Commentary in this report is provided by the portfolio manager(s) of each Fund as of the date of this report and is subject to change at any time based on market or other conditions.

Third-party information has been obtained from sources that Nationwide Fund Advisors (NFA), the investment adviser to the Funds, deems reliable. Portfolio composition is accurate as of the date of this report and is subject to change at any time and without notice. NFA, one of its affiliated advisers or its employees may hold a position in the securities named in this report.

This report and the holdings provided are for informational purposes only and are not intended to be relied on as investment advice. Investors should work with their financial professional to discuss their specific situation.

### Statement Regarding Availability of Quarterly Portfolio Holdings

The Trust files complete schedules of portfolio holdings for each Fund with the Securities and Exchange Commission (SEC) for the first and third quarters of each fiscal year on Form N-PORT. Additionally, the Trust files a schedule of portfolio holdings monthly for the NVIT Government Money Market Fund on Form N-MFP. Forms N-PORT and Forms N-MFP are available on the SEC's website at <http://www.sec.gov>. Forms N-PORT and Forms N-MFP may be reviewed and copied at the SEC's Public Reference Room in Washington, DC, and information on the operation of the Public Reference Room may be obtained by calling 800-SEC-0330. The Trust also makes this information available to investors on <http://nationwide.com/mutualfundsnvit> or upon request without charge.

### Statement Regarding Availability of Proxy Voting Record

Federal law requires the Trust and each of its investment advisers and subadvisers to adopt procedures for voting proxies (the "Proxy Voting Guidelines") and to provide a summary of those Proxy Voting Guidelines used to vote the securities held by a Fund. The Funds' proxy voting policies and procedures and information regarding how the Funds voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 are available without charge (i) upon request, by calling 800-848-0920, (ii) on the Trust's website at <http://nationwide.com/mutualfundsnvit> or (iii) on the SEC's website at <http://www.sec.gov>.

***Before purchasing a variable annuity, you should carefully consider the investment objectives, risks, charges and expenses of the annuity and its underlying investment options. The product prospectus and underlying fund prospectuses contain this and other important information. Underlying fund prospectuses can be obtained from your investment professional or by contacting Nationwide at 800-848-6331. Read the prospectus carefully before you make a purchase.***

NVIT Funds are not sold to individual investors. These investment options are underlying subaccounts and cannot be purchased directly by the public. They are only available through variable products issued by life insurance companies.

Nationwide Funds Group (NFG) comprises Nationwide Fund Advisors, Nationwide Fund Distributors LLC and Nationwide Fund Management LLC. Together they provide advisory, distribution and administration services, respectively, to Nationwide Funds. Nationwide Fund Advisors (NFA) is the investment adviser to Nationwide Funds.

Variable products are issued by Nationwide Life Insurance Company or Nationwide Life and Annuity Insurance Company, Columbus, Ohio. The general distributor is Nationwide Investment Services Corporation (NISC), member FINRA.

Nationwide Funds distributed by Nationwide Fund Distributors LLC (NFD), member FINRA, Columbus, Ohio. NISC and NFD are not affiliated with any subadviser contracted by Nationwide Fund Advisors (NFA), with the exception of Nationwide Asset Management, LLC (NWAM).

Nationwide, the Nationwide N and Eagle, and Nationwide is on your side are service marks of Nationwide Mutual Insurance Company. ©2021

Dear Investor,

During this unprecedented time of challenge and volatility, Nationwide continues to diligently care for our associates, communities, and ultimately, you our investors. We remain steadfastly committed to protecting people, businesses and futures with extraordinary care. Equity markets experienced an unprecedented period of volatility during the annual reporting period ended December 31, 2020, as investors tried to make sense out of the coronavirus outbreak and the resulting economic lockdown.

Economic growth collapsed through the reporting period as a result of the shutdown before recovering as the period closed, with growth rates -5.0% in the first quarter of 2020, a record -31.4% in the second quarter and a record +33.1% in the third quarter. Economists estimate a continued rebound in 2021. Corporate profits collapsed, with a decline of 16% forecast for 2020 but is expected to recover within the next year as the economy continues to emerge from the shutdown.

**U.S. economic activity faced unprecedented challenges spurred from the Pandemic outbreak, and the lasting implications remain unclear.**

#### Asset Class

Markets experienced unprecedented volatility during the reporting period, with the coronavirus outbreak causing the sharpest bear market since the Great Depression and an impressive bounce in the second-half of the year. The S&P 500® Index ("S&P 500") started the period strong, as an accommodating Federal Reserve and steady economic growth drove a cumulative return of 5.0% through mid-February. This quickly reversed as the severity of the coronavirus outbreak began to take shape, with a 34% decline through March 23, 2020. Since 1950, there have been five previous occasions where the S&P 500 fell 30%, taking on average 297 trading days (roughly a year and 2 months), with 1987 the previous quickest decline at 70 days. This time, it took 20 days. Aggressive fiscal and monetary policy, paired with the prospect for an economic reopen, drove investor sentiment higher, with a 69% rally through the end of the period. For the full reporting period, the S&P 500 finished with a return of 18.4%, which is impressive given the severe disruption caused by COVID-19. Fixed income returns were positive, with a substantial drop in interest rates more than offsetting modestly wider credit spreads.

International markets followed a similar pattern as domestic, though the MSCI EAFE® Index continued to lag the S&P 500, returning just 7.8%, while the MSCI Emerging Markets® Index was roughly in line at 18.3%. The global outbreak and subsequent economic shutdown had a broad impact, though the strong economic rebound and aggressive global central bank stimulus led to strong performance in the second-half of the period.

**The S&P 500 was higher in seven of the 12-months during the reporting period.**

While much of 2020 was characterized by near-universal strong returns and low volatility for risk-assets, volatility dramatically improved through the reporting period, though most risk-assets delivered positive returns. Growth stocks substantially outperformed value stocks, while small-cap stocks staged an impressive rebound and modestly outperformed large cap stocks.

Fixed-income markets were higher, driven by a decline in interest rates to historic lows. The Federal Reserve aggressively added stimulus, first by bringing the Fed Funds target rate to effectively 0% by March 15, followed by an aggressive bond buying program that nearly doubled the balance sheet from \$4.2 trillion to \$7.4 trillion through the period. Fed Chair Powell has indicated that they will remain active in supporting the market, and there is no maximum to their balance sheet growth. Interest rates collapsed across the curve through the period, with the 10-year yield falling from 1.92% to a record-low of 0.50% as of March 9, 2020 before bouncing modestly to 0.92% by period-end. The 2-year yield dropped from 1.57% to 0.12%, widening the spread between the two yields to 0.80%.

The following chart provides returns for various market segments for the year ended December 31, 2020:

Index	Annual Total Return (as of December 31, 2020)
Bloomberg Barclays Emerging Markets USD Aggregate Bond	6.52%
Bloomberg Barclays Municipal Bond	5.21%
Bloomberg Barclays U.S. 1-3 Year Government/Credit Bond	3.33%
Bloomberg Barclays U.S. 10-20 Year Treasury Bond	13.56%
Bloomberg Barclays U.S. Aggregate Bond	7.51%
Bloomberg Barclays U.S. Corporate High Yield	7.11%
MSCI EAFE®	7.82%
MSCI Emerging Markets®	18.31%
MSCI World ex USA	10.65%
Russell 1000® Growth	38.49%
Russell 1000® Value	2.8%
Russell 2000®	19.96%
S&P 500®	18.40%

As always, we feel that the best way for you to reach your financial goals is to consistently adhere to a disciplined and patient investment strategy. We urge investors to seek investments based on a sound asset allocation strategy, a long-term perspective and regular conversations with a financial professional.

At Nationwide, we continue to take a steady approach to seeking long-term growth. We remain confident in our ability to help investors navigate the markets for years to come. Thank you for investing with us. We deeply value your trust.

Sincerely,

A handwritten signature in black ink, appearing to read "M. S. Spangler", with a horizontal line extending to the right.

Michael S. Spangler  
President and CEO  
Nationwide Variable Insurance Trust

For the annual period ended December 31, 2020, the Amundi NVIT Multi Sector Bond Fund (Class I) returned 4.06% versus 7.51% for its benchmark, the Bloomberg Barclays U.S. Aggregate Bond Index (U.S. Aggregate Index). For broader comparison, the median return for the Fund's Morningstar insurance funds peer category, Multisector Bond (consisting of 336 funds as of December 31, 2020), was 4.75% for the same period. Performance for the Fund's other share class versus the Fund's benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

Calendar year 2020 performance was defined by the late February and March COVID-induced shock and then a multi-staged recovery during the remainder of the year. The Fund benefitted from the ability to actively hedge and allocate risk exposure across a diverse set of fixed income sectors and country exposures. The opening months of 2020 were characterized by narrow credit spreads, modestly lower risk-free yields, a healthy U.S. consumer and a solid U.S. economy. Portfolio positioning reflected this environment as we maintained low interest-rate exposure (duration) and reduced corporate credit market beta\* exposure in favour of U.S. consumer-focused securitized exposure. The unexpected global "COVID shock" had a profound impact on economic growth, market prices and liquidity. Extreme measures to control the disease hampered most economic activity resulting in record-breaking domestic job losses, a shuttered retail sector and severely curtailed travel and leisure activities. Global credit (corporate, securitized and sovereign) spreads rapidly repriced wider in response to elevated credit and liquidity risk premia. Securitized market prices were some of the most negatively impacted, particularly residential credit, commercial mortgage credit and consumer asset-backed securities. These sectors weighed the most on portfolio performance.

Monetary policy support, government fiscal support measures, and relaxed social distancing policies jumpstarted the initial market recovery in the spring. During this period, Corporate Credit, Residential Credit and Consumer Credit markets recouped a significant portion of earlier losses. Commercial Real Estate was the slowest sector to recover as investors weighed the impact of COVID-related structural changes to the demand and utilization of the Office, Retail and Leisure Real Estate market segments. Within the Corporate Credit markets, Leisure, Energy, and Capital Goods lagged the broad market recovery.

During late 2020, investors focused on the discovery and eventual roll-out of effective COVID-19 vaccines and the possibility of another round of U.S. government stimulus. The fuller market recovery brought year-to-date portfolio performance into positive. Those market sectors that lagged earlier in the year (Commercial Real Estate, Residential Credit MBS, and Cyclical/Leisure Corporate sectors) tended to outperform the broader markets. Over the 12-month reporting period, Investment Grade Corporate Securities (unhedged) and Consumer Asset-Backed Securities were notable positive contributors to total returns. Given the strong risk recovery, the largest detractors from portfolio performance were credit market hedges; however, these positions did provide

meaningful downside protection during the initial pandemic shock and were adjusted throughout the year.

The Fund routinely uses derivatives to hedge currency, interest rate and corporate credit exposures. These instruments include interest rate Swaps and Futures and credit default Swaps on the broad corporate bond markets. During the reporting period, U.S. interest rates fell dramatically and, as a result, the Fund's interest rate hedges (short positions to offset duration in fixed coupon cash bonds) detracted from overall performance. The portfolio management team routinely repositions the Fund's asset class and hedge exposures to reflect current macroeconomic expectations, asset class valuations and risk levels. The Fund did not experience any material liquidity events during the period.

The industry is slowly working through the transition away from LIBOR and progress continues in modifying contract language to reference LIBOR replacements. Exceptions lie within pockets of the securitized and corporate credit markets where some floating securities do not possess prospectus language to deal with the transition and have subsequently experienced price volatility surrounding the uncertainty of this issue. The investment team has been careful to avoid purchasing securities without acceptable LIBOR transition language.

\*Beta is a measure of a stock's volatility in relation to the overall market. If a stock is less volatile than the market, the stock's beta is less than 1.0

The Fund is subject to the risks of investing in fixed-income securities, including default risk and interest rate risk (if interest rates go up, bond prices go down, and if interest rates go down, bond prices go up). The Fund may also invest in high-yield bonds, which are more volatile and are subject to greater default risk, liquidity risk, and price fluctuations than funds that invest in higher-quality securities. The prices of high-yield bonds tend to be more sensitive to adverse economic and business conditions than are higher-rated corporate bonds. Increased volatility may reduce the market value of high-yield bonds. They are also subject to the claims-paying ability of the issuing company. The Fund may invest in corporate loans (which have speculative characteristics and are high risk). The Fund may invest in sovereign debt (a governmental entity may delay or refuse to pay interest or repay principal). The Fund may concentrate on specific countries, subjecting it to greater volatility than that of other mutual funds. The Fund may invest in more-aggressive investments such as derivatives (many of which create investment leverage and illiquidity and are highly volatile). The Fund also is subject to the risks of investing in foreign securities (which are volatile, harder to price and less liquid than U.S. securities), including currency fluctuations, political risks, differences in accounting and limited availability

of information, all of which are magnified in emerging markets. Please refer to the most recent prospectus for a more detailed explanation of the Fund's principal risks.

A description of the benchmarks can be found on the Market Index Definitions page at the back of this book.

### Performance of a \$10,000 Investment

Investment return and principal value will fluctuate, and when redeemed, shares may be worth more or less than original cost. Past performance is no guarantee of future results and does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investing in mutual funds involves market risk, including loss of principal. Performance returns assume the reinvestment of all distributions.

Comparative performance of \$10,000 invested in Class I shares of the Amundi NVIT Multi Sector Bond Fund (formerly NVIT Multi Sector Bond Fund) versus performance of the Bloomberg Barclays (BBgBarc) U.S. Aggregate Bond Index and the Blended Index\* over the 10-year period ended 12/31/20. Unlike the Fund, the performance of these indexes does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

\* The Blended Index comprises 60% Citigroup US Broad Investment-Grade Bond Index, 15% Citigroup US High-Yield Market Index, 15% Citigroup World Government Bond Index (Unhedged) and 10% JPMorgan Emerging Market Bond Index.

For the annual period ended December 31, 2020, the DoubleLine NVIT Total Return Tactical Fund (Class I) returned 3.83% versus 7.51% for its benchmark, the Bloomberg Barclays U.S. Aggregate Bond Index. For broader comparison, the median return for the Fund's Morningstar® insurance funds peer category, Intermediate Core-Plus Bond (consisting of 602 funds as of December 31, 2020), was 8.10% for the same period.

The Doubleline NVIT Total Return Tactical Fund underperformed the Bloomberg Barclays U.S. Aggregate Bond Index return for the calendar year of 2020. The underperformance was a result of asset allocation, duration positioning, and lack of overlap between the assets that the Federal Reserve began purchasing.

The market environment over the period was the most volatile year of the post-crisis era for both equity and fixed income markets. In response to declining economic activity, the Federal Reserve cut its key policy rate by 150 basis points\* and instituted a newly found asset purchasing program. At the same time, Congress launched the largest economic stimulus package in U.S. history. Nonetheless, the Portfolio managed to deliver positive total returns. The highest performing sectors within the Portfolio were Emerging Market Debt and Investment Grade Corporate Credit. Emerging Markets benefitted from a weakening U.S. Dollar, which accelerated the rate of depreciation as expectations of a worsening fiscal-deficit increased. Investment Grade Corporate Credit posted strong returns due to a longer duration profile and Federal Reserve support programs early in the pandemic. High-Yield Corporate Credit was negatively impacted during the March drawdown, as the sector rallied back and the outlook on the underlying Corporate Credit Risk improved. Agency Mortgage-Backed Securities ("MBS") benefitted initially, amidst nearly universal falling U.S. Treasury yields and the implementation of the Federal Reserve Quantitative-Easing program. Asset-Backed Securities delivered positive returns, having minimal exposure to aircraft securities during the March drawdown and adding aircraft securities exposure aggressively as aircraft-securitization prices rallied in the following months.

The U.S. Treasury allocation benefitted initially as investors sought safe-haven assets during the March drawdown. During the second half of the 2020, Treasury yields began to rebound as Congress passed multiple stimulus programs weighing on the fiscal deficit. Bank Loans and Collateralized Loan Obligations were not immune to the March drawdown. The sectors benefitted from a rebound in the underlying view of Fundamental Corporate Risk despite the COVID related tumult and depressed short term yields. Commercial MBS managed to deliver positive returns despite the acute impact the economic lock-downs had on Office, Hospitality, and Retail industries. Commercial MBS prices began to rebound as investors expected delinquencies to taper, and more profoundly once a COVID-19 vaccine was announced. Non-Agency Residential MBS delivered positive returns despite the rise in unemployment. Market participants anticipated the improvement in credit fundamentals with the assistance of forbearance programs, foreclosure moratoriums, and stimulus

programs. Overall, every sector within the portfolio experienced positive total returns.

The three best performing sectors of the Fund were Emerging Market Debt, Investment-Grade Corporate bonds, and High-Yield Corporate bonds. The Bloomberg Barclays U.S. Aggregate Bond Index does not have exposure to Emerging-Market Corporate bonds and High-Yield Corporate bonds. DoubleLine continues to hold the key contributing sectors. We consistently monitor and perform due diligence on all of our holdings and still find relative value in these sectors going into 2021.

Every sector within the Fund delivered positive total returns over the reporting period. The three sectors with lowest total returns were Non-Agency Residential MBS, Commercial MBS, and Collateralized Loans Obligations. The Fund maintains exposure to all three of these sectors while the Bloomberg Barclays U.S. Aggregate Bond Index does not have exposure to Non-Agency Residential MBS or Collateralized Loan Obligations.

Over the reporting period, the Fund averaged approximately 15% exposure to floating rate assets, the bulk of which was comprised of Non-Agency Residential MBS securities. Regarding the transition from LIBOR to SOFR, the Federal Reserve announced the eventual replacement of LIBOR by June 2023. DoubleLine is currently reviewing the impacts this transition would have on the portfolio.

The COVID-19 lockdowns and economic disruption brought extreme levels of uncertainty to the financial markets. As a result, the market drawdown that ensued was a function of insufficient liquidity. In response to the negative liquidity conditions, the Federal Reserve announced the Secondary Market Corporate Credit Facility (SMCCF). This program allowed for the Federal Reserve's purchase of Investment-Grade Corporate Bonds and Corporate Bond ETFs in the secondary market. The primary drivers of underperformance were asset allocation and a lack of overlap between the assets that the Federal Reserve began purchasing and the assets held in the Fund. The Fund had a greater allocation to fixed-income securitized products than the benchmark that were not a part of asset purchase program of the Federal Reserve, with certain sectors being acutely impacted by the COVID-19 pandemic.

While the Fund did experience redemptions during the COVID liquidity event in March, it did not experience material losses from raising cash.

The Fund did not utilize derivatives during the reporting period.

\*Basis points (“bps”) refers to a common unit of measure for interest rates and other percentages in finance. One basis point is equal .001 or 1/100th of 1%.

The Fund is subject to the risks of investing in fixed-income securities, including high-yield bonds (which are more volatile). These risks include default risk and interest rate risk (if interest rates go up, bond prices go down, and if interest rates go down, bond prices go up). Funds that invest in high-yield securities are subject to greater default risk, liquidity risk, and price fluctuations than funds that invest in higher-quality securities. The prices of high-yield bonds tend to be more sensitive to adverse economic and business conditions than are higher-rated corporate bonds. Increased volatility may reduce the market value of high-yield bonds. They are also subject to the claims paying ability of the issuing company. The Fund may invest in corporate loans

(which have speculative characteristics and are high risk). The Fund may invest in sovereign debt (a governmental entity may delay or refuse to pay interest or repay principal). The Fund also is subject to the risks of investing in foreign securities (currency fluctuations, political risks, differences in accounting and limited availability of information, all of which are magnified in emerging markets). The Fund is nondiversified and may concentrate on specific sectors or countries, subjecting it to greater volatility than that of other mutual funds. The Fund may invest in more-aggressive investments such as derivatives (many of which create investment leverage and illiquidity, and are highly volatile).

A description of the benchmarks can be found on the Market Index Definitions page at the back of this book.

**Performance of a \$10,000 Investment**

Investment return and principal value will fluctuate, and when redeemed, shares may be worth more or less than original cost. Past performance is no guarantee of future results and does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investing in mutual funds involves market risk, including loss of principal. Performance returns assume the reinvestment of all distributions.

*Comparative performance of \$10,000 invested in Class I shares of the DoubleLine NVIT Total Return Tactical Fund from inception through 12/31/20 versus performance of the Bloomberg Barclays (BBgBarc) U.S. Aggregate Bond Index for the same period. Unlike the Fund, the performance of the index does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.*

For the annual period ended December 31, 2020, the Federated NVIT High Income Bond Fund (Class I) returned 6.02% versus 7.05% for its benchmark, the Bloomberg Barclays U.S. Corporate High-Yield 2% Issuer Capped Index. For broader comparison, the return for the Fund's Morningstar insurance funds peer category, High Yield Bond (consisting of 676 funds as of December 31, 2020), was 4.84% for the same period. Performance for the Fund's other share class versus the Fund's benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

The dominant theme impacting the high yield market during the period under review was COVID-19 and the impact on the U.S. and global economies. As the seriousness of the virus became apparent in the early part of the calendar year 2020, riskier assets such as High Yield Bonds plummeted in value, especially in the early part of March. As protective measures were put in place leading to a reduction in cases and deaths, the High Yield market began a powerful recovery rally aided by a substantial monetary and fiscal policy stimulus. While virus cases surged as the period came to an end, the financial markets continued to rally as vaccines were approved late in the period and distribution had begun as 2020 came to an end.

The Fund was positively impacted by its underweighted position to the poor performing Service sector. The Fund also benefitted from positive security selection in the Oil Field Services, Aerospace and Defense and Pharmaceutical industry sectors. Specific high-yield issuers held by the Fund that positively impacted performance relative to the benchmark included: Endo Pharmaceutical, Antero Midstream and QEP Resources.

