

The fund offers its shares only to separate accounts of insurance companies that offer variable annuity and variable life insurance products. The fund may not be available in your state due to various insurance regulations. Please check with your insurance company for availability. If the fund in this prospectus is not available in your state, this prospectus is not to be considered a solicitation. Please read this prospectus together with your variable annuity or variable life insurance product prospectus.

Fidelity® Variable Insurance Products

Initial Class, Service Class, and Service Class 2 Balanced Portfolio

Prospectus

April 28, 2020

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, and if your insurance carrier elects to participate, you may not be receiving paper copies of the Fund's shareholder reports from the insurance company that offers your variable insurance product unless you specifically request paper copies from your financial professional or the administrator of your variable insurance product. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Fund electronically, by contacting your financial professional or the administrator of your variable insurance product. If you own a Fidelity-administered variable insurance product, please visit [fidelity.com/mailpreferences](https://www.fidelity.com/mailpreferences) to make your election or call 1-800-343-3548.

You may elect to receive all future reports in paper free of charge. If you wish to continue receiving paper copies of your shareholder reports, you may contact your financial professional or the administrator of your variable insurance product. If you own a Fidelity-administered variable insurance product, please visit [fidelity.com/mailpreferences](https://www.fidelity.com/mailpreferences) to make your election or call 1-800-343-3548. Your election to receive reports in paper will apply to all funds available under your variable insurance product.

Like securities of all mutual funds, these securities have not been approved or disapproved by the Securities and Exchange Commission, and the Securities and Exchange Commission has not determined if this prospectus is accurate or complete. Any representation to the contrary is a criminal offense.

Fund Summary

Fund/Class:

VIP Balanced Portfolio/Initial Class, Service Class, Service Class 2

Investment Objective

The fund seeks income and capital growth consistent with reasonable risk.

Fees

(fees paid directly from your investment)

Not Applicable

Annual Operating Expenses

(expenses that you pay each year as a % of the value of your investment)

	Initial Class	Service Class	Service Class 2
Management fee	0.39%	0.39%	0.39%
Distribution and/or Service (12b-1) fees	None	0.10%	0.25%
Other expenses	0.10%	0.10%	0.10%
Total annual operating expenses	0.49%	0.59%	0.74%

This **example** helps compare the cost of investing in the fund with the cost of investing in other funds.

Let's say, hypothetically, that the annual return for shares of the fund is 5% and that the fees and the annual operating expenses for shares of the fund are exactly as described in the fee table. This example illustrates the effect of fees and expenses, but is not meant

	Initial Class	Service Class	Service Class 2
1 year	\$ 50	\$ 60	\$ 76
3 years	\$ 157	\$ 189	\$ 237
5 years	\$ 274	\$ 329	\$ 411
10 years	\$ 616	\$ 738	\$ 918

Portfolio Turnover

The fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs. These costs, which are not reflected in annual operating expenses or in the example, affect the fund's performance. During the most recent fiscal year, the fund's portfolio turnover rate was 41% of the average value of its portfolio.

Principal Investment Strategies

- Investing approximately 60% of assets in stocks and other equity securities and the remainder in bonds and other debt securities, including lower-quality debt securities (those of less than investment-grade quality, also referred to as high yield debt securities or junk bonds), when its outlook is neutral.

Fee Table

The following table describes the fees and expenses that may be incurred, directly or indirectly, when you, as a variable product owner, buy and hold interests in a separate account that invests in shares of the fund. The table does not include any fees or other expenses of any variable annuity or variable life insurance product; if it did, overall fees and expenses would be higher.

to suggest actual or expected fees and expenses or returns, all of which may vary. This example does not include any fees or other expenses of any variable annuity or variable life insurance product; if it did, overall expenses would be higher. For every \$10,000 invested, here's how much you, as a variable product owner, would pay in total expenses if all interests in a separate account that invests in shares of the fund were redeemed at the end of each time period indicated:

- Investing at least 25% of total assets in fixed-income senior securities.
- Investing in domestic and foreign issuers.
- With respect to the fund's equity investments, allocating the fund's assets across different market sectors (at present, communication services, consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, and utilities), using different Fidelity managers.
- With respect to the fund's equity investments, investing in either "growth" stocks or "value" stocks or both.
- Using fundamental analysis of factors such as each issuer's financial condition and industry position, as well as market and economic conditions, to select investments.

Fund Summary – continued

- Investing in Fidelity’s central funds (specialized investment vehicles used by Fidelity® funds to invest in particular security types or investment disciplines) consistent with the asset classes discussed above.

Principal Investment Risks

- Stock Market Volatility.** Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Different parts of the market, including different market sectors, and different types of securities can react differently to these developments.
- Interest Rate Changes.** Interest rate increases can cause the price of a debt security to decrease.
- Foreign Exposure.** Foreign markets can be more volatile than the U.S. market due to increased risks of adverse issuer, political, regulatory, market, or economic developments and can perform differently from the U.S. market.
- Prepayment.** The ability of an issuer of a debt security to repay principal prior to a security’s maturity can cause greater price volatility if interest rates change.
- Issuer-Specific Changes.** The value of an individual security or particular type of security can be more volatile than, and can

perform differently from, the market as a whole. Lower-quality debt securities (those of less than investment-grade quality, also referred to as high yield debt securities or junk bonds) and certain types of other securities involve greater risk of default or price changes due to changes in the credit quality of the issuer. The value of lower-quality debt securities and certain types of other securities can be more volatile due to increased sensitivity to adverse issuer, political, regulatory, market, or economic developments.

You could lose money by investing in the fund.

Performance

The following information is intended to help you understand the risks of investing in the fund. The information illustrates the changes in the performance of the fund’s shares from year to year and compares the performance of the fund’s shares to the performance of a securities market index and a hypothetical composite of market indexes over various periods of time. The indexes have characteristics relevant to the fund’s investment strategies. Index descriptions appear in the “Additional Index Information” section of the prospectus. Returns for shares of the fund do not include the effect of any sales charges or other expenses of any variable annuity or variable life insurance product; if they did, returns for shares of the fund would be lower. Past performance is not an indication of future performance.

