¹⁰ Information is as of September 30, 2019.

2. The second paragraph in the "Price of shares" section of the statement of additional information is amended to read as follows:

The price you pay for shares, the offering price, is based on the net asset value per share, which is calculated once daily as of approximately 4 p.m. New York time, which is the normal close of trading on the New York Stock Exchange, each day the New York Stock Exchange is open. For days on which the New York Stock Exchange publishes in advance that it will close early (e.g., the day before July 4th, the day after Thanksgiving and Christmas Eve), orders received after the planned early close will be entered at the calculated offering price on the following business day. However, if the New York Stock Exchange makes an unscheduled close prior to 4 p.m. New York time, the fund's share price would still be determined as of 4 p.m. New York time on that business day. In such example, portfolio securities traded on the New York Stock Exchange would be valued at their closing price unless the investment adviser determines that a fair value adjustment is appropriate due to subsequent events. The New York Stock Exchange is currently closed on weekends and on the following holidays: New Year's Day; Martin Luther King Jr. Day; Presidents' Day; Good Friday; Memorial Day; Independence Day; Labor Day; Thanksgiving; and Christmas Day. Each share class of the fund has a separately calculated net asset value (and share price). The fund's investment adviser delivers the net asset value every day it is calculated to each insurance company that offers such fund as an underlying investment to its variable contracts by, for example, email, direct electronic transmission or facsimile or through the systems of the National Securities Clearing Corporation.

Statement of Additional Information Supplement October 1, 2019

(for Class 1, Class 1A, Class 2, Class 3 and Class 4 shares statement of additional information dated May 1, 2019, as supplemented to date)

1. The first three paragraphs under the sub-header "Securities lending activities" in the "Description of certain securities, investment techniques and risks" section of the statement of additional information are amended to read as follows:

Securities lending activities - Certain funds may lend portfolio securities to brokers, dealers or other institutions that provide cash or U.S. Treasury securities as collateral in an amount at least equal to the value of the securities loaned. While portfolio securities are on loan, the fund will continue to receive the equivalent of the interest and the dividends or other distributions paid by the issuer on the securities, as well as a portion of the interest on the investment of the collateral. Additionally, although the fund will not have the right to vote on securities while they are on loan, the fund has a right to consent on corporate actions and a right to recall each loan to vote on proposals, including proposals involving material events affecting securities loaned. The fund has delegated the decision to lend portfolio securities to the investment adviser. The adviser also has the discretion to consent on corporate actions and to recall securities on loan to vote. In the event the adviser deems a corporate action or proxy vote material, as determined by the adviser based on factors relevant to the fund, it will use reasonable efforts to recall the securities and consent to or vote on the matter.

Securities lending involves risks, including the risk that the loaned securities may not be returned in a timely manner or at all and/or the risk of a loss of rights in the collateral if a borrower or the lending agent defaults. These risks could be greater for non-U.S. securities. Additionally, the fund may lose money from the reinvestment of collateral received on loaned securities in investments that decline in value, default or do not perform as expected. The fund will make loans only to parties deemed by the fund's adviser to be in good standing and when, in the adviser's judgment, the income earned would justify the risks.

Citibank, N.A. ("Citibank") serves as securities lending agent for the fund. As the securities lending agent, Citibank administers the fund's securities lending program pursuant to the terms of a securities lending agent agreement entered into between the fund and Citibank. Under the terms of the agreement, Citibank is responsible for making available to approved borrowers securities from the fund's portfolio. Citibank is also responsible for the administration and management of the fund's securities lending program, including the preparation and execution of an agreement with each borrower governing the terms and conditions of any securities loan, ensuring that securities loans are properly coordinated and documented, ensuring that loaned securities are valued daily and that the corresponding required collateral is delivered by the borrowers, arranging for the investment of collateral received from borrowers, and arranging for the return of loaned securities to the fund in accordance with the fund's instructions or at loan termination. As compensation for its services, Citibank receives a portion of the amount earned by the fund for lending securities.

2. The table under the heading "Portfolio manager fund holdings and management of other accounts" in the "Management of the Series" section is amended solely with respect to the fund listed below to read as follows. Except as noted below, footnotes to the table remain unchanged.

Portfolio manager	Number of other registered investment companies (RICs) for which portfolio manager is a manager (assets of RICs in billions) ¹		of po inve vehicl for whic manager i (asset	Number of other pooled investment vehicles (PIVs) for which portfolio manager is a manager (assets of PIVs in billions) ¹		Number of other accounts for which portfolio manager is a manager (assets of other accounts in billions) ^{1,2}

⁹ The advisory fee of one of these accounts (representing \$0.15 in total assets) is based partially on their investment results.

Statement of Additional Information Supplement July 1, 2019

The third paragraph under the heading "Administrative services" in the "Management of the Series" section of the statement of additional information is amended to read as follows:

The Administrative Services Agreement between the fund and the investment adviser provides the fund the ability to charge an administrative services fee of 0.05% for all share classes. The investment adviser receives an administrative services fee at the annual rate of .03% of the average daily net assets of the fund (which could be increased as noted above) for its provision of administrative services. Administrative services fees are paid monthly and accrued daily.

Keep this supplement with your statement of additional information.

Certain investment limitations and guidelines

The following limitations and guidelines are considered at the time of purchase, under normal circumstances, and are based on a percentage of each fund's net assets (excluding, for the avoidance of doubt, collateral held in connection with securities lending activities) unless otherwise noted. This summary is not intended to reflect all of the funds' investment limitations.

Global Growth Fund

General

· The fund invests at least 65% of its assets in common stocks.

Investing outside the U.S.

- · Under normal market conditions, the fund invests at least 40% of its net assets in issuers domiciled outside the United States. If market conditions are not deemed favorable by the fund's investment adviser, the fund will invest at least 30% of its net assets in issuers domiciled outside the United States.
- In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley
 Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains
 principal corporate offices, conducts its principal operations and/or generates revenues.

Debt instruments

• The fund may invest up to 10% of its assets in straight debt securities (i.e., debt securities that do not have equity conversion or purchase rights) rated Baa1 or below and BBB+ or below by NRSROs or in unrated securities that are determined to be of equivalent quality by the fund's investment adviser. The fund currently intends to look to the ratings from Moody's Investors Services, Standard & Poor's Ratings Services and Fitch Ratings. If rating agencies differ, securities will be considered to have received the highest of these ratings, consistent with the fund's investment policies.

Global Small Capitalization Fund

Equity securities

• Normally, the fund invests at least 80% of its assets in equity securities of companies with small market capitalizations, measured at the time of purchase. However, the fund's holdings of small capitalization stocks may fall below the 80% threshold due to subsequent market action. The investment adviser currently defines "small market capitalization" companies to be companies with market capitalizations of \$6.0 billion or less. The investment adviser has periodically re-evaluated and adjusted this definition and may continue to do so in the future.

Investing outside the U.S.

- Under normal market conditions, the fund invests at least 40% of its assets in issuers domiciled outside the United States. If market conditions are not deemed favorable by the fund's investment adviser, the fund will invest at least 30% of its net assets in issuers domiciled outside the United States.
- In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley
 Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains
 principal corporate offices, conducts its principal operations and/or generates revenues.

Debt instruments

• The fund may invest up to 10% of its assets in straight debt securities (i.e., debt securities that do not have equity conversion or purchase rights) rated Baa1 or below and BBB+ or below by NRSROs, or unrated but determined to be of equivalent quality by the fund's investment adviser. The fund currently intends to look to the ratings from Moody's Investors Services, Standard & Poor's Ratings Services and Fitch Ratings. If rating agencies differ, securities will be considered to have received the highest of these ratings, consistent with the fund's investment policies.

Growth Fund

General

· The fund invests at least 65% of its assets in common stocks.

Investing outside the U.S.

- · The fund may invest up to 25% of its assets in securities of issuers domiciled outside the United States.
- · In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations and/or generates revenues.

Debt instruments

• The fund may invest up to 10% of its assets in straight debt securities (i.e., debt securities that do not have equity conversion or purchase rights) rated Ba1 or below and BB+ or below by NRSROs, or unrated but determined to be of equivalent quality by the fund's investment adviser. The fund currently intends to look to the ratings from Moody's Investors Services, Standard & Poor's Ratings Services and Fitch Ratings. If rating agencies differ, securities will be considered to have received the highest of these ratings, consistent with the fund's investment policies.

International Fund

General

· The fund invests at least 65% of its assets in common stocks of companies domiciled outside the United States.

Debt instruments

• The fund may invest up to 5% of its assets in straight debt securities (i.e., debt securities that do not have equity conversion or purchase rights) rated Baa1 or below and BBB+ or below by NRSROs or in unrated securities that are determined to be of equivalent quality by the fund's investment adviser. The fund currently intends to look to the ratings from Moody's Investors Services, Standard & Poor's Ratings Services and Fitch Ratings. If rating agencies differ, securities will be considered to have received the highest of these ratings, consistent with the fund's investment policies.

Investing outside the U.S.

In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley
Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains
principal corporate offices, conducts its principal operations and/or generates revenues.

New World Fund

General

- · The fund invests primarily in stocks of companies with significant exposure to countries with developing economies and/or markets.
- · Under normal market conditions, the fund invests at least 35% of its assets in equity and debt securities of issuers primarily based in qualified countries which have developing economies and/or markets.