The Fund was negatively impacted as result of being underweight the Independent Energy sector in the second quarter of 2020. While Independent Energy was an underperformer across the entire period under review, it was a major outperformer in the second quarter, led by several companies that were downgraded from investment grade at the end of March, and entered the benchmark at very depressed prices. These issuers substantially rebounded in early April after entering the High Yield index. While the Fund did purchase securities of several of these issuers, such as Occidental Petroleum, Continental Resources and Western Midstream, during the period, it was underweighting these issuers when they had the substantial recovery early in April. Ford and Kraft Heinz were other downgraded securities that followed this pattern. The

Fund also was underweighting the strong performing Banking and Food and Beverage sectors. Security selection in the Retail, Media and Entertainment and Automotive sectors also negatively impacted performance. Specific high-yield issuers held by the Fund that negatively impacted performance relative to the benchmark included: Party City, Callon Petroleum and Sesi, LLC.

The Fund utilized derivatives during the reporting period in the form of credit default swap contracts to expose the Fund's cash holdings to the investment characteristics and performance of the high-yield bond market while maintaining liquidity to satisfy shareholder activity.

The Fund did not experience any liquidity issues during the reporting period.

The Fund was not impacted by LIBOR during the reporting period.

**Subadviser:**

Federated Investment Management Company

**Portfolio Managers:**

Mark E. Durbiano

The Fund is subject to the risks of investing in fixed-income securities, including default risk and interest rate risk (if interest rates go up, bond prices go down, and if interest rates go down, bond prices go up). The Fund may invest in high-yield bonds, which are subject to greater default risk, liquidity risk, and price fluctuations than funds that invest in higher-quality securities. The prices of high-yield bonds tend to be more sensitive to adverse economic and business conditions than are higher-rated corporate bonds. Increased volatility may reduce the market value of high-yield bonds. They are also subject to the claims-paying ability of the issuing company. The Fund may invest in more-aggressive investments such as derivatives (which create investment leverage and are highly volatile). The Fund also is subject to the risks of investing in foreign securities (which are volatile, harder to price and less liquid than U.S. securities). Please refer to the most recent prospectus for a more detailed explanation of the Fund's principal risks.

### Performance of a \$10,000 Investment

Investment return and principal value will fluctuate, and when redeemed, shares may be worth more or less than original cost. Past performance is no guarantee of future results and does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investing in mutual funds involves market risk, including loss of principal. Performance returns assume the reinvestment of all distributions.

Comparative performance of \$10,000 invested in Class I shares of the Federated NVIT High Income Bond Fund versus performance of the Bloomberg Barclays (BBgBarc) U.S. Corp High Yield (HY) 2% Issuer Capped Index over the 10-year period ended 12/31/20. Unlike, the Fund, the performance of this index does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

For the annual period ended December 31, 2020, the NVIT Core Bond Fund (Class Y) returned 7.17% versus 7.51% for its benchmark, the Bloomberg Barclays U.S. Aggregate Bond Index. For broader comparison, the median return for the Fund's Morningstar® insurance funds peer category, Intermediate Core Bond (consisting of 415 funds as of December 31, 2020), was 7.48% for the same period. Performance for the Fund's other share classes versus its benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

On a relative basis, the Fund underperformed the benchmark, the Bloomberg Barclays U.S. Aggregate Bond index, by 34 basis points\* during 2020. The Fund was over-weighted in non-investment grade corporates and outperformed relative to the benchmark as fallen angels recovered dramatically after "gapping out" (when a stock opens above or below the previous day's close with no trading activity in between) at the onset of the COVID-19 crisis in March. The Fund's over-weighted positions in non-agency Mortgage Backed Securities ("MBS") and Commercial MBS performed well. The Fund's over-weighted position in Asset Backed Securities ("ABS"), primarily collateralized loan obligations contributed positively to performance but underperformed relative to the benchmark. The Fund's over-weighted position in Treasury Inflation-Protected Securities ("TIPS") also performed well due to rising inflation expectations with the Federal Reserve shifting its monetary policy strategy toward an average inflation targeting framework.

Government Securities were the Fund's most underweight position and the Fund's biggest detractor from performance. Treasuries modestly outperformed spread product\*\* in 2020. The Fund was underweighted in Investment Grade Corporate Bonds for most of the year. While Corporate Bonds outperformed, most other Spread-Related sectors, the Fund's Investment Grade Exposure underperformed relative to the benchmark, mainly due to security selection.

During the year, the Fund employed the use of derivatives, specifically Treasury Futures, to manage duration exposure. Futures are an efficient means by which the portfolio manager hedges the Fund's exposure to changes in interest rates. The Fund used Futures to get long-duration relative to the benchmark, which contributed to performance as rates declined over the period. Over 70% of the NVIT Core Bond is rated single-A or higher. The "up-in-quality"† bias helped limit some of the downside brought on by the unusual bear market

as a function of an extremely unique recession brought on by the COVID-19 crisis.

The Fund did not experience any liquidity issues that had a material impact on performance during the reporting period.

The Fund did not experience and LIBOR impacts during the reporting period.

### Performance of a \$10,000 Investment

Investment return and principal value will fluctuate, and when redeemed, shares may be worth more or less than original cost. Past performance is no guarantee of future results and does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investing in mutual funds involves market risk, including loss of principal. Performance returns assume the reinvestment of all distributions.

Comparative performance of \$10,000 invested in Class Y shares of the NVIT Core Bond Fund versus performance of the Bloomberg Barclays (BBgBarc) U.S. Aggregate Bond Index over the 10-year period ended 12/31/20. Unlike the Fund, the performance of the index does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

For the annual period ended December 31, 2020, the NVIT Core Plus Bond Fund (Class Y) returned 9.41% versus 7.51% for its benchmark, the Bloomberg Barclays U.S. Aggregate Bond Index. For broader comparison, the median return for the Fund's Morningstar® peer category, Intermediate Core-Plus Bond (consisting of 602 funds as of December 31, 2020), was 8.10% for the same period. Performance for the Fund's other share classes versus its benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

As the wide-reaching impact of COVID-19 became evident, credit spreads widened to levels not seen in a decade, and treasury yields fell to record lows. Government restrictions and cautious consumers led to a sharp, sudden drop in economic activity and a spike in unemployment. Responding to this exogenous shock, central banks and policymakers globally moved swiftly with monetary and fiscal policy accommodation, as well as measures intended to support orderly functioning of capital markets. Extensive monetary and fiscal policy actions facilitated an initial stabilization in credit markets while the approval of several vaccines later in the year allowed credit spreads to ultimately recover back to levels similar to before COVID-19. On the other hand, treasury yields remain at historically low levels – even if somewhat higher to end the year compared to the record lows seen earlier in the year. Despite much volatility, spread sectors, including investment grade credit, non-investment grade credit, bank loans, emerging market debt and securitized sectors, delivered positive total returns over the one-year period.

The largest contributors to relative outperformance during the year were security selection within Investment Grade Credit and sector allocations to Investment Grade Credit, non-Investment Grade Credit and agency Mortgage Backed Securities (“MBS”). The portfolio's duration positioning was also additive. On the other hand, allocations to Emerging Market debt, Commercial MBS and non-agency MBS detracted from relative performance.

Following the great financial crisis, the inflation story was defined by a failure to consistently deliver at-or-above target inflation, primarily driven by structural disinflationary forces such as globalization and trade, technological disruption, demographic trends and high debt levels. As a result, one might expect the post-COVID crisis regime to exacerbate the old trend. However, we see the current period as uniquely different from the classic recession resulting from economic imbalances, such as in the early 1990s or 2000 – 2001.

The Fund utilized interest-rate futures and government-bond futures for duration and yield curve management and also used currency futures for hedging; derivatives usage moderately added to performance.

### Performance of a \$10,000 Investment

Investment return and principal value will fluctuate, and when redeemed, shares may be worth more or less than original cost. Past performance is no guarantee of future results and does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investing in mutual funds involves market risk, including loss of principal. Performance returns assume the reinvestment of all distributions.

Comparative performance of \$10,000 invested in Class Y shares of the NVIT Core Plus Bond Fund versus performance of the Bloomberg Barclays (BBgBarc) U.S. Aggregate Bond Index over the 10-year period ended 12/31/20. Unlike the Fund, the performance of this index does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

For the annual period ended December 31, 2020, the NVIT Government Bond Fund (Class I) returned 6.08% versus 6.36% for its benchmark, the Bloomberg Barclays U.S. Government/Mortgage Index. For broader comparison, the median return for the Fund's Morningstar® insurance funds peer category, Intermediate Government (consisting of 234 funds as of December 31, 2020), was 5.44% for the same period. Performance for the Fund's other share classes versus its benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

On a relative basis, the Fund underperformed the benchmark, the Bloomberg Barclays U.S. Government/U.S. MBS Index, by 28 basis points\* during 2020. The Fund's out-of-benchmark allocations to Agency Debentures, Asset Backed Securities ("ABS") and Non-Agency Housing significantly underperformed in March as risk assets sold off aggressively. The spreading COVID-19 weighed heavily on economic growth expectations, resulting in massive liquidation of virtually anything considered a risk asset. Major domestic equity indices all fell into bear markets while U.S. Treasuries rallied strongly to push long-term yields to record low levels. We took advantage of the volatility by adding to our Agency Debenture and Non-Agency Housing positions and added an allocation to Treasury Inflation-Protected Securities ("TIPS"), all of which quickly rebounded. Within Agency Mortgage Backed Securities ("MBS"), the Fund began the year with an up-in-coupon bias. This position underperformed as volatility increased in March and the Federal Reserve initiated purchases of Treasuries and lower coupon Agency MBS. We responded by repositioning the portfolio to reflect a down-in-coupon\*\* bias for the remainder of the year, which benefitted performance in the second half.

The Fund was slightly long-duration for most of the period, which contributed positively to performance as rates fell throughout 2020. The Fund's out-of-benchmark allocations to Agency Debentures, TIPS, ABS and Non-Agency Housing contributed positively to performance. The Fund's overweight position in TIPS performed well due to rising inflation expectations with the Federal Reserve shifting its monetary policy strategy toward an average inflation targeting framework. The allocations to Agency Debentures, ABS and Non-Agency Housing are expected to be maintained on a view of better relative value.

During the year, the Fund employed the use of derivatives, specifically U.S. Treasury Futures, to manage duration exposure. Futures are an efficient means by which the portfolio manager hedges the Fund's exposure to changes in interest rates and curve shape. The Fund was short Futures, which detracted from performance as rates decreased for the period. This was more than offset by our cash positions, which appreciated as rates fell.

There were no LIBOR impacts to the Fund during the reporting period.

The Fund did not experience any liquidity issues that had a material impact on performance during the reporting period.

**Subadviser:**

Nationwide Asset Management, LLC

**Portfolio Managers:**

Chad W. Finefrock, CFA and Gary R. Hunt, CFA

\*Basis-point ("bps") used to describe the percentage change in the value of financial instruments or the rate change in an index or other benchmark. One basis point is equivalent to 0.01% (1/100th of a percent)

\*\*"Up-in-coupon" refers to selling higher yielding coupons in exchange for lower yielding issues.

The Fund's value is not guaranteed by the U.S. government or any government agency. The Fund is subject to the risks of investing in fixed-income securities, including default risk and interest rate risk (if interest rates go up, bond prices go down, and if interest rates go down, bond prices go up). The fund is also subject to risk from the use of derivatives, as many derivatives create investment leverage and are highly volatile. Please refer to the most recent prospectus for a more detailed explanation of the Fund's principal risks.

**Performance of a \$10,000 Investment**

Investment return and principal value will fluctuate, and when redeemed, shares may be worth more or less than original cost. Past performance is no guarantee of future results and does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investing in mutual funds involves market risk, including loss of principal. Performance returns assume the reinvestment of all distributions.

*Comparative performance of \$10,000 invested in Class I shares of the NVIT Government Bond Fund versus performance of the Bloomberg Barclays (BBgBarc) U.S. Government (Govt)/Mortgage Index over the 10-year period ended 12/31/20. Unlike the Fund, the performance of the index does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.*

For the annual period ended December 31, 2020, the NVIT Government Money Market Fund (Class I) returned 0.24% versus 0.28% for its benchmark, the iMoneyNet Money Fund Average™ Government All. Performance for the Fund's other share classes versus its benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

***Please note that Federated Investment Management Company was subadviser to the Fund from 1/1/2020 to 6/30/2020. Therefore, the following commentary reflects that time period.***

The reporting period could reasonably be divided into two distinct time periods – the first two months were characterized by stable short-term interest rates, followed by the remaining four months experiencing sharply declining interest rates along with unprecedented U.S. fiscal stimulus and Treasury bill supply in response to the potential COVID-19 pandemic impact.

Following healthy Gross Domestic Product (“GDP”) growth of 2.4% in the fourth quarter of 2019, the trend reversed in the first and second quarters of 2020 with GDP falling 5.0% and 31.4%, respectively. The unemployment rate was among historical lows at 3.5% for both January and February 2020 and then increased sharply to hit a historical high of 14.8% in April 2020, before ending the period at 11.1% in June 2020. Inflation was moderate at the beginning of the period, then rose to near the Federal Reserve's 2% target level, then slowed significantly. The year-over-year change in the price index for core personal consumption expenditure (“core PCE”) rose from 1.8% in January 2020 to a peak of 1.9% in February 2020 and then fell to 0.9% in April 2020 before ending the period at 1.1% in June 2020.

The reporting period began with the Federal Reserve (“Fed”) having left the Fed Funds Target Range unchanged at 1.50 – 1.75% at its December 2019 meeting, at which the Fed indicated that “the current stance of monetary policy is appropriate to support sustained expansion of economic activity.” This was perceived by market participants as a signal that the Fed was on hold. As such, the Fed left the Federal Funds Target Range unchanged at its January 2020 meeting as well. Meanwhile, the first cases of COVID-19 were being discovered in Wuhan, China in December 2019. By late-January, the virus had spread to the U.S. and other countries around the globe. Citing the evolving risks to economic activity posed by COVID-19, the Fed lowered the Federal Funds Target Range by a total of 150 basis points\* to 0.00 – 0.25%, within the first half of March. In that same month, the U.S. government enacted three separate phases of fiscal stimulus, including the CARES Act, which totaled approximately \$2.2 trillion. As the number of cases continued to grow in the U.S. and abroad, governments implemented international travel restrictions, business closings, and stay-at-home orders in an effort to contain the spread of the virus. In the shadow of these restrictions, U.S. economic activity plummeted, and the unemployment rate soared.

In order to finance the fiscal stimulus plans, the U.S. Treasury issued an unprecedented \$2.4 trillion in treasury bills during the second quarter of 2020. This resulted in significant supply for the money market portion of the yield curve. Also, during the reporting period, the Government Sponsored Enterprises (“GSEs”) continued to issue floating rate securities tied to the Secured Overnight Financing Rate (“SOFR”). SOFR has been designated as an alternative to LIBOR when and if LIBOR is phased out, as proposed, by the end of 2021. Simultaneously, there was a substantial amount of cash coming into the front end of the curve as investors sought liquidity in a period of relative uncertainty.

Over the six-month period, yields on Treasury securities fell notably. For instance, the yield on the one-month Treasury bill declined 133 basis points\*, from 1.45% at the beginning of the period to end at 0.12%. Similarly, the yield on the one-year Treasury bill fell 143 basis points\*, from 1.58% at the beginning of the period to end at 0.15%. Although the yields on both Treasury securities and repurchase agreements declined during the reporting period, Treasury yields were somewhat supported by the onslaught of bill supply relative to repurchase agreements.

We began the period with a relatively long average maturity target range of thirty-five to forty-five days. This was in response to the expectation of short-term interest rates remaining stable or moving lower for an extended period of time. This maturity range was maintained throughout the reporting period. We found value in Treasury and agency floating rate notes, which comprised 28% of Fund assets at period-end. This includes SOFR-based floating rate securities, which comprised 18% of Fund assets at the end of the period versus 13% at the beginning. We also added to the Fund's Treasury and agency fixed rate securities, which comprised 36% of Fund assets at the end of the period versus 25% at the beginning. This was primarily the result of an increasing allocation to Treasury bills, while the Treasury note and agency security positions decreased. The Fund's weighted average maturity and weighted average life stood at thirty-one days and ninety-nine days, respectively, at the end of June 2020, versus thirty-four and one hundred-four days at the beginning of the period. The Fund's maturity stance and security allocations allowed it to remain competitive with comparably invested money market funds.

The Fund did not experience any liquidity issues during the reporting period.

The Fund did not use derivatives during the reporting period.

There were no industry impacts to the Fund related to the LIBOR transition during the reporting period.

Federated Investment Management Company

The Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund is open to all investors and although it seeks to preserve

the value of the investment at \$1.00 per share, it cannot guarantee it will do so. You could lose money by investing in the Fund. The Fund may impose a fee upon sale of shares or temporarily suspend the ability to sell shares if the Fund's liquidity falls below required minimums because of market conditions or other factors. The Fund's sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time. The Fund may invest in shares of other government money market mutual funds, including those advised by the Fund's subadviser, to provide additional liquidity or to achieve higher yields. Please refer to the most recent prospectus for a more detailed description of the Fund's principal risks.

***Please note that Dreyfus Cash Investment Securities was subadviser to the Fund from 6/30/2020-12/31/2020. Therefore, the following commentary reflects that time period.***

The 2020 calendar year, which coincides with the reporting period, closed in a dramatically different manner than it began. 2020 began with the economy cruising along. Gross Domestic Product ("GDP") was above 2.0%, the unemployment rate sat at 3.5%, following 2019 when unemployment ranged from 3.5%-4.0%. The policy rate the Federal Open Market Committee ("FOMC") uses to control short term interest rates, the federal funds rate, began 2020 in a range of 1.50%-1.75%.

However, things changed considerably in the first quarter of 2020, when the COVID-19 pandemic began to spread across the globe. On March 3, the FOMC citing "evolving risks to economic activity" from COVID-19, lowered the target range for federal funds by 50 basis points\*, to 1.00%-1.25%. In subsequent weeks, the COVID-19 pandemic engulfed the United States, and investors fled risk-assets. In a second unscheduled move within two weeks, on March 15, the FOMC once again lowered the target range for federal funds. This time by 100 basis points\*, to a range of 0.00%-0.25%. In the accompanying statement to the policy move, the Federal Reserve ("Fed") cited a willingness to "use its full range of tools to support the flow of credit to households and businesses and thereby promote its maximum employment and price stability goals." First quarter GDP contracted by -5.0%, and a fell a whopping -31.4% in the second quarter of 2020. Equity markets sold off in dramatic fashion, and credit markets began to seize-up. The monthly nonfarm payroll report showed job losses in April amounted to 20.8 million and the unemployment rate rocketed to 14.8%.

In addition to lowering the Federal Funds Target Range, the Fed engaged in quantitative easing, a policy of buying Treasuries and Mortgage-Back Securities, and implemented a number of programs designed to improve liquidity in credit markets and smooth the overall workings of financial markets. The Money Market Liquidity Facility ("MMLF") was announced on March 18, and entailed the Federal Reserve Bank of Boston providing non-recourse loans to eligible financial institutions to purchase eligible assets from money market funds. This program was effective in providing liquidity to prime money market funds

seeking to sell commercial paper and certificates of deposit, at amortized cost. The program peaked at \$53.2 billion in April before falling to \$3.6 billion at the end of the year, as conditions improved.

In addition to monetary stimulus provided by the Fed during the pandemic, Congress added fiscal stimulus, passing the \$2.2 trillion Coronavirus Aid, Relief and Economic Security (CARES) Act, which was signed into law by President Trump on March 27, 2020. The CARES Act included \$300 billion in cash payments to Americans, increased unemployment benefits, and created the Paycheck Protection Program which provided loans to small businesses.

As a result of these collective measures, economic conditions improved in the middle of the year. Jobs came back to the economy. June was the peak month of job growth with 4.8 million jobs added to the U.S. economy. The unemployment rate continued to fall from April throughout the remainder of the year, closing at 6.7% in December. However, after consecutive monthly job gains in the economy beginning in May, the month of December saw a return to job losses, with 140,000 Americans added to the unemployed rolls. This downturn headed into the winter will bolster calls for quick action for further direct payment to individuals as well as new programs to assist businesses severely impacted by the pandemic.

2020 was characterized by the swift moves from the Fed to lower interest rates to the zero bound, and little expectation for the Fed to raise short-term rates exists. This was evidenced by the most recent Summary of Economic Projections, released at the December FOMC meeting, which indicated no expected rate hikes through 2023. Therefore, we added incremental yield by purchasing longer dated U.S. Treasury floating rate notes, as well as U.S. government agency floating rate notes. Amidst a flat government yield curve in the money market space (overnight to 13-month maturities), these holdings have provided incremental yield in addition to core holdings of fixed rate U.S. Treasuries, U.S government agency securities and repurchase agreements collateralized fully by U.S. government securities. We intend to continue to implement this strategy in 2021, should we believe current market conditions warrant.

The Fund did not invest in derivatives during the reporting period.

### Performance of a \$10,000 Investment

Investment return and principal value will fluctuate, and when redeemed, shares may be worth more or less than original cost. Past performance is no guarantee of future results and does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investing in mutual funds involves market risk, including loss of principal. Performance returns assume the reinvestment of all distributions.

Comparative performance of \$10,000 invested in Class I shares of the NVIT Government Money Market Fund versus performance of the iMoneyNet Money Fund Average™ Government All over the 10-year period ended 12/31/20. Unlike the Fund, the performance of the index does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

For the annual period ended December 31, 2020, the NVIT Short Term Bond Fund (Class Y) returned 3.32% versus 3.33% for its benchmark, the Bloomberg Barclays U.S. Government/Credit Bond 1-3 Year Index. For broader comparison, the median return for the Fund's Morningstar® insurance funds peer category, Short-Term Bond (consisting of 574 funds as of December 31, 2020), was 3.73% for the same period. Performance for the Fund's other share classes versus its benchmark is stated in the Average Annual Total Return chart in this report's Fund Performance section.