Year-by-Year Returns

During the periods shown in the chart for Initial Class:

Highest Quarter Return

Lowest Quarter Return

Returns	Quarter ended
11.84%	March 31, 2012
-14.29%	September 30, 2011

Average Annual Returns

For the periods ended December 31, 2019	Past 1 year	Past 5 years	Past 10 years
Initial Class	24.51%	8.42%	9.98%
Service Class	24.30%	8.30%	9.85%
Service Class 2	24.11%	8.14%	9.70%
S&P 500 [®] Index (reflects no deduction for fees, expenses, or taxes)	31.49%	11.70%	13.56%
Fidelity Balanced 60/40 Composite Index SM (reflects no deduction for fees, expenses, or taxes)	22.18%	8.37%	9.77%

Investment Adviser

Fidelity Management & Research Company LLC (FMR) (the Adviser) is the fund's manager. Other investment advisers serve as sub-advisers for the fund.

Portfolio Manager(s)

Steven Kaye (co-manager) has managed the fund since January 2014.

Brian Lempel (co-manager) has managed the fund since January 2014.

Douglas Simmons (co-manager) has managed the fund since January 2014.

Pierre Sorel (co-manager) has managed the fund since January 2014.

Robert Stansky (co-manager) has managed the fund since January 2014.

Ford O'Neil (co-manager) has managed the fund since July 2015.

John Mirshekari (co-manager) has managed the fund since October 2016.

Nicola Stafford (co-manager) has managed the fund since August 2017.

Jody Simes (co-manager) has managed the fund since November 2019.

Ashley Fernandes (co-manager) has managed the fund since January 2020.

Melissa Reilly (co-manager) has managed the fund since January 2020.

Purchase and Sale of Shares

Only Permitted Accounts, including separate accounts of insurance companies and qualified funds of funds that have signed the appropriate agreements with the fund, if applicable, can buy or sell shares. Insurance companies offer variable annuity and variable life insurance products through separate accounts. A qualified fund of

funds is an eligible insurance-dedicated mutual fund that invests in other mutual funds.

Permitted Accounts - not variable product owners - are the shareholders of the fund. Variable product owners hold interests in separate accounts, including separate accounts that are shareholders of qualified funds of funds. The terms of the offering of interests in separate accounts are included in the variable annuity or variable life insurance product prospectus.

The price to buy one share is its net asset value per share (NAV). Shares will be bought at the NAV next calculated after an order is received in proper form.

The price to sell one share is its NAV. Shares will be sold at the NAV next calculated after an order is received in proper form.

The fund is open for business each day the New York Stock Exchange (NYSE) is open.

There is no purchase minimum for fund shares.

Tax Information

Variable product owners seeking to understand the tax consequences of their investment should consult with their tax advisers or the insurance company that issued their variable product, or refer to their variable annuity or variable life insurance product prospectus. Insurance company separate accounts generally do not pay tax on dividends or capital gain distributions from the fund.

Payments to Broker-Dealers and Other Financial Intermediaries

The fund, the Adviser, Fidelity Distributors Company LLC (FDC), and/or their affiliates may pay intermediaries, which may include insurance companies and their affiliated broker-dealers and service-providers (who may be affiliated with the Adviser or FDC), for the sale of fund shares and related services. These payments may create a conflict of interest by influencing your intermediary and your investment professional to recommend the fund over another investment. Ask your investment professional or visit your intermediary's web site for more information.

Fund Basics

Investment Details

Investment Objective

VIP Balanced Portfolio seeks income and capital growth consistent with reasonable risk.

Principal Investment Strategies

The Adviser manages the fund to maintain a balance between stocks and bonds. When the Adviser's outlook is neutral, it will invest approximately 60% of the fund's assets in stocks and other equity securities and the remainder in bonds and other debt securities, including lower-quality debt securities (those of less than investment-grade quality, also referred to as high yield debt securities or junk bonds). The Adviser may vary from this target if it believes stocks or bonds offer more favorable opportunities, but will always invest at least 25% of the fund's total assets in fixed-income senior securities.

The Adviser may invest the fund's assets in securities of foreign issuers in addition to securities of domestic issuers.

The Adviser allocates the equity portion of the fund's assets across different market sectors, using different Fidelity managers to handle investments within each sector. At present, these sectors include communication services, consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, and utilities.

The Adviser expects the fund's equity sector allocations will approximate the sector weightings of the S&P 500[®] Index, a broadly diversified measure of the performance of 500 common stocks chosen for market size, liquidity, and industry group representation to represent U.S. equity performance. While the Adviser may overweight or underweight one or more sectors from time to time, the Adviser expects the returns of the equity portion of the fund to be driven primarily by the security selections of the managers of each sector.

With respect to the fund's equity investments, the Adviser is not constrained by any particular investment style. At any given time, the Adviser may tend to buy "growth" stocks or "value" stocks, or a combination of both types. In buying and selling securities for the fund, the Adviser relies on fundamental analysis, which involves a bottom-up assessment of a company's potential for success in light of factors including its financial condition, earnings outlook, strategy, management, industry position, and economic and market conditions.

The Adviser uses central funds to help invest the fund's assets. Central funds are specialized investment vehicles designed to be used by Fidelity[®] funds. Fidelity uses them to invest in particular security types or investment disciplines; for example, rather than buy bonds directly, the fund may invest in a central fund that buys bonds. Fidelity does not charge any additional management fees for central funds. Central funds offer exposure to some or all of the following types of investment-grade and lower-quality debt securities (those of less than investment-grade quality, also referred to as high yield debt securities or junk bonds): corporate bonds, mortgage

and other asset-backed securities, floating rate loans, and BB-rated securities. Central funds may also focus on other types of securities.