Equity securities

• The fund may invest its assets in equity securities of any company, regardless of where it is based, if the adviser has determined that a significant portion of its assets or revenues (generally 20% or more) is attributable to developing countries.

Debt instruments

- The fund may invest in straight debt securities (i.e., debt securities that do not have equity conversion or purchase rights) of issuers primarily based in qualified countries which
 have developing economies and/or markets, or issuers that the fund's investment adviser determines have a significant portion of their assets or revenues (generally
 20% or more) attributable to developing countries.
- The fund may invest in straight debt securities (i.e., debt securities that do not have equity conversion or purchase rights) rated Ba1 or below and BB+ or below by NRSROs, or unrated but determined to be of equivalent quality by the fund's investment adviser. The fund currently intends to look to the ratings from Moody's Investors Services, Standard & Poor's Ratings Services and Fitch Ratings. If rating agencies differ, securities will be considered to have received the highest of these ratings, consistent with the fund's investment policies.

Investing outside the U.S.

In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley
Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains
principal corporate offices, conducts its principal operations and/or generates revenues.

Blue Chip Income and Growth Fund

General

• The fund seeks to produce income exceeding the average yield on U.S. stocks generally (as represented by the average yield on the S&P 500 Index) and to provide an opportunity for growth of principal consistent with sound common stock investing.

Equity securities

- · Normally, the fund invests at least 80% of its assets in common stocks of "blue-chip" companies. The investment adviser currently defines "blue chip" companies as larger, more established, dividend-paying companies domiciled in the United States with market capitalizations greater than \$4.0 billion. The investment adviser has periodically re-evaluated and adjusted this definition and may continue to do so in the future.
- · The fund ordinarily invests at least 90% of equity assets in the stock of companies in business for five or more years (including predecessor companies).
- · The fund ordinarily invests at least 90% of equity assets in the stock of companies that pay regular dividends.
- · The fund ordinarily invests at least 90% of its equity assets in the stock of companies whose debt securities are rated at least investment grade.
- · The fund will not invest in private placements of stock of companies.
- · The fund invests, under normal market conditions, at least 90% of its assets in equity securities.

Investing outside the U.S.

- · The fund may invest up to 10% of assets in equity securities of larger non-U.S. companies so long as they are listed or traded in the United States.
- · In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations and/or generates revenues.

Global Growth and Income Fund

General

The fund seeks to make your investment grow over time and provide you with current income by investing primarily in stocks of well-established companies located around the world.

Investing outside the U.S.

- · Under normal market conditions, the fund invests at least 40% of its net assets in issuers domiciled outside the United States. If market conditions are not deemed favorable by the fund's investment adviser, the fund will invest at least 30% of its net assets in issuers domiciled outside the United States.
- For temporary defensive purposes, the fund may invest principally or entirely in securities that are denominated in U.S. dollars or whose issuers are domiciled in the United States. Securities denominated in U.S. dollars include American Depositary Receipts, certain European Depositary Receipts and Global Depositary Receipts.
- In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations and/or generates revenues.

Debt instruments

- The fund may invest up to 10% of its assets in straight debt securities (i.e., debt securities that do not have equity conversion or purchase rights) rated Baa1 or below and BBB+ or below by NRSROs, or unrated but determined to be of equivalent quality by the fund's investment adviser. The fund currently intends to look to the ratings from Moody's Investors Services, Standard & Poor's Ratings Services and Fitch Ratings. If rating agencies differ, securities will be considered to have received the highest of these ratings, consistent with the fund's investment policies.
- The fund may invest up to 5% of its assets in straight debt securities (i.e., debt securities that do not have equity conversion or purchase rights) rated Ba1 or below and BB+ or below by NRSROs, or unrated but determined to be of equivalent quality by the fund's investment adviser.

Growth-Income Fund

General

· The fund invests primarily in common stocks or other securities that demonstrate the potential for appreciation and/or dividends.

Investing outside the U.S.

- · The fund may invest up to 15% of its assets in securities of issuers domiciled outside the United States.
- In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations and/or generates revenues.

Debt instruments

• The fund may invest up to 5% of its assets in straight debt securities rated Ba1 or below and BB+ or below by NRSROs, or unrated but determined to be of equivalent quality by the fund's investment adviser. The fund currently intends to look to the ratings from Moody's Investors Services, Standard & Poor's Ratings Services and Fitch Ratings. If rating agencies differ, securities will be considered to have received the highest of these ratings, consistent with the fund's investment policies.

International Growth and Income Fund

General

• The fund may invest up to 20% of its assets in securities of issuers domiciled in the United States. However, the fund has no current intention of investing more than 10% of its assets in securities of issuers domiciled in the United States (excluding cash equivalents of U.S. issuers) and issuers whose securities are primarily listed on U.S. securities exchanges. The fund currently intends to invest at least 90% of its assets in securities of issuers domiciled outside the United States whose securities are primarily listed on exchanges outside the United States, and cash and cash equivalents (including cash equivalents issued by U.S. issuers). The fund may invest a portion of its assets in companies located in emerging and developing countries.

Investing outside the U.S.

In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley
Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains
principal corporate offices, conducts its principal operations and/or generates revenues.

Debt instruments

• The fund may invest up to 5% of its assets in straight debt securities (i.e., debt securities that do not have equity conversion or purchase rights) rated Ba1 or below and BB+ or below by NRSROs, or unrated but determined to be of equivalent quality by the fund's investment adviser.

Capital Income Builder

Income producing securities

· The fund will invest at least 90% of its assets in income-producing securities.

Equity securities

 \cdot The fund will invest at least 50% of its assets in equity securities.

Debt instruments

• The fund may invest up to 5% of its assets in straight debt securities (i.e., debt securities that do not have equity conversion or purchase rights) rated Ba1 or below and BB+ or below by National Recognized Statistical Rating Organizations designated by the fund's investment adviser, or unrated but determined by the fund's investment adviser to be of equivalent quality. The fund currently intends to look to the ratings from Moody's Investors Service, Standard & Poor's Ratings Services and Fitch Ratings. If rating agencies differ, securities will be considered to have received the highest of these ratings, consistent with the fund's investment policies.

Investing outside the U.S.

- · The fund may invest up to 50% of its assets in securities of issuers domiciled outside the United States.
- · In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations and/or generates revenues.

Asset Allocation Fund

General

· Under normal market conditions, the fund generally invests 40% to 80% of its assets in equity securities; 20% to 50% in debt securities; and 0% to 40% in money market instruments and cash.

Debt instruments

• Up to 25% of the fund's debt assets may be invested in straight debt securities (i.e., debt securities that do not have equity conversion or purchase rights) rated Ba1 or below and BB+ or below by NRSROs, or unrated but determined to be of equivalent quality by the fund's investment adviser. The fund currently intends to look to the ratings from Moody's Investors Services, Standard & Poor's Ratings Services and Fitch Ratings. If rating agencies differ, securities will be considered to have received the highest of these ratings, consistent with the fund's investment policies.

Investing outside the U.S.

- · The fund may invest up to 15% of its assets in equity securities of issuers domiciled outside the United States.
- · The fund may invest up to 5% of its assets in debt securities of issuers domiciled outside the United States.
- In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations and/or generates revenues.

Global Balanced Fund

Equity securities

· The fund invests at least 45% of the value of its assets in equity investments.

Investing outside the U.S.

- · Under normal market conditions, the fund invests at least 40% of its net assets in issuers domiciled outside the United States. If market conditions are not deemed favorable by the fund's investment adviser, the fund will invest at least 30% of its net assets in issuers domiciled outside the United States.
- In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations and/or generates revenues.

Debt instruments

- The fund invests at least 30% of the value of its assets in debt securities (including money market instruments). These will consist of investment-grade securities (rated Baa3 or better or BBB— or better by NRSROs or unrated but determined to be of equivalent quality by the fund's investment adviser). The fund currently intends to look to the ratings from Moody's Investors Services, Standard & Poor's Ratings Services and Fitch Ratings. If rating agencies differ, securities will be considered to have received the highest of these ratings, consistent with the fund's investment policies.
- The fund may also invest up to 5% of its assets in lower quality, higher yielding debt securities including those convertible into common stocks (rated Ba1 or below and BB+ or below by NRSROs or unrated but determined to be of equivalent quality by the fund's investment adviser).

Bond Fund

General

- · Normally, the fund invests at least 80% of its assets in bonds and other debt securities. For purposes of this investment guideline, investments may be represented by derivative instruments, such as futures contracts and swap agreements.
- · The fund may invest up to 20% of its assets in preferred stocks, including convertible and nonconvertible preferred stocks.
- The fund may not purchase equity securities directly, other than certain convertible securities. The fund may retain up to 5% of its assets in common stock, warrants and rights received in conjunction with, or in exchange for, debt securities.