On a relative basis, the portfolio underperformed the benchmark, the Barclay's U.S. Government/Credit 1-3yr Index, by .01 basis points\* during 2020. Treasuries were the Fund's largest underweight position and the biggest detractor from performance. Treasuries modestly outperformed spread product\*\* during 2020. The Fund's underweight to Investment Grade Corporate Bonds contributed negatively to performance, as corporates outperformed most other spread related sectors. The Fund's position in investment grade outperformed relative to the benchmark but detracted from performance due mainly to security selection.

The Fund was overweight in non-Investment Grade Corporate Bonds and outperformed relative to the benchmark as fallen angels recovered dramatically after "gapping out" (when a stock opens above or below the previous day's close with no trading activity in between) at the onset of the COVID-19 crisis in March. The Fund's overweight positions in Asset Backed Securities ("ABS"), agency Mortgage Backed Securities ("MBS"), non-agency MBS, and Commercial MBS performed well. These positions were in High-Quality Bonds with attractive spreads. They all contributed positively to outperformance as spreads tightened for the remainder of 2020 after "gapping out" in March. The Fund's overweight position in Treasury Inflation Protected Securities ("TIPS") also performed well due to rising inflation expectations with the Federal Reserve shifting its monetary policy strategy toward an average inflation targeting framework.

During the year, the Fund employed the use of derivatives, specifically Treasury Futures, to manage duration exposure. Futures are an efficient means by which the portfolio manager hedges the Fund's exposure to changes in interest rates. The Fund used futures to hedge the longer duration of our corporates and Agency MBS relative to the benchmark, which contributed negatively to performance as rates declined over the period. Over 80% of the NVIT Short Term Bond rated single-A or higher. The "up-in-quality"† bias helped limit some of the downside brought on by the unusual bear market as a function of an extremely unique recession brought on by the COVID-19 crisis.

There Fund did not experience any liquidity issues during the reporting period.

There were no industry impacts to the Fund related to the LIBOR transition during the reporting period.

#### **Subadviser:**

Nationwide Asset Management, LLC

#### **Portfolio Managers:**

Gary S. Davis, CFA and Corsan Maley

\*Basis points ("bps") refers to a common unit of measure for interest rates and other percentages in finance. One basis point is equal .001 or 1/100th of 1%.

\*\* "Spread product" is the term for taxable (as opposed to municipal) bonds that are not Treasury securities. Agency securities, asset-backed securities, corporate bonds, high-yield bonds and mortgage-backed securities are various types of spread product.

†"up-in-quality" takes into account the change in the quality of the goods.

The Fund is subject to the risks of investing in fixed-income securities, including high-yield bonds (which are more volatile). These risks include default risk and interest rate risk (if interest rates go up, bond prices go down, and if interest rates go down, bond prices go up). Funds that invest in high-yield securities are subject to greater default risk, liquidity risk, and price fluctuations than funds that invest in higher-quality securities. The prices of high-yield bonds tend to be more sensitive to adverse economic and business conditions than are higher-rated corporate bonds. Increased volatility may reduce the market value of high-yield bonds. They are also subject to the claims-paying ability of the issuing company. The Fund also is subject to the risks of investing in foreign securities (which are volatile, harder to price and less liquid than U.S. securities). Please refer to the most recent prospectus for a more detailed explanation of the Fund's principal risks.

A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

**Performance of a \$10,000 Investment**

Investment return and principal value will fluctuate, and when redeemed, shares may be worth more or less than original cost. Past performance is no guarantee of future results and does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Investing in mutual funds involves market risk, including loss of principal. Performance returns assume the reinvestment of all distributions.

Comparative performance of \$10,000 invested in Class Y shares of the NVIT Short Term Bond Fund versus performance of the Bloomberg Barclays (BBgBarc) U.S. 1-3 Year Government (Govt)/Credit Bond Index over the 10-year period ended 12/31/20. Unlike the Fund, the performance of the index does not reflect any fees, expenses, or sales charges. One cannot invest directly in a market index. A description of the benchmark can be found on the Market Index Definitions page at the back of this book.

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) paid on purchase payments and redemption fees; and (2) ongoing costs, including investment advisory fees, administration fees, distribution fees and other Fund expenses. The examples below are intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. Per Securities and Exchange Commission ("SEC") requirements, the examples assume that you had a \$1,000 investment in the Class at the beginning of the reporting period (July 1, 2020) and continued to hold your shares at the end of the reporting period (December 31, 2020).

### Actual Expenses

For each Class of the Fund in the table below, the first line provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid from July 1, 2020 through December 31, 2020. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line of each Class under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

### Hypothetical Expenses for Comparison Purposes

The second line of each Class in the table below provides information about hypothetical account values and hypothetical expenses based on the Class' actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Class' actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period from July 1, 2020 through December 31, 2020. You may use this information to compare the ongoing costs of investing in the Class of the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transaction costs, such as sales charges (loads) or redemption fees. If these transaction costs were included, your costs would have been higher. Therefore, the second line for each Class in the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. The examples also assume all dividends and distributions are reinvested.

<sup>(a)</sup> The Example does not include charges that are imposed by variable insurance contracts. If these charges were reflected, the expenses listed below would be higher.

<sup>(b)</sup> Expenses are equal to the Fund's annualized expense ratio multiplied by the average account value from July 1, 2020 through December 31, 2020 multiplied by 184/366 to reflect one-half year period. The expense ratio presented represents a six-month, annualized ratio in accordance with Securities and Exchange Commission guidelines.

<sup>(c)</sup> Represents the hypothetical 5% return before expenses.

\* Denotes a non-income producing security.

^ Value determined using significant unobservable inputs.

∞ Fair valued security.

† Amount rounds to less than 0.1%.

- (a) Rule 144A, Section 4(2), or other security which is restricted as to sale to institutional investors. These securities were deemed liquid pursuant to procedures approved by the Board of Trustees. The liquidity determination is unaudited. The aggregate value of these securities at December 31, 2020 was \$193,276,602 which represents 70.16% of net assets.
- (b) Variable or floating rate security, the interest rate of which adjusts periodically based on changes in current interest rates and prepayments on the underlying pool of assets. See Note 6 for further information. The interest rate shown was the current rate as of December 31, 2020.
- (c) Step Bond. Coupon rate is set for an initial period and then increases to a higher coupon rate at a specific date. The rate shown is the rate at December 31, 2020.
- (d) The security or a portion of this security is on loan at December 31, 2020. The total value of securities on loan at December 31, 2020 was \$16,954,907, which was collateralized by cash used to purchase repurchase agreements with a total value of \$8,437,713 and by \$9,212,675 of collateral in the form of U.S. Government Treasury Securities, interest rates ranging from 0.00% – 5.25%, and maturity dates ranging from 1/28/2021 – 2/15/2050, a total value of \$17,650,388.
- (e) Variable or floating rate security, linked to the referenced benchmark. The interest rate shown was the current rate as of December 31, 2020.
- (f) Perpetual Bond Security. The rate reflected in the Statement of Investments is the rate in effect on December 31, 2020. The maturity date reflects the next call date.
- (g) Security in default.
- (h) PIK-Payment-in-kind security. Income may be in cash or additional notes, at the discretion of the issuer. The rate disclosed is the PIK rate.

**Centrally Cleared Credit default swap contracts outstanding - buy protection as of December 31, 2020<sup>1</sup>:**

Reference Obligation/Index	Financing Rate Paid by the Fund (%)	Payment Frequency	Maturity Date	Implied Credit Spread (%) <sup>2</sup>	Notional Amount <sup>3</sup>	Upfront Payments (Receipts) (\$) <sup>4</sup>	Unrealized Appreciation (Depreciation) (\$)	Value (\$)

						<u>(1,449,942)</u>	<u>(7,992,217)</u>	<u>(9,442,158)</u>

At December 31, 2020, the Fund had \$6,191,310 segregated as collateral for credit default swap contracts.

- 1 The Fund, as a buyer of credit protection, pays periodic payments and any upfront premium to the protection seller, and is obligated to receive a contingent payment, upon occurrence of a credit event with respect to an underlying reference obligation, as defined under the terms of each individual swap contract.
- 2 Implied credit spreads are an indication of the seller's performance risk, related to the likelihood of a credit event occurring that would require a seller to make a payment to a buyer. Implied credit spreads are used to determine the value of swap contracts and reflect the cost of buying/selling protection, which may include upfront payments made to enter into the contract. Therefore, higher spreads would indicate a greater likelihood that a seller will be obligated to perform (i.e., make payment) under the swap contract. Increasing values, in absolute terms and relative notional amounts, are also indicative of greater performance risk. Implied credit spreads for credit default swaps on credit indices are linked to the weighted average spread across the underlying reference obligations included in a particular index.
- 3 The notional amount is the maximum amount that a seller of a credit default swap would be obligated to pay and a buyer of credit protection would receive, upon occurrence of a credit event.
- 4 Upfront premiums generally related to payments received or paid at the initiation of the swap agreement to compensate for differences between the stated terms of the swap agreement and current market conditions (credit spreads, interest rates and other relevant factors).

- (a) Rule 144A, Section 4(2), or other security which is restricted as to sale to institutional investors. These securities were deemed liquid pursuant to procedures approved by the Board of Trustees. The liquidity determination is unaudited. The aggregate value of these securities at December 31, 2020 was \$37,775,708 which represents 19.02% of net assets.
- (b) Variable or floating rate security, the interest rate of which adjusts periodically based on changes in current interest rates and prepayments on the underlying pool of assets. See Note 6 for further information. The interest rate shown was the current rate as of December 31, 2020.
- (c) Step Bond. Coupon rate is set for an initial period and then increases to a higher coupon rate at a specific date. The rate shown is the rate at December 31, 2020.
- (d) Security in default.
- (e) Variable or floating rate security, linked to the referenced benchmark. The interest rate shown was the current rate as of December 31, 2020.
- (f) Perpetual Bond Security. The rate reflected in the Statement of Investments is the rate in effect on December 31, 2020. The maturity date reflects the next call date.
- (g) PIK-Payment-in-kind security. Income may be in cash or additional notes, at the discretion of the issuer. The rate disclosed is the PIK rate.
- (h) Perpetual bond security. The maturity date reflects the next call date.

\* Denotes a non-income producing security.

^ Value determined using significant unobservable inputs.

∞ Fair valued security.

† Amount rounds to less than 0.1%.

- (a) Rule 144A, Section 4(2), or other security which is restricted as to sale to institutional investors. These securities were deemed liquid pursuant to procedures approved by the Board of Trustees. The liquidity determination is unaudited. The aggregate value of these securities at December 31, 2020 was \$80,767,931 which represents 66.62% of net assets.
- (b) PIK-Payment-in-kind security. Income may be in cash or additional notes, at the discretion of the issuer. The rate disclosed is the cash rate.
- (c) Security in default.
- (d) Restricted security.
- (e) Step Bond. Coupon rate is set for an initial period and then increases to a higher coupon rate at a specific date. The rate shown is the rate at December 31, 2020.
- (f) Variable or floating rate security, linked to the referenced benchmark. The interest rate shown was the current rate as of December 31, 2020.

† Amount rounds to less than 0.1%.

- (a) Rule 144A, Section 4(2), or other security which is restricted as to sale to institutional investors. These securities were deemed liquid pursuant to procedures approved by the Board of Trustees. The liquidity determination is unaudited. The aggregate value of these securities at December 31, 2020 was \$427,660,172 which represents 30.84% of net assets.
- (b) Variable or floating rate security, the interest rate of which adjusts periodically based on changes in current interest rates and prepayments on the underlying pool of assets. See Note 6 for further information. The interest rate shown was the current rate as of December 31, 2020.

- (c) The security or a portion of this security is on loan at December 31, 2020. The total value of securities on loan at December 31, 2020 was \$34,779,465, which was collateralized by cash used to purchase repurchase agreements with a total value of \$5,234,385 and by \$30,841,834 of collateral in the form of U.S. Government Treasury Securities, interest rates ranging from 0.00% – 5.38%, and maturity dates ranging from 1/15/2021 – 11/15/2050, a total value of \$36,076,219.
- (d) Variable or floating rate security, linked to the referenced benchmark. The interest rate shown was the current rate as of December 31, 2020.
- (e) Perpetual Bond Security. The rate reflected in the Statement of Investments is the rate in effect on December 31, 2020. The maturity date reflects the next call date.
- (f) Step Bond. Coupon rate is set for an initial period and then increases to a higher coupon rate at a specific date. The rate shown is the rate at December 31, 2020.
- (g) Zero Coupon Security. Debt security that pays no cash income but is sold at substantial discount from its value at maturity.
- (h) Principal amounts are not adjusted for inflation.
- (i) Security was purchased with cash collateral held from securities on loan. The total value of securities purchased with cash collateral as of December 31, 2020 was \$5,234,385.
- (j) Please refer to Note 2 for additional information on the joint repurchase agreement.

† Amount rounds to less than 0.1%.

- (a) Variable or floating rate security, the interest rate of which adjusts periodically based on changes in current interest rates and prepayments on the underlying pool of assets. See Note 6 for further information. The interest rate shown was the current rate as of December 31, 2020.
- (b) Rule 144A, Section 4(2), or other security which is restricted as to sale to institutional investors. These securities were deemed liquid pursuant to procedures approved by the Board of Trustees. The liquidity determination is unaudited. The aggregate value of these securities at December 31, 2020 was \$300,461,983 which represents 17.96% of net assets.
- (c) Step Bond. Coupon rate is set for an initial period and then increases to a higher coupon rate at a specific date. The rate shown is the rate at December 31, 2020.
- (d) The security or a portion of this security is on loan at December 31, 2020. The total value of securities on loan at December 31, 2020 was \$97,778,092, which was collateralized by cash used to purchase repurchase agreements with a total value of \$55,214,137 and by \$45,433,580 of collateral in the form of U.S. Government Treasury Securities, interest rates ranging from 0.00% – 8.13%, and maturity dates ranging from 1/15/2021 – 11/15/2050, a total value of \$100,647,717.
- (e) Perpetual Bond Security. The rate reflected in the Statement of Investments is the rate in effect on December 31, 2020. The maturity date reflects the next call date.
- (f) Variable or floating rate security, linked to the referenced benchmark. The interest rate shown was the current rate as of December 31, 2020.
- (g) PIK-Payment-in-kind security. Income may be in cash or additional notes, at the discretion of the issuer. The rate disclosed is the PIK rate.
- (h) Security in default.

- (i) PIK-Payment-in-kind security. Income may be in cash or additional notes, at the discretion of the issuer. The rate disclosed is the cash rate.
- (j) Principal amounts are not adjusted for inflation.
- (k) Security or a portion of the security was purchased with cash collateral held from securities on loan. The total value of securities purchased with cash collateral as of December 31, 2020 was \$55,214,137.
- (l) Please refer to Note 2 for additional information on the joint repurchase agreement.

Reg. S Regulation S - Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States. Such security cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933 or pursuant to an exemption from registration. Currently there is no restriction on trading this security.

- (a) Rule 144A, Section 4(2), or other security which is restricted as to sale to institutional investors. These securities were deemed liquid pursuant to procedures approved by the Board of Trustees. The liquidity determination is unaudited. The aggregate value of these securities at December 31, 2020 was \$45,787,700 which represents 10.22% of net assets.
- (b) Variable or floating rate security, the interest rate of which adjusts periodically based on changes in current interest rates and prepayments on the underlying pool of assets. See Note 6 for further information. The interest rate shown was the current rate as of December 31, 2020.
- (c) The security or a portion of this security is on loan at December 31, 2020. The total value of securities on loan at December 31, 2020 was \$13,349,248, which was collateralized by cash used to purchase repurchase agreements with a total value of \$8,650,998 and by \$5,037,215 of collateral in the form of U.S. Government Treasury Securities, interest rates ranging from 0.13% – 5.38%, and maturity dates ranging from 1/15/2021 – 11/15/2050, a total value of \$13,688,213.
- (d) Principal amounts are not adjusted for inflation.
- (e) Security or a portion of the security was used to cover the margin requirement for futures contracts.
- (f) Security was purchased with cash collateral held from securities on loan. The total value of securities purchased with cash collateral as of December 31, 2020 was \$8,650,998.
- (g) Please refer to Note 2 for additional information on the joint repurchase agreement.

- (a) Rule 144A, Section 4(2), or other security which is restricted as to sale to institutional investors. These securities were deemed liquid pursuant to procedures approved by the Board of Trustees. The liquidity determination is unaudited. The aggregate value of these securities at December 31, 2020 was \$604,732,086 which represents 34.83% of net assets.
- (b) Variable or floating rate security, the interest rate of which adjusts periodically based on changes in current interest rates and prepayments on the underlying pool of assets. See Note 6 for further information. The interest rate shown was the current rate as of December 31, 2020.

- (c) Step Bond. Coupon rate is set for an initial period and then increases to a higher coupon rate at a specific date. The rate shown is the rate at December 31, 2020.
- (d) The security or a portion of this security is on loan at December 31, 2020. The total value of securities on loan at December 31, 2020 was \$192,825,480, which was collateralized by cash used to purchase repurchase agreements with a total value of \$21,774,704 and by \$175,908,250 of collateral in the form of U.S. Government Treasury Securities, interest rates ranging from 0.00% – 8.13%, and maturity dates ranging from 1/5/2021 – 11/15/2050, a total value of \$197,682,954.
- (e) Variable or floating rate security, linked to the referenced benchmark. The interest rate shown was the current rate as of December 31, 2020.
- (f) Principal amounts are not adjusted for inflation.
- (g) Security was purchased with cash collateral held from securities on loan. The total value of securities purchased with cash collateral as of December 31, 2020 was \$21,774,704.
- (h) Please refer to Note 2 for additional information on the joint repurchase agreement.

Amounts designated as "—" are zero or have been rounded to zero.

(a) Per share calculations were performed using average shares method.

(b) Not annualized for periods less than one year.

(c) The total returns do not include charges that are imposed by variable insurance contracts. If these charges were reflected, returns would be lower than those shown.

(d) Annualized for periods less than one year.

(e) Expense ratios include expenses reimbursed to the Advisor.

## 1. Organization

Nationwide Variable Insurance Trust ("NVIT" or the "Trust") is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company, organized as a statutory trust under the laws of the State of Delaware. The Trust has authorized an unlimited number of shares of beneficial interest ("shares"), without par value. The Trust currently offers shares to life insurance company separate accounts to fund the benefits payable under variable life insurance policies and variable annuity contracts. As of December 31, 2020, the Trust operates sixty-five (65) separate series, or mutual funds, each with

- Amundi NVIT Multi Sector Bond Fund ("Multi Sector Bond ")
- DoubleLine NVIT Total Return Tactical Fund ("Total Return Tactical")
- Federated NVIT High Income Bond Fund ("High Income Bond")
- NVIT Core Bond Fund ("Core Bond")
- NVIT Core Plus Bond Fund ("Core Plus Bond")
- NVIT Government Bond Fund ("Government Bond")
- NVIT Government Money Market Fund ("Government Money Market")
- NVIT Short Term Bond Fund ("Short Term Bond")

Only separate accounts established by ("NLIC"), a wholly owned subsidiary of NFS, and Nationwide Life and Annuity Insurance Company ("NLAIC"), a wholly owned subsidiary of NLIC, hold shares of Multi Sector Bond, High Income Bond, and Government Money Market. Shares of Total Return Tactical are held by separate accounts established by NLIC, other unaffiliated insurance companies, and other series of the Trust that operate as fund-of-funds, such as the NVIT Blueprint Funds. Shares of Core Bond and Core Plus Bond are held by separate accounts established by NLIC and NLAIC and series of the Trust that operate as a fund-of-funds, such as the NVIT Blueprint Funds. Shares of Government Bond are held by separate accounts established by NLIC and NLAIC and other unaffiliated insurance companies. Shares of Short Term Bond are held by separate accounts established by NLIC and NLAIC and series of the Trust that operate as a fund-of-funds, such as the NVIT Blueprint Funds and NVIT Investor Destinations Funds.

The Funds, as applicable, currently offer Class I, Class II, Class IV, Class V and Class Y shares. Each share class of a Fund represents interests in the same portfolio of investments of that Fund and the classes are identical except for any differences in the distribution or service fees, administrative services fees, class specific expenses, certain voting rights, and class names or designations.

Government Money Market seeks to maintain a stable price of \$1.00 per share by using the amortized cost method of valuation to value portfolio securities. Government Money Market invests primarily in a portfolio of U.S. government securities and repurchase agreements that are collateralized fully by cash or U.S. government securities, and which mature in 397 calendar days or less, with certain exceptions permitted by applicable regulations. U.S. Government securities are debt securities issued and/or guaranteed as to principal and interest by the United States, or by a person controlled or supervised

its own objective(s) and investment strategies. This report contains the financial statements and financial highlights for the eight (8) series listed below (each, a "Fund"; collectively, the "Funds").

Nationwide Fund Advisors ("NFA") serves as investment adviser to the Funds. NFA is a wholly owned subsidiary of Nationwide Financial Services, Inc. ("NFS"), a holding company which is a direct wholly owned subsidiary of Nationwide Corporation. Nationwide Corporation, in turn, is owned by Nationwide Mutual Insurance Company and Nationwide Mutual Fire Insurance Company.

by and acting as an instrumentality of the government of the United States. Government Money Market will limit investments to those securities that are Eligible Securities as defined by applicable regulations at the time of purchase.

Government Money Market operates as a "Government Money Market Fund," as defined in Rule 2a-7 under the 1940 Act. This means that Government Money Market invests at least 99.5% of its total assets in (1) U.S. government securities, (2) repurchase agreements that are collateralized fully by U.S. government securities or cash, (3) cash, and/or (4) other money market mutual funds that operate as Government Money Market Funds. Under normal circumstances, Government Money Market invests at least 80% of its net assets, excluding cash, in U.S. government securities and repurchase agreements that are fully collateralized by U.S. government securities.

Government Money Market does not currently intend to impose liquidity fees or redemption gates on shareholder redemptions. However, the Board of Trustees of the Trust ("Board of Trustees") may reserve the ability to subject Government Money Market to a liquidity fee and/or redemption gate in the future, after providing prior notice to shareholders. Because Government Money Market invests in short-term securities, Government Money Market's subadviser generally sells securities only to meet liquidity needs, to maintain target allocations or to take advantage of more favorable opportunities.