If the Adviser's strategies do not work as intended, the fund may not achieve its objective.

Description of Principal Security Types

Equity securities represent an ownership interest, or the right to acquire an ownership interest, in an issuer. Different types of equity securities provide different voting and dividend rights and priority in the event of the bankruptcy of the issuer. Equity securities include common stocks, preferred stocks, convertible securities, and warrants.

Debt securities are used by issuers to borrow money. The issuer usually pays a fixed, variable, or floating rate of interest, and must repay the amount borrowed, usually at the maturity of the security. Some debt securities, such as zero coupon bonds, do not pay current interest but are sold at a discount from their face values. Debt securities include corporate bonds, government securities (including Treasury securities), repurchase agreements, money market securities, mortgage and other asset-backed securities, loans and loan participations, and other securities believed to have debt-like characteristics, including hybrids and synthetic securities.

Derivatives are investments whose values are tied to an underlying asset, instrument, currency, or index. Derivatives include futures, options, forwards, and swaps, such as interest rate swaps (exchanging a floating rate for a fixed rate), total return swaps (exchanging a floating rate for the total return of an index, security, or other instrument or investment) and credit default swaps (buying or selling credit default protection).

Forward-settling securities involve a commitment to purchase or sell specific securities when issued, or at a predetermined price or yield. When a fund does not already own or have the right to obtain securities equivalent in kind and amount, a commitment to sell securities is equivalent to a short sale. Payment and delivery take place after the customary settlement period.

Central funds are special types of investment vehicles created by Fidelity for use by Fidelity[®] funds and other advisory clients. Central funds incur certain costs related to their investment activity (such as custodial fees and expenses), but do not pay additional management fees. The investment results of the portions of the fund's assets invested in the central funds will be based upon the investment results of those funds.

Principal Investment Risks

Many factors affect the fund's performance. Developments that disrupt global economies and financial markets, such as pandemics and epidemics, may magnify factors that affect a fund's performance. The fund's share price changes daily based on changes in market conditions and interest rates and in response to other economic, political, or financial developments. The fund's reaction to these developments will be affected by the types and maturities of securities in which the fund invests, the financial condition, industry and economic sector, and geographic location of an issuer, and the fund's

level of investment in the securities of that issuer. When you sell your shares they may be worth more or less than what you paid for them, which means that you could lose money by investing in the fund.

The following factors can significantly affect the fund's performance:

Stock Market Volatility. The value of equity securities fluctuates in response to issuer, political, market, and economic developments. Fluctuations, especially in foreign markets, can be dramatic over the short as well as long term, and different parts of the market, including different market sectors, and different types of equity securities can react differently to these developments. For example, stocks of companies in one sector can react differently from those in another, large cap stocks can react differently from small cap stocks, and "growth" stocks can react differently from "value" stocks. Issuer, political, or economic developments can affect a single issuer, issuers within an industry or economic sector or geographic region, or the market as a whole. Changes in the financial condition of a single issuer can impact the market as a whole. Terrorism and related geo-political risks have led, and may in the future lead, to increased short-term market volatility and may have adverse long-term effects on world economies and markets generally.

Interest Rate Changes. Debt securities, including money market securities, have varying levels of sensitivity to changes in interest rates. In general, the price of a debt security can fall when interest rates rise and can rise when interest rates fall. Securities with longer maturities and certain types of securities, such as mortgage securities and the securities of issuers in the financial services sector, can be more sensitive to interest rate changes, meaning the longer the maturity of a security, the greater the impact a change in interest rates could have on the security's price. Short-term and long-term interest rates do not necessarily move in the same amount or the same direction. Short-term securities tend to react to changes in short-term interest rates, and long-term securities tend to react to changes in long-term interest rates. Securities with floating interest rates can be less sensitive to interest rate changes, but may decline in value if their interest rates do not rise as much as interest rates in general. Securities whose payment at maturity is based on the movement of all or part of an index and inflation-protected debt securities may react differently from other types of debt securities.

Foreign Exposure. Foreign securities, foreign currencies, and securities issued by U.S. entities with substantial foreign operations can involve additional risks relating to political, economic, or regulatory conditions in foreign countries. These risks include fluctuations in foreign exchange rates; withholding or other taxes; trading, settlement, custodial, and other operational risks; and the less stringent investor protection and disclosure standards of some foreign markets. All of these factors can make foreign investments, especially those in emerging markets, more volatile and potentially less liquid than U.S. investments. In addition, foreign markets can perform differently from the U.S. market.

Global economies and financial markets are becoming increasingly interconnected, which increases the possibilities that conditions in

one country or region might adversely impact issuers or providers in, or foreign exchange rates with, a different country or region.

Prepayment. Many types of debt securities, including mortgage securities, are subject to prepayment risk. Prepayment risk occurs when the issuer of a security can repay principal prior to the security's maturity. Securities subject to prepayment can offer less potential for gains during a declining interest rate environment and similar or greater potential for loss in a rising interest rate environment. In addition, the potential impact of prepayment features on the price of a debt security can be difficult to predict and result in greater volatility.

Issuer-Specific Changes. Changes in the financial condition of an issuer or counterparty, changes in specific economic or political conditions that affect a particular type of security or issuer, and changes in general economic or political conditions can increase the risk of default by an issuer or counterparty, which can affect a security's or instrument's credit quality or value. The value of securities of smaller, less well-known issuers can be more volatile than that of larger issuers. Lower-quality debt securities (those of less than investment-grade quality, also referred to as high yield debt securities or junk bonds) and certain types of other securities tend to be particularly sensitive to these changes.

Lower-quality debt securities and certain types of other securities involve greater risk of default or price changes due to changes in the credit quality of the issuer. The value of lower-quality debt securities and certain types of other securities often fluctuates in response to company, political, or economic developments and can decline significantly over short as well as long periods of time or during periods of general or regional economic difficulty.