Debt instruments

- · For purposes of the above limits, bonds include any debt instrument including corporate bank loans and cash equivalents, and include nonvoting, nonconvertible preferred securities.
- The fund invests at least 35% of its assets in debt securities (including cash and cash equivalents) rated A3 or better or A- or better by NRSROs or in unrated securities that are determined to be of equivalent quality by the fund's investment adviser. The fund currently intends to look to the ratings from Moody's Investors Services, Standard & Poor's Ratings Services and Fitch Ratings. If rating agencies differ, securities will be considered to have received the highest of these ratings, consistent with the fund's investment policies.
- The fund invests at least 65% of its assets in debt securities (including cash and cash equivalents, securities issued and guaranteed by the U.S. and other governments, and securities backed by mortgages and other assets) that are rated investment grade (rated Baa3 or better or BBB- or better by NRSROs or in unrated securities that are determined to be of equivalent quality by the fund's investment adviser).
- The fund may invest up to 35% of its assets in debt securities rated Ba1 or below and BB+ or below by NRSROs, or unrated but determined to be of equivalent quality by the fund's investment adviser.

Investing outside the U.S.

- The fund may invest up to 20% of its assets in securities denominated in currencies other than the U.S. dollar. The fund may also invest in bonds of issuers domiciled outside the U.S. which are denominated in U.S. dollars.
- In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley
 Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains
 principal corporate offices, conducts its principal operations and/or generates revenues.

Corporate Bond Fund

Debt instruments

- Normally, the fund will invest at least 80% of its assets in corporate debt securities. For purposes of this limit, corporate debt securities include any corporate debt instrument, including, but not limited to, bank loans, covered bonds, hybrids (securities with equity and debt characteristics), certain preferred securities and commercial paper and other cash equivalents.
- The fund will invest at least 90% of its assets in debt securities, including money market instruments, cash and cash equivalents, rated Baa3 or better or BBB- or better by NRSROs designated by the fund's investment adviser or unrated but determined to be of equivalent quality by the fund's investment adviser at time of purchase. The fund currently intends to look to the ratings from Moody's Investors Services, Standard & Poor's Ratings Services and Fitch Ratings. If rating agencies differ, securities will be considered to have received the highest of these ratings, consistent with the fund's investment policies. The fund may invest in debt securities guaranteed or sponsored by the U.S. government by a NRSRO.

Investing outside the U.S.

In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley
Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains
principal corporate offices, conducts its principal operations and/or generates revenues.

Global Bond Fund

Debt instruments

- Normally, the fund invests at least 80% of its assets in bonds (for purposes of this limit, bonds include any debt instrument including corporate bank loans and cash
 equivalents and may include certain preferred securities). For purposes of this investment guideline, investments may be represented by derivative instruments, such as
 futures contracts and swap agreements.
- Normally, the fund's debt obligations consist substantially of investment-grade bonds (rated Baa3 or better or BBB- or better by NRSROs, or unrated but determined to be of
 equivalent quality by the fund's investment adviser). The fund currently intends to look to the ratings from Moody's Investors Services, Standard & Poor's Ratings
 Services and Fitch Ratings. If rating agencies differ, securities will be considered to have received the highest of these ratings, consistent with the fund's investment
 policies.
- The fund may invest up to 35% of its assets in debt securities rated Ba1 or below and BB+ or below by NRSROs, or unrated but determined to be of equivalent quality by the fund's investment adviser.

Investing outside the U.S.

- · Under normal market conditions, the fund invests at least 40% of its net assets in issuers domiciled outside the United States. If market conditions are not deemed favorable by the fund's investment adviser, the fund will invest at least 30% of its net assets in issuers domiciled outside the United States.
- In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations and/or generates revenues.

High-Income Bond Fund

Debt instruments

- Normally, the fund invests at least 80% of its assets in bonds. For purposes of this limit, bonds include any debt instrument including corporate bank loans and cash
 equivalents, and may include certain preferred securities. For purposes of this investment guideline, investments may be represented by derivative instruments, such as
 futures contracts and swap agreements.
- The fund invests at least 65% of its assets in debt securities rated Ba1 or below or BB+ or below by NRSROs or in unrated securities that are determined to be of equivalent quality by the fund's investment adviser. The fund currently intends to look to the ratings from Moody's Investors Services, Standard & Poor's Ratings Services and Fitch Ratings. If rating agencies differ, securities will be considered to have received the lowest of these ratings, consistent with the fund's investment policies.

Equity and other securities

· The fund may invest up to 20% of its assets in equity securities, such as common and preferred stocks and convertible securities.

Investing outside the U.S.

• In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations and/or generates revenues.

Mortgage Fund

General

• Under normal market conditions, the fund invests at least 80% of its assets in mortgage-related securities, including, but not limited to, residential mortgage-backed securities and commercial mortgage-backed securities, federal agency debentures, contracts for future delivery of mortgage-related securities (such as to be announced (TBA) contracts and mortgage dollar rolls), and other securities collateralized by mortgage loans. Compliance with certain asset diversification requirements in the Internal Revenue Code applicable to insurance company separate accounts and their underlying funding vehicles may, at times, restrict the fund's ability to invest at least 80% of its assets in mortgage-related securities.

- The fund invests at least 80% of its assets in mortgage-related securities that are sponsored or guaranteed by the U.S. government, including securities issued by government sponsored entities and federal agencies and instrumentalities that are not backed by the full faith and credit of the U.S. government, and non-government mortgage-related securities that are rated in the Aaa or AAA category by NRSROs or unrated but determined to be of equivalent quality by the fund's investment adviser. The fund currently intends to look to the ratings from Moody's Investors Services, Standard & Poor's Ratings Services and Fitch Ratings. If rating agencies differ, securities will be considered to have received the highest of these ratings, consistent with the fund's investment policies.
- The fund may invest up to 5% of its assets in securities that are in the AA, Aa or A ratings category by NRSROs or unrated but determined to be of equivalent quality by the fund's investment adviser.
- · The fund may invest up to 10% of its assets in securities of issuers domiciled outside the United States; however, all such securities will be U.S. dollar denominated.

Investing outside the U.S.

- · The fund may purchase obligations of corporations or governmental entities outside the United States, provided those obligations are U.S. dollar-denominated and highly liquid.
- In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley
 Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains
 principal corporate offices, conducts its principal operations and/or generates revenues.

Ultra-Short Bond Fund

Debt instruments

- · Normally, the fund invests at least 80% of its assets in bonds and other debt securities. For purposes of this limit, debt securities include any debt instrument, including, but not limited to, commercial paper and other cash equivalents.
- The money market instruments in which the fund invests, such as commercial paper, commercial bank obligations and ultra-short-term debt securities, will generally be rated A-2 or better or P-2 or better by at least one NRSRO designated by the fund's investment adviser.

Maturity

- · The fund may only purchase instruments having remaining maturities of 397 days or less.
- · The fund maintains a dollar-weighted average portfolio maturity of 60 days or less.
- · The fund maintains the dollar-weighted average life of its portfolio at 120 days or less.
- For purposes of determining the weighted average maturity (but not the weighted average life) of the fund's portfolio, certain variable and floating rate obligations and put securities which may otherwise have stated or final maturities in excess of 397 days will be deemed to have remaining maturities equal to the period remaining until each next readjustment of the interest rate or until the fund is entitled to repayment or repurchase of the security.

Liquidity

· The fund may not acquire illiquid securities if, immediately after the acquisition, the fund would have invested more than 15% of its total assets in illiquid securities.

Investing outside the U.S.

- · The fund may purchase obligations of corporations or governmental entities outside the United States, provided those obligations are U.S. dollar-denominated and highly liquid.
- In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley
 Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains
 principal corporate offices, conducts its principal operations and/or generates revenues.

U.S. Government/AAA-Rated Securities Fund

General

• Normally, the fund invests at least 80% of its assets in securities guaranteed by the "full faith and credit" pledge of the U.S. government or debt securities that are rated Aaa or AAA by NRSROs or unrated but determined to be of equivalent quality by the fund's investment adviser. The fund currently intends to look to the ratings from Moody's Investors Services, Standard & Poor's Ratings Services and Fitch Ratings. If rating agencies differ, securities will be considered to have received the highest of these ratings, consistent with the fund's investment policies. For purposes of this investment guideline, investments may be represented by derivative instruments, such as futures contracts and swap agreements.

Investing outside the U.S.

- · The fund may purchase obligations of corporations or governmental entities outside the United States, provided those obligations are U.S. dollar-denominated and highly liquid.
- · In determining the domicile of an issuer, the fund's investment adviser will consider the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International, and may also take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations and/or generates revenues.

Description of certain securities, investment techniques and risks

The descriptions below are intended to supplement the material in the prospectus under "Investment objectives, strategies and risks." With respect to all funds, portfolio changes will be made without regard to the length of time a particular investment may have been held.

Equity securities — Certain funds may invest in equity securities. Equity securities represent an ownership position in a company. Equity securities held by the fund typically consist of common stocks. The prices of equity securities fluctuate based on, among other things, events specific to their issuers and market, economic and other conditions. For example, prices of these securities can be affected by financial contracts held by the issuer or third parties (such as derivatives) relating to the security or other assets or indices. Holders of equity securities are not creditors of the issuer. If an issuer liquidates, holders of equity securities are entitled to their pro rata share of the issuer's assets, if any, after creditors (including the holders of fixed income securities and senior equity securities) are paid.

There may be little trading in the secondary market for particular equity securities, which may adversely affect the fund's ability to value accurately or dispose of such equity securities. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may decrease the value and/or liquidity of equity securities.

