB) and certain foreign central banks keeping the federal funds and equivalent foreign rates near historical lows. Increases in the federal funds and equivalent foreign rates may expose fixed income markets to heightened volatility and reduced liquidity for certain fixed income investments, particularly those with longer maturities. In addition, decreases in fixed income dealer market-making capacity may also potentially lead to heightened volatility and reduced liquidity in the fixed income markets. As a result, the value of the Fund's investments and share price may decline. Changes in central bank policies could also result in higher than normal shareholder redemptions, which could potentially increase portfolio turnover and the Fund's transaction costs.

In addition to risks associated with the underlying commodities, investments in commodity-linked notes may be subject to additional risks, such as non-payment of interest and loss of principal, counterparty risk, lack of a secondary market and risk of greater volatility than traditional equity and debt securities. The value of the commodity-linked notes the Fund buys may fluctuate significantly because the values of the underlying investments to which they are linked are themselves volatile. Additionally, certain commodity-linked notes employ "economic" leverage by requiring payment by the issuer of an amount that is a multiple of the price increase or decrease of the underlying commodity, commodity index, or other economic variable. Such economic leverage will increase the volatility of the value of these commodity-linked notes and the Fund to the extent it invests in such notes.

- O. Leverage Risk** – Leverage exists when the Fund can lose more than it originally invests because it purchases or sells an instrument or enters into a transaction without investing an amount equal to the full economic exposure of the instrument or transaction.
- P. Collateral** – To the extent the Fund has designated or segregated a security as collateral and that security is subsequently sold, it is the Fund's practice to replace such collateral no later than the next business day.

NOTE 2–Advisory Fees and Other Fees Paid to Affiliates

The Trust has entered into a master investment advisory agreement with Invesco Advisers, Inc. (the "Adviser" or "Invesco"). Under the terms of the investment advisory agreement, the Fund accrues daily and pays monthly an advisory fee to the Adviser less the amount paid by the Subsidiary to the Adviser based on the annual rate of the Fund's average daily net assets as follows:

Average Daily Net Assets	Rate
First \$250 million	0.950%
Next \$250 million	0.925%
Next \$500 million	0.900%
Next \$1.5 billion	0.875%
Next \$2.5 billion	0.850%
Next \$2.5 billion	0.825%
Next \$2.5 billion	0.800%
Over \$10 billion	0.775%

For the year ended December 31, 2020, the effective advisory fee rate incurred by the Fund was 0.92%.

The Subsidiary has entered into a separate contract with the Adviser whereby the Adviser provides investment advisory and other services to the Subsidiary. In consideration of these services, the Subsidiary pays an advisory fee to the Adviser based on the annual rate of the Subsidiary's average daily net assets as set forth in the table above.

Under the terms of a master sub-advisory agreement between the Adviser and each of Invesco Asset Management Deutschland GmbH, Invesco Asset Management Limited, Invesco Asset Management (Japan) Limited, Invesco Hong Kong Limited, Invesco Senior Secured Management, Inc. and Invesco Canada Ltd. and separate sub-advisory agreements with Invesco Capital Management LLC and Invesco Asset Management (India) Private Limited (collectively, the "Affiliated Sub-Advisers") the Adviser, not the Fund, will pay 40% of the fees paid to the Adviser to any such Affiliated Sub-Adviser(s) that provide(s) discretionary investment management services to the Fund based on the percentage of assets allocated to such Affiliated Sub-Adviser(s).

The Adviser has contractually agreed, through at least April 30, 2022, to waive advisory fees and/or reimburse expenses of all shares to the extent necessary to limit total annual fund operating expenses after fee waiver and/or expense reimbursement (including prior fiscal year-end Acquired Fund Fees and Expenses of 0.15% and excluding certain items discussed below) of Series I shares to 0.80% and Series II shares to 1.05% of the Fund's average daily net assets (the "expense limits"). In determining the Adviser's obligation to waive advisory fees and/or reimburse expenses, the following expenses are not taken into account, and could cause the total annual fund operating expenses after fee waiver and/or expense reimbursement to exceed the numbers reflected above: (1) interest; (2) taxes; (3) dividend expense on short sales; (4) extraordinary or non-routine items, including litigation expenses; and (5) expenses that the Fund has incurred but did not actually pay because of an expense offset arrangement. Acquired Fund Fees and Expenses are not operating expenses of the Fund directly, but are fees and expenses, including management fees, of the investment companies in which the Fund invests. As a result, the total annual fund operating expenses after expense reimbursement may exceed the expense limits above. Unless Invesco continues the fee waiver agreement, it will terminate on April 30, 2022. During its term, the fee waiver agreement cannot be terminated or amended to increase the expense limits or reduce the advisory fee waiver without approval of the Board of Trustees.