Leverage Risk. Derivatives, forward-settling securities, and short sale transactions involve leverage because they can provide investment exposure in an amount exceeding the initial investment. Leverage can magnify investment risks and cause losses to be realized more quickly. A small change in the underlying asset, instrument, or index can lead to a significant loss. Assets segregated to cover these transactions may decline in value and are not available to meet redemptions. Forward-settling securities and short sale transactions also involve the risk that a security will not be issued, delivered, available for purchase, or paid for when anticipated. An increase in the market price of securities sold short will result in a loss. Government legislation or regulation could affect the use of these transactions and could limit a fund's ability to pursue its investment strategies.

In response to market, economic, political, or other conditions, a fund may temporarily use a different investment strategy for defensive purposes. If the fund does so, different factors could affect its performance and the fund may not achieve its investment objective.

Other Investment Strategies

In addition to the principal investment strategies discussed above, the Adviser may lend the fund's securities to broker-dealers or other institutions to earn income for the fund.

Fund Basics – continued

The Adviser may also engage in transactions that have a leveraging effect on the fund, including investments in derivatives, regardless of whether the fund may own the asset, instrument, or components of the index underlying the derivative, and forward-settling securities. The fund's derivative investments may include interest rate swaps, total return swaps, credit default swaps, options (including options on futures and swaps), and futures contracts (both long and short positions) on securities, other instruments, and indexes. Depending on the Adviser's outlook and market conditions, the Adviser may engage in these transactions to increase or decrease the fund's exposure to changing security prices, interest rates, credit qualities, or other factors that affect security values, or to gain or reduce exposure to an asset, instrument, or index.

Fundamental Investment Policies

The following is fundamental, that is, subject to change only by shareholder approval:

VIP Balanced Portfolio seeks income and capital growth consistent with reasonable risk.

Valuing Shares

The fund is open for business each day the NYSE is open.

The NAV is the value of a single share. Fidelity normally calculates NAV as of the close of business of the NYSE, normally 4:00 p.m. Eastern time. The fund's assets normally are valued as of this time for the purpose of computing NAV. Fidelity calculates NAV separately for each class of shares of a multiple class fund.

NAV is not calculated and the fund will not process purchase and redemption requests submitted on days when the fund is not open for business. The time at which shares are priced and until which purchase and redemption orders are accepted may be changed as permitted by the Securities and Exchange Commission (SEC).

To the extent that the fund's assets are traded in other markets on days when the fund is not open for business, the value of the fund's assets may be affected on those days. In addition, trading in some of the fund's assets may not occur on days when the fund is open for business.

NAV is calculated using the values of the underlying central funds in which the fund invests. Shares of underlying central funds are valued at their respective NAVs. Other assets are valued primarily on the basis of market quotations, official closing prices, or information furnished by a pricing service. Certain short-term securities are valued on the basis of amortized cost. If market quotations, official closing prices, or information furnished by a pricing service are not readily available or, in the Adviser's opinion, are deemed unreliable for a security, then that security will be fair valued in good faith by the Adviser in accordance with applicable fair value pricing policies. For example, if, in the Adviser's opinion, a security's value has been materially affected by events occurring before a fund's pricing time but after the close of the exchange or market on which the security is principally traded, then that security will be fair valued in good faith by the Adviser in accordance with applicable fair value pricing

policies. Fair value pricing will be used for high yield debt securities when available pricing information is determined to be stale or for other reasons not to accurately reflect fair value.

Arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume before a fund calculates its NAV. These arbitrage opportunities may enable short-term traders to dilute the NAV of long-term investors. Securities trading in overseas markets present time zone arbitrage opportunities when events affecting portfolio security values occur after the close of the overseas markets but prior to the close of the U.S. market. Fair valuation of a fund's portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of NAV by short-term traders.

Policies regarding excessive trading may not be effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts.

Fair value pricing is based on subjective judgments and it is possible that the fair value of a security may differ materially from the value that would be realized if the security were sold.

Shareholder Information

Additional Information about the Purchase and Sale of Shares

As used in this prospectus, the term “shares” generally refers to the shares offered through this prospectus.

Frequent Purchases and Redemptions

The fund may reject for any reason, or cancel as permitted or required by law, any purchase orders, including transactions deemed to represent excessive trading, at any time.

Excessive trading of fund shares can harm variable product owners in various ways, including reducing the returns to long-term variable product owners by increasing costs paid by the fund (such as brokerage commissions or spreads paid to dealers who sell money market instruments), disrupting portfolio management strategies, and diluting the value of the shares in cases in which fluctuations in markets are not fully priced into the fund’s NAV.

Purchase and redemption transactions submitted to the fund by Permitted Accounts reflect the transactions of multiple variable product owners whose individual transactions are often not disclosed to the fund, making it difficult to determine whether an individual variable product owner is engaging in excessive trading. Excessive trading in Permitted Accounts is likely to go undetected by the fund and may increase costs to the fund and disrupt its portfolio management.

The fund reserves the right at any time to restrict purchases or impose conditions that are more restrictive on excessive trading than those stated in this prospectus.

Excessive Trading Policy

The Board of Trustees has adopted policies designed to discourage excessive trading of fund shares. Under these policies, insurance companies will be permitted to apply the fund’s excessive trading policy (described below), or their own excessive trading policy if approved by the Adviser. In these cases, the fund will typically not request or receive individual account data but will rely on the insurance company to monitor trading activity in good faith in accordance with its or the fund’s policies. Reliance on insurance companies increases the risk that excessive trading may go undetected. For other insurance companies, the fund will monitor trading activity at the Permitted Account level to attempt to identify disruptive trades. The fund may request variable product owner transaction information, as frequently as daily, from any insurance company at any time, and may apply the fund’s policy to transactions that exceed thresholds established by the Board of Trustees. The fund may prohibit purchases of fund shares by an insurance company or by some or all of any Permitted Accounts. There is no assurance that the Adviser will request data with sufficient frequency to detect or deter excessive trading in Permitted Accounts effectively.