The growth-oriented, equity-type securities generally purchased by certain of the funds may involve large price swings and potential for loss. To the extent the fund invests in income-oriented, equity-type securities, income provided by the fund may be reduced by changes in the dividend policies of, and the capital resources available at, the companies in which the fund invests.

Debt instruments — Debt securities, also known as "fixed income securities," are used by issuers to borrow money. Bonds, notes, debentures, asset-backed securities (including those backed by mortgages), and loan participations and assignments are common types of debt securities. Generally, issuers pay investors periodic interest and repay the amount borrowed either periodically during the life of the security and/or at maturity. Some debt securities, such as zero coupon bonds, do not pay current interest, but are purchased at a discount from their face values and their values accrete over time to face value at maturity. Some debt securities bear interest at rates that are not fixed, but that vary with changes in specified market rates or indices. The market prices of debt securities fluctuate depending on such factors as interest rates, credit quality and maturity. In general, market prices of debt securities decline when interest rates rise and increase when interest rates fall. These fluctuations will generally be greater for longer-term debt securities than for shorter-term debt securities. Prices of these securities can also be affected by financial contracts held by the issuer or third parties (such as derivatives) relating to the security or other assets or indices.

Lower rated debt securities, rated Ba1/BB+ or below by Nationally Recognized Statistical Rating Organizations, are described by the rating agencies as speculative and involve greater risk of default or price changes due to changes in the issuer's creditworthiness than higher rated debt securities, or they may already be in default. Such securities are sometimes referred to as "junk bonds" or high yield bonds. The market prices of these securities may fluctuate more than higher quality securities and may decline significantly in periods of general economic difficulty. It may be more difficult to dispose of, and to determine the value of, lower rated debt securities. Investment grade bonds in the ratings categories A or Baa/BBB also may be more susceptible to changes in market or economic conditions than bonds rated in the highest rating categories.

Certain additional risk factors relating to debt securities are discussed below:

Sensitivity to interest rate and economic changes — Debt securities may be sensitive to economic changes, political and corporate developments, and interest rate changes. In addition, during an economic downturn or a period of rising interest rates, issuers that are highly leveraged may experience increased financial stress that could adversely affect their ability to meet projected business goals, to obtain additional financing and to service their principal and interest payment obligations. Periods of economic change and uncertainty also can be expected to result in increased volatility of market prices and yields of certain debt securities and derivative instruments. For example, during the financial crisis of 2007-2009, the Federal Reserve implemented a number of economic policies that impacted, and may continue to impact, interest rates and the market. These policies, as well as potential actions by governmental entities both in and outside of the U.S., may expose fixed income markets to heightened volatility and may reduce liquidity for certain investments, which could cause the value of the funds' portfolio to decline.

Payment expectations — Debt securities may contain redemption or call provisions. If an issuer exercises these provisions in a lower interest rate market, the funds may have to replace the security with a lower yielding security, resulting in decreased income to investors. If the issuer of a debt security defaults on its obligations to pay interest or principal or is the subject of bankruptcy proceedings, the funds may incur losses or expenses in seeking recovery of amounts owed to them.

Liquidity and valuation — There may be little trading in the secondary market for particular debt securities, which may affect adversely the funds' ability to value accurately or dispose of such debt securities. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may decrease the value and/or liquidity of debt securities.

The investment adviser attempts to reduce the risks described above through diversification of the fund's portfolios and by credit analysis of each issuer, as well as by monitoring broad economic trends and corporate and legislative developments, but there can be no assurance that it will be successful in doing so.

Credit ratings for debt securities provided by rating agencies reflect an evaluation of the safety of principal and interest payments, not market value risk. The rating of an issuer is a rating agency's view of past and future potential developments related to the issuer and may not necessarily reflect actual outcomes. There can be a lag between the time of developments relating to an issuer and the time a rating is assigned and updated. The investment adviser considers these ratings of securities as one of many criteria in making its investment decisions.

Bond rating agencies may assign modifiers (such as +/-) to ratings categories to signify the relative position of a credit within the rating category. Investment policies that are based on ratings categories should be read to include any security within that category, without giving consideration to the modifier except where otherwise provided. See the Appendix to this statement of additional information for more information about credit ratings.

Securities with equity and debt characteristics — Certain securities have a combination of equity and debt characteristics. Such securities may at times behave more like equity than debt or vice versa.

Preferred stock — Preferred stock represents an equity interest in an issuer that generally entitles the holder to receive, in preference to common stockholders and the holders of certain other stocks, dividends and a fixed share of the proceeds resulting from a liquidation of the issuer. Preferred stocks may pay fixed or adjustable rates of return, and preferred stock dividends may be cumulative or non-cumulative and participating or non-participating. Cumulative dividend provisions require all or a portion of prior unpaid dividends to be paid before dividends can be paid to the issuer's common stockholders, while prior unpaid dividends on non-cumulative preferred stock are forfeited. Participating preferred stock may be entitled to a dividend exceeding the issuer's declared dividend in certain cases, while non-participating preferred stock is entitled only to the stipulated dividend. Preferred stock is subject to issuer-specific and market risks applicable generally to equity securities. As with debt securities, the prices and yields of preferred stocks often move with changes in interest rates and the issuer's credit quality. Additionally, a company's preferred stock typically pays dividends only after the company makes required payments to holders of its bonds and other debt. Accordingly, the price of preferred stock will usually react more strongly than bonds and other debt to actual or perceived changes in the issuing company's financial condition or prospects. Preferred stock of smaller companies may be more vulnerable to adverse developments than preferred stock of larger companies.

Convertible securities — A convertible security is a debt obligation, preferred stock or other security that may be converted, within a specified period of time and at a stated conversion rate, into common stock or other equity securities of the same or a different issuer. The conversion may occur automatically upon the occurrence of a predetermined event or at the option of either the issuer or the security holder. Under certain circumstances, a convertible security may also be called for redemption or conversion by the issuer after a particular date and at predetermined price specified upon issue. If a convertible security held by a certain fund is called for redemption or conversion, the fund could be required to tender the security for redemption, convert it into the underlying common stock, or sell it to a third party.

The holder of a convertible security is generally entitled to participate in the capital appreciation resulting from a market price increase in the issuer's common stock and to receive interest paid or accrued until the convertible security matures or is redeemed, converted or exchanged. Before conversion, convertible securities have characteristics similar to non-convertible debt or preferred securities, as applicable. Convertible securities rank senior to common stock in an issuer's capital structure and, therefore, normally entail less risk than the issuer's common stock. However, convertible securities may also be subordinate to any senior debt obligations of the issuer, and, therefore, an issuer's convertible securities may entail more risk than such senior debt obligations. Convertible securities usually offer lower interest or dividend yields than non-convertible debt securities of similar credit quality because of the potential for capital appreciation. In addition, convertible securities are often lower-rated securities.

Because of the conversion feature, the price of a convertible security will normally fluctuate in some proportion to changes in the price of the underlying asset, and, accordingly, convertible securities are subject to risks relating to the activities of the issuer and/or general market and economic conditions. The income component of a convertible security may cushion the security against declines in the price of the underlying asset but may also cause the price of the security to fluctuate based upon changes in interest rates and the credit quality of the issuer. As with a straight fixed income security, the price of a convertible security tends to increase when interest rates decline and decrease when interest rates rise. Like the price of a common

stock, the price of a convertible security also tends to increase as the price of the underlying stock rises and to decrease as the price of the underlying stock declines.

Hybrid securities — A hybrid security is a type of security that also has equity and debt characteristics. Like equities, which have no final maturity, a hybrid security may be perpetual. On the other hand, like debt securities, a hybrid security may be callable at the option of the issuer on a date specified at issue. Additionally, like common equities, which may stop paying dividends at virtually any time without violating any contractual terms or conditions, hybrids typically allow for issuers to withhold payment of interest until a later date or to suspend coupon payments entirely without triggering an event of default. Hybrid securities are normally at the bottom of an issuer's debt capital structure because holders of an issuer's hybrid securities are structurally subordinated to the issuer's senior creditors. In bankruptcy, hybrid securities may be more sensitive to economic changes than more senior debt securities. Such securities may also be viewed as more equity-like by the market when the issuer or its parent company experiences financial difficulties.