Further, the Adviser has contractually agreed, through at least June 30, 2022, to waive the advisory fee payable by the Fund in an amount equal to 100% of the net advisory fees the Adviser receives from the affiliated money market funds on investments by the Fund of uninvested cash in such affiliated money market funds.

For the year ended December 31, 2020, the Adviser waived advisory fees of \$4,140,286.

The Trust has entered into a master administrative services agreement with Invesco pursuant to which the Fund has agreed to pay Invesco a fee for costs incurred in providing accounting services and fund administrative services to the Fund and to reimburse Invesco for fees paid to insurance companies that have agreed to provide certain administrative services to the Fund. These administrative services provided by the insurance companies may include, among other things: maintenance of master accounts with the Fund; tracking, recording and transmitting net purchase and redemption orders for Fund shares; maintaining and preserving records related to the purchase, redemption and other account activity of variable product owners; distributing copies of Fund documents such as prospectuses, proxy materials and periodic reports, to variable product owners, and responding to inquiries from variable product owners about the Fund. Pursuant to such agreement, for the year ended December 31, 2020, Invesco was paid \$134,962 for accounting and fund administrative services and was reimbursed \$1,406,096 for fees paid to insurance companies. Invesco has entered into a sub-administration agreement whereby State Street Bank and Trust Company ("SSB") serves as fund accountant and provides certain administrative services to the Fund. Pursuant to a custody agreement with the Trust on behalf of the Fund, SSB also serves as the Fund's custodian.

The Trust has entered into a transfer agency and service agreement with Invesco Investment Services, Inc. ("IIS") pursuant to which the Fund has agreed to pay IIS a fee for providing transfer agency and shareholder services to the Fund and reimburse IIS for certain expenses incurred by IIS in the course of providing such services. For the year ended December 31, 2020, expenses incurred under the agreement are shown in the Consolidated Statement of Operations as *Transfer agent fees*.

The Trust has entered into a master distribution agreement with Invesco Distributors, Inc. ("IDI") to serve as the distributor for the Fund. The Trust has adopted a plan pursuant to Rule 12b-1 under the 1940 Act with respect to the Fund's Series II shares (the "Plan"). The Fund, pursuant to the Plan, pays IDI compensation at the annual rate of 0.25% of the Fund's average daily net assets of Series II shares. The fees are accrued daily and paid monthly. Of the Plan payments, up to 0.25% of the average daily net assets of the Series II shares may be paid to insurance companies who furnish continuing personal shareholder services to customers who purchase and own Series II shares of the Fund. For the year ended December 31, 2020, expenses incurred under the Plan are detailed in the Consolidated Statement of Operations as *Distribution fees*.

Certain officers and trustees of the Trust are officers and directors of the Adviser, IIS and/or IDI.

NOTE 3—Additional Valuation Information

GAAP defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, under current market conditions. GAAP establishes a hierarchy that prioritizes the inputs to valuation methods, giving the highest priority to readily available unadjusted quoted prices in an active market for identical assets (Level 1) and the lowest priority to significant unobservable inputs (Level 3), generally when market prices are not readily available or are unreliable. Based on the valuation inputs, the securities or other investments are tiered into one of three levels. Changes in valuation methods may result in transfers in or out of an investment's assigned level:

Level 1 - Prices are determined using quoted prices in an active market for identical assets.

Level 2 - Prices are determined using other significant observable inputs. Observable inputs are inputs that other market participants may use in pricing a security. These may include quoted prices for similar securities, interest rates, prepayment speeds, credit risk, yield curves, loss severities, default rates, discount rates, volatilities and others.

Level 3 - Prices are determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable (for example, when there is little or no market activity for an investment at the end of the period), unobservable inputs may be used. Unobservable inputs reflect the Fund's own assumptions about the factors market participants would use in determining fair value of the securities or instruments and would be based on the best available information.

The following is a summary of the tiered valuation input levels, as of December 31, 2020. The level assigned to the securities valuations may not be an indication of the risk or liquidity associated with investing in those securities. Because of the inherent uncertainties of valuation, the values reflected in the consolidated financial statements may materially differ from the value received upon actual sale of those investments.