Under the excessive trading policy, excessive trading activity is measured by the number of roundtrip transactions in a variable product owner’s account. A roundtrip transaction occurs when a variable product owner sells fund shares within 30 days of the purchase date.

For purposes of the fund’s policy, exchanges are treated as a sale and a purchase.

Variable product owners with two or more roundtrip transactions in a single fund within a rolling 90-day period will be blocked from making additional purchases of the fund or limited to trading by U.S. mail for 85 days. Variable product owners with four or more roundtrip transactions across all Fidelity® funds within any rolling 12-month period will be blocked from making additional purchases for at least 85 days or limited to trading by U.S. mail for 12 months across all Fidelity® funds. Any roundtrip within 12 months of the expiration of a multi-fund block or U.S. mail restriction will initiate another multi-fund block or a 12-month U.S. mail restriction. Repeat offenders may be subject to long-term or permanent U.S. mail restrictions on purchases in any account under the variable product owner’s control at any time. In addition to enforcing these roundtrip limitations, the fund may in its discretion restrict, reject, or cancel any purchases that, in FMR’s opinion, may be disruptive to the management of the fund or otherwise not be in the fund’s interests. The administration and effectiveness of these sanctions will in large part depend on the rights, ability, and willingness of insurance companies to impose the sanctions.

The fund’s excessive trading policy does not apply to transactions of \$5,000 or less, or transactions which have been demonstrated to the fund to be (i) systematic withdrawal and/or contribution programs, (ii) mandatory retirement distributions, (iii) transactions initiated by a retirement plan sponsor, sponsors of certain other employee benefit plans or qualified fund of fund(s), or (iv) transactions in certain company-owned accounts. A qualified fund of fund(s) must demonstrate that it has an investment strategy coupled with policies designed to control frequent trading that have been determined by the fund’s Treasurer to be reasonably effective.

The fund’s policies are separate from any insurance company policies and procedures applicable to variable product owner transactions. The variable annuity or variable life insurance product prospectus will contain a description of the insurance company’s policies and procedures, if any, with respect to excessive trading. If you purchase or sell fund shares through an insurance company, you may wish to contact the insurance company to determine the policies applicable to your account.

The fund’s Treasurer is authorized to suspend the fund’s policies during periods of severe market turbulence or national emergency. The fund reserves the right to modify its policies at any time without prior notice.

The fund does not knowingly accommodate frequent purchases and redemptions of fund shares by investors, except to the extent permitted by the policies described above.

As described in “Valuing Shares,” the fund also uses fair value pricing to help reduce arbitrage opportunities available to short-term traders. There is no assurance that the fund’s excessive trading policy will be effective, or will successfully detect or deter excessive or disruptive trading.

Shareholder Information – continued

Buying Shares

Eligibility

Shares are generally available only to investors residing in the United States.

There is no minimum balance or purchase minimum for fund shares.

Price to Buy

The price to buy one share is its NAV. Shares are sold without a sales charge.

Shares will be bought at the NAV next calculated after an order is received in proper form.

The fund has authorized certain intermediaries to accept orders to buy shares on its behalf. When authorized intermediaries receive an order in proper form, the order is considered as being placed with the fund, and shares will be bought at the NAV next calculated after the order is received by the authorized intermediaries. Orders by qualified funds of funds, including mutual funds for which Fidelity serves as investment manager, will be treated as received by the fund at the same time that the corresponding orders are received in proper form by the funds of funds.

The fund may stop offering shares completely or may offer shares only on a limited basis, for a period of time or permanently.

Under applicable anti-money laundering rules and other regulations, purchase orders may be suspended, restricted, or canceled and the monies may be withheld.

Selling Shares

The price to sell one share is its NAV.

Shares will be sold at the NAV next calculated after an order is received in proper form. Normally, redemptions will be processed by the next business day, but it may take up to seven days to pay the redemption proceeds if making immediate payment would adversely affect the fund.

The fund has authorized certain intermediaries to accept orders to sell shares on its behalf. When authorized intermediaries receive an order in proper form, the order is considered as being placed with the fund, and shares will be sold at the NAV next calculated after the order is received by the authorized intermediaries. Orders by qualified funds of funds, including mutual funds for which Fidelity serves as investment manager, will be treated as received by the fund at the same time that the corresponding orders are received in proper form by the funds of funds.

See “Policies Concerning the Redemption of Fund Shares” below for additional redemption information.

Redemptions may be suspended or payment dates postponed when the NYSE is closed (other than weekends or holidays), when trading on the NYSE is restricted, or as permitted by the SEC.

Redemption proceeds may be paid in securities or other property rather than in cash if the Adviser determines it is in the best interests of the fund.

Under applicable anti-money laundering rules and other regulations, redemption requests may be suspended, restricted, canceled, or processed and the proceeds may be withheld.

The fund offers its shares to Permitted Accounts that may be affiliated or unaffiliated with FMR and/or each other. The fund currently does not foresee any disadvantages to variable product owners arising out of the fact that the fund offers its shares to separate accounts of insurance companies that offer variable annuity and variable life insurance products (as well as other Permitted Accounts). Nevertheless, the Board of Trustees that oversees the fund intends to monitor events to identify any material irreconcilable conflicts that may possibly arise and to determine what action, if any, should be taken in response.

Variable product owners may be asked to provide additional information in order for Fidelity to verify their identities in accordance with requirements under anti-money laundering regulations. Accounts may be restricted and/or closed, and the monies withheld, pending verification of this information or as otherwise required under these and other federal regulations.