Contingent convertible securities, which are also known as contingent capital securities, are a form of hybrid security that are intended to either convert into equity or have their principal written down upon the occurrence of certain trigger events. One type of contingent convertible security has characteristics designed to absorb losses, by providing that the liquidation value of the security may be adjusted downward to below the original par value or written off entirely under certain circumstances. For instance, if losses have eroded the issuer's capital level below a specified threshold, the liquidation value of the security may be reduced in whole or in part. The write-down of the security's par value occur automatically and would not entitle holders to institute bankruptcy proceedings against the issuer. In addition, an automatic write-down could result in a reduced income rate if the dividend or interest payment associated with the security is based on the security's par value. Such securities may, but are not required to, provide for circumstances under which the liquidation value of the security may be adjusted back up to par, such as an improvement in capitalization or earnings. Another type of contingent convertible security provides for mandatory conversion of the security into common shares of the issuer under certain circumstances. The mandatory conversion might relate, for example, to the issuer's failure to maintain a capital minimum. Since the common stock of the issuer may not pay a dividend, investors in such instruments could experience reduced yields (or no yields at all) and conversion would deepen the subordination of the investor, effectively worsening the investor's standing in the case of the issuer's insolvency. An automatic write-down or conversion event with respect to a contingent convertible security will typically be triggered by a reduction in the issuer's capital level, but may also be triggered by regulatory actions, such as a change in regulatory capital requirements, or by

Investing in smaller capitalization stocks — Certain funds may invest in the stocks of smaller capitalization companies. Investing in smaller capitalization stocks can involve greater risk than is customarily associated with investing in stocks of larger, more established companies. For example, smaller companies often have limited product lines, limited operating histories, limited markets or financial resources, may be dependent on one or a few key persons for management and can be more susceptible to losses. Also, their securities may be less liquid or illiquid (and therefore have to be sold at a discount from current prices or sold in small lots over an extended period of time), may be followed by fewer investment research analysts and may be subject to wider price swings, thus creating a greater chance of loss than securities of larger capitalization companies. Because Global Small Capitalization Fund in particular emphasizes the stocks of issuers with smaller market capitalizations (by U.S. standards), it can be expected to have more difficulty obtaining information about the issuers or valuing or disposing of its securities than if it were to concentrate on larger capitalization stocks. The funds determine relative market capitalizations using U.S. standards.

Accordingly, the funds' investments in certain countries outside the United States may have larger market capitalizations relative to other companies within those countries.

Investing in private companies — Certain funds may invest in companies that have not publicly offered their securities. Investing in private companies can involve greater risks than those associated with investing in publicly traded companies. For example, the securities of a private company may be subject to the risk that market conditions, developments within the company, investor perception, or regulatory decisions may delay or prevent the company from ultimately offering its securities to the public. Furthermore, these investments are generally considered to be illiquid until a company's public offering and are often subject to additional contractual restrictions on resale that would prevent the fund from selling their company shares for a period of time following the public offering.

Investments in private companies can offer the fund significant growth opportunities at attractive prices. However, these investments can pose greater risk, and, consequently, there is no guarantee that positive results can be achieved in the future.

Investing outside the U.S. — Certain funds may invest in securities of issuers domiciled outside the United States and which may be denominated in currencies other than the U.S. dollar. Securities of issuers domiciled outside the United States, or with significant operations or revenues outside the United States, may lose value because of adverse political, social, economic or market developments (including social instability, regional conflicts, terrorism and war) in the countries or regions in which the issuers are domiciled, operate or generate revenue. These issuers may also be more susceptible to actions of foreign governments such as the imposition of price controls or punitive taxes that could adversely impact the value of these securities. To the extent the fund invests in securities that are denominated in currencies other than the U.S. dollar, these securities may also lose value due to changes in foreign currency exchange rates against the U.S. dollar and/or currencies of other countries. Securities markets in certain countries may be more volatile or less liquid than those in the United States. Investments outside the United States may also be subject to different accounting practices and different regulatory, legal and reporting standards, and may be more difficult to value, than those in the United States. In addition, the value of investments outside the United States may be reduced by foreign taxes, including foreign withholding taxes on interest and dividends. Further, there may be increased risks of delayed settlement of securities purchased or sold by the fund. The risks of investing outside the United States may be heightened in connection with investments in emerging markets.

Additional costs could be incurred in connection with the fund's investment activities outside the United States. Brokerage commissions may be higher outside the United States, and the fund will bear certain expenses in connection with its currency transactions. Furthermore, increased custodian costs may be associated with maintaining assets in certain jurisdictions.

Investing in emerging markets — Investing in emerging markets may involve risks in addition to and greater than those generally associated with investing in the securities markets of developed countries. For instance, developing countries may have less developed legal and accounting systems than those in developed countries. The governments of these countries may be less stable and more likely to impose capital controls, nationalize a company or industry, place restrictions on foreign ownership and on withdrawing sale proceeds of securities from the country, and/or impose punitive taxes that could adversely affect the prices of securities. In addition, the economies of these countries may be dependent on relatively few industries that are more susceptible to local and global changes. Securities markets in these countries can also be relatively small and have substantially lower trading volumes. As a result, securities issued in these countries may be more volatile and less liquid, and may be more difficult to value, than securities issued in countries with more developed economies and/or markets. Additionally, there may be increased settlement risks for transactions in local securities.

Although there is no universally accepted definition, the investment adviser generally considers an emerging market to be a market that is in the earlier stages of its industrialization cycle with a low per capita gross domestic product ("GDP") and a low market capitalization to GDP ratio relative to those in the United States and the European Union, and would include markets commonly referred to as "frontier markets."

Certain risk factors related to emerging markets

Currency fluctuations — Certain emerging markets' currencies have experienced and in the future may experience significant declines against the U.S. dollar. For example, if the U.S. dollar appreciates against foreign currencies, the value of the fund's emerging markets securities holdings would generally depreciate and vice versa. Further, the fund may lose money due to losses and other expenses incurred in converting various currencies to purchase and sell securities valued in currencies other than the U.S. dollar, as well as from currency restrictions, exchange control regulation and currency devaluations.

Government regulation — Certain developing countries lack uniform accounting, auditing and financial reporting and disclosure standards, have less governmental supervision of financial markets than in the United States, and do not honor legal rights enjoyed in the United States. Certain governments may be more unstable and present greater risks of nationalization or restrictions on foreign ownership of local companies. Repatriation of investment income, capital and the proceeds of sales by foreign investors may require governmental registration and/or approval in some developing countries. While the fund will only invest in markets where these restrictions are considered acceptable by the investment adviser, a country could impose new or additional repatriation restrictions after the fund's investment. If this happened, the fund's response might include, among other things, applying to the appropriate authorities for a waiver of the restrictions or engaging in transactions in other markets designed to offset the risks of decline in that country. Such restrictions will be considered in relation to the fund's liquidity needs and other factors. Further, some attractive equity securities may not be available to the fund if foreign shareholders already hold the maximum amount legally permissible.

While government involvement in the private sector varies in degree among developing countries, such involvement may in some cases include government ownership of companies in certain sectors, wage and price controls or imposition of trade barriers and other protectionist measures. With respect to any developing country, there is no guarantee that some future economic or political crisis will not lead to price controls, forced mergers of companies, expropriation, or creation of government monopolies to the possible detriment of the fund's investments.

Fluctuations in inflation rates — Rapid fluctuations in inflation rates may have negative impacts on the economies and securities markets of certain emerging market countries.

Less developed securities markets — Emerging markets may be less well-developed than other markets. These markets have lower trading volumes than the securities markets of more developed countries and may be unable to respond effectively to increases in trading volume. Consequently, these markets may be substantially less liquid than those of more developed countries, and the securities of issuers located in these markets may have limited marketability. These factors may make prompt liquidation of substantial portfolio holdings difficult or impossible at times.

Settlement risks — Settlement systems in developing countries are generally less well organized than those of developed markets. Supervisory authorities may also be unable to

apply standards comparable to those in developed markets. Thus, there may be risks that settlement may be delayed and that cash or securities belonging to the fund may be in jeopardy because of failures of or defects in the systems. In particular, market practice may require that payment be made before receipt of the security being purchased or that delivery of a security be made before payment is received. In such cases, default by a broker or bank (the "counterparty") through whom the transaction is effected might cause the fund to suffer a loss. The fund will seek, where possible, to use counterparties whose financial status is such that this risk is reduced. However, there can be no certainty that the fund will be successful in eliminating this risk, particularly as counterparties operating in developing countries frequently lack the standing or financial resources of those in developed countries. There may also be a danger that, because of uncertainties in the operation of settlement systems in individual markets, competing claims may arise with respect to securities held by or to be transferred to the fund.

Insufficient market information — The fund may encounter problems assessing investment opportunities in certain emerging markets in light of limitations on available information and different accounting, auditing and financial reporting standards. In such circumstances, the fund's investment adviser will seek alternative sources of information, and to the extent the investment adviser is not satisfied with the sufficiency of the information obtained with respect to a particular market or security, the fund will not invest in such market or security.

Taxation — Taxation of dividends, interest and capital gains received by the fund varies among developing countries and, in some cases, is comparatively high. In addition, developing countries typically have less well-defined tax laws and procedures and such laws may permit retroactive taxation so that the fund could become subject in the future to local tax liability that it had not reasonably anticipated in conducting its investment activities or valuing its assets.

Litigation — The fund and its shareholders may encounter substantial difficulties in obtaining and enforcing judgments against individuals residing outside of the U.S. and companies domiciled outside of the U.S.

Fraudulent securities — Securities purchased by the fund may subsequently be found to be fraudulent or counterfeit, resulting in a loss to the fund.