Each Fund is a diversified fund, as defined in the 1940 Act.

## 2. Summary of Significant Accounting Policies

The following is a summary of significant accounting policies followed by the Funds in the accounting and the preparation of their financial statements. The Funds are investment companies and follow accounting and reporting guidance in the Financial Accounting Standards Board ("FASB") Accounting

Standards Codification Topic 946 (“ASC 946”). The policies are in conformity with accounting principles generally accepted in the United States of America (“U.S. GAAP”), including, but not limited to, ASC 946. The preparation of financial statements requires fund management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expenses for the period. The Funds utilize various methods to measure the value of their investments on a recurring basis. Amounts received upon the sale of such investments could differ from those estimated values and those differences could be material.

### (a) Security Valuation

U.S. GAAP defines fair value as the price that a Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. Pursuant to procedures approved by the Board of Trustees, NFA assigns a fair value, as defined by U.S. GAAP, to a Fund’s investments in accordance with a hierarchy that prioritizes the various types of inputs used to measure fair value. The hierarchy gives the highest priority to readily available unadjusted quoted prices in active markets for identical assets (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements) when market prices are not readily available or reliable.

The three levels of the hierarchy are summarized as follows.

- Level 1 — Quoted prices in active markets for identical assets
- Level 2 — Other significant observable inputs (including quoted prices of similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 — Significant unobservable inputs (including a Fund’s own assumptions in determining the fair value of investments)

Changes in valuation techniques may result in transfers into or out of an investment’s assigned level within the hierarchy.

An investment’s categorization within the hierarchy is based on the lowest level of any input that is significant to the fair valuation in its entirety. The inputs or methodology used to value investments are not intended to indicate the risk associated with investing in those investments.

Securities for which market-based quotations are readily available are valued at the current market value as of “Valuation Time.” Valuation Time is as of the close of regular trading on the New York Stock Exchange (usually 4:00 p.m. Eastern time). Equity securities are generally valued at the last quoted sale price or official closing price, or, if there is no such price, the last quoted bid price provided by an independent pricing service approved by the Board of Trustees. Prices are taken from the primary market or exchange on which each security trades. Shares of registered open-end management investment companies are valued at net asset value (“NAV”) as reported

by such company. Shares of exchange traded funds are generally valued at the last quoted sale price or official closing price, or, if there is no such price, the last quoted bid price provided by an independent pricing service. Master limited partnerships (“MLPs”) are publicly traded partnerships and are treated as partnerships for U.S. federal income tax purposes. Investments in MLPs are valued at the last quoted sale price or official closing price, or, if there is no such price, the last quoted bid price provided by an independent pricing service. Equity securities, shares of registered open-end management investment companies, shares of exchange traded funds and MLPs valued in this manner are generally categorized as Level 1 investments within the hierarchy. Repurchase agreements are valued at amortized cost, which approximates fair value, and are generally categorized as Level 2 investments within the hierarchy.

Debt and other fixed-income securities are generally valued at the bid evaluation price provided by an independent pricing service as approved by the Board of Trustees. Evaluations provided by independent pricing service providers may be determined without exclusive reliance on quoted prices and may use broker-dealer quotations, individual trading characteristics and other market data, reported trades or valuation estimates from their internal pricing models. The independent pricing service providers’ internal models use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates, anticipated timing of principal repayments, and quoted prices for similar assets and are generally categorized as Level 2 investments within the hierarchy. Debt obligations generally involve some risk of default with respect to interest and/or principal payments.

Municipal securities are valued as determined by an independent pricing service. The independent pricing service utilizes internal models and uses observable inputs such as: (i) yields or prices of municipal securities of comparable quality, coupon, maturity and type; (ii) indications as to values from dealers; and (iii) general market conditions. Municipal securities are generally categorized as Level 2 investments within the hierarchy.

Bank loans are valued using an average bid price provided by an independent pricing service. Evaluated quotes provided by the independent pricing service may reflect appropriate factors such as ratings, tranche type, industry, company performance and other market data. The independent pricing service utilizes internal models and uses observable inputs such as issuer details, interest rates, tranche type, ratings, and other market data. Securities valued in this manner are generally categorized as Level 2 investments within the hierarchy, consistent with similar valuation techniques and inputs for debt securities.

Securities held by Government Money Market are valued at amortized cost, which approximates fair value. Securities valued in this manner are generally categorized as Level 2 securities within the hierarchy. Under the amortized cost method, premium or discount, if any, is amortized or accreted, respectively, to the maturity of the security. Government Money Market’s use of amortized cost is subject to compliance with

certain conditions as specified by Rule 2a-7 under the 1940 Act.

The Board of Trustees has delegated authority to NFA, and the Trust's administrator, Nationwide Fund Management LLC ("NFM"), to assign a fair value under certain circumstances, as described below, pursuant to valuation procedures approved by the Board of Trustees. NFA and NFM have established a Fair Valuation Committee ("FVC") to assign these fair valuations. The fair value of a security may differ from its quoted or published price. Fair valuation of portfolio securities may occur on a daily basis.

Securities may be fair valued in certain circumstances, such as where (i) market-based quotations are not readily available; (ii) an independent pricing service does not provide a value or the value provided by an independent pricing service is determined to be unreliable in the judgment of NFA/NFM or its designee; (iii) a significant event has occurred that affects the value of a Fund's securities after trading has stopped (e.g., earnings announcements or news relating to natural disasters affecting an issuer's operations); (iv) the securities are illiquid; (v) the securities have defaulted or been delisted from an exchange and are no longer trading; or (vi) any other circumstance in which the FVC believes that market-based quotations do not accurately reflect the value of a security.

The FVC will assign a fair value according to fair value methodologies. Information utilized by the FVC to obtain a fair value may include, among others, the following: (i) a multiple of earnings; (ii) the discount from market value of a similar, freely traded security; (iii) the yield-to-maturity for debt issues; or (iv) a combination of these and other methods. Fair valuations may also take into account significant events that occur before Valuation Time but after the close of the principal market on which a security trades that materially affect the value of such security. To arrive at the appropriate methodology, the FVC may consider a non-exclusive list of factors, which are specific to the security, as well as whether the security is traded on the domestic or foreign markets. The FVC monitors the results of fair valuation determinations and regularly reports the results to the Board of Trustees. Each Fund attempts to establish a price that it might reasonably expect to receive upon the current sale of that security. That said, there can be no assurance that the fair value assigned to a security is the price at which a security could have been sold during the period in which the particular fair value was used to value the security. To the extent the significant inputs used are observable, these securities are classified as Level 2 investments; otherwise, they are classified as Level 3 investments within the hierarchy.

Values of foreign securities, currencies, and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars at the exchange rate of said currencies against the U.S. dollar, as of Valuation Time, as provided by an independent pricing service approved by the Board of Trustees.

The following tables provide a summary of the inputs used to value the Funds' net assets as of December 31, 2020. Please refer to the Statements of Investments for additional information on portfolio holdings.

Amounts designated as "-" are zero or have been rounded to zero.

The FVC continues to evaluate any information that could cause an adjustment to the fair value for these investments, such as market news, the progress of judicial and regulatory proceedings, and subadviser recommendations.

**(b) Cash Overdraft**

The Fund may have overdrawn U.S. dollar and/or foreign currency balances with the Fund's custodian bank, JPMorgan Chase Bank, N.A. ("JPMorgan"). To offset the overdraft, JPMorgan advanced an amount equal to the overdraft. Consistent with the Fund's borrowing policy, the advance is deemed a temporary loan to the Fund. Such loan is payable upon demand and bears interest from the date of such advance to the date of payment at the rate agreed upon with JPMorgan under the custody agreement. This advance is separate from, and was not made pursuant to, the credit agreement discussed in Note 4. A Fund with an overdraft is subject to a lien by JPMorgan on the Fund's account and JPMorgan may charge the Fund's account for any amounts owed to JPMorgan. JPMorgan also has the right to set off as appropriate and apply all deposits and credits held by or owing to JPMorgan against such amount, subject to the terms of the custody agreement.

At December 31, 2020, the Funds did not have overdrawn balances.

**(c) Foreign Currency Transactions**

The accounting records of the Funds are maintained in U.S. dollars. The Funds may, nevertheless, engage in foreign currency transactions. In those instances, a Fund will convert foreign currency amounts into U.S. dollars at the current rate of exchange between the foreign currency and the U.S. dollar in order to determine the value of the Funds' investments, assets, and liabilities.

Purchases and sales of securities, receipts of income, and payments of expenses are converted at the prevailing rate of exchange on the respective date of such transactions. The accounting records of a Fund do not differentiate that portion of the results of operations resulting from changes in foreign exchange rates from those resulting from changes in the market prices of the relevant securities. Each portion contributes to the net realized gains or losses from transactions in investment securities and net change in unrealized appreciation/depreciation in the value of investment securities. Net currency gains or losses, realized and unrealized, that are a result of differences between the amount recorded on a Fund's accounting records, and the U.S. dollar equivalent amount actually received or paid for interest or dividends, receivables and payables for investments sold or purchased, and foreign cash, are included in the Statements of Operations under "Net realized gains (losses) from foreign currency transactions" and "Net change in unrealized appreciation/depreciation in the value of translation of assets and liabilities denominated in foreign currencies," if applicable.

**(d) Swap Contracts**

*Credit Default Swap Contracts* — Certain Funds entered into credit default swap contracts during the year ended December 31, 2020. Credit default swap contracts are either privately negotiated agreements between the Fund and a counterparty or traded through a futures commission merchant and cleared through a clearinghouse that serves as a central counterparty.

Investments in credit default swap contracts are utilized to expose a Fund's cash holdings to the investment characteristics and performance of the high-yield bond market while maintaining liquidity to satisfy shareholder activity, to manage broad credit market spread exposure and/or to create synthetic long and short exposure to sovereign debt securities, as applicable, to meet each Fund's stated investment strategies as shown in the Fund's Prospectus.

Each Fund segregates liquid assets to cover its obligations under its credit default swap contracts.

Upfront premiums received or paid at the beginning of the initiation period are included in the Statements of Assets and Liabilities under "Swap contracts, at value" for OTC swaps and under "Receivable/payable for variation margin on centrally cleared swap contracts" for centrally cleared swaps, as applicable.

These upfront premiums are amortized and accreted daily and are recorded as realized gains or losses on the Statements of Operations upon maturity or termination of the credit default swap contract.

As the protection purchaser in a credit default swap contract, the Fund pays the counterparty a periodic stream of payments over the term of the contract, provided that no credit event or default (or similar event) occurs. However, the Fund is required to receive the par (or other agreed-upon) value of a referenced debt obligation from the counterparty in the event of a default (or similar event) by a third party, such as a U.S. or foreign issuer, on the debt obligation. If a credit event or default (or similar event) occurs, the Fund either (i) receives from the counterparty an amount equal to the notional amount of the swap and the counterparty takes delivery of the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index, or (ii) receives from the counterparty a net settlement amount in the form of cash or securities to the notional amount of the swap and the recovery value of the referenced obligation or underlying securities comprising the referenced index. As the purchaser in a credit default swap contract, the Fund's investment would generate income only in the event of an actual default (or similar event) by the issuer of the underlying obligation.

As the protection seller in a credit default swap contract, a Fund receives from the counterparty a periodic stream of payments over the term of the contract, provided that no credit event or default (or similar event) occurs. However, a Fund is required to pay the par (or other agreed-upon) value of a referenced debt obligation to the counterparty in the event of a default (or similar event) by a third party, such as a U.S. or foreign issuer, on the debt obligation. In return, if no credit event or default (or similar event) occurs, a Fund keeps the stream of payments and would have no payment of obligations.

If a credit event or default (or similar event) occurs, a Fund either (i) pays to the counterparty an amount equal to the notional amount of the swap and takes delivery of the referenced

obligation, other deliverable obligations or underlying securities comprising the referenced index, or (ii) pays the counterparty a net settlement amount in the form of cash or securities to the notional amount of the swap and the recovery value of the referenced obligation or underlying securities comprising the referenced index. By selling a credit default swap contract, a Fund effectively adds economic leverage to its portfolio because, in addition to its total net assets, a Fund is subject to investment exposure on the notional amount of the swap.

Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising the credit index. A credit index is a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. These indices are made up of reference credits that are judged by a poll of dealers to be the most liquid entities in the credit default swap market based on the sector of the index. Components of the indices include high-yield securities. Credit indices are traded using credit default swap contracts with standardized terms including a fixed spread and standard maturity dates. An index credit default swap contract references all the names in the index, and if there is a default, the credit event is settled based on the name's weight in the index. For most indices, each name has an equal weight in the index. The composition of the indices changes periodically. The use of credit default swap contracts on indices is often less expensive than it would be to buy many issuer-specific credit default swap contracts to achieve a similar effect.

Credit default swap contracts are marked-to-market daily based on valuations from independent pricing services. Credit default swap contracts are generally categorized as Level 2 investments within the hierarchy.

Implied credit spreads are utilized in determining the market value of credit default swap agreements on credit indices and serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for the credit derivative. Implied credit spreads utilized in valuing each Fund's investments as of December 31, 2020 are disclosed in the Statements of Investments. The implied credit spread of a particular referenced entity reflects the cost of selling protection on such entity's debt, and may include upfront payments required to be made to enter into the agreement. For credit default swap agreements on credit indices, the quoted market prices and resulting value serve as the indicator of the current status of the payment/performance risk. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

Certain clearinghouses currently offer clearing for limited types of derivatives transactions, such as credit derivatives. In a centrally cleared credit default swap contract, immediately following execution of the swap agreement, the swap agreement is novated to a central counterparty (the "CCP") and a Fund's counterparty on the swap agreement becomes the CCP. A Fund is required to interface with the CCP through a broker. Upon entering into a centrally cleared swap contract, a Fund is required to deposit initial margin with the broker in the form of cash or securities in

an amount that varies depending on the size and risk profile of the particular swap. Securities deposited as initial margin are designated on the Statement of Investments and cash deposited is recorded on the Statements of Assets and Liabilities as cash pledged for centrally cleared swap contracts. The daily change in valuation of centrally cleared credit default swap contracts is recorded as a receivable or payable for variation margin on centrally cleared swap contracts. Payments received from (paid to) the counterparty, including at termination, are recorded as realized gains (losses) in the Statements of Operations.

The Funds' swap agreements are disclosed in the Statements of Assets and Liabilities under "Swap contracts, at value" for over-the counter ("OTC") swaps and under "Receivable/payable for variation margin on centrally cleared swap contracts" for centrally cleared swaps, in a table in the Statement of Investments, and in the Statements of Operations under "Net realized gains (losses) from expiration or closing of swap contracts" and "Net change in unrealized appreciation/depreciation in the value of swap contracts.", as applicable.

### **(e) Forward Foreign Currency Contracts**

Certain Funds entered into forward foreign currency contracts in connection with planned purchases or sales of securities denominated in a foreign currency and/or to hedge the U.S. dollar value of portfolio securities denominated in a foreign currency, to express a view on a foreign currency vs. the U.S. dollar or other foreign currency and/or to hedge the U.S. dollar value of portfolio securities denominated in a foreign currency, as applicable, to meet each Fund's stated investment strategies as shown in the Fund's Prospectus.

A forward foreign currency contract involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. Forward foreign currency contracts are generally valued at the mean of the last quoted bid and ask prices, as provided by an independent pricing service approved by the Board of Trustees, and are generally categorized as Level 2 investments within the hierarchy. The market value of a forward foreign currency contract fluctuates with changes in foreign currency exchange rates. All commitments are marked-to-market daily at the applicable exchange rates and any resulting unrealized appreciation or depreciation is recorded. Realized gains or losses are recorded at the time the forward foreign currency contract matures or at the time of delivery of the currency. Forward foreign currency contracts entail the risk of unanticipated movements in the value of the foreign currency relative to the U.S. dollar, and the risk that the counterparties to the contracts may be unable to meet their obligations under the contract.

The Funds' forward foreign currency contracts are disclosed in the Statements of Assets and Liabilities under "Unrealized appreciation/(depreciation) on forward foreign currency contracts," in a table in the Statement of Investments and in the Statements of Operations under "Net realized gains (losses) from settlement of forward foreign currency contracts" and "Net change in unrealized appreciation/depreciation in the value of forward foreign currency contracts.", as applicable.

**(f) Options**

Certain Funds purchased and/or wrote options on futures contracts and/or indexes. Such option investments are utilized to manage currency exposures and/or hedge against movements in the values of the foreign currencies in which the portfolio securities are denominated, to gain exposure to and/or hedge against changes in interest rates, to capitalize on the return-generating features of selling options (short volatility) while simultaneously benefiting from the risk-control attributes associated with buying options (long volatility), and/or to generate consistent outperformance, as applicable, to meet each Fund's stated investment strategies as shown in the Fund's Prospectus.

The purchase of put options serves as a short hedge and the purchase of call options serves as a long hedge. Writing put options serves as a limited long hedge because increases in the value of the hedged investment would be offset to the extent of the premium received for writing the option. However, if the security depreciates to a price lower than the strike price of the put option, it can be expected that the put option will be exercised, and the Fund will be obligated to purchase the security at more than its market value. The Fund segregates liquid assets to cover its obligations under its option contracts. Writing call options serves as a limited short hedge because declines in the value of the hedged investment would be offset to the extent of the premium received for writing the option. However, if the security appreciates to a price higher than the exercise price of the call option, it can be expected that the call option will be exercised, and a Fund will be obligated to sell the security at less than its market value or will be obligated to purchase the security at a price greater than that at which the security must be sold under the option.

When a Fund writes an option, an amount equal to the premium received is recorded as a liability and subsequently marked-to-market to reflect the current value of the option written. Premiums received from writing options which expire unexercised are treated as realized gains. Premiums received from writing options which are exercised or closed are added to the proceeds from or offset against amounts paid on the underlying transaction to determine the realized gain or loss on such underlying transaction. When a Fund writes an option, it has no control over whether the option will be exercised, and as a result bears the risk of an unfavorable change in the price of the instrument underlying the written option. Writing options entails the risk that a Fund may not be able to enter into a closing transaction because of an illiquid market.

Options traded on an exchange are valued at the settlement price provided by an independent pricing service as approved by the Board. If a settlement price is not available, such options are valued at the last quoted sale price, if available, and otherwise at the average bid/ask price. Exchange-traded options are generally categorized as Level 1 investments within the hierarchy. Options traded in the over-the-counter ("OTC") market, and which are not quoted by NASDAQ, are valued at the last quoted bid price, and are generally categorized as Level 2 investments within the hierarchy. The value of an option

position reflects, among other things, the implied price volatility of the underlying investment, the current market value of the underlying investment, the time remaining until expiration of the option, the relationship of the strike price to the market price of the underlying investment, and general market conditions. Options that expire unexercised have no value. American-style options can be exercised at any time prior to the expiration date of the option. European-style options can only be exercised at expiration of the option.

A Fund effectively terminates its right or obligation under an option by entering into a closing transaction. Closing transactions permit a Fund to realize the profit or limit the loss on an option position prior to its exercise or expiration.

If a Fund is unable to affect a closing transaction for an option it purchased, it would have to exercise the option to realize any profit. The inability to enter into a closing purchase transaction for a covered call option written by a Fund could cause material losses because a Fund would be unable to sell the investment used as a cover for the written option until the option expires or is exercised.

The writing and purchasing of options is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. Imperfect correlation between options and the securities markets may detract from the effectiveness of attempted hedging. Transactions using OTC options (other than options purchased by a Fund) expose a Fund to counterparty risk. To the extent required by Securities and Exchange Commission ("SEC") guidelines, a Fund will not enter into any options transactions unless it owns either (i) an offsetting ("covered") position in securities, other options, or futures or (ii) cash and liquid obligations with a value sufficient at all times to cover its potential obligations to the extent not covered as provided in (i) above. A Fund will also earmark or set aside cash and/or appropriate liquid assets in a segregated custodial account as required by SEC and U.S. Commodity Futures Trading Commission regulations. Assets used as cover or held in a segregated account cannot be sold while the position in the corresponding option or futures contract is open, unless they are replaced with similar assets. As a result, the commitment of a large portion of a Fund's assets to earmarking or segregated accounts as a cover could impede portfolio management or a Fund's ability to meet redemption requests or other current obligations.

The Funds' options contracts written are disclosed in the Statements of Assets and Liabilities under "Written options, at value", in a table in the Statements of Investments and in the Statements of Operations under "Net realized gains (losses) from expiration or closing of option contracts written" and "Net change in unrealized appreciation/depreciation in the value of option contracts written", as applicable.

The Funds' purchased options are disclosed in the Statements of Assets and Liabilities under "Investment securities, at value", in the Statement of Investments and in the Statements of

Operations under “Net realized gains (losses) from transactions in investment securities” and “Net change in unrealized appreciation/depreciation in the value of investment securities”, as applicable.

At December 31, 2020, the Funds had no open option contracts.

### (g) Futures Contracts

Certain Funds are subject to equity price and/or interest rate risk in the normal course of pursuing their objectives. Certain Funds entered into financial futures contracts (“futures contracts”) to manage currency risk, to equitize cash balances, to more efficiently manage the portfolio, to modify exposure to volatility, to increase or decrease the baseline equity exposure, to gain exposure to and/or hedge against changes in interest rates, for the purpose of reducing active risk in the portfolio, to gain exposure to and/or hedge against the value of equities and/or to gain exposure to foreign currencies, as applicable, to meet each Fund's stated investment strategies as shown in the Fund's Prospectus. Futures contracts are contracts for delayed delivery of securities or currencies at a specific future date and at a specific price or currency amount.