Policies Concerning the Redemption of Fund Shares

If your account is held directly with a fund, the length of time that a fund typically expects to pay redemption proceeds depends on the method you have elected to receive such proceeds. A fund typically expects to make payment of redemption proceeds by wire, automated clearing house (ACH) or by issuing a check by the next business day following receipt of a redemption order in proper form. Proceeds from the periodic and automatic sale of shares of a Fidelity® money market fund that are used to buy shares of another Fidelity® fund are settled simultaneously.

If your account is held through an intermediary, the length of time that a fund typically expects to pay redemption proceeds depends, in part, on the terms of the agreement in place between the intermediary and a fund. For redemption proceeds that are paid either directly to you from a fund or to your intermediary for transmittal to you, a fund typically expects to make payments by wire, by ACH or by issuing a check on the next business day following receipt of a redemption order in proper form from the intermediary by a fund. Redemption orders that are processed through investment professionals that utilize the National Securities Clearing Corporation will generally settle one to three business days following receipt of a redemption order in proper form.

As noted elsewhere, payment of redemption proceeds may take longer than the time a fund typically expects and may take up to seven days from the date of receipt of the redemption order as permitted by applicable law.

Redemption Methods Available. Generally a fund expects to pay redemption proceeds in cash. To do so, a fund typically expects to satisfy redemption requests either by using available cash (or cash equivalents) or by selling portfolio securities. On a less regular basis, a fund may also satisfy redemption requests by utilizing one or more of the following sources, if permitted: borrowing from another Fidelity® fund; drawing on an available line or lines of credit from a

bank or banks; or using reverse repurchase agreements. These methods may be used during both normal and stressed market conditions.

In addition to paying redemption proceeds in cash, a fund reserves the right to pay part or all of your redemption proceeds in readily marketable securities instead of cash (redemption in-kind). Redemption in-kind proceeds will typically be made by delivering the selected securities to the redeeming shareholder within seven days after the receipt of the redemption order in proper form by a fund.

Dividends and Capital Gain Distributions

The fund earns dividends, interest, and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions.

The fund normally pays dividends in February and December, and capital gain distributions in February. The fund also normally pays capital gain distributions in December, if necessary, to ensure that the fund is not subject to a fund-level excise tax.

Any dividends and capital gain distributions will be automatically reinvested in additional shares.

Fund Services

Fund Management

The fund is a mutual fund, an investment that pools shareholders' money and invests it toward a specified goal.

Adviser

FMR. The Adviser is the fund's manager. The address of the Adviser is 245 Summer Street, Boston, Massachusetts 02210.

As of January 1, 2020, the Adviser had approximately \$2.6 trillion in discretionary assets under management, and as of December 31, 2019, approximately \$3.2 trillion when combined with all of its affiliates' assets under management.

As the manager, the Adviser has overall responsibility for directing the fund's investments and handling its business affairs.

Sub-Adviser(s)

FMR Investment Management (UK) Limited (FMR UK), at 1 St. Martin's Le Grand, London, EC1A 4AS, United Kingdom, serves as a sub-adviser for the fund. As of December 31, 2019, FMR UK had approximately \$23.9 billion in discretionary assets under management. FMR UK may provide investment research and advice on issuers based outside the United States and may also provide investment advisory services for the fund. FMR UK is an affiliate of the Adviser.

Fidelity Management & Research (Hong Kong) Limited (FMR H.K.), at Floor 19, 41 Connaught Road Central, Hong Kong, serves as a sub-adviser for the fund. As of December 31, 2019, FMR H.K. had approximately \$16.5 billion in discretionary assets under management. FMR H.K. may provide investment research and advice on issuers based outside the United States and may also provide investment advisory services for the fund. FMR H.K. is an affiliate of the Adviser.

Fidelity Management & Research (Japan) Limited (FMR Japan), at Kamiyacho Prime Place, 1-17, Toranomon-4-Chome, Minato-ku, Tokyo, Japan, serves as a sub-adviser for the fund. FMR Japan was organized in 2008 to provide investment research and advice on issuers based outside the United States. FMR Japan may provide investment research and advice on issuers based outside the United States and may also provide investment advisory services for the fund. FMR Japan is an affiliate of the Adviser.

Portfolio Manager(s)

Ashley Fernandes is co-manager of the fund, which he has managed since January 2020. He also manages other funds. Since joining Fidelity Investments in 2013, Mr. Fernandes has worked as a global energy analyst, research analyst, and portfolio manager.

Steven Kaye is co-manager of the fund, which he has managed since January 2014. He also manages other funds. Since joining Fidelity Investments in 1985, Mr. Kaye has worked as a research analyst, assistant director of equity research, and portfolio manager.

Brian Lempel is co-manager of the fund, which he has managed since January 2014. He also manages other funds. Since joining Fidelity Investments in 2004, Mr. Lempel has worked as a research analyst and portfolio manager.

John Mirshekari is co-manager of the fund, which he has managed since October 2016. He also manages other funds. Since joining Fidelity Investments in 2003, Mr. Mirshekari has worked as a research analyst and portfolio manager.

Ford O'Neil is co-manager of the fund, which he has managed since July 2015 and, prior to that, from October 2001 to January 2015. He also manages other funds. Since joining Fidelity Investments in 1989, Mr. O'Neil has worked as a research analyst and portfolio manager.

Melissa Reilly is co-manager of the fund, which she has managed since January 2020. She also manages other funds. Since joining Fidelity Investments in 2004, Ms. Reilly has worked as a chief investment officer and portfolio manager.

Jody Simes is co-manager of the fund, which he has managed since November 2019. He also manages other funds. Since joining Fidelity Investments in 1993, Mr. Simes has worked as an analyst, global sector leader, and portfolio manager.

Douglas Simmons is co-manager of the fund, which he has managed since January 2014. He also manages other funds. Since joining Fidelity Investments in 2003, Mr. Simmons has worked as a portfolio manager.