Investing through Stock Connect — The fund may invest in China A-shares of certain Chinese companies listed and traded on the Shanghai Stock Exchange and on the Shenzhen Stock Exchange (together, the "Exchanges") through the Shanghai-Hong Kong Stock Connect Program and the Shenzhen-Hong Kong Stock Connect Program, respectively (together, "Stock Connect"). Stock Connect is a securities trading and clearing program developed by the Exchange of Hong Kong, the Exchanges and the China Securities Depository and Clearing Corporation Limited. Stock Connect facilitates foreign investment in the People's Republic of China ("PRC") via brokers in Hong Kong. Persons investing through Stock Connect are subject to PRC regulations and Exchange listing rules, among others. These could include limitations on or suspension of trading. These regulations are relatively new and subject to changes which could adversely impact the fund's rights with respect to the securities. As Stock Connect is relatively new, there are no assurances that the necessary systems to run the program will function properly. Stock Connect is subject to aggregate and daily quota limitations on purchases and the fund may experience delays in transacting via Stock Connect. The fund's shares are held in an omnibus account and registered in nominee name. Please also see the sections on risks relating to investing outside the U.S. and investing in emerging markets.

Synthetic local access instruments — Participation notes, market access warrants and other similar structured investment vehicles (collectively, "synthetic local access instruments") are instruments used by investors to obtain exposure to equity investments in local markets where direct ownership by

foreign investors is not permitted or is otherwise restricted by local law. Synthetic local access instruments, which are generally structured and sold over-the-counter by a local branch of a bank or broker-dealer that is permitted to purchase equity securities in the local market, are designed to replicate exposure to one or more underlying equity securities. The price and performance of a synthetic local access instrument are normally intended to track the price and performance of the underlying equity assets as closely as possible. However, there can be no assurance that the results of synthetic local access instruments will replicate exactly the performance of the underlying securities due to transaction costs, taxes and other fees and expenses. The holder of a synthetic local access instrument may also be entitled to receive any dividends paid in connection with the underlying equity assets, but usually does not receive voting rights as it would if such holder directly owned the underlying assets.

Investments in synthetic local access instruments involve the same risks associated with a direct investment in the shares of the companies the instruments seek to replicate, including, in particular, the risks associated with investing outside the United States. Synthetic local access instruments also involve risks that are in addition to the risks normally associated with a direct investment in the underlying equity securities. For instance, synthetic local access instruments represent unsecured, unsubordinated contractual obligations of the banks or broker-dealers that issue them. Consequently, a purchaser of a synthetic local access instrument relies on the creditworthiness of such a bank or broker-dealer counterparty and has no rights under the instrument against the issuer of the underlying equity securities. Additionally, there is no guarantee that a liquid market for a synthetic local access instrument will exist or that the issuer of the instrument will be willing to repurchase the instrument when an investor wishes to sell it.

Currency transactions — Certain funds may enter into currency transactions on a spot (i.e., cash) basis at the prevailing rate in the currency exchange market to provide for the purchase or sale of a currency needed to purchase a security denominated in that currency. In addition, certain funds may enter into forward currency contracts to protect against changes in currency exchange rates, to increase exposure to a particular foreign currency, to shift exposure to currency fluctuations from one currency to another or to seek to increase returns. A forward currency contract is an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. Some forward currency contracts, called non-deliverable forwards or NDFs, do not call for physical delivery of the currency and are instead settled through cash payments. Forward currency contracts are typically privately negotiated and traded in the interbank market between large commercial banks (or other currency traders) and their customers. Although forward contracts entered into by the fund will typically involve the purchase or sale of a currency against the U.S. dollar, the fund also may purchase or sell a non-U.S. currency against another non-U.S. currency.

Currency exchange rates generally are determined by forces of supply and demand in the foreign exchange markets and the relative merits of investment in different countries as viewed from an international perspective. Currency exchange rates, as well as foreign currency transactions, can also be affected unpredictably by intervention by U.S. or foreign governments or central banks or by currency controls or political developments in the United States or abroad. Such intervention or other events could prevent the fund from entering into foreign currency transactions, force the fund to exit such transactions at an unfavorable time or price or result in penalties to the fund, any of which may result in losses to the fund.

Generally, a fund will not attempt to protect against all potential changes in exchange rates and the use of forward contracts does not eliminate the risk of fluctuations in the prices of the underlying securities. If the value of the underlying securities declines or the amount of the fund's commitment increases because of changes in exchange rates, the fund may need to provide additional cash or securities to satisfy its commitment under the forward contract. The fund is also subject to the risk that it may be delayed or prevented from obtaining payments owed to it under the forward contract as a

result of the insolvency or bankruptcy of the counterparty with which it entered into the forward contract or the failure of the counterparty to comply with the terms of the contract.

The realization of gains or losses on foreign currency transactions will usually be a function of the investment adviser's ability to accurately estimate currency market movements. Entering into forward currency transactions may change the fund's exposure to currency exchange rates and could result in losses to the fund if currencies do not perform as expected by the fund's investment adviser. For example, if the fund's investment adviser increases a fund's exposure to a foreign currency using forward contracts and that foreign currency's value declines, the fund may incur a loss. In addition, while entering into forward currency transactions could minimize the risk of loss due to a decline in the value of the hedged currency, it could also limit any potential gain that may result from an increase in the value of the currency. See also the "Derivatives" section under "Description of certain securities, investment techniques and risks" for a general description of investment techniques and risks relating to derivatives, including certain currency forwards.

Forward currency contracts may give rise to leverage, or exposure to potential gains and losses in excess of the initial amount invested. Leverage magnifies gains and losses and could cause a fund to be subject to more volatility than if it had not been leveraged, thereby resulting in a heightened risk of loss. The fund will segregate liquid assets that will be marked to market daily to meet its forward contract commitments to the extent required by the U.S. Securities and Exchange Commission.

Forward currency transactions also may affect the character and timing of income, gain, or loss recognized by the fund for U.S. tax purposes. The use of forward currency contracts could result in the application of the mark-to-market provisions of the Internal Revenue Code and may cause an increase (or decrease) in the amount of taxable dividends paid by the fund

Forward commitment, when issued and delayed delivery transactions — Certain funds may enter into commitments to purchase or sell securities at a future date. When a fund agrees to purchase such securities, it assumes the risk of any decline in value of the security from the date of the agreement. If the other party to such a transaction fails to deliver or pay for the securities, the fund could miss a favorable price or yield opportunity, or could experience a loss.

Certain funds may enter into roll transactions, such as a mortgage dollar roll where a fund sells mortgage-backed securities for delivery in the current month and simultaneously contracts to repurchase substantially similar (same type, coupon, and maturity) securities on a specified future date, at a pre-determined price. During the period between the sale and repurchase (the "roll period"), a fund forgoes principal and interest paid on the mortgage-backed securities. The fund is compensated by the difference between the current sales price and the lower forward price for the future purchase (often referred to as the "drop"), if any, as well as by the interest earned on the cash proceeds of the initial sale. The fund could suffer a loss if the contracting party fails to perform the future transaction and a fund is therefore unable to buy back the mortgage-backed securities it initially sold. The fund also takes the risk that the mortgage-backed securities that it repurchases at a later date will have less favorable market characteristics than the securities originally sold (e.g., greater prepayment risk). These transactions are accounted for as purchase and sale transactions, which may increase a fund's portfolio turnover rate.

With to be announced (TBA) transactions, the particular securities (i.e., specified mortgage pools) to be delivered or received are not identified at the trade date, but are "to be announced" at a later settlement date. However, securities to be delivered must meet specified criteria, including face value, coupon rate and maturity, and be within industry-accepted "good delivery" standards.

The fund will not use any of these transactions for the purpose of leveraging and will segregate liquid assets that will be marked to market daily in an amount sufficient to meet their payment obligations in

these transactions. Although these transactions will not be entered into for leveraging purposes, to the extent the fund's aggregate commitments in connection with these transactions exceed its segregated assets, the fund temporarily could be in a leveraged position (because it may have an amount greater than its net assets subject to market risk). Should market values of the fund's portfolio securities decline while the fund is in a leveraged position, greater depreciation of its net assets would likely occur than if it were not in such a position. The fund will not borrow money to settle these transactions and, therefore, will liquidate other portfolio securities in advance of settlement if necessary to generate additional cash to meet their obligations. After a transaction is entered into, the fund may still dispose of or renegotiate the transaction. Additionally, prior to receiving delivery of securities as part of a transaction, the fund may sell such securities.

Obligations backed by the "full faith and credit" of the U.S. government — U.S. government obligations include the following types of securities:

U.S. Treasury securities — U.S. Treasury securities include direct obligations of the U.S. Treasury, such as Treasury bills, notes and bonds. For these securities, the payment of principal and interest is unconditionally guaranteed by the U.S. government, and thus they are of high credit quality. Such securities are subject to variations in market value due to fluctuations in interest rates and in government policies, but, if held to maturity, are expected to be paid in full (either at maturity or thereafter).

Federal agency securities — The securities of certain U.S. government agencies and government-sponsored entities are guaranteed as to the timely payment of principal and interest by the full faith and credit of the U.S. government. Such agencies and entities include, but are not limited to, the Federal Financing Bank ("FFB"), the Government National Mortgage Association ("Ginnie Mae"), the Veterans Administration ("VA"), the Federal Housing Administration ("FHA"), the Export-Import Bank ("Exim Bank"), the Overseas Private Investment Corporation ("OPIC"), the Commodity Credit Corporation ("CCC") and the Small Business Administration ("SBA").