	Level 1	Level 2	Level 3	Total
Investments in Securities				
U.S. Treasury Securities	\$ -	\$108,784,212	\$-	\$108,784,212
Commodity-Linked Securities	-	31,412,350	-	31,412,350
Money Market Funds	767,126,252	-	-	767,126,252
Total Investments in Securities	767,126,252	140,196,562	-	907,322,814
Other Investments - Assets*				
Futures Contracts	16,766,258	-	-	16,766,258
Swap Agreements	-	5,769,058	-	5,769,058
	16,766,258	5,769,058	-	22,535,316
Other Investments - Liabilities*				
Futures Contracts	(1,205,238)	-	-	(1,205,238)
Swap Agreements	-	(474,412)	-	(474,412)
	(1,205,238)	(474,412)	-	(1,679,650)
Total Other Investments	15,561,020	5,294,646	-	20,855,666
Total Investments	\$782,687,272	\$145,491,208	\$-	\$928,178,480

* Unrealized appreciation (depreciation).

NOTE 4—Derivative Investments

The Fund may enter into an ISDA Master Agreement under which a fund may trade OTC derivatives. An OTC transaction entered into under an ISDA Master Agreement typically involves a collateral posting arrangement, payment netting provisions and close-out netting provisions. These netting provisions allow for reduction of credit risk through netting of contractual obligations. The enforceability of the netting provisions of the ISDA Master Agreement depends on the governing law of the ISDA Master Agreement, among other factors.

For financial reporting purposes, the Fund does not offset OTC derivative assets or liabilities that are subject to ISDA Master Agreements in the Consolidated Statement of Assets and Liabilities.

Value of Derivative Investments at Period-End

The table below summarizes the value of the Fund's derivative investments, detailed by primary risk exposure, held as of December 31, 2020:

Derivative Assets	Value			Total
	Commodity Risk	Equity Risk	Interest Rate Risk	
Unrealized appreciation on futures contracts – Exchange-Traded ^(a)	\$ 7,430,980	\$ 7,187,691	\$ 2,147,587	\$ 16,766,258
Unrealized appreciation on swap agreements – OTC	5,178,334	590,724	-	5,769,058
Total Derivative Assets	12,609,314	7,778,415	2,147,587	22,535,316
Derivatives not subject to master netting agreements	(7,430,980)	(7,187,691)	(2,147,587)	(16,766,258)
Total Derivative Assets subject to master netting agreements	\$ 5,178,334	\$ 590,724	\$ -	\$ 5,769,058

Derivative Liabilities	Value			
	Commodity Risk	Equity Risk	Interest Rate Risk	Total
Unrealized depreciation on futures contracts – Exchange-Traded ^(a)	\$ -	\$ (733,986)	\$ (471,252)	\$ (1,205,238)
Unrealized depreciation on swap agreements – OTC	(474,412)	-	-	(474,412)
Total Derivative Liabilities	(474,412)	(733,986)	(471,252)	(1,679,650)
Derivatives not subject to master netting agreements	-	733,986	471,252	1,205,238
Total Derivative Liabilities subject to master netting agreements	\$ (474,412)	\$ -	\$ -	\$ (474,412)

^(a) The daily variation margin receivable (payable) at period-end is recorded in the Consolidated Statement of Assets and Liabilities.

Offsetting Assets and Liabilities

The table below reflects the Fund's exposure to Counterparties subject to either an ISDA Master Agreement or other agreement for OTC derivative transactions as of December 31, 2020.

Counterparty	Financial Derivative Assets	Financial Derivative Liabilities	Net Value of Derivatives	Collateral (Received)/Pledged		Net Amount ^(a)
	Swap Agreements	Swap Agreements		Non-Cash	Cash	
Fund						
Goldman Sachs International	\$ 590,724	\$(130,469)	\$ 460,255	\$-	\$ -	\$ 460,255
Subtotal-Fund	590,724	(130,469)	460,255	-	-	460,255

Total	\$6,893,269	\$(809,826)	\$6,083,443	\$-	\$(3,227,989)	\$2,855,454

^(a) The Fund and the Subsidiary are recognized as separate legal entities and as such are subject to separate netting arrangements with the Counterparty.