Pierre Sorel is co-manager of the fund, which he has managed since January 2014. He also manages other funds. Since joining Fidelity Investments in 1998, Mr. Sorel has worked as an equity research analyst and portfolio manager.

Nicola Stafford is co-manager of the fund, which she has managed since August 2017. She also manages other funds. Since joining Fidelity Investments in 2001, Ms. Stafford has worked as a research analyst and portfolio manager.

Robert Stansky is co-manager of the fund, which he has managed since January 2014. He also manages other funds. Since joining Fidelity Investments in 1983, Mr. Stansky has worked as a research analyst and portfolio manager.

The statement of additional information (SAI) provides additional information about the compensation of, any other accounts managed by, and any fund shares held by the portfolio manager(s).

From time to time a manager, analyst, or other Fidelity employee may express views regarding a particular company, security, industry, or market sector. The views expressed by any such person are the views of only that individual as of the time expressed and do not necessarily represent the views of Fidelity or any other person in the Fidelity organization. Any such views are subject to change at any time based upon market or other conditions and Fidelity disclaims any responsibility to update such views. These views may not be relied on as investment advice and, because investment decisions for a Fidelity® fund are based on numerous factors, may not be relied on as an indication of trading intent on behalf of any Fidelity® fund.

Advisory Fee(s)

The fund pays a management fee to the Adviser. The management fee is calculated and paid to the Adviser every month. The fee is

calculated by adding a group fee rate to an individual fund fee rate, dividing by twelve, and multiplying the result by the fund's average net assets throughout the month.

The group fee rate is based on the average net assets of a group of mutual funds advised by FMR. This rate cannot rise above 0.52%, and it drops as total assets under management increase.

For December 2019, the group fee rate was 0.23%. The individual fund fee rate is 0.15%.

The total management fee for the fiscal year ended December 31, 2019, was 0.39% of the fund's average net assets. Because the fund's management fee rate may fluctuate, the fund's management fee may be higher or lower in the future.

The Adviser pays FMR UK, FMR H.K., and FMR Japan for providing sub-advisory services.

The basis for the Board of Trustees approving the management contract and sub-advisory agreements for the fund is available in the fund's semi-annual report for the fiscal period ended June 30, 2019 and in the fund's annual report for the fiscal period ended December 31, 2019.

From time to time, the Adviser or its affiliates may agree to reimburse or waive certain fund expenses while retaining the ability to be repaid if expenses fall below the specified limit prior to the end of the fiscal year.

Reimbursement or waiver arrangements can decrease expenses and boost performance.

Fund Distribution

The fund is composed of multiple classes of shares. All classes of the fund have a common investment objective and investment portfolio.

FDC distributes each class's shares.

Intermediaries may receive from the Adviser, FDC, and/or their affiliates compensation for their services intended to result in the sale of class shares. This compensation may take the form of:

- Distribution and/or service (12b-1) fees.
- Payments for additional distribution-related activities and/or shareholder services.
- Payments for educational seminars and training, including seminars sponsored by Fidelity, or by an intermediary.

These payments are described in more detail in this section and in the SAI.

Distribution and Service Plan(s)

Initial Class has adopted a Distribution and Service Plan pursuant to Rule 12b-1 under the Investment Company Act of 1940 (1940 Act) that recognizes that the Adviser may use its management fee revenues, as well as its past profits or its resources from any other source, to pay FDC for expenses incurred in connection with providing services intended to result in the sale of Initial Class shares

and/or support services that benefit variable product owners. The Adviser, directly or through FDC, may pay significant amounts to intermediaries that provide those services. Currently, the Board of Trustees of the fund has authorized such payments for Initial Class. Variable product owners should speak with their investment professionals to learn more about any payments their firms may receive from the Adviser, FDC, and/or their affiliates, as well as fees and/or commissions the investment professional charges. Variable product owners should also consult disclosures made by their investment professionals at the time of purchase.

Service Class has adopted a Distribution and Service Plan pursuant to Rule 12b-1 under the 1940 Act. Under the plan, Service Class is authorized to pay FDC a 12b-1 (service) fee as compensation for providing support services that benefit variable product owners. Service Class may pay this 12b-1 (service) fee at an annual rate of 0.25% of its average net assets, or such lesser amount as the Trustees may determine from time to time. Service Class currently pays FDC a 12b-1 (service) fee at an annual rate of 0.10% of its average net assets throughout the month. Service Class's 12b-1 (service) fee rate may be increased only when the Trustees believe that it is in the best interests of variable product owners to do so.

Service Class 2 has adopted a Distribution and Service Plan pursuant to Rule 12b-1 under the 1940 Act. Under the plan, Service Class 2 is authorized to pay FDC a 12b-1 (service) fee as compensation for providing support services that benefit variable product owners. Service Class 2 currently pays FDC a 12b-1 (service) fee at an annual rate of 0.25% of its average net assets throughout the month.

FDC may reallocate up to the full amount of these 12b-1 (service) fees to intermediaries, including its affiliates, for providing support services that benefit variable product owners.

If payments made by the Adviser to FDC or to intermediaries under Initial Class's Distribution and Service Plan were considered to be paid out of Initial Class's assets on an ongoing basis, they might increase the cost of a shareholder's investment and might cost a shareholder more than paying other types of sales charges.

Any fees paid out of Service Class's or Service Class 2's assets on an ongoing basis pursuant to a Distribution and Service Plan will increase the cost of a shareholder's investment and may cost a shareholder more than paying other types of sales charges.

In addition, each Service Class and Service Class 2 plan specifically recognizes that the Adviser may make payments from its management fee revenue, past profits, or other resources to FDC for expenses incurred in connection with providing services intended to result in the sale of Service Class and Service Class 2 shares and/or support services that benefit variable product owners, including payments of significant amounts made to intermediaries that provide those services. Currently, the Board of Trustees of the fund has authorized such payments for Service Class and Service Class 2. Variable product owners should speak with their investment professionals to learn more about any payments their firms may receive from the Adviser, FDC, and/or their affiliates, as well as fees and/or commissions the investment professional charges. Variable product

Fund Services – continued

owners should also consult disclosures made by their investment professionals at the time of purchase.