Other federal agency obligations — Additional federal agency securities are neither direct obligations of, nor guaranteed by, the U.S. government. These obligations include securities issued by certain U.S. government agencies and government-sponsored entities. However, they generally involve some form of federal sponsorship: some operate under a congressional charter; some are backed by collateral consisting of "full faith and credit" obligations as described above; some are supported by the issuer's right to borrow from the Treasury; and others are supported only by the credit of the issuing government agency or entity. These agencies and entities include, but are not limited to: the Federal Home Loan Banks, the Federal Home Loan Mortgage Corporation ("Freddie Mac"), the Federal National Mortgage Association ("Fannie Mae"), the Tennessee Valley Authority and the Federal Farm Credit Bank System.

In 2008, Freddie Mac and Fannie Mae were placed into conservatorship by their new regulator, the Federal Housing Finance Agency ("FHFA"). Simultaneously, the U.S. Treasury made a commitment of indefinite duration to maintain the positive net worth of both firms. As conservator, the FHFA has the authority to repudiate any contract either firm has entered into prior to the FHFA's appointment as conservator (or receiver should either firm go into default) if the FHFA, in its sole discretion determines that performance of the contract is burdensome and repudiation would promote the orderly administration of Fannie Mae's or Freddie Mac's affairs. While the FHFA has indicated that it does not intend to repudiate the guaranty obligations of either entity, doing so could adversely affect holders of their mortgage-backed securities. For example, if a contract were repudiated, the liability for any direct compensatory damages would accrue to the entity's conservatorship estate and could only be satisfied to the extent the estate had available assets. As a result, if interest payments on Fannie Mae or Freddie Mac mortgage-backed securities held by the fund were reduced because underlying borrowers failed to make payments or such payments were not advanced by a loan servicer, the fund's only recourse

might be against the conservatorship estate, which might not have sufficient assets to offset any shortfalls.

The FHFA, in its capacity as conservator, has the power to transfer or sell any asset or liability of Fannie Mae or Freddie Mac. The FHFA has indicated it has no current intention to do this; however, should it do so a holder of a Fannie Mae or Freddie Mac mortgage-backed security would have to rely on another party for satisfaction of the guaranty obligations and would be exposed to the credit risk of that party.

Certain rights provided to holders of mortgage-backed securities issued by Fannie Mae or Freddie Mac under their operative documents may not be enforceable against the FHFA, or enforcement may be delayed during the course of the conservatorship or any future receivership. For example, the operative documents may provide that upon the occurrence of an event of default by Fannie Mae or Freddie Mac, holders of a requisite percentage of the mortgage-backed security may replace the entity as trustee. However, under the Federal Housing Finance Regulatory Reform Act of 2008, holders may not enforce this right if the event of default arises solely because a conservator or receiver has been appointed.

Pass-through securities — Certain funds may invest in various debt obligations backed by pools of mortgages or other assets including, but not limited to, residential mortgage loans, home equity loans, mortgages on commercial buildings, consumer loans and equipment leases. Principal and interest payments made on the underlying asset pools backing these obligations are typically passed through to investors, net of any fees paid to any insurer or any guarantor of the securities. Pass-through securities may have either fixed or adjustable coupons. These securities include:

Mortgage-backed securities — These securities may be issued by U.S. government agencies and government-sponsored entities, such as Ginnie Mae, Fannie Mae and Freddie Mac, and by private entities. The payment of interest and principal on mortgage-backed obligations issued by U.S. government agencies may be guaranteed by the full faith and credit of the U.S. government (in the case of Ginnie Mae), or may be guaranteed by the issuer (in the case of Fannie Mae and Freddie Mac). However, these guarantees do not apply to the market prices and yields of these securities, which vary with changes in interest rates.

Mortgage-backed securities issued by private entities are structured similarly to those issued by U.S. government agencies. However, these securities and the underlying mortgages are not guaranteed by any government agencies and the underlying mortgages are not subject to the same underwriting requirements. These securities generally are structured with one or more types of credit enhancements such as insurance or letters of credit issued by private companies. Borrowers on the underlying mortgages are usually permitted to prepay their underlying mortgages. Prepayments can alter the effective maturity of these instruments. In addition, delinquencies, losses or defaults by borrowers can adversely affect the prices and volatility of these securities. Such delinquencies and losses can be exacerbated by declining or flattening housing and property values. This, along with other outside pressures, such as bankruptcies and financial difficulties experienced by mortgage loan originators, decreased investor demand for mortgage loans and mortgage-related securities and increased investor demand for yield, can adversely affect the value and liquidity of mortgage-backed securities.

Adjustable rate mortgage-backed securities — Adjustable rate mortgage-backed securities ("ARMS") have interest rates that reset at periodic intervals. Acquiring ARMS permits the fund to participate in increases in prevailing current interest rates through periodic adjustments in the coupons of mortgages underlying the pool on which ARMS are based. Such ARMS generally have higher current yield and lower price fluctuations than is the case with more traditional fixed income debt securities of comparable rating and maturity. In addition, when

prepayments of principal are made on the underlying mortgages during periods of rising interest rates, the fund can reinvest the proceeds of such prepayments at rates higher than those at which they were previously invested. Mortgages underlying most ARMS, however, have limits on the allowable annual or lifetime increases that can be made in the interest rate that the mortgagor pays. Therefore, if current interest rates rise above such limits over the period of the limitation, the fund, when holding an ARMS, does not benefit from further increases in interest rates. Moreover, when interest rates are in excess of coupon rates (i.e., the rates being paid by mortgagors) of the mortgages, ARMS behave more like fixed income securities and less like adjustable rate securities and are subject to the risks associated with fixed income securities. In addition, during periods of rising interest rates, increases in the coupon rate of adjustable rate mortgages generally lag current market interest rates slightly, thereby creating the potential for capital depreciation on such securities.

Collateralized mortgage obligations (CMOs) — CMOs are also backed by a pool of mortgages or mortgage loans, which are divided into two or more separate bond issues. CMOs issued by U.S. government agencies are backed by agency mortgages, while privately issued CMOs may be backed by either government agency mortgages or private mortgages. Payments of principal and interest are passed through to each bond issue at varying schedules resulting in bonds with different coupons, effective maturities and sensitivities to interest rates. Some CMOs may be structured in a way that when interest rates change, the impact of changing prepayment rates on the effective maturities of certain issues of these securities is magnified. CMOs may be less liquid or may exhibit greater price volatility than other types of mortgage or asset-backed securities.

Commercial mortgage-backed securities — These securities are backed by mortgages on commercial property, such as hotels, office buildings, retail stores, hospitals and other commercial buildings. These securities may have a lower prepayment uncertainty than other mortgage-related securities because commercial mortgage loans generally prohibit or impose penalties on prepayments of principal. In addition, commercial mortgage-related securities often are structured with some form of credit enhancement to protect against potential losses on the underlying mortgage loans. Many of the risks of investing in commercial mortgage-backed securities reflect the risks of investing in the real estate securing the underlying mortgage loans, including the effects of local and other economic conditions on real estate markets, the ability of tenants to make rental payments and the ability of a property to attract and retain tenants. Commercial mortgage-backed securities may be less liquid or exhibit greater price volatility than other types of mortgage or asset-backed securities and may be more difficult to value.

Asset-backed securities — These securities are backed by other assets such as credit card, automobile or consumer loan receivables, retail installment loans or participations in pools of leases. Credit support for these securities may be based on the underlying assets and/or provided through credit enhancements by a third party. The values of these securities are sensitive to changes in the credit quality of the underlying collateral, the credit strength of the credit enhancement, changes in interest rates and at times the financial condition of the issuer. Obligors of the underlying assets also may make prepayments that can change effective maturities of the asset-backed securities. These securities may be less liquid and more difficult to value than other securities.

"IOs" and "POs" are issued in portions or tranches with varying maturities and characteristics. Some tranches may only receive the interest paid on the underlying mortgages (IOs) and others may only receive the principal payments (POs). The values of IOs and POs are extremely sensitive to interest rate fluctuations and prepayment rates, and IOs are also subject to the risk of early repayment of the underlying mortgages that will substantially reduce or eliminate interest payments.

Warrants and rights — Warrants and rights may be acquired by certain funds in connection with other securities or separately. Warrants generally entitle, but do not obligate, their holder to purchase other equity or fixed income securities at a specified price at a later date. Rights are similar to warrants but typically have a shorter duration and are issued by a company to existing holders of its stock to provide those holders the right to purchase additional shares of stock at a later date. Warrants and rights do not carry with them the right to dividends or voting rights with respect to the securities that they entitle their holder to purchase, and they do not represent any rights in the assets of the issuing company. Additionally, a warrant or right ceases to have value if it is not exercised prior to its expiration date. As a result, warrants and rights may be considered more speculative than certain other types of investments. Changes in the value of a warrant or right do not necessarily correspond to changes in the value of its underlying security. The price of a warrant or right may be more volatile than the price of its underlying security, and they therefore present greater potential for capital appreciation and capital loss. The effective price paid for warrants or rights added to the subscribed security's market price, such as when there is no movement in the price of the underlying security. The market for warrants or rights may be very limited and it may be difficult to sell them promptly at an acceptable price.