Upon entering into a futures contract, a Fund is required to segregate an initial margin deposit of cash and/or other assets equal to a certain percentage of the futures contract's notional value. Under a futures contract, a Fund agrees to receive from or pay to a broker an amount of cash equal to the daily fluctuation in value of the futures contract. Subsequent receipts or payments, known as “variation margin” receipts or payments, are made each day, depending on the fluctuation in the fair value of the futures contract, and are recognized by a Fund as unrealized gains or losses. Futures contracts

are generally valued daily at their settlement price as provided by an independent pricing service approved by the Board of Trustees, and are generally categorized as Level 1 investments within the hierarchy.

A “sale” of a futures contract means a contractual obligation to deliver the securities or foreign currency called for by the contract at a fixed price or amount at a specified time in the future. A “purchase” of a futures contract means a contractual obligation to acquire the securities or foreign currency at a fixed price at a specified time in the future. When a futures contract is closed, a Fund records a realized gain or loss equal to the difference between the value of the futures contract at the time it was opened and its value at the time it was closed.

Should market conditions change unexpectedly, a Fund may not achieve the anticipated benefits of futures contracts and may realize a loss. The use of futures contracts for hedging purposes involves the risk of imperfect correlation in the movements in the price of the futures contracts and the underlying assets. A Fund's investments in futures contracts entail limited counterparty credit risk because a Fund invests only in exchange-traded futures contracts, which are settled through the exchange and whose fulfillment is guaranteed by the credit of the exchange.

The Funds' futures contracts are reflected in the Statements of Assets and Liabilities under “Receivable/Payable for variation margin on futures contracts,” in a table in the Statement of Investments and in the Statements of Operations under “Net realized gains (losses) from expiration or closing of futures contracts” and “Net change in unrealized appreciation/depreciation in the value of futures contracts”, as applicable.

The following is a summary of the Funds' derivative instruments categorized by risk exposure as of December 31, 2020:

### Fair Values of Derivatives not Accounted for as Hedging Instruments as of December 31, 2020:

#### Multi Sector Bond

Assets:	Statements of Assets and Liabilities	Fair Value
Futures Contracts(a)		
Interest rate risk	Receivable/payable for variation margin on futures contracts	\$ 321,088
<b>Total</b>		<b>\$ 321,088</b>
<b>Liabilities:</b>		
Swap Contracts(b)		
Credit risk	Receivable/payable for variation margin on centrally cleared swap contracts	(7,992,217)
Forward Foreign Currency Contracts		
Currency risk	Unrealized depreciation on forward foreign currency contracts	(38,626)
Futures Contracts(a)		
Interest rate risk	Receivable/payable for variation margin on futures contracts	(83,687)
<b>Total</b>		<b>\$ (8,114,530)</b>

**Core Bond**

<b>Assets:</b>	<b>Statements of Assets and Liabilities</b>	<b>Fair Value</b>
Futures Contracts(a)		
Interest rate risk	Receivable/payable for variation margin on futures contracts	\$ 1,034,437
<b>Total</b>		<b>\$ 1,034,437</b>
<b>Liabilities:</b>		
Futures Contracts(a)		
Interest rate risk	Receivable/payable for variation margin on futures contracts	(1,141,278)
<b>Total</b>		<b>\$ (1,141,278)</b>

**Core Plus Bond**

<b>Assets:</b>	<b>Statements of Assets and Liabilities</b>	<b>Fair Value</b>
Futures Contracts(a)		
Interest rate risk	Receivable/payable for variation margin on futures contracts	\$ 204,114
<b>Total</b>		<b>\$ 204,114</b>

**Government Bond**

<b>Assets:</b>	<b>Statements of Assets and Liabilities</b>	<b>Fair Value</b>
Futures Contracts(a)		
Interest rate risk	Receivable/payable for variation margin on futures contracts	\$ 60,489
<b>Total</b>		<b>\$ 60,489</b>
<b>Liabilities:</b>		
Futures Contracts(a)		
Interest rate risk	Receivable/payable for variation margin on futures contracts	(312,860)
<b>Total</b>		<b>\$ (312,860)</b>

**Short Term Bond**

<b>Assets:</b>	<b>Statements of Assets and Liabilities</b>	<b>Fair Value</b>
Futures Contracts(a)		
Interest rate risk	Receivable/payable for variation margin on futures contracts	\$ 895,260
<b>Total</b>		<b>\$ 895,260</b>
<b>Liabilities:</b>		
Futures Contracts(a)		
Interest rate risk	Receivable/payable for variation margin on futures contracts	(721,847)
<b>Total</b>		<b>\$ (721,847)</b>

- (a) Includes cumulative appreciation/(depreciation) of futures contracts as reported in the Statement of Investments. Only current day's variation margin is reported within the Statements of Asset and Liabilities.
- (b) Swap contracts are included in the table at value, with the exception of centrally cleared swap contracts which are included in the table at unrealized appreciation/(depreciation). For centrally cleared swaps, only the variation margin on swap contracts is reported in the Statements of Asset and Liabilities.

Average Notional Balance Short	\$	455,239,414

The Funds are required to disclose information about offsetting and related arrangements to enable users of the financial statements to understand the effect of those arrangements on the Funds' financial position. In order to better define its contractual rights and to secure rights that will help certain Funds mitigate their counterparty risk, certain Funds entered into an International Swaps and Derivatives Association, Inc. Master Agreement ("ISDA Master Agreement") or a similar agreement with each of their derivative contract counterparties. An ISDA Master Agreement is a bilateral agreement between certain Funds and a counterparty that governs OTC derivatives and forward foreign currency contracts and typically contains, among other things, collateral posting items, if applicable, and netting provisions in the event of a default and/or termination event. Under an ISDA Master Agreement, certain Funds may, under certain circumstances, offset with the counterparty certain derivative financial instrument's payables and/or receivables

with collateral held and/or posted and create one single net payment. The provisions of the ISDA Master Agreement typically permit a single net payment in the event of default (close-out netting) including the bankruptcy or insolvency of the counterparty. However, bankruptcy or insolvency laws of a particular jurisdiction may impose restrictions on or prohibitions against the right of offset in bankruptcy, insolvency or other events. The counterparty is a financial institution.

At December 31, 2020, certain Funds may have entered into futures contracts. The futures contract agreements do not provide for netting arrangements.

For financial reporting purposes, certain Funds do not offset derivative assets and derivative liabilities that may be subject to netting arrangements on the "Statements of Assets and Liabilities."

The following tables set forth certain Funds' net exposure by counterparty for forward foreign currency contracts that are subject to enforceable master netting arrangements or similar arrangements as of December 31, 2020:

**Multi Sector Bond****Offsetting of Financial Liabilities, Derivative Liabilities and Collateral Pledged by Counterparty:**

Counterparty	Description	Gross Amounts of Recognized Liability Derivative	Gross Amounts Not Offset in the Statements of Assets and Liabilities		Net Amount of Liability Derivative
			Derivatives Available for Offset	Collateral Pledged	
	Forward Foreign				
Morgan Stanley Co., Inc.	Currency Contracts	\$ (38,626)	\$ —	\$ —	\$ (38,626)
<b>Total</b>		<b>(38,626)</b>	<b>\$ —</b>	<b>\$ —</b>	<b>(38,626)</b>

Amounts designated as "—" are zero.

**(h) Unfunded Commitments**

Each Fund may enter into commitments to buy and sell investments including commitments to buy Loan Participations to settle on future dates as part of its normal investment activities. Commitments are generally traded and priced as part of a related Loan Participations. The value of the unfunded portion of the investment is determined using a

pro-rata allocation, based on its par value relative to the par value of the entire investment. The unrealized appreciation (depreciation) from unfunded commitments is reported on the Statements of Assets and Liabilities. Credit risk exists on these commitments to the extent of any difference between the sales price and current value of the underlying securities sold. Market risk exists on these commitments to buy to the same extent as

if the securities were owned on a settled basis and gains and losses are recorded and reported in the same manner.

For the year ended December 31, 2020, no Funds held loan commitments in which all or a portion of the commitment was unfunded which could be extended at the option of the borrower.

### (i) Restricted Securities

At December 31, 2020, certain Funds owned restricted private placement instruments. These investments are valued at fair value as determined in accordance with procedures approved by the Board of Trustees. The acquisition dates of these investments, their costs, and their values at December 31, 2020 were as follows:

#### High Income Bond

	Coupon	Maturity Date	Principal Amount	Acquisition Date	Cost	Market Value	% of Net Assets
Motors Liquidation Co.	7.40%	9/1/2025	\$2,500,000	4/21/2011	\$-	\$-	0.00%

Amounts designated as "-" are zero or have been rounded to zero.

### (j) TBA

The Funds may invest in TBA mortgage-backed securities. A TBA, or "To Be Announced", trade represents a contract for the purchase or sale of mortgage-backed securities to be delivered at a future agreed-upon date; however, the specific mortgage pool numbers or the number of pools that will be delivered to fulfill the trade obligation or terms of the contract are unknown at the time of the trade. Mortgage pools (including fixed-rate or variable-rate mortgages) guaranteed by the Government National Mortgage Association, or GNMA, the Federal National Mortgage Association, or FNMA, or the Federal Home Loan Mortgage Corporation, or FHLMC, are subsequently allocated to the TBA transactions. TBAs involve a risk of loss if the value of the security to be purchased or sold declines or increases, respectively, prior to the settlement date. TBAs are valued at the bid evaluation price as provided by an independent pricing service approved by the Board.

The Funds may also enter into TBA sale commitments to hedge its portfolio positions, to sell mortgage-backed securities it owns under delayed delivery arrangements or to take a short position in mortgage-backed securities. Proceeds of TBA sale commitments are not received until the contractual settlement date. During the time a TBA sale commitment is outstanding, either equivalent deliverable securities or an offsetting TBA purchase commitment deliverable on or before the sale commitment date are held as "cover" for the transaction, or other liquid assets in an amount equal to the notional value of the TBA sale commitment are segregated. If the TBA sale commitment is closed through the acquisition of an offsetting TBA purchase commitment, a Fund realizes a gain or loss based upon the unit price of the acquisition. If a Fund delivers securities under the commitment, the Fund realizes a gain or a loss from the sale of the securities based upon the unit price established at the date the commitment was entered into.

### (k) Securities Lending

During the year ended December 31, 2020, certain Funds entered into securities lending transactions. To generate additional income, the Funds lent their portfolio securities, up to 33 1/3% of the total assets of a Fund, to brokers, dealers, and other financial institutions.

JPMorgan serves as securities lending agent for the securities lending program for the Funds. Securities lending transactions are considered to be overnight and continuous and can be terminated by a Fund or the borrower at any time.

The Funds receive payments from JPMorgan equivalent to any dividends and/or interest while on loan, in lieu of income which is included as "Dividend income" and/or "Interest income", as applicable, on the Statements of Operations. The Funds also receive interest that would have been earned on the securities loaned while simultaneously seeking to earn income on the investment of cash collateral or receiving a fee with respect to the receipt of non-cash collateral. Securities lending income includes any fees charged to borrowers less expenses associated with the loan. Income from the securities lending program is recorded when earned from JPMorgan and reflected in the Statements of Operations under "Income from securities lending." There may be risks of delay or restrictions in recovery of the securities or disposal of collateral should the borrower of the securities fail financially. Loans are made, however, only to borrowers deemed by JPMorgan to be of good standing and creditworthy. Loans are subject to termination by the Funds or the borrower at any time, and, therefore, are not considered to be illiquid investments. For Funds to which JPMorgan is not an affiliate, JPMorgan receives a fee based on a percentage of earnings (less any rebates paid to the borrower) derived from the investment of cash collateral, or a percentage of the fee paid by the borrower for loans collateralized by non-cash collateral. For Funds to which JPMorgan is an affiliate, JPMorgan receives a flat fee based on a percentage of the market value of loaned securities.

In accordance with guidance presented in FASB Accounting Standards Update 2014-11, Balance Sheet (Topic) 860: Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures, liabilities under the outstanding securities lending transactions as of December 31, 2020, which were comprised of repurchase agreements purchased with cash collateral, were as follows:

<b>Fund</b>	<b>Amounts of Liabilities Presented in the Statements of Assets and Liabilities</b>	
Multi Sector Bond	\$	8,437,713
Core Bond		5,234,385
Core Plus Bond		55,214,137
Government Bond		8,650,998
Short Term Bond		21,774,704

The Trust's securities lending policies and procedures require that the borrower (i) deliver cash or U.S. Government securities as collateral with respect to each new loan of U.S. securities, equal to at least 102% of the value of the portfolio securities loaned, and with respect to each new loan of non-U.S. securities, collateral of at least 105% of the value of the portfolio securities loaned; and (ii) at all times thereafter mark-to-market the collateral on a daily basis so that the market value of such collateral is at least 100% of the value of securities loaned. Cash collateral received is generally invested in joint repurchase agreements and shown in the Statement of Investments and included in calculating the Fund's total assets. U.S. Government securities received as collateral, if any, are held in safe-keeping by JPMorgan or The Bank of New York Mellon and cannot be sold or repledged by the Funds and accordingly are not reflected in the Fund's total assets. For additional information on the non-cash collateral received, if any, please refer to the Statement of Investments.

The Securities Lending Agency Agreement between the Trust and JPMorgan provides that in the event of a default by a borrower with respect to any loan, the Fund may terminate the loan and JPMorgan will exercise any and all remedies provided under the applicable borrower agreement to make the Fund whole. These remedies include purchasing replacement securities by applying the collateral held from the defaulting borrower against the purchase cost of the replacement securities. If, despite such efforts by JPMorgan to exercise these remedies, the collateral is less than the purchase cost of the replacement securities, JPMorgan is responsible for such shortfall, subject to certain limitations which are set forth in detail in the Securities Lending Agency Agreement.

At December 31, 2020, the joint repos on a gross basis were as follows:

Bank of America NA, 0.08%, dated 12/31/2020, due 1/4/2021, repurchase price \$69,800,620, collateralized by U.S. Government Agency Securities, 4.00%, maturing 3/20/2050; total market value \$71,196,000.

BofA Securities, Inc., 0.08%, dated 12/31/2020, due 1/4/2021, repurchase price \$19,000,169, collateralized by U.S. Government Agency Securities, ranging from 2.00% - 4.00%, maturing 12/25/2029 - 8/25/2050; total market value \$19,380,000.

Cantor Fitzgerald & Co., 0.08%, dated 12/31/2020, due 1/4/2021, repurchase price \$115,014,935, collateralized by U.S. Government Agency and Treasury Securities, ranging from 0.00% - 7.00%, maturing 4/1/2021 - 2/20/2067; total market value \$117,314,192.

At December 31, 2020, the Securities Lending Agency Agreement does not permit the Funds to enforce a netting arrangement.

#### **(I) Joint Repurchase Agreements**

During the year ended December 31, 2020, certain Funds, along with other series of the Trust, pursuant to procedures adopted by the Board of Trustees and applicable guidance from the SEC, transferred cash collateral received from securities lending transactions, through a joint account at JPMorgan, the Funds' custodian, the daily aggregate balance of which is invested in one or more joint repurchase agreements ("repo" or collectively "repos") collateralized by U.S. Treasury or federal agency obligations. For repos, each Fund participates on a pro rata basis with other clients of JPMorgan in its share of the underlying collateral under such repos and in its share of proceeds from any repurchase or other disposition of the underlying collateral. In repos, the seller of a security agrees to repurchase the security at a mutually agreed-upon time and price, which reflects the effective rate of return for the term of the agreement. For repos, The Bank of New York Mellon or JPMorgan takes possession of the collateral pledged for investments in such repos. The underlying collateral is valued daily on a mark-to-market basis to ensure that the value is equal to or greater than the repurchase price, including accrued interest. In the event of default of the obligation to repurchase, the Funds have the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation. If the seller defaults and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Funds may be delayed or limited.

CF Secured, LLC, 0.08%, dated 12/31/2020, due 1/4/2021, repurchase price \$51,000,453, collateralized by U.S. Government Agency and Treasury Securities, ranging from 0.00% - 5.00%, maturing 11/30/2022 - 11/20/2070; total market value \$52,020,504.

HSBC Bank plc, 0.10%, dated 12/31/2020, due 1/4/2021, repurchase price \$347,341,670, collateralized by U.S. Government Treasury Securities, ranging from 0.00% - 5.00%, maturing 9/9/2021 - 8/15/2050; total market value \$354,427,338.

NatWest Markets Securities, Inc., 0.08%, dated 12/28/2020, due 1/4/2021, repurchase price \$50,000,078, collateralized by U.S. Government Treasury Securities, ranging from 0.00% - 1.00%, maturing 1/15/2021 - 7/15/2030; total market value \$51,000,806.

Pershing LLC, 0.12%, dated 12/31/2020, due 1/4/2021, repurchase price \$53,000,707, collateralized by U.S. Government Agency and Treasury Securities, ranging from 0.00% - 10.00%, maturing 2/15/2021 - 5/20/2070; total market value \$54,060,000.

At December 31, 2020, certain Funds' investment in joint repos was subject to an enforceable netting arrangement. The Funds' proportionate holding in joint repos was as follows:

Fund	Counterparty	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Statements of Assets and Liabilities	Net Amounts of Assets Presented in the Statements of Assets and Liabilities	Gross Amounts not Offset in the Statements of Assets and Liabilities	
					Collateral Received	Net Amounts of Assets
Multi Sector Bond NA	Bank of America	\$ 3,000,000	\$ -	\$ 3,000,000	\$ (3,000,000)	\$ -

Amounts designated as "—" are zero or have been rounded to zero.

\* At December 31, 2020, the value of the collateral received exceeded the market value of the Fund's proportionate holding in the joint repos. Please refer to the Statement of Investments for the Fund's undivided interest in each joint repo and related collateral.

During the year ended December 31, 2020, Government Money Market, along with another series of Nationwide Mutual Funds ("NMF"), pursuant to procedures adopted by the Board of Trustees and applicable guidance from the SEC, transferred cash through a joint account at JPMorgan Chase Bank, N.A. ("JPMorgan"), Government Money Market's custodian, the daily aggregate balance of which is invested in one or more joint repurchase agreements ("repo" or collectively "repos") collateralized by U.S. Treasury or federal agency obligations. In a repo, the seller of a security agrees to repurchase the security at a mutually agreed-upon time and price, which reflects the effective rate of return for the term of the agreement.

For repos, The Bank of New York Mellon or JPMorgan takes possession of the collateral pledged for investments in such repos. The underlying collateral is valued daily on a mark-to-market basis to ensure that the value is equal to or greater than the repurchase price, including accrued interest. In the event of default of the obligation to repurchase, Government Money Market has the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation. If the seller defaults and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by Government Money Market may be delayed or limited.

At December 31, 2020, the joint repos on a gross basis were as follows:

Banco Santander SA, 0.08%, dated 12/31/2020, due 1/4/2021, repurchase price \$100,000,889, collateralized by U.S. Government Agency and Treasury Securities, ranging from 2.00% - 6.00%, maturing 8/15/2027 - 6/1/2050; total market value \$102,000,075.

Barclays Capital, Inc., 0.05%, dated 12/31/2020, due 1/4/2021, repurchase price \$48,000,267, collateralized by U.S. Government Treasury Securities, ranging from 0.13% - 3.63%, maturing 9/30/2021 - 8/15/2043; total market value \$48,960,028.

MUFG Securities Ltd., 0.05%, dated 12/31/2020, due 1/4/2021, repurchase price \$200,001,111, collateralized by U.S. Government Agency and Treasury Securities, ranging from 0.00% - 5.50%, maturing 7/15/2021 - 12/1/2050; total market value \$204,000,029.

RBC Dominion Securities Inc., 0.08%, dated 12/31/2020, due 1/4/2021, repurchase price \$200,001,778, collateralized by U.S. Government Agency and Treasury Securities, ranging from 0.50% - 7.25%, maturing 8/15/2022 - 12/20/2050; total market value \$204,045,264.

Royal Bank of Canada, 0.07%, dated 12/31/2020, due 1/4/2021, repurchase price \$100,000,777, collateralized by U.S. Government Agency Securities, ranging from 0.00% - 38.71%, maturing 12/20/2026 - 9/25/2057; total market value \$107,854,767.

At December 31, 2020, Government Money Market's investment in joint repos was subject to an enforceable netting arrangement. The Fund's proportionate holding in joint repos was as follows:

Fund	Counterparty	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Statements of Assets and Liabilities	Net Amounts of Assets Presented in the Statements of Assets and Liabilities	Gross Amounts not Offset in the Statements of Assets and Liabilities	
					Collateral Received	Net Amounts of Assets
Government Money Market	Banco Santander SA	\$ 75,000,000	\$ -	\$ 75,000,000	\$ (75,000,000)	\$ -
Government Money Market	Barclays Capital, Inc.	32,000,000	-	32,000,000	(32,000,000)	-
Government Money Market	MUFG Securities Ltd.	150,000,000	-	150,000,000	(150,000,000)	-
Government Money Market	RBC Dominion Securities Inc.	153,000,000	-	153,000,000	(153,000,000)	-
Government Money Market	Royal Bank of Canada	75,000,000	-	75,000,000	(75,000,000)	-
<b>Total</b>		\$ 485,000,000	\$ -	\$ 485,000,000	\$ (485,000,000)	\$ -

Amounts designated as "-" are zero or have been rounded to zero.

\* At December 31, 2020, the value of the collateral received exceeded the market value of the Fund's proportionate holding in the joint repos. Please refer to the Statement of Investments for the Fund's undivided interest in each joint repo and related collateral.

#### (m) Security Transactions and Investment Income

Security transactions are accounted for on the date the security is purchased or sold. Security gains and losses are calculated on the identified cost basis. Interest income is recognized on the accrual basis and includes, where applicable, the amortization of premiums or accretion of discounts, and is recorded as such on a Fund's Statement of Operations. Dividend income and expenses, as applicable, are recorded on the ex-dividend date and are recorded as such on a Fund's Statement of Operations, except for certain dividends from foreign securities, which are recorded as soon as the Trust is informed on or after the ex-dividend date.