Effect of Derivative Investments for the year ended December 31, 2020

The table below summarizes the gains (losses) on derivative investments, detailed by primary risk exposure, recognized in earnings during the period:

	Location of Gain (Loss) on Consolidated Statement of Operations			
	Commodity Risk	Equity Risk	Interest Rate Risk	Total
Realized Gain (Loss):				
Futures contracts	\$ (8,300,730)	\$ 9,869,856	\$32,890,764	\$34,459,890
Swap agreements	21,689,437	835,508	-	22,524,945
Change in Net Unrealized Appreciation:				
Futures contracts	3,057,581	3,762,180	13,566,628	20,386,389
Swap agreements	3,230,995	590,724	-	3,821,719
Total	\$19,677,283	\$15,058,268	\$46,457,392	\$81,192,943

The table below summarizes the average notional value of derivatives held during the period.

	Futures Contracts	Swap Agreements
Average notional value	\$1,084,018,110	\$191,607,640

NOTE 5–Trustees' and Officers' Fees and Benefits

Trustees' and Officers' Fees and Benefits include amounts accrued by the Fund to pay remuneration to certain Trustees and Officers of the Fund. Trustees have the option to defer compensation payable by the Fund, and *Trustees' and Officers' Fees and Benefits* also include amounts accrued by the Fund to fund such deferred compensation amounts. Those Trustees who defer compensation have the option to select various Invesco Funds in which their deferral accounts shall be deemed to be invested. Finally, certain current Trustees were eligible to participate in a retirement plan that provided for benefits to be paid upon retirement to Trustees over a

period of time based on the number of years of service. The Fund may have certain former Trustees who also participate in a retirement plan and receive benefits under such plan. *Trustees' and Officers' Fees and Benefits* include amounts accrued by the Fund to fund such retirement benefits. Obligations under the deferred compensation and retirement plans represent unsecured claims against the general assets of the Fund.

NOTE 6—Cash Balances

The Fund is permitted to temporarily carry a negative or overdrawn balance in its account with SSB, the custodian bank. Such balances, if any at period-end, are shown in the Consolidated Statement of Assets and Liabilities under the payable caption *Amount due custodian*. To compensate the custodian bank for such overdrafts, the overdrawn Fund may either (1) leave funds as a compensating balance in the account so the custodian bank can be compensated by earning the additional interest; or (2) compensate by paying the custodian bank at a rate agreed upon by the custodian bank and Invesco, not to exceed the contractually agreed upon rate. The Fund may not purchase additional securities when any borrowings from banks or broker-dealers exceed 5% of the Fund's total assets, or when any borrowings from an Invesco Fund are outstanding.

NOTE 7—Distributions to Shareholders and Tax Components of Net Assets

Tax Character of Distributions to Shareholders Paid During the Fiscal Years Ended December 31, 2020 and 2019:

	2020	2019
Ordinary income*	\$ 89,338,290	\$-
Long-term capital gain	30,231,711	-
Total distributions	\$119,570,001	\$-

* Includes short-term capital gain distributions, if any.

Tax Components of Net Assets at Period-End:

	2020
Undistributed ordinary income	\$ 41,205,414
Undistributed long-term capital gain	18,480,023
Net unrealized appreciation – investments	18,107,984
Net unrealized appreciation (depreciation) - foreign currencies	(31,196)
Temporary book/tax differences	(95,784)
Shares of beneficial interest	902,957,206
Total net assets	\$980,623,647

The difference between book-basis and tax-basis unrealized appreciation (depreciation) is due to differences in the timing of recognition of gains and losses on investments for tax and book purposes. The Fund's net unrealized appreciation (depreciation) difference is attributable primarily to futures contracts and swap agreements.

The temporary book/tax differences are a result of timing differences between book and tax recognition of income and/or expenses. The Fund's temporary book/tax differences are the result of the trustee deferral of compensation and retirement plan benefits.

Capital loss carryforward is calculated and reported as of a specific date. Results of transactions and other activity after that date may affect the amount of capital loss carryforward actually available for the Fund to utilize. The ability to utilize capital loss carryforward in the future may be limited under the Internal Revenue Code and related regulations based on the results of future transactions.

The Fund does not have a capital loss carryforward as of December 31, 2020.

NOTE 8—Investment Transactions

The aggregate amount of investment securities (other than short-term securities, U.S. Treasury obligations and money market funds, if any) purchased and sold by the Fund during the year ended December 31, 2020 was \$18,980,000 and \$17,545,113, respectively. Cost of investments, including any derivatives, on a tax basis includes the adjustments for financial reporting purposes as of the most recently completed federal income tax reporting period-end.