Appendix

Financial Highlights

Financial Highlights are intended to help you understand the financial history of fund shares for the past 5 years (or, if shorter, the period of operations). Certain information reflects financial results for a single share. The total returns in the table represent the rate

that an investor would have earned (or lost) on an investment in shares (assuming reinvestment of all dividends and distributions). The annual information has been audited by Deloitte & Touche LLP, independent registered public accounting firm, whose report, along with fund financial statements, is included in the annual report. Annual reports are available for free upon request.

Total from investment operations	3.95	(.77)	2.72	1.12	.10
Distributions from net investment income	(.32)	(.27)	(.27)	(.22)	(.26)
Distributions from net realized gain	(.86)	(.94)	(.46)	(.40)	(.50)
Total distributions	(1.18)	(1.21)	(.73)	(.62)	(.76)
Net asset value, end of period	\$ 19.55	\$ 16.78	\$ 18.76	\$ 16.77	\$ 16.27
Total Return ^{B,C}	24.51%	(4.22)%	16.43%	7.26%	.59%
Ratios to Average Net Assets ^{D,E}					
Expenses before reductions	.49%	.49%	.50%	.51%	.51%
Expenses net of fee waivers, if any	.49%	.49%	.50%	.51%	.51%
Expenses net of all reductions	.48%	.49%	.50%	.51%	.51%
Net investment income (loss)	1.81%	1.64%	1.56%	1.66%	1.54%
Supplemental Data					
Net assets, end of period (000 omitted)	\$ 240,746	\$ 206,293	\$ 231,977	\$ 209,201	\$ 212,589
Portfolio turnover rate ^F	41%	55%	45%	43%	54%

^A Calculated based on average shares outstanding during the period.

^B Total returns do not reflect charges attributable to your insurance company's separate account. Inclusion of these charges would reduce the total returns shown.

^C Total returns would have been lower if certain expenses had not been reduced during the applicable periods shown.

^D Fees and expenses of any underlying Fidelity Central Funds are not included in the Fund's expense ratio. The Fund indirectly bears its proportionate share of the expenses of any underlying Fidelity Central Funds. Based on their most recent shareholder report date, the expenses of any underlying non-money market Fidelity Central Funds were less than .005%.

^E Expense ratios reflect operating expenses of the class. Expenses before reductions do not reflect amounts reimbursed by the investment adviser or reductions from brokerage service arrangements or reductions from other expense offset arrangements and do not represent the amount paid by the class during periods when reimbursements or reductions occur. Expenses net of fee waivers reflect expenses after reimbursement by the investment adviser but prior to reductions from brokerage service arrangements or other expense offset arrangements. Expenses net of all reductions represent the net expenses paid by the class.

^F Amount does not include the portfolio activity of any underlying Fidelity Central Funds.

Additional Index Information

Fidelity Balanced 60/40 Composite IndexSM is a customized blend of unmanaged indexes, weighted as follows: S&P 500[®] Index - 60%; and Bloomberg Barclays U.S. Aggregate Bond Index - 40%.

S&P 500[®] Index is a market capitalization-weighted index of 500 common stocks chosen for market size, liquidity, and industry group representation to represent U.S. equity performance.

Notes

IMPORTANT INFORMATION ABOUT OPENING A NEW ACCOUNT

To help the government fight the funding of terrorism and money laundering activities, the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (USA PATRIOT ACT), requires all financial institutions to obtain, verify, and record information that identifies each person or entity that opens an account.

For variable product owners: When you open an account, you will be asked for your name, address, date of birth, and other information that will allow Fidelity to identify you. You may also be asked to provide documents that may help to establish your identity, such as your driver's license.

For insurance separate accounts: When you open an account, you will be asked for the name of the entity, its principal place of business and taxpayer identification number (TIN). You will be asked to provide information about the entity's control person and beneficial owners, and person(s) with authority over the account, including name, address, date of birth and social security number. You may also be asked to provide documents, such as drivers' licenses, articles of incorporation, trust instruments or partnership agreements and other information that will help Fidelity identify the entity.

You can obtain additional information about the fund. A description of the fund's policies and procedures for disclosing its holdings is available in its SAI and on Fidelity's web sites. The SAI also includes more detailed information about the fund and its investments. The SAI is incorporated herein by reference (legally forms a part of the prospectus). The fund's annual and semi-annual reports also include additional information. The fund's annual report includes a discussion of the fund's holdings and recent market conditions and the fund's investment strategies that affected performance.

For a free copy of any of these documents or to request other information or ask questions about the fund, call Fidelity at 1-877-208-0098. In addition, you may visit Fidelity's web site at institutional.fidelity.com for a free copy of a prospectus, SAI, or annual or semi-annual report or to request other information.

The SAI, the fund's annual and semi-annual reports and other related materials are available from the Electronic Data Gathering, Analysis, and Retrieval (EDGAR) Database on the SEC's web site (<http://www.sec.gov>). You can obtain copies of this information, after paying a duplicating fee, by sending a request by e-mail to publicinfo@sec.gov or by writing the Public Reference Section of the SEC, Washington, D.C. 20549-1520. You can also review and copy information about the fund, including the fund's SAI, at the SEC's Public Reference Room in Washington, D.C. Call 1-202-551-8090 for information on the operation of the SEC's Public Reference Room.

Investment Company Act of 1940, File Number, 811-07205

FDC is a member of the Securities Investor Protection Corporation (SIPC). You may obtain information about SIPC, including the SIPC brochure, by visiting www.sipc.org or calling SIPC at 202-371-8300.