#### (n) Distributions to Shareholders

Distributions from net investment income, if any, are declared daily and paid monthly for Bond, Core Plus Bond, Government Money Market, Core Bond, and Short Term Bond and declared and paid quarterly for Inflation-Protected Securities. Distributions from net realized capital gains, if any, are declared and distributed at least annually. All distributions are recorded on the ex-dividend date.

Dividends and distributions to shareholders are determined in accordance with federal income tax regulations, which may differ from U.S. GAAP. These "book/tax" differences are considered either permanent or temporary. Permanent differences are reclassified within the capital accounts based on their nature for federal income tax purposes; temporary differences do not require reclassification. The permanent differences as of December 31, 2020 are primarily attributable to foreign currency gain/loss, paydown reclass, treatment of notional principal contracts, and amortization. Temporary differences arise when certain items of income, gain, or loss are recognized in different periods for financial statement and tax purposes; these differences will reverse at some time in the future. The temporary differences as of December 31, 2020 may primarily be attributable to treatment of notional principal contracts, mark-to-market adjustments on futures, defaulted bond interest, amortization, outstanding straddle loss deferrals, investments in perpetual bonds, and investments in contingent payment debt instruments. These reclassifications have no effect upon the NAV of a Fund. Any distribution in excess of current and accumulated earnings and profits for federal income tax purposes is reported as a return of capital distribution.

Fund	Total Distributable	
	Capital	Earnings (Loss)
Multi Sector Bond	\$ (3,895)	\$ 3,895
Total Return Tactical	—	—
High Income Bond	—	—
Core Bond	—	—
Core Plus Bond	1	(1)
Government Bond	—	—
Government Money Market	(7,818)	7,818
Short Term Bond	—	—

Amounts designated as "—" are zero or have been rounded to zero.

### (o) Federal Income Taxes

Each Fund elected to be treated as, and intends to qualify each year as, a "regulated investment company" ("RIC") by complying with the requirements of Subchapter M of the U.S. Internal Revenue Code of 1986 (the "Code"), as amended, and to make distributions of net investment income and net realized capital gains sufficient to relieve a Fund from all, or substantially all, federal income taxes. The aforementioned distributions may be made in cash or via consent dividends. Consent dividends, when authorized, become taxable to the shareholders as if they were paid in cash.

A Fund recognizes a tax benefit from an uncertain position only if it is more likely than not that the position is sustainable, based solely on its technical merits and consideration of the relevant taxing authorities' widely understood administrative practices and precedents. Each year, a Fund undertakes an affirmative evaluation of tax positions taken or expected to be taken in the course of preparing tax returns to determine whether it is more likely than not (i.e., greater than 50 percent) that each tax position will be sustained upon examination by a

taxing authority. The Funds are not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

The Funds file U.S. federal income tax returns and, if applicable, returns in various foreign jurisdictions in which they invest. Generally, a Fund is subject to examinations by such taxing authorities for up to three years after the filing of the return for the tax period.

### (p) Allocation of Expenses, Income and Gains and Losses

Expenses directly attributable to a Fund are charged to that Fund. Expenses not directly attributable to a Fund are allocated proportionally among various or all series of the Trust. Income, fund level expenses, and realized and unrealized gains or losses are allocated to each class of shares of a Fund based on the value of the outstanding shares of that class relative to the total value of the outstanding shares of that Fund. Expenses specific to a class (such as Rule 12b-1 and administrative services fees) are charged to that specific class.

### 3. Transactions with Affiliates

Under the terms of the Trust's Investment Advisory Agreement, NFA manages the investments of the assets and supervises the daily business affairs of the Funds in accordance with policies and procedures established by the Board of Trustees. NFA

has selected the subadviser for each Fund as noted below, and provides investment management evaluation services in monitoring, on an ongoing basis, the performance of the subadvisers.

As of December 31, 2020, the subadviser for each Fund is as follows:

Fund	Subadviser
Multi Sector Bond	Amundi Pioneer Institutional Asset Management, Inc.
Total Return Tactical	DoubleLine Capital LP ("DoubleLine")
High Income Bond	Federated Investment Management Company
Core Bond	Nationwide Asset Management, LLC ("NWAM") (a)
Core Plus Bond	Neuberger Berman Investment Advisers LLC
Government Bond	NWAM(a)
Government Money Market	Dreyfus Cash Investment Strategies(b)
Short Term Bond	NWAM(a)

(a) NWAM is an affiliate of NFA.

(b) Effective July 1, 2020, Dreyfus Cash Investment Strategies was appointed as subadviser to the Fund. Effective July 1, 2020, Federated Investment Management Company was terminated and ceased serving as subadviser to the Fund.

Under the terms of the Investment Advisory Agreement, each Fund pays NFA an investment advisory fee based on that Fund's average daily net assets. During the year ended December 31, 2020, the Funds paid investment advisory fees to NFA according to the following schedule.

<b>Fund</b>	<b>Fee Schedule</b>	<b>Advisory Fee (annual rate)</b>
Multi Sector Bond	Up to \$200 million	0.575%
	\$200 million up to \$500 million	0.550%
	\$500 million and more	0.525%
Total Return Tactical	Up to \$500 million	0.58%
	\$500 million up to \$1 billion	0.555%
	\$1 billion and more	0.53%
High Income Bond	Up to \$50 million	0.75%
	\$50 million up to \$250 million	0.60%
	\$250 million up to \$500 million	0.55%
	\$500 million and more	0.50%
Core Bond	Up to \$1 billion	0.40%
	\$1 billion and more	0.38%
Core Plus Bond	Up to \$1 billion	0.45%
	\$1 billion up to \$1.5 billion	0.44%
	\$1.5 billion and more	0.43%
Government Bond	Up to \$250 million	0.50%
	\$250 million up to \$1 billion	0.475%
	\$1 billion up to \$2 billion	0.45%
	\$2 billion up to \$5 billion	0.425%
	\$5 billion and more	0.40%
Government Money Market	Up to \$1 billion	0.30%
	\$1 billion up to \$2 billion	0.28%
	\$2 billion up to \$5 billion	0.26%
	\$5 billion and more	0.24%
Short Term Bond	Up to \$1 billion	0.35%
	\$1 billion and up to \$1.5 billion	0.34%
	\$1.5 billion and more	0.33%

The Trust and NFA have entered into a written contract waiving a portion of investment advisory fees of the Funds as listed in the following table until April 30, 2022:

<b>Fund</b>	<b>Advisory Fee Waiver (annual rate)</b>
Government Bond	0.015%

During the year ended December 31, 2020, the following table provides the waiver of such investment advisory fees by NFA for which NFA shall not be entitled to later seek recoupment.

<b>Fund</b>	<b>Amount</b>
Government Bond	\$ 71,136

For the year ended December 31, 2020, the effective advisory fee rates before and after voluntary advisory fee waivers and expense reimbursements due to the expense limitation agreement described below, were as follows:

<b>Fund</b>	<b>Effective Advisory Fee Rate Before Contractual and Voluntary* Fee Waivers and Expense Reimbursements</b>	<b>Effective Advisory Fee Rate After Contractual* Fee Waivers</b>	<b>Effective Advisory Fee Rate After Contractual and Voluntary* Fee Waivers</b>	<b>Effective Advisory Fee Rate After Contractual and Voluntary* Fee Waivers and Expense Reimbursements</b>
Multi Sector Bond	0.57%	N/A	N/A	0.57%
Total Return Tactical	0.58	N/A	N/A	0.47
High Income Bond	0.66	N/A	N/A	0.59
Core Bond	0.39	N/A	N/A	0.39
Core Plus Bond	0.44	N/A	N/A	0.44
Government Bond	0.49	0.47%	N/A	0.47

<b>Fund</b>	<b>Effective Advisory Fee Rate Before Contractual and Voluntary* Fee Waivers and Expense Reimbursements</b>	<b>Effective Advisory Fee Rate After Contractual* Fee Waivers</b>	<b>Effective Advisory Fee Rate After Contractual and Voluntary* Fee Waivers</b>	<b>Effective Advisory Fee Rate After Contractual and Voluntary* Fee Waivers</b>
Government Money Market	0.29%	N/A	0.20%	0.20%
Short Term Bond	0.34	N/A	N/A	0.34

\* Please see above for additional information regarding contractual waivers.

From these fees, pursuant to the subadvisory agreements, NFA pays fees to the affiliated and unaffiliated subadvisers. NFA paid the affiliated subadviser \$3,931,182 during the year ended December 31, 2020.

DoubleLine has agreed to reimburse Total Return Tactical for certain investment adviser fees as a result of transactions in other affiliated investment companies. For the year ended December 31, 2020, DoubleLine reimbursed the Fund \$24,585.

The Trust and NFA have entered into a written Expense Limitation Agreement that limits certain Fund's operating expenses, (excluding any interest, taxes, brokerage commissions and other costs incurred in connection with the purchase and sales of portfolio securities, acquired fund fees and expenses, short sale dividend expenses, Rule 12b-1 fees, fees paid pursuant to an Administrative Services Plan, excludable sub administration fees, other expenditures which are capitalized in accordance with U.S. GAAP, expenses incurred by a Fund in connection with any merger or reorganization, and other non-routine expenses not incurred in the ordinary course of a Fund's business) from exceeding the amounts listed in the following table until April 30, 2021.

<b>Fund</b>	<b>Classes</b>	<b>Amount (annual rate)</b>
Multi Sector Bond	All Classes	0.78%
Total Return Tactical	All Classes	0.58%
High Income Bond	All Classes	0.76%
Core Plus Bond	All Classes	0.55%

NFA may request and receive reimbursement from a Fund for advisory fees waived or other expenses reimbursed by NFA pursuant to the Expense Limitation Agreement at a date not to exceed three years from the month in which the corresponding waiver or reimbursement to the Fund was made. However, no reimbursement may be made unless: (i) the Fund's assets exceed \$100 million and (ii) the total annual expense ratio of the class making such reimbursement is no higher than the

amount of the expense limitation that was in place at the time NFA waived the fees or reimbursed the expenses and does not cause the expense ratio to exceed the current expense limitation. Reimbursement by a Fund of amounts previously waived or reimbursed by NFA is not permitted except as provided for in the Expense Limitation Agreement. The Expense Limitation Agreement may be changed or eliminated only with the consent of the Board of Trustees.

As of December 31, 2020, the cumulative potential reimbursements for certain Funds, listed by the period or year in which NFA waived fees or reimbursed expenses to certain Funds are:

<b>Fund</b>	<b>Fiscal Year 2018 Amount</b>	<b>Fiscal Year 2019 Amount</b>	<b>Fiscal Year 2020 Amount</b>	<b>Total</b>
Multi Sector Bond	\$ —	\$ —	\$ —	\$ —
Total Return Tactical	229,641	217,124	196,534	643,299
High Income Bond	43,784	65,953	88,347	198,084
Core Bond	—	—	—	—
Core Plus Bond	—	—	—	—
Government Bond	—	—	—	—
Government Money Market	—	—	—	—
Short Term Bond	—	—	—	—

Amounts designated as "—" are zero or have been rounded to zero.

During the year ended December 31, 2020, no amounts were reimbursed to NFA pursuant to the Expense Limitation Agreement.

NFM, a wholly owned subsidiary of NFS Distributors, Inc. ("NFSDI") (a wholly owned subsidiary of NFS), provides

various administrative and accounting services for the Funds and serves as Transfer and Dividend Disbursing Agent for the Funds. NFM has entered into agreements with third-party service providers to provide certain sub-administration and sub-transfer agency services to the Funds. NFM pays the service providers a fee for these services.

Under the terms of a Joint Fund Administration and Transfer Agency Agreement, the fees for such services are based on the sum of the following: (i) the amount payable by NFM to its sub-administrator and sub-transfer agent; and (ii) a percentage of the combined average daily net assets of the Trust and Nationwide Mutual Funds ("NMF"), a Delaware statutory trust and registered investment company that is affiliated with the Trust, according to the following fee schedule.

#### Combined Fee Schedule

Up to \$25 billion	0.025%
\$25 billion and more	0.020%

For the year ended December 31, 2020, NFM earned an aggregate of \$2,673,073 in fees from the Funds under the Joint Fund Administration and Transfer Agency Agreement.

In addition, the Trust pays out-of-pocket expenses reasonably incurred by NFM in providing services to the Funds and the Trust, including, but not limited to, the cost of pricing services that NFM utilizes.

Under the terms of the Joint Fund Administration and Transfer Agency Agreement and a letter agreement between NFM and the Trust, the Trust has agreed to reimburse NFM for certain costs related to each Fund's portion of ongoing administration, monitoring and annual (compliance audit) testing of the Trust's Rule 38a-1 Compliance Program subject to the pre-approval of the Trust's Audit Committee. These costs are allocated among the series of the Trust based upon their relative net assets. For the year ended December 31, 2020, the Funds' aggregate portion of such costs amounted to \$33,984.

Under the terms of a Distribution Plan pursuant to Rule 12b-1 under the 1940 Act, Nationwide Fund Distributors LLC ("NFD"), the Funds' principal underwriter, is compensated by the Funds for expenses associated with the distribution of certain classes of shares of the Funds. NFD is a wholly owned subsidiary of NFSDI. These fees are based on average daily net assets of the respective class of the Funds at an annual rate as listed in the following table.

Fund	Class II Shares
Multi Sector Bond	N/A
Total Return Tactical	0.25%
High Income Bond	N/A
Core Bond	0.25%
Core Plus Bond	0.25%
Government Bond	0.25%
Government Money Market	0.25%
Short Term Bond	0.25%

N/A - Not Applicable.

The Trust and NFD have entered into a written contract waiving distribution fees for Class II shares of the Funds according to the following schedule until at least April 30, 2021:

Fund	Distribution Fee Waiver (Annual Rate)
Total Return Tactical	0.10%

During the year ended December 31, 2020, each Fund's waiver of such distribution fees by NFD, for which NFD shall not be entitled to reimbursement by the Funds for any amount waived, were as follows:

Fund	Amount
Total Return Tactical	\$ 14,738

During the year ended December 31, 2020, NFA voluntarily waived investment advisory fees payable by Government

Money Market in an amount equal to \$1,800,316, for which NFA shall not be entitled to later seek recoupment. Voluntary

waivers may be discontinued at anytime at the discretion of NFA. During the same period, NFD voluntarily waived Rule 12b-1 fees payable by Class II shares of Government Money Market in an amount equal to \$351,345. Also during that period, NFS voluntarily waived fees payable to it pursuant to the Trust's Administrative Services Plan by Class II, Class IV and Class V shares of Government Money Market in an amount equal to \$1,617,720. Each of these fee waivers was made voluntarily, and neither NFA, NFD nor NFS shall be entitled to reimbursement by Government Money Market of any of the amounts waived. Such waivers may be discontinued at any time, and neither NFA, NFD nor NFS represents that any of these voluntary waivers will be continued or repeated.

Under the terms of an Administrative Services Plan, the Funds pay fees to servicing organizations, such as broker-dealers, including NFS, and financial institutions, that agree to provide administrative support services to the shareholders of certain classes. These services may include, but are not limited to, the following: (i) establishing and maintaining shareholder accounts; (ii) processing purchase and redemption transactions; (iii) arranging bank wires; (iv) performing shareholder sub-accounting; (v) answering inquiries regarding the Funds; and (vi) other such services. These fees are calculated at an annual rate of up to 0.25% of the average daily net assets of Class I and Class II shares of the Fund, 0.20% of the average daily net assets of Class IV shares of the Fund, and 0.10% of the average daily net assets of Class V shares of each Fund.

For the year ended December 31, 2020, the effective rates for administrative services fees were as follows:

<b>Fund</b>	<b>Class I</b>	<b>Class II</b>	<b>Class IV</b>	<b>Class V</b>
Multi Sector Bond	0.15%	N/A	N/A	N/A
Total Return Tactical	0.25	0.25%	N/A	N/A
High Income Bond	0.15	N/A	N/A	N/A
Core Bond	0.15	0.15	N/A	N/A
Core Plus Bond	0.15	0.15	N/A	N/A
Government Bond	0.15	0.15	0.15%	N/A
Government Money Market	0.15	0.15	0.15	0.10%
Short Term Bond	0.15	0.15	N/A	N/A

N/A — Not Applicable.

For the year ended December 31, 2020, each Fund's total administrative services fees were as follows:

<b>Fund</b>	<b>Amount</b>
Multi Sector Bond	\$ 396,540
Total Return Tactical	38,746
High Income Bond	181,437
Core Bond	199,169
Core Plus Bond	138,924
Government Bond	711,422
Government Money Market	2,370,100
Short Term Bond	536,729

#### 4. Line of Credit and Interfund Lending

Effective July 9, 2020, the Trust, excluding Government Money Market, and NMF (together, the "Trusts") have entered into a credit agreement with JPMorgan, The Bank of New York Mellon, and Wells Fargo Bank National Association (the "Lenders"), permitting the Trusts, in the aggregate, to borrow up to \$100,000,000. Advances taken by a Fund under this arrangement would be primarily for temporary or emergency purposes, including the meeting of redemption requests that otherwise might require the untimely disposition of securities, and are subject to the Fund's borrowing restrictions. The line of credit requires a commitment fee of 0.15% per year on \$100,000,000. Such commitment fee shall be payable quarterly in arrears on the last business day of each March, June, September and December and on the termination date. Effective July 9, 2020, borrowings under this arrangement accrue interest at a rate of 1.25% per annum plus the higher of (a) if ascertainable and available, the Eurodollar Rate as of such day for a transaction settling two business days after such day, (b) the Federal Funds Effective Rate in effect on such day

and (c) the Overnight Bank Funding Rate in effect on such day; provided, however, that if the Federal Funds Rate calculated in accordance with the foregoing shall be less than zero, such rate shall be deemed to be zero percent (0%) for the purposes of this Agreement. If an Index Rate Unavailability Event occurs in respect of the Eurodollar Rate, the Federal Funds Rate shall be determined without reference to clause (a) of this definition. Prior to July 9, 2020, borrowings under this arrangement accrued interest at a rate of 1.00% per annum plus the higher of (a) the one-month London Interbank Offered Rate or (b) the Federal Funds Rate. Interest costs, if any, would be shown on the Statements of Operations. No compensating balances are required under the terms of the line of credit. In addition, a Fund may not draw on any portion of the line of credit that is provided by a bank that is an affiliate of the Fund's subadvisor, if applicable. In addition to any rights and remedies of the Lenders provided by law, each Lender has the right, upon any amount becoming due and payable by the Fund, to set-off as appropriate and apply all deposits and credits held by or owing to such Lender against such amount, subject to the terms of the

credit agreement. The line of credit is renewed annually, and next expires on July 8, 2021. During the year ended December 31, 2020, the Funds had no borrowings under the line of credit.

Pursuant to an exemptive order issued by the SEC (the "Order"), the Funds may participate in an interfund lending program among Funds managed by NFA. The program allows the participating Funds to borrow money from and loan money to each other for temporary purposes, subject to the conditions in the Order. A loan can only be made through the program if

the interfund loan rate on that day is more favorable to both the borrowing and lending Funds as compared to rates available through short-term bank loans or investments in overnight repurchase agreements and money market funds, respectively, as detailed in the Order. Further, a Fund may participate in the program only if and to the extent that such participation is consistent with its investment objectives and limitations. Interfund loans have a maximum duration of seven days and may be called on one business day's notice. During the year ended December 31, 2020, none of the Funds engaged in interfund lending.

## 5. Investment Transactions

For the year ended December 31, 2020, purchases and sales of securities (excluding short-term securities) were as follows:

Fund	Purchases*	Sales*
Multi Sector Bond	\$ 250,975,672	\$ 269,369,588
Total Return Tactical	101,077,341	86,591,205
High Income Bond	45,804,303	52,113,254
Core Bond	938,587,610	1,046,534,179
Core Plus Bond	3,682,643,627	3,619,141,184
Government Bond	277,151,777	307,449,466
Short Term Bond	1,378,817,211	1,327,118,429

\* Includes purchases and sales of long-term U.S. Government securities, if any.

For the year ended December 31, 2020, purchases and sales of U.S. Government securities (excluding short-term securities) were as follows:

Fund	Purchases	Sales
Multi Sector Bond	\$ —	\$ —
Total Return Tactical	36,811,411	31,134,950
High Income Bond	—	—
Core Bond	204,327,021	197,127,899
Core Plus Bond	722,966,524	667,086,858
Government Bond	90,109,023	109,750,889
Short Term Bond	498,625,312	337,004,632

Amounts designated as "—" are zero or have been rounded to zero.

## 6. Portfolio Investment Risks

### Risks Associated with Bank Loans

The bank loans in which the Funds invest are subject to the risks that generally apply to fixed-income securities, such as interest rate risk, credit risk, liquidity risk, as well as, where applicable, foreign securities risk, emerging markets risk, and lower quality or high-yield risk. Although borrowers frequently provide collateral to secure repayment of these obligations, they do not always do so. If they do provide collateral, the value of the collateral may not completely cover the borrower's obligations at the time of a default. Collateral may include security interests in receivables, goods, commodities, or real property. For trade finance loan transactions, the collateral itself may be the source of proceeds to repay the loan (i.e., the borrower's ability to repay the loan will be dependent on the borrower's ability to sell, and the purchaser's ability to buy, the goods or commodities that are collateral for the loan). Interests in loan instruments may be tranching or tiered with respect to collateral rights. If a borrower files for protection from its creditors under the U.S. bankruptcy laws, these laws may limit a Fund's rights to its collateral. In addition, the value of collateral may erode during a bankruptcy

case. In the event of a bankruptcy, the holder of a bank loan may not recover its principal, may experience a long delay in recovering its investment and may not receive interest during the delay. Unsecured loans expose the lenders, and thus the Funds, to increased credit risk.

### Risks Associated with Interest Rates

Prices of fixed-income securities generally increase when interest rates decline and decrease when interest rates increase. Prices of longer-term securities generally change more in response to interest rate changes than prices of shorter-term securities. To the extent a Fund invests a substantial portion of its assets in fixed-income securities with longer-term maturities, rising interest rates are more likely to cause the value of the Fund's investments to decline significantly.