Unrealized Appreciation (Depreciation) of Investments on a Tax Basis

Aggregate unrealized appreciation of investments	\$19,787,634
Aggregate unrealized (depreciation) of investments	(1,679,650)
Net unrealized appreciation of investments	\$18,107,984

Cost of investments for tax purposes is \$910,070,496.

NOTE 9—Reclassification of Permanent Differences

Primarily as a result of differing book/tax treatment of foreign currencies, swap agreements and futures contracts, on December 31, 2020, undistributed net investment income (loss) was increased by \$30,907,764 and undistributed net realized gain was decreased by \$30,907,764. This reclassification had no effect on the net assets or the distributable earnings of the Fund.

NOTE 10—Share Information**Summary of Share Activity**

	Year ended December 31, 2020 ^(a)		Year ended December 31, 2019	
	Shares	Amount	Shares	Amount
Sold:				
Series I	379,236	\$ 3,960,734	479,777	\$ 4,939,090
Series II	3,857,886	39,526,525	4,284,767	43,466,506
Issued as reinvestment of dividends:				
Series I	609,307	5,885,904	-	-
Series II	11,979,357	113,684,097	-	-
Reacquired:				
Series I	(682,143)	(6,935,376)	(270,304)	(2,780,603)
Series II	(16,076,040)	(163,600,619)	(16,984,260)	(172,302,767)
Net increase (decrease) in share activity	67,603	\$ (7,478,735)	(12,490,020)	\$(126,677,774)

^(a) There are entities that are record owners of more than 5% of the outstanding shares of the Fund and in the aggregate own 81% of the outstanding shares of the Fund. The Fund and the Fund's principal underwriter or adviser, are parties to participation agreements with these entities whereby these entities sell units of interest in separate accounts funding variable products that are invested in the Fund. The Fund, Invesco and/or Invesco affiliates may make payments to these entities, which are considered to be related to the Fund, for providing services to the Fund, Invesco and/or Invesco affiliates including but not limited to services such as, securities brokerage, third party record keeping and account servicing and administrative services. The Fund has no knowledge as to whether all or any portion of the shares owned of record by these entities are also owned beneficially.

NOTE 11—Coronavirus (COVID-19) Pandemic

During the first quarter of 2020, the World Health Organization declared COVID-19 to be a public health emergency. COVID-19 has led to increased short-term market volatility and may have adverse long-term effects on U.S. and world economies and markets in general. COVID-19 may adversely impact the Fund's ability to achieve its investment objective. Because of the uncertainties on valuation, the global economy and business operations, values reflected in these consolidated financial statements may materially differ from the value received upon actual sales of those investments.

The extent of the impact on the performance of the Fund and its investments will depend on future developments, including the duration and spread of the COVID-19 outbreak, related restrictions and advisories, and the effects on the financial markets and economy overall, all of which are highly uncertain and cannot be predicted.

Report of Independent Registered Public Accounting Firm

To the Board of Trustees of AIM Variable Insurance Funds (Invesco Variable Insurance Funds) and Shareholders of Invesco V.I. Balanced-Risk Allocation Fund

Opinion on the Financial Statements

We have audited the accompanying consolidated statement of assets and liabilities, including the consolidated schedule of investments, of Invesco V.I. Balanced-Risk Allocation Fund and its subsidiary (one of the funds constituting AIM Variable Insurance Funds (Invesco Variable Insurance Funds), referred to hereafter as the "Fund") as of December 31, 2020, the related consolidated statement of operations for the year ended December 31, 2020, the consolidated statement of changes in net assets for each of the two years in the period ended December 31, 2020, including the related notes, and the consolidated financial highlights for each of the five years in the period ended December 31, 2020 (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Fund as of December 31, 2020, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period ended December 31, 2020 and the financial highlights for each of the five years in the period ended December 31, 2020 in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These consolidated financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on the Fund's consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these consolidated financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our procedures included confirmation of securities owned as of December 31, 2020 by correspondence with the custodian, transfer agent and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

/s/PricewaterhouseCoopers LLP

Houston, Texas
February 16, 2021

We have served as the auditor of one or more investment companies in the Invesco group of investment companies since at least 1995. We have not been able to determine the specific year we began serving as auditor.

Calculating your ongoing Fund expenses

Example

As a shareholder of the Fund, you incur ongoing costs, including management fees; distribution and/or service fees (12b-1); and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with ongoing costs of investing in other mutual funds. The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period July 1, 2020 through December 31, 2020.

The actual and hypothetical expenses in the examples below do not represent the effect of any fees or other expenses assessed in connection with a variable product; if they did, the expenses shown would be higher while the ending account values shown would be lower.

Actual expenses

The table below provides information about actual account values and actual expenses. You may use the information in this table, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the table under the heading entitled “Actual Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes

The table below also provides information about hypothetical account values and hypothetical expenses based on the Fund’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund’s actual return.

The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs. Therefore, the hypothetical information is useful in comparing ongoing costs, and will not help you determine the relative total costs of owning different funds.

	Beginning Account Value (07/01/20)	ACTUAL		HYPOTHETICAL (5% annual return before expenses)		Annualized Expense Ratio
		Ending Account Value (12/31/20) ¹	Expenses Paid During Period ²	Ending Account Value (12/31/20)	Expenses Paid During Period ²	
Series I	\$1,000.00	\$1,149.70	\$3.67	\$1,021.72	\$3.46	0.68%
Series II	1,000.00	1,148.00	5.02	1,020.46	4.72	0.93

¹ The actual ending account value is based on the actual total return of the Fund for the period July 1, 2020 through December 31, 2020, after actual expenses and will differ from the hypothetical ending account value which is based on the Fund’s expense ratio and a hypothetical annual return of 5% before expenses.

² Expenses are equal to the Fund’s annualized expense ratio as indicated above multiplied by the average account value over the period, multiplied by 184/366 to reflect the most recent fiscal half year.

Tax Information

Form 1099-DIV, Form 1042-S and other year-end tax information provide shareholders with actual calendar year amounts that should be included in their tax returns. Shareholders should consult their tax advisers.

The following distribution information is being provided as required by the Internal Revenue Code or to meet a specific state's requirement.

The Fund designates the following amounts or, if subsequently determined to be different, the maximum amount allowable for its fiscal year ended December 31, 2020:

Federal and State Income Tax

Long-Term Capital Gain Distributions	\$30,231,711
Qualified Dividend Income*	0.00%
Corporate Dividends Received Deduction*	0.00%
U.S. Treasury Obligations*	0.68%

* The above percentages are based on ordinary income dividends paid to shareholders during the Fund's fiscal year.

Trustees and Officers

The address of each trustee and officer is AIM Variable Insurance Funds (Invesco Variable Insurance Funds) (the “Trust”), 11 Greenway Plaza, Suite 1000, Houston, Texas 77046-1173. The trustees serve for the life of the Trust, subject to their earlier death, incapacitation, resignation, retirement or removal as more specifically provided in the Trust’s organizational documents. Each officer serves for a one year term or until their successors are elected and qualified. Column two below includes length of time served with predecessor entities, if any.

Name , Year of Birth and Position(s) Held with the Trust	Trustee and/or Officer Since	Principal Occupation(s) During Past 5 Years	Number of Funds in Fund Complex Overseen by Trustee	Other Directorship(s) Held by Trustee During Past 5 Years
Interested Trustee				
Martin L. Flanagan ¹ – 1960 Trustee and Vice Chair	2007	Executive Director, Chief Executive Officer and President, Invesco Ltd. (ultimate parent of Invesco and a global investment management firm); Trustee and Vice Chair, The Invesco Funds; Vice Chair, Investment Company Institute; and Member of Executive Board, SMU Cox School of Business Formerly: Advisor to the Board, Invesco Advisers, Inc. (formerly known as Invesco Institutional (N.A.), Inc.); Chairman and Chief Executive Officer, Invesco Advisers, Inc. (registered investment adviser); Director, Chairman, Chief Executive Officer and President, Invesco Holding Company (US), Inc. (formerly IVZ Inc.) (holding company), Invesco Group Services, Inc. (service provider) and Invesco North American Holdings, Inc. (holding company); Director, Chief Executive Officer and President, Invesco Holding Company Limited (parent of Invesco and a global investment management firm); Director, Invesco Ltd.; Chairman, Investment Company Institute and President, Co-Chief Executive Officer, Co-President, Chief Operating Officer and Chief Financial Officer, Franklin Resources, Inc. (global investment management organization)	197	None

¹ Mr. Flanagan is considered an interested person (within the meaning of Section 2(a)(19) of the 1940 Act) of the Trust because he is an officer of the Adviser to the Trust, and an officer and a director of Invesco Ltd., ultimate parent of the Adviser.