### Risks Associated with Foreign Securities and Currencies

Investments in securities of foreign issuers carry certain risks not ordinarily associated with investments in securities of U.S. issuers. These risks include foreign currency fluctuations,

future disruptive political and economic developments and the possible imposition of exchange controls or other unfavorable foreign government laws and restrictions. In addition, investments in certain countries may carry risks of expropriation of assets, confiscatory taxation, political or social instability, or diplomatic developments that adversely affect investments in those countries.

Certain countries also may impose substantial restrictions on investments in their capital markets by foreign entities, including restrictions on investments in issuers in industries deemed sensitive to relevant national interests. These factors may limit the investment opportunities available and result in a lack of liquidity and high price volatility with respect to securities of issuers from developing countries.

### **Risks Associated with Variable Rate Securities**

**Mortgage-Backed Securities** — Mortgage-backed securities are fixed-income securities that give the holder the right to receive a portion of principal and/or interest payments made on a pool of residential or commercial mortgage loans. Such securities may be issued or guaranteed by U.S. government agencies or instrumentalities or may be issued by private issuers, generally originators in mortgage loans, including savings and loan associations, mortgage bankers, commercial banks, investment bankers, and special purpose entities. Adjustable rate mortgage-backed securities are collateralized by or represent interests in mortgage loans with variable rates of interest. These variable rates of interest reset periodically to align themselves with market rates. The Fund will not benefit from increases in interest rates to the extent that interest rates rise to the point where they cause the current coupon of the underlying adjustable rate mortgages to exceed any maximum allowable annual or lifetime reset limits (or “cap rates”) for a particular mortgage. During periods of declining interest rates, income to the Fund derived from adjustable rate mortgage-backed securities which remain in a mortgage pool will decrease in contrast to the income on fixed rate mortgage-backed securities, which will remain constant. Adjustable rate mortgages also have less potential for appreciation in value as interest rates decline than do fixed rate investments.

**Asset-Backed Securities** — Asset-backed securities are fixed-income securities issued by a trust or other legal entity established for the purpose of issuing securities and holding certain assets, such as credit card receivables or auto leases, which pay down over time and generate sufficient cash to pay holders of the securities. Almost any type of fixed-income assets may be used to create an asset-backed security, including other fixed-income securities or derivative instruments such as swaps. Payments or distributions of principal and interest on asset-backed securities may be supported by nongovernmental credit enhancements similar to those utilized in connection with mortgage-backed securities. The credit quality of most asset-backed securities depends primarily on the credit quality of the assets underlying such securities, how well the entity issuing the security is insulated from the credit risk of the originator or any other affiliated entities, and the amount and quality of any credit enhancement of the securities. To the extent a security interest exists, it may be more difficult for the issuer to

enforce the security interest as compared to mortgage-backed securities.

**Collateralized Mortgage Obligations (“CMOs”) and Multiclass Pass-Through Securities** — CMOs are multi-class debt obligations which are collateralized by mortgage loans or pass-through certificates. Multiclass pass-through securities are interests in a trust composed of whole loans or private pass-throughs (referred to as “Mortgage Assets”). Often, CMOs are collateralized by Government National Mortgage Association Pass-Through Certificates (“Ginnie Maes”), Federal National Mortgage Association Pass-Through Certificates (“Fannie Maes”), or Federal Home Loan Mortgage Corporation Pass-Through Certificates (“Freddie Macs”), but also may be collateralized by Mortgage Assets. Payments of principal and interest on the Mortgage Assets, and any reinvestment income thereon, provide the funds to pay debt service on the CMOs or make scheduled distributions on the multiclass pass-through securities. CMOs may be issued by agencies or instrumentalities of the U.S. government, or by private originators of, or investors in, mortgage loans, including savings and loan associations, mortgage banks, commercial banks, investment banks and special purpose subsidiaries of the foregoing. In order to form a CMO, the issuer assembles a package of traditional mortgage-backed pass-through securities, or actual mortgage loans, and uses them as collateral for a multi-class security. Each class of CMOs, often referred to as a “tranche,” is issued at a specified fixed or floating coupon rate and has a stated maturity or final distribution date. Principal prepayments on the Mortgage Assets may cause the CMOs to be retired substantially earlier than their stated maturities or final distribution dates. Interest is paid or accrues on all classes of the CMOs on a monthly, quarterly or semi-annual basis. As market conditions change, and particularly during periods of rapid or unanticipated changes in market interest rates, the attractiveness of the CMO classes and the ability of the structure to provide the anticipated investment characteristics may be reduced significantly. Such changes can result in volatility in the market value, and in some instances reduced liquidity, of the CMO class.

**Stripped Mortgage Securities** — Stripped mortgage securities are derivative multiclass mortgage securities. Stripped mortgage securities are structured with two or more classes of securities that receive different proportions of the interest and principal distributions on a pool of mortgage assets. A common type of stripped mortgage security will have at least one class receiving only a small portion of the interest and a larger portion of the principal from the mortgage assets, while the other class will receive primarily interest and only a small portion of the principal. In the most extreme case, one class will receive all of the interest (“IO” or interest-only), while the other class will receive the entire principal (“PO” or principal-only class). The yield to maturity on IOs, POs and other mortgage-backed securities that are purchased at a substantial premium or discount generally are extremely sensitive not only to changes in prevailing interest rates but also to the rate of principal payments (including prepayments) on the related underlying mortgage assets, and a rapid rate of principal payments may have a material adverse effect on such securities’ yield to maturity. If the underlying mortgage assets experience greater

than anticipated prepayments of principal, the Fund may fail to fully recoup its initial investment in these securities even if the securities have received the highest rating by a nationally recognized statistical rating organization.

**Collateralized Debt Obligations (“CDOs”)** — CDOs are a type of asset-backed security and include, among other things, collateralized bond obligations (“CBOs”), collateralized loan obligations (“CLOs”) and other similarly structured securities. A CBO is a trust which is backed by a diversified pool of high risk, below investment grade fixed-income securities. A CLO is a trust typically collateralized by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior unsecured loans and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. Normally, CBOs, CLOs and other CDOs are privately offered and sold, and thus are not registered under the securities laws. As a result, investments in CDOs may be characterized by the Fund as illiquid securities. In addition to the risks associated with debt instruments (e.g., interest rate risk and credit risk), CDOs carry additional risks including, but not limited to: (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the possibility that the Fund may invest in CDOs that are subordinate to other classes; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

#### **TBA Commitments**

TBA commitments are forward agreements for the purchase or sale of mortgage-backed securities for a fixed price, with payment and delivery on an agreed upon future settlement date. The specific securities to be delivered are not identified at the trade date. However, delivered securities must meet specified terms, including issuer, rate, and mortgage terms. When entering into TBA commitments, the Fund may take possession of or deliver the underlying mortgage-backed securities but can extend the settlement or roll the transaction. TBA commitments involve a risk of loss if the value of the security to be purchased or sold declines or increases, respectively, prior to settlement date.

#### **Risks Associated with REIT and Real Estate Investments**

Investments in REITs and in real estate securities carry certain risks associated with direct ownership of real estate and with the real estate industry in general. These risks include possible declines in the value of real estate, possible lack of availability of mortgage funds, unexpected vacancies of properties, and the relative lack of liquidity associated with investments in real estate.

#### **Risks Associated with Credit and Emerging Markets**

Investments in emerging market instruments are subject to certain additional credit and market risks. The yields of

emerging market debt obligations reflect, among other things, perceived credit risk. The Fund's investment in securities rated below investment grade typically involves risks not associated with higher-rated securities including, among others, greater risk of not receiving timely and/or ultimate payment of interest and principal, greater market price volatility, and less-liquid secondary market trading. The consequences of political, social, economic, or diplomatic changes may have disruptive effects on the market prices of emerging market investments.

#### **Risks from Underlying Funds**

The Underlying Funds in which certain Funds invest may apply any of a variety of investment strategies and may invest in a broad range of asset classes, securities and other investments to attempt to achieve their designated investment goals. The foregoing is not intended to be a complete discussion of all risks associated with the investment strategies of a Fund. Please refer to the current prospectus for a discussion of the risks associated with investing in a Fund. Information about Underlying Fund risks may be found in such Underlying Fund's annual or semiannual report to shareholders.

#### **7. Indemnifications**

Under the Trust's organizational documents, the Trust's Officers and Trustees are indemnified by the Trust against certain liabilities arising out of the performance of their duties to the Trust. In addition, the Trust has entered into indemnification agreements with its Trustees and certain of its Officers. Trust Officers receive no compensation from the Trust for serving as its Officers. In addition, in the normal course of business, the Trust enters into contracts with its vendors and others that provide for general indemnifications. The Trust's maximum liability under these arrangements is unknown, as this would involve future claims made against the Trust. Based on experience, however, the Trust expects the risk of loss to be remote.

#### **8. New Accounting Pronouncements and Other Matters**

On July 27, 2017, the United Kingdom's Financial Conduct Authority announced its intention to cease sustaining LIBOR after 2021. US Federal Reserve Bank's Alternative Reference Rates Committee (the "SOFR committee") selected Secured Overnight Financing Rate (SOFR) as the preferred alternative to the U.S. dollar LIBOR. The SOFR committee has noted the stability of the repurchase market on which the rate is based. New York Federal Reserve began publication of the rate in April 2018. Markets are slowly developing in response to these new reference rates. Uncertainty related to the liquidity impact of the change in rates, and how to appropriately adjust these rates at the time of transition, poses risks for the Fund. These risks are likely to persist until new reference rates and fallbacks for both legacy and new instruments and contracts are commercially accepted and market practices become settled. Management is currently evaluating the implications of the change and its impact on financial statement disclosures and reporting requirements.

## 9. Federal Tax Information

The tax character of distributions paid during the year ended December 31, 2020 was as follows:

Fund	Distributions paid from				Total Distributions Paid
	Ordinary Income*	Net Long-Term Capital Gains	Total Taxable Distributions	Return of Capital	
Multi Sector Bond	\$ 9,023,050	\$ —	\$ 9,023,050	\$ —	\$ 9,023,050
Total Return Tactical	5,093,386	—	5,093,386	—	5,093,386
High Income Bond	6,149,472	—	6,149,472	—	6,149,472
Core Bond	40,876,686	—	40,876,686	—	40,876,686
Core Plus Bond	48,101,857	—	48,101,857	—	48,101,857
Government Bond	9,505,649	—	9,505,649	—	9,505,649
Government Money Market	4,199,258	158	4,199,416	—	4,199,416
Short Term Bond	37,058,077	—	37,058,077	—	37,058,077

Amounts designated as "-" are zero or have been rounded to zero.

\* Ordinary Income amounts include taxable market discount and net short-term capital gains, if any.

The tax character of distributions paid during the year ended December 31, 2019 was as follows:

Fund	Distributions paid from				Total Distributions Paid
	Ordinary Income*	Net Long-Term Capital Gains	Total Taxable Distributions	Return of Capital	
Multi Sector Bond	\$ 13,455,994	\$ —	\$ 13,455,994	\$ 325,506	\$ 13,781,500
Total Return Tactical	6,307,983	—	6,307,983	—	6,307,983
High Income Bond	7,288,478	—	7,288,478	—	7,288,478
Core Bond	43,203,696	—	43,203,696	—	43,203,696
Core Plus Bond	54,270,950	—	54,270,950	—	54,270,950
Government Bond	10,835,260	—	10,835,260	—	10,835,260
Government Money Market	28,850,335	—	28,850,335	—	28,850,335
Short Term Bond	46,454,681	—	46,454,681	—	46,454,681

Amounts designated as "-" are zero or have been rounded to zero.

\* Ordinary Income amounts include taxable market discount and net short-term capital gains, if any.

As of December 31, 2020, the components of accumulated earnings/(deficit) on a tax basis were as follows:

Fund	Undistributed Ordinary Income	Undistributed Long-Term Capital Gains	Accumulated Earnings	Other Gains and Losses	Distributions Payable	Accumulated Capital and Other Losses	Unrealized Appreciation/(Depreciation)*	Total Accumulated Earnings (Deficit)
Multi Sector Bond	\$ 2,061,781	\$ —	\$ 2,061,781	\$ 126,392	\$ —	\$ (11,181,643)	\$ 8,918,855	\$ (74,615)
Total Return Tactical	1,089,817	—	1,089,817	(3,747)	—	—	2,016,194	3,102,264
High Income Bond	558,684	—	558,684	(70,803)	—	(5,357,568)	3,022,521	(1,847,166)
Core Bond	19,698,584	21,488,965	41,187,549	3,071	—	—	66,169,211	107,359,831
Core Plus Bond	46,694,879	14,288,532	60,983,411	196,127	—	—	82,112,079	143,291,617
Government Bond	593,053	—	593,053	—	—	(5,608,173)	24,483,187	19,468,067
Government Money Market	—	—	—	—	—	—	—	—
Short Term Bond	4,353,184	—	4,353,184	—	—	(22,609,240)	12,885,312	(5,370,744)

Amounts designated as "-" are zero or have been rounded to zero.

\* The difference between book-basis and tax-basis unrealized appreciation/(depreciation) is primarily attributable to timing differences in recognizing certain gains and losses on investment transactions.

As of December 31, 2020, the tax cost of investments and the breakdown of unrealized appreciation/(depreciation) for each Fund was as follows:

Fund	Tax Cost of Investments	Unrealized Appreciation	Unrealized Depreciation	Net Unrealized Appreciation/(Depreciation)
Multi Sector Bond	\$ 245,315,022	\$ 23,374,449	\$ (13,833,544)	\$ 9,540,905

<b>Fund</b>	<b>Tax Cost of Investments</b>	<b>Unrealized Appreciation</b>	<b>Unrealized Depreciation</b>	<b>Net Unrealized Appreciation/ (Depreciation)</b>
Total Return Tactical	191,051,774	5,149,294	(3,105,600)	2,043,694
High Income Bond	113,863,876	6,700,532	(3,494,344)	3,206,188
Core Bond	1,301,820,086	70,563,737	(3,009,986)	67,553,751
Core Plus Bond	1,818,084,076	90,039,465	(5,466,655)	84,572,810
Government Bond	434,077,745	25,792,712	(525,829)	25,266,883
Government Money Market	1,954,043,548	—	—	—
Short Term Bond	1,861,546,915	34,573,524	(4,070,399)	30,503,125

Amounts designated as "-" are zero or have been rounded to zero.

As of December 31, 2020, for federal income tax purposes, the Funds have capital loss carryforwards available to offset future capital gains, if any, to the extent provided by the U.S. Treasury regulations and in any given year may be limited due to large shareholder redemptions or contributions. Capital loss carryforwards do not expire. The following table represents capital loss carryforwards available as of December 31, 2020.

<b>Fund</b>	<b>Amount</b>
Multi Sector Bond	\$(11,181,643)
High Income Bond	(5,357,568)
Government Bond	(5,608,173)
Short Term Bond	(22,609,240)

During the year ended December 31, 2020, the Funds had capital loss carryforwards that were utilized and are no longer eligible to offset future capital gains, if any, in the amounts listed below.

<b>Fund</b>	<b>Utilized</b>
Multi Sector Bond	\$819,121
Total Return Tactical	1,690,846
Core Plus Bond	6,869,284
Government Bond	7,559,980
Government Money Market	110
Short Term Bond	15,907,593

## 10. Coronavirus (COVID-19) Pandemic

The global pandemic outbreak of an infectious respiratory illness caused by a novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption, affecting the global economy and the financial health of individual companies in significant and unforeseen ways. COVID-19 has resulted in, among other things, travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, prolonged quarantines, significant disruptions to business operations, market closures, cancellations and restrictions, supply chain disruptions, lower consumer demand, and significant volatility and declines in global financial markets, as well as general concern and uncertainty. Instability in the United States, European and other credit markets has made it more difficult for borrowers to obtain financing or refinancing on attractive terms or at all. In particular, because of the current conditions in the credit markets, borrowers may be subject to increased interest expenses for borrowed money and tightening underwriting standards. In addition, stock prices as well as yield could be negatively impacted to the extent that

issuers of equity securities cancel or announce the suspension of dividends or share buybacks.

The COVID-19 pandemic could continue to inhibit global, national and local economic activity, and constrain access to capital and other sources of funding. Various recent government interventions have been aimed at curtailing the distress to financial markets caused by the COVID-19 outbreak. There can be no guarantee that these or other economic stimulus plans (within the United States or other affected countries throughout the world) will be sufficient or will have their intended effect. In addition, an unexpected or quick reversal of such policies could increase market volatility, which could adversely affect a Fund's investments. The duration and future impact of COVID-19 are currently unknown, which may exacerbate the other risks that apply to a Fund and could negatively affect Fund performance and the value of your investment in a Fund.

## 11. Subsequent Events

Management has evaluated the impact of subsequent events on the Funds and has determined that there are no subsequent events requiring recognition or disclosure in the financial statements.

**To the Board of Trustees of Nationwide Variable Insurance Trust and Shareholders of Amundi NVIT Multi Sector Bond Fund, Doubleline NVIT Total Return Tactical Fund, Federated NVIT High Income Bond Fund, NVIT Core Bond Fund, NVIT Core Plus Bond Fund, NVIT Government Bond Fund, NVIT Government Money Market Fund and NVIT Short Term Bond Fund**

**Opinions on the Financial Statements**

We have audited the accompanying statements of assets and liabilities, including the statements of investments, of Amundi NVIT Multi Sector Bond Fund, Doubleline NVIT Total Return Tactical Fund, Federated NVIT High Income Bond Fund, NVIT Core Bond Fund, NVIT Core Plus Bond Fund, NVIT Government Bond Fund, NVIT Government Money Market Fund and NVIT Short Term Bond Fund (eight of the funds constituting Nationwide Variable Insurance Trust, hereafter collectively referred to as the "Funds") as of December 31, 2020, the related statements of operations for the year ended December 31, 2020, the statements of changes in net assets for each of the two years in the period ended December 31, 2020, including the related notes, and the financial highlights for each of the periods indicated therein (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds as of December 31, 2020, the results of each of their operations for the year then ended, the changes in each of their net assets for each of the two years in the period ended December 31, 2020 and each of the financial highlights for each of the periods indicated therein in conformity with accounting principles generally accepted in the United States of America.

**Basis for Opinions**

These financial statements are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2020 by correspondence with the custodian, transfer agent, agent banks and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

#### **Continuation of Advisory (and Sub-Advisory) Agreements**

The Trust's investment advisory agreements with its Investment Adviser (the "Adviser") and its Sub-Advisers (together, the "Advisory Agreements") must be approved for each series of the Trust (individually a "Fund" and collectively the "Funds") for an initial term no greater than two years, and may continue in effect thereafter only if such continuation is approved at least annually, (i) by the vote of the Trustees or by a vote of the shareholders of the Fund in question, and (ii) by the vote of a majority of the Trustees who are not parties to the Advisory Agreements or "interested persons" of any party thereto (the "Independent Trustees"), cast in person at a meeting called for the purpose of voting on such approval. As a result of the current and potential effects of the COVID-19 pandemic, however, the Securities and Exchange Commission issued an exemptive order suspending the in-person voting requirements of the Investment Company Act of 1940, as amended for approval of investment advisory agreements, subject to certain conditions.

The Trustees relied on this order in connection with their 2020 meeting to approve the Advisory Agreements.

The Board of Trustees (the "Board") has five regularly scheduled meetings each year and takes into account throughout the year matters bearing on the Advisory Agreements. The Board and its standing committees consider at each meeting factors that are relevant to the annual continuation of each Fund's Advisory Agreements, including investment performance, Sub-Adviser updates and reviews, reports with respect to compliance monitoring and the services and support provided to the Fund and its shareholders.

In preparation for the Board's meetings in 2020 to consider the continuation of the Advisory Agreements, the Trustees requested and were furnished with a wide range of information to assist in their deliberations. These materials included:

- A summary report for each Fund that sets out a variety of information regarding the Fund, including performance, expense, and profitability information for the past three years.
- Reports from Broadridge Financial Solutions, Inc. ("Broadridge"), a leading independent source of mutual fund industry data, describing, on a Fund-by-Fund basis, for each Fund's largest share class, the Fund's (a) performance rankings (over multiple periods ended June 30, 2020) compared with performance universes created by Broadridge of similar or peer group funds, and (b) expense rankings comparing the Fund's fees and expenses with expense groups created by Broadridge of similar or peer group funds. An independent consultant retained by the Board provided input to Broadridge as to the composition of the various performance universes, expense groups and peer funds.
- Information regarding voluntary or contractual expense limitations or reductions and the relationship of expenses to any expense limitation.
- Information provided by the Adviser as to the Adviser's profitability in providing services under the Advisory Agreements.
- Information from the Adviser regarding economies of scale and breakpoints, including information provided by the Adviser as to the circumstances under which specific actions intended to share the benefits of economies of scale might be appropriate.

The Trustees met with representatives of the Adviser at the Trustees' regular quarterly meetings in September and December 2020 to discuss matters related to the continuation of the Advisory Agreements. In addition, the Trustees met with independent legal counsel to the Independent Trustees ("Independent Legal Counsel") in October and in November, to review information and materials provided to them, and to formulate requests for additional information. The Trustees submitted supplemental information requests to the Adviser following each meeting. At the Trustees' regular quarterly meeting in December 2020, the Trustees met to give final

consideration to information bearing on the continuation of the Advisory Agreements.

The Trustees considered, among other things, information provided by the Adviser in response to their previous information requests. The Trustees engaged in discussion and consideration among themselves, and with the Adviser, Trust counsel, and Independent Legal Counsel regarding the various factors that may contribute to the determination of whether the continuation of the Advisory Agreements should be approved.

In considering this information with respect to each of the Funds, the Trustees took into account, among other things, the nature, extent, and quality of services provided by the Adviser and relevant Sub-Adviser. In evaluating the Advisory Agreements for the Funds, the Trustees also reviewed information provided by the Adviser concerning the following:

- The terms of the Advisory Agreements and a summary of the services performed by the Adviser and Sub-Advisers.
- The activities of the Adviser in selecting, overseeing, and evaluating each Sub-Adviser; reporting by the Adviser to the Trustees regarding the Sub-Advisers; and steps taken by the Adviser, where appropriate, to identify replacement Sub-Advisers and to put those Sub-Advisers in place.
- The investment advisory and oversight capabilities of the Adviser, including, among other things, its expertise in investment, economic, and financial analysis.
- The Adviser's and Sub-Advisers' personnel and methods; the number of the Adviser's advisory and analytical personnel; general information about the compensation of the Adviser's advisory personnel; the Adviser's and Sub-Advisers' investment processes; the Adviser's risk assessment and risk management capabilities; and the Adviser's valuation and valuation oversight capabilities.
- The financial condition and stability of the Adviser and the Adviser's assessment of the financial condition and stability of the Sub-Advisers.
- Potential ancillary benefits, in addition to fees for serving as investment adviser, derived by the Adviser as a result of being investment adviser for the Funds, including, where applicable, information on fees inuring to the Adviser's affiliates for serving as the Trust's administrator, fund accountant, and transfer agent and fees or other payments relating to shareholder servicing or sub-transfer agency services provided by or through the Adviser or its affiliates.

Based on information provided by Broadridge and the Adviser, the Trustees reviewed expense information for each of the Funds and the total return investment performance of each of the Funds as well as the performance of peer groups of funds over various time periods.

The Trustees considered that DoubleLine NVIT Total Return Tactical Fund, NVIT AllianzGI International Growth Fund, NVIT AQR Large Cap Defensive Style Fund, NVIT Core Bond Fund,

NVIT Core Plus Bond Fund, NVIT Emerging Markets Fund, NVIT GS International Equity Insights Fund, NVIT GS Large Cap Equity Insights Fund, NVIT GS Small Cap Equity Insights Fund, NVIT iShares® Fixed Income ETF Fund, NVIT iShares® Global Equity ETF Fund, NVIT Jacobs Levy Large Cap Growth Fund, NVIT JP Morgan Disciplined Equity Fund, NVIT JP Morgan Mozaic Multi-Asset Fund, NVIT Mellon Dynamic U.S. Core Fund, NVIT Mellon Dynamic U.S. Equity Income Fund, NVIT Real Estate Fund, NVIT Short Term Bond Fund, and NVIT Wells Fargo Discovery Fund were each shown to pay actual management fees and to have total expense ratios (including 12b-1/non-12b-1 fees) at levels below or equal to their peer group medians or within a generally acceptable range above the Fund's peer group median. In addition, the Trustees considered that, with the exception of the Funds referred to below in this paragraph, each of those Funds was shown to have experienced three-year performance for the period ended June 30, 2020 (or, if shorter, for the period since the Fund's inception) at or above its peer group median, or within the third quintile of its peer group. With respect to NVIT Core Bond Fund, the Trustees noted that the Fund had experienced three-year performance in the fourth quintile of its peer group and considered management's statement that the Fund's underperformance was substantially the result of the Fund's portfolio having a lower allocation to corporate credit risk and higher credit quality compared to its peer group. With respect to NVIT GS International Equity Insights Fund, NVIT GS Large Cap Equity Insights Fund, NVIT GS Small Cap Equity Insights Fund, NVIT iShares® Fixed Income ETF Fund, NVIT iShares® Global Equity ETF Fund, NVIT JP Morgan Disciplined Equity Fund, and NVIT JP Morgan Mozaic Multi-Asset Fund, the Trustees considered that these Funds had been relatively recently organized and did not have three years of performance. With respect to NVIT Jacobs Levy Large Cap Growth Fund and NVIT Mellon Dynamic U.S. Equity Income Fund, the Trustees considered that a new subadviser was appointed to the Fund in May 2020 and April 2020, respectively, and additional time was necessary to evaluate each Fund's performance under the new subadviser. The Trustees determined on the basis of all of the information presented to them that the expense and performance information of each of these Funds was consistent with the continuation of the Fund's Advisory Agreement.

With respect to Amundi NVIT Multi-Sector Bond Fund, BlackRock NVIT Managed Global Allocation Fund, Federated NVIT High Income Bond Fund, Neuberger Berman NVIT Multi-Cap Opportunities Fund, NVIT Columbia Overseas Value Fund, NVIT Government Bond Fund, NVIT Government Money Market Fund, NVIT International Equity Fund, NVIT Managed American Funds Asset Allocation Fund, NVIT Newton Sustainable U.S. Equity Fund, and NVIT U.S. 130/30 Equity Fund, the Trustees considered that, although each Fund was shown to pay actual management fees higher than its peer group median, its total expense ratio (including 12b-1/non-12b-1 fees) was equal to or lower than or within a generally acceptable range of the Fund's peer group median. The Trustees considered that each of Federated NVIT High Income Bond, Neuberger Berman NVIT Multi-Cap Opportunities Fund, NVIT Columbia Overseas Value Fund, NVIT Government Bond Fund, NVIT Government Money Market Fund, and NVIT Managed American Funds Asset

Allocation Fund had experienced three-year performance for the period ended June 30, 2020 at or above its peer group median, or within the third quintile of its peer group. With respect to Amundi NVIT Multi-Sector Bond Fund, the Trustees noted that the Fund had experienced three-year performance in the fifth quintile of its peer group and considered that in February 2019 the Fund's prior sub-adviser was replaced. With respect to BlackRock NVIT Managed Global Allocation Fund, the Trustees noted that the Fund had experienced three-year performance below its peer group median and considered the Adviser's statements that the volatility overlay that is part of the Fund's investment strategy will have the effect of causing the Fund to underperform its peers under various market conditions, including those experienced in recent periods. With respect to NVIT International Equity Fund, the Trustees noted that the Fund had experienced three-year performance in the fifth quintile of its peer group and considered the Adviser's statement that it is considering future opportunities for the Fund in light of its recent underperformance and its stronger long-term (ten-year) performance. With respect to NVIT Newton Sustainable U.S. Equity Fund, the Trustees noted that the Fund had experienced three-year performance below its peer group median and considered that a new sub-adviser was appointed in May 2020 and additional time was necessary to evaluate the Fund's performance under the new subadviser. With respect to NVIT U.S. 130/30 Equity Fund, the Trustees considered that the Fund had been relatively recently organized and did not have three years of performance. The Trustees determined on the basis of all of the information presented to them, including any remedial efforts taken or to be taken by the Adviser, that the expense and performance information of each of these Funds was consistent with the continuation of the Fund's Advisory Agreement.

With respect to BlackRock NVIT Equity Dividend Fund, the Trustees noted that the Fund was shown to pay actual management fees at a level higher than its peer group median and that the Fund's total expense ratio (including 12b-1/non-12b-1 fees) was in the fifth quintile of its peer group. The Trustees

considered that, although the Fund pays relatively high total expenses, the Fund's overall expense arrangements appeared acceptable, particularly in light of its favorable levels of three-year investment performance shown to be within the second quintile of its peer group. The Trustees determined on the basis of all of the information presented to them that the expense and performance information of the Fund was consistent with the continuation of the Fund's advisory agreement.

With respect to NVIT Managed American Funds Growth & Income Fund, the Trustees considered that, although the Fund's total expense ratio (including 12b-1/non-12b-1 fees) was higher than the Fund's peer group median, the Fund was shown to pay actual management fees at a level lower than its peer group. They noted that the Fund had experienced three-year performance below its peer group median and considered the Adviser's statements that the volatility overlay that is part of the Fund's investment strategy will have the effect of causing the Fund to underperform its peers under various market conditions, including those experienced in recent periods. The Trustees determined on the basis of all of the information presented to them that the expense and performance information of the Fund was consistent with the continuation of the Fund's Advisory Agreement.

The Trustees considered whether each of the Funds may benefit from any economies of scale realized by the Adviser in the event of growth in assets of the Fund. The Trustees noted that each Fund's advisory fee rate schedule, with the exception of Blackrock NVIT Managed Global Allocation Fund, NVIT iShares® Fixed Income ETF Fund, and NVIT iShares® Global Equity ETF Fund, is subject to contractual advisory fee breakpoints. The Trustees determined to continue to monitor the fees paid by the Funds without breakpoints to determine whether breakpoints might in the future become appropriate.

Based on all relevant information and factors, the Trustees unanimously approved the continuation of the Advisory Agreements at their meeting in December 2020.

### Other Federal Tax Information

For the year ended December 31, 2020 certain dividends paid by the Funds may be subject to a maximum tax rate of 20% as provided for by the Jobs and Growth Tax Relief Reconciliation Act of 2003. The Funds intend to designate the maximum amount allowable as taxed at a maximum rate of 15%. Complete information will be reported in conjunction with your 2020 Form 1099-DIV.

The Funds designate the following amounts, or the maximum amount allowable under the Internal Revenue Code, as long term capital gain distributions qualifying for the maximum 20% income tax rate for individuals:

Fund	Amount
Government Money Market	\$ 158

Each Trustee who is deemed an "interested person," as such term is defined in the 1940 Act, is referred to as an "Interested Trustee." Those Trustees who are not "interested persons," as such term is defined in the 1940 Act, are referred to as "Independent Trustees." The name, year of birth, position and length of time served with the Trust, number of portfolios overseen, principal occupation(s) and other directorships/trusteeships held during the past five years, and additional information related to experience, qualifications, attributes, and skills of each Trustee and Officer are shown below. There are 65 series of the Trust, all of which are overseen by the Board of Trustees and Officers of the Trust. The address for each Trustee and Officer is c/o Nationwide Funds Group, One Nationwide Plaza, Mail Code 5-02-210, Columbus, OH 43215.

#### Independent Trustees

<a href="#">Paula H. J. Cholmondeley</a>		
Year of Birth	Positions Held with Trust and Length of Time Served <sup>1</sup>	Number of Portfolios Overseen in the Nationwide Fund Complex
1947	Trustee since July 2000	112
<b>Principal Occupation(s) During the Past Five Years (or Longer)</b>		
Ms. Cholmondeley focuses full time on corporate governance. She sits on public company boards and is also on the faculty of the National Association of Corporate Directors. She has served as a Chief Executive Officer of Sorrel Group (management consulting company) since January 2004. The Statement of Additional Information ("SAI") includes additional information about the Trustees and is available, without charge, upon request. Shareholders may call 800-848-0920 to request the SAI.

**Bloomberg Barclays Emerging Markets USD Aggregate Bond Index:** An unmanaged index comprising fixed-rate and floating-rate U.S. dollar-denominated bonds from sovereign, quasi-sovereign and corporate emerging market issuers; the countries considered to be emerging markets are determined by annual review using rules-based classifications from the World Bank income group and the International Monetary Fund.

**Bloomberg Barclays Long Treasury Index:** An ETF tracking index that includes all publicly issued U.S. Treasury securities 10 or more years remaining until maturity, are rated as investment grade and have an outstanding face-value of \$250 million or more.

**Bloomberg Barclays Municipal Bond Index:** An unmanaged index that covers the U.S. dollar-denominated, long-term, tax-exempt bond market. The index has four main sectors: state and local general obligation bonds, revenue bonds, insured bonds and pre-refunded bonds.

**Bloomberg Barclays U.S. 10-20 Year Treasury Bond Index:** An unmanaged index that measures the performance of U.S. Treasury securities with a remaining maturity of 10 to 20 years.

**Bloomberg Barclays U.S. Aggregate Bond Index:** An unmanaged, market value-weighted index of U.S. dollar-denominated investment-grade, fixed-rate, taxable debt issues, which includes Treasuries, government-related and corporate securities, mortgage-backed securities (agency fixed-rate and hybrid adjustable-rate mortgage pass-throughs), asset-backed securities and commercial mortgage-backed securities (agency and non-agency).

**Bloomberg Barclays U.S. Corporate High Yield 2% Issuer Capped Index:** An unmanaged index that measures the performance of high-yield corporate bonds, with a maximum allocation of 2% to any one issuer.

**Bloomberg Barclays U.S. Corporate High Yield Index:** An unmanaged index that measures the performance of U.S. dollar-denominated, non-investment-grade, fixed-rate, taxable corporate bonds with at least \$150 million par value outstanding, a maximum credit rating of Ba1 and a remaining maturity of one year or more; gives a broad look at how high-yield ("junk") bonds have performed.

**Bloomberg Barclays U.S. 1-3 Year Government/Credit Bond Index:** An unmanaged index that measures the performance of the non-securitized component of the U.S. Aggregate Bond Index with maturities of 1 to 3 years, including Treasuries, government-related issues and corporates.

**Bloomberg Barclays U.S. Treasury Inflation-Protected Securities (TIPS) Index<sup>SM</sup>:** An index that measures the performance of the US Treasury Inflation Protected Securities (TIPS) market.

**Bloomberg Barclays Mortgage-Backed Securities Index:** A market value-weighted index comprising agency mortgage-backed pass-through securities of the Government National Mortgage Association (Ginnie Mae), the Federal National Mortgage Association (Fannie Mae), and the Federal Home Loan Mortgage Corporation (Freddie Mac) with a minimum \$150 million par amount outstanding and a weighted-average maturity of at least 1 year.

**Citigroup Non-US Dollar World Government Bond Index (Citigroup WGBI Non-US):** An unmanaged, market capitalization-weighted index that reflects the performance of fixed-rate investment-grade sovereign bonds with remaining maturities of one year or more issued outside the United States; generally considered to be representative of the world bond market.

**Citigroup US Broad Investment-Grade Bond Index (USBIG<sup>®</sup>):** An unmanaged, market capitalization-weighted index that measures the performance of U.S. dollar-denominated bonds issued in the U.S. investment-grade bond market; includes fixed-rate, U.S. Treasury, government-sponsored, collateralized and corporate debt with remaining maturities of one year or more.

**Citigroup US High-Yield Market Index:** An unmanaged, market capitalization-weighted index that reflects the performance of the North American high-yield market; includes U.S. dollar-denominated, fixed-rate, cash-pay and deferred-interest securities with remaining maturities of one year or more, issued by corporations domiciled in the United States or Canada.

**Citigroup World Government Bond Index (WGBI) (Unhedged):** An unmanaged, market capitalization-weighted index that is not hedged back to the U.S. dollar and reflects the performance of the global sovereign fixed-income market; includes local currency, investment-grade, fixed-rate sovereign bonds issued in 20-plus countries, with remaining maturities of one year or more.

**iMoneyNet Money Fund Average<sup>TM</sup> Government All Index:** An average of government money market funds. Government money market funds may invest in U.S. Treasuries, U.S. Agencies, repurchase agreements, and government-backed floating rate notes, and include both retail and institutional funds.

**JPM Emerging Market Bond Index (EMBI) Global Diversified Index:** An unmanaged index that reflects the total returns of U.S. dollar-denominated sovereign bonds issued by emerging market countries as selected by JPMorgan.

**J.P. Morgan Mozaic<sup>SM</sup> Index (Series F):** A rules-based, dynamic index that tracks the total return of a global mix of asset classes, including equity securities, fixed-income securities and commodities, through futures contracts on those asset classes. The Index rebalances monthly in an effort to capture the continued performance of asset classes that have exhibited the highest recent returns.

**Morningstar<sup>®</sup> Lifetime Allocation Indexes:** A series of unmanaged, multi-asset-class indexes designed to benchmark target-date investment products. Each index is available in three risk profiles: aggressive, moderate and conservative. The index asset allocations adjust over time, reducing equity exposure and shifting toward traditional income-producing investments. The strategic asset allocation of the indexes is based on the Lifetime Asset Allocation methodology developed by Ibbotson Associates, a Morningstar company.

**Morningstar® Lifetime Moderate Income Index:** An index representing a portfolio of global equities, bonds and traditional inflation hedges such as commodities and Treasury Inflation-Protected Securities. This portfolio is held in proportions appropriate for a U.S. investor who is at least ten years into retirement.

**Morningstar® (Mstar) Target Risk Indexes:** A series of unmanaged indexes designed to meet the needs of investors who would like to maintain a target level of equity exposure through a portfolio diversified across equities, bonds and inflation-hedged instruments.

- The Morningstar Aggressive Target Risk Index seeks approximately 95% exposure to global equity markets.
- The Morningstar Moderately Aggressive Target Risk Index seeks approximately 80% exposure to global equity markets.
- The Morningstar Moderate Target Risk Index seeks approximately 60% exposure to global equity markets.
- The Morningstar Moderately Conservative Target Risk Index seeks approximately 40% exposure to global equity markets.
- The Morningstar Conservative Target Risk Index seeks approximately 20% exposure to global equity markets.

#### Note about Morningstar Category™

*The Morningstar Category™ is a proprietary Morningstar data point and is assigned based on the underlying securities in each portfolio. Categories make it easier to build well-diversified portfolios, assess potential risk, and identify top-performing funds. A Fund is placed in a category based on its portfolio statistics and compositions over the previous three-year period. If a Fund is new and has no portfolio history, Morningstar assigns a temporary category. When necessary, Morningstar may change a category assignment based on recent changes to a Fund's portfolio.*

**MSCI ACWI®:** An unmanaged, free float-adjusted, market capitalization-weighted index that is designed to measure the performance of large-cap and mid-cap stocks in global developed and emerging markets as determined by MSCI.

**MSCI ACWI® ex USA:** An unmanaged, free float-adjusted, market capitalization-weighted index that is designed to measure the performance of large-cap and mid-cap stocks in global developed and emerging markets as determined by MSCI; excludes the United States.

**MSCI ACWI® ex USA Growth:** An unmanaged, free float-adjusted, market capitalization-weighted index that is designed to measure the performance of large-cap and mid-cap growth stocks in global developed and emerging markets as determined by MSCI; excludes the United States.

**MSCI EAFE® Index:** An unmanaged, free float-adjusted, market capitalization-weighted index that is designed to measure the performance of large-cap and mid-cap stocks in developed markets as determined by MSCI; excludes the United States and Canada.

**MSCI World ex USA Index<sup>SM</sup>:** Captures large- and mid-capitalization representation across 22 of 23 Developed Markets (DM) countries—excluding the United States. With 1,020 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country. DM countries include: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland and the United Kingdom.

**MSCI World Index<sup>SM</sup>:** An unmanaged, free float-adjusted, market capitalization-weighted index that is designed to measure the performance of large-cap and mid-cap stocks in global developed markets as determined by MSCI.

**MSCI EAFE® Value Index:** An unmanaged, free float-adjusted, market capitalization-weighted index that is designed to measure the performance of large-cap and mid-cap value stocks in developed markets as determined by MSCI; excludes the United States and Canada.

**MSCI Emerging Markets® Index:** An unmanaged, free float-adjusted, market capitalization-weighted index that is designed to measure the performance of large-cap and mid-cap stocks in emerging-country markets as determined by MSCI.

**Russell 1000® Growth Index:** An unmanaged index that measures the performance of the large-capitalization growth segment of the U.S. equity universe; includes those Russell 1000® Index companies with higher price-to-book ratios and higher forecasted growth values.

**Russell 1000® Value Index:** An unmanaged index that measures the performance of the large-capitalization value segment of the U.S. equity universe; includes those Russell 1000® Index companies with lower price-to-book ratios and lower forecasted growth values.

**Russell 2000® Growth Index:** An unmanaged index that measures the performance of the small-capitalization growth segment of the U.S. equity universe; includes those Russell 2000® Index companies with higher price-to-book ratios and higher forecasted growth values.

**Russell 2000® Index:** An unmanaged index that measures the performance of the small-capitalization segment of the U.S. equity universe.

**Russell 2000® Value Index:** An unmanaged index that measures the performance of the small-capitalization value segment of the U.S. equity universe; includes those Russell 2000® Index companies with lower price-to-book ratios and lower forecasted growth values.

**Russell 3000® Growth Index:** A market-capitalization weighted index based on the Russell 3000 Index. Includes companies that show signs of above-average growth.

**Russell Midcap® Growth Index:** An unmanaged index that measures the performance of the mid-capitalization growth segment of the U.S. equity universe; includes those Russell Midcap® Index companies with higher price-to-book ratios and higher forecasted growth values.

**Russell Midcap® Value Index:** An unmanaged index that measures the performance of the mid-capitalization value segment of the U.S. equity universe; includes those Russell Midcap® Index companies with lower price-to-book ratios and lower forecasted growth values.

**S&P 500® Index:** An unmanaged, market capitalization-weighted index of 500 stocks of leading large-cap U.S. companies in leading industries; gives a broad look at the U.S. equities market and those companies' stock price performance.

**The S&P/Citi International Treasury Bond ex-US Index:** An index measuring performance of treasury bonds in local currencies. The bonds are issued by developed market countries outside the U.S.

**S&P MidCap 400® (S&P 400) Index:** An unmanaged index that measures the performance of 400 stocks of medium-sized U.S. companies (those with a market capitalization of \$1.4 billion to \$5.9 billion).

**S&P North American Technology Sector Index™:** An index that represents U.S. securities classified under GICS® information technology sector as well as internet & direct marketing retail, interactive home entertainment, and interactive media & services sub-industries.

**S&P Biotechnology Select Industry Index:** An index that represents performance of narrow GICS® sub-industries. Made up of stocks from the S&P Total Market Index that are classified with biotechnology as a sub-industry.

**S&P Target Date® To Indexes:** A series of 12 unmanaged, multi-asset class indexes consisting of the Retirement Income Index plus 11 indexes that correspond to a specific target retirement date (ranging from 2010 through 2060+). The series reflects a subset of target date funds, each of which generally has an asset allocation mix and glide path featuring relatively conservative total equity exposure near retirement and static total equity exposure after retirement. Each index in the series reflects varying levels of exposure to equities, bonds, and other asset classes and becomes more conservative with the approach of the target retirement date.

**S&P Total Market Index:** An index comprised of securities to track the broad equity market, including large-, mid-, small-, and micro-cap stocks

**S&P Total Market Index:** An index comprised of securities to track the broad equity market, including large-, mid-, small-, and micro-cap stocks