Depositary receipts — Depositary receipts are securities that evidence ownership interests in, and represent the right to receive, a security or a pool of securities that have been deposited with a bank or trust depository. Certain funds may invest in American Depositary Receipts ("ADRs"), European Depositary Receipts ("EDRs"), Global Depositary Receipts ("GDRs"), and other similar securities. For ADRs, the depository is typically a U.S. financial institution and the underlying securities are issued by a non-U.S. entity. For other depositary receipts, the depository may be a non-U.S. or a U.S. entity, and the underlying securities may be issued by a non-U.S. or a U.S. entity. Depositary receipts will not necessarily be denominated in the same currency as their underlying securities. Generally, ADRs are issued in registered form, denominated in U.S. dollars, and designed for use in the U.S. securities markets. Other depositary receipts, such as EDRs and GDRs, may be issued in bearer form, may be denominated in either U.S. dollars or in non-U.S. currencies, and are primarily designed for use in securities markets outside the United States. ADRs, EDRs and GDRs can be sponsored by the issuing bank or trust company or the issuer of the underlying securities. Although the issuing bank or trust company may impose charges for the collection of dividends and the conversion of such securities into the underlying securities, generally no fees are imposed on the purchase or sale of these securities other than transaction fees ordinarily involved with trading stock. Such securities may be less liquid or may trade at a lower price than the underlying securities and the United States. Therefore, less information may be available regarding these issuers than about the issuers of other securities and there may not be a correlation between such information and the market value of the depositary receipts.

Inflation-linked bonds — Certain funds may invest in inflation-linked bonds issued by governments, their agencies or instrumentalities and corporations.

The principal amount of an inflation-linked bond is adjusted in response to changes in the level of an inflation index, such as the Consumer Price Index for Urban Consumers ("CPURNSA"). If the index measuring inflation falls, the principal value or coupon of these securities will be adjusted downward. Consequently, the interest payable on these securities will be reduced. Also, if the principal value of these securities is adjusted according to the rate of inflation, the adjusted principal value repaid at maturity may be less than the original principal. In the case of U.S. Treasury Inflation-Protected Securities ("TIPS"), currently the only inflation-linked security that is issued by the U.S Treasury, the principal amounts are adjusted daily based upon changes in the rate of inflation (as currently represented by the non-seasonally adjusted CPURNSA, calculated with a three-month lag). TIPS may pay interest semi-annually, equal to a fixed percentage of the inflation-adjusted principal amount. The interest rate on these bonds is fixed at issuance, but over the life of the bond this interest may be paid on an increasing or decreasing principal amount that has been adjusted for inflation. The current

market value of TIPS is not guaranteed and will fluctuate. However, the U.S. government guarantees that, at maturity, principal will be repaid at the higher of the original face value of the security (in the event of deflation) or the inflation adjusted value.

Other non-U.S. sovereign governments also issue inflation-linked securities that are tied to their own local consumer price indexes and that offer similar deflationary protection. In certain of these non-U.S. jurisdictions, the repayment of the original bond principal upon the maturity of an inflation-linked bond is not guaranteed, allowing for the amount of the bond repaid at maturity to be less than par. Corporations also periodically issue inflation-linked securities tied to CPURNSA or similar inflationary indexes. While TIPS and non-U.S. sovereign inflation-linked securities are currently the largest part of the inflation-linked market, the fund may invest in corporate inflation-linked securities.

The value of inflation-linked securities is expected to change in response to the changes in real interest rates. Real interest rates, in turn, are tied to the relationship between nominal interest rates and the rate of inflation. If inflation were to rise at a faster rate than nominal interest rates, real interest rates would decline, leading to an increase in value of the inflation-linked securities. In contrast, if nominal interest rates were to increase at a faster rate than inflation, real interest rates might rise, leading to a decrease in value of inflation-linked securities. There can be no assurance, however, that the value of inflation-linked securities will be directly correlated to the changes in interest rates rise due to reasons other than inflation, investors in these securities may not be protected to the extent that the increase is not reflected in the security's inflation measure.

The interest rate for inflation-linked bonds is fixed at issuance as a percentage of this adjustable principal. Accordingly, the actual interest income may both rise and fall as the principal amount of the bonds adjusts in response to movements of the consumer price index. For example, typically interest income would rise during a period of inflation and fall during a period of deflation.

The market for inflation-linked securities may be less developed or liquid, and more volatile, than certain other securities markets. There is a limited number of inflation-linked securities currently available for the fund to purchase, making the market less liquid and more volatile than the U.S. Treasury and agency markets.

Real estate investment trusts — Real estate investment trusts ("REITs"), which primarily invest in real estate or real estate-related loans, may issue equity or debt securities. Equity REITs own real estate properties, while mortgage REITs hold construction, development and/or long-term mortgage loans. The values of REITs may be affected by changes in the value of the underlying property of the trusts, the creditworthiness of the issuer, property taxes, interest rates, tax laws and regulatory requirements, such as those relating to the environment. Both types of REITs are dependent upon management skill and the cash flows generated by their holdings, the real estate market in general and the possibility of failing to qualify for any applicable pass-through tax treatment or failing to maintain any applicable exemptive status afforded under relevant laws.

Variable and floating rate obligations — The interest rates payable on certain securities in which certain of the funds may invest may not be fixed but may fluctuate based upon changes in market rates or credit ratings. Variable and floating rate obligations bear coupon rates that are adjusted at designated intervals, based on the then current market rates of interest or credit ratings. The rate adjustment features tend to limit the extent to which the market value of the obligations will fluctuate. When the fund holds variable or floating rate securities, a decrease in market interest rates will adversely affect the income received from such securities and the net asset value of the fund's shares.

Cash and cash equivalents — The fund may hold cash or invest in cash equivalents. Cash equivalents include, but are not limited to: (a) shares of money market or similar funds managed by the investment adviser or its affiliates; (b) shares of other money market funds; (c) commercial paper; (d) short-term

bank obligations (for example, certificates of deposit, bankers' acceptances (time drafts on a commercial bank where the bank accepts an irrevocable obligation to pay at maturity)) or bank notes; (e) savings association and savings bank obligations (for example, bank notes and certificates of deposit issued by savings banks or savings associations); (f) securities of the U.S. government, its agencies or instrumentalities that mature, or that may be redeemed, in one year or less; and (g) higher quality corporate bonds and notes that mature, or that may be redeemed, in one year or less.

Commercial paper — The fund may purchase commercial paper. Commercial paper refers to short-term promissory notes issued by a corporation to finance its current operations. Such securities normally have maturities of thirteen months or less and, though commercial paper is often unsecured, commercial paper may be supported by letters of credit, surety bonds or other forms of collateral. Maturing commercial paper issuances are usually repaid by the issuer from the proceeds of new commercial paper issuances. As a result, investment in commercial paper is subject to rollover risk, or the risk that the issuer cannot issue enough new commercial paper paper to satisfy its outstanding commercial paper. Like all fixed income securities, commercial paper prices are susceptible to fluctuations in interest rates rise, commercial paper prices will decline and vice versa. However, the short-term nature of a commercial paper investment makes it less susceptible to volatility than many other fixed income securities because interest rate risk typically increases as maturity lengths increase. Commercial paper tends to yield smaller returns than longer-term corporate debt because securities with shorter maturities typically have lower effective yields than those with longer maturities. As with all fixed income securities, there is a chance that the issuer will default on its commercial paper obligations and commercial paper may become illiquid or suffer from reduced liquidity in these or other situations.

Commercial paper in which the fund may invest includes commercial paper issued in reliance on the exemption from registration afforded by Section 4(a)(2) of the 1933 Act. Section 4 (a)(2) commercial paper has substantially the same price and liquidity characteristics as commercial paper generally, except that the resale of Section 4(a)(2) commercial paper is limited to institutional investors who agree that they are purchasing the paper for investment purposes and not with a view to public distribution. Technically, such a restriction on resale renders Section 4(a)(2) commercial paper a restricted security under the 1933 Act. In practice, however, Section 4(a)(2) commercial paper typically can be resold as easily as any other unrestricted security held by the fund. Accordingly, Section 4(a)(2) commercial paper has been generally determined to be liquid under procedures adopted by the fund's board of trustees.

Restricted or illiquid securities — Certain funds may purchase securities subject to restrictions on resale. Restricted securities may only be sold pursuant to an exemption from registration under the Securities Act of 1933, as amended (the "1933 Act"), or in a registered public offering. Restricted securities held by the fund are often eligible for resale under Rule 144A, an exemption under the 1933 Act allowing for resales to "Qualified Institutional Buyers." Where registration is required, the holder of a registered security may be obligated to pay all or part of the registration expense and a considerable period may elapse between the time it decides to seek registration and the time it may be permitted to sell a security under an effective registration statement. Difficulty in selling such securities may result in a loss to the fund or cause it to incur additional administrative costs.

Some fund holdings (including some restricted securities) may be deemed illiquid if the fund expects that a reasonable portion of the holding cannot be sold in seven calendar days or less without the sale significantly changing the market value of the investment. The determination of whether a holding is considered illiquid is made by the Series' adviser under a liquidity risk management program adopted by the Series' board and administered by the Series' adviser. The fund may incur significant additional costs in disposing of illiquid securities.

Loan assignments and participations — Certain funds may invest in loans or other forms of indebtedness that represent interests in amounts owed by corporations or other borrowers

(collectively "borrowers"). Loans may be originated by the borrower in order to address its working capital needs, as a result of a reorganization of the borrower's assets and liabilities (recapitalizations), to merge with or acquire another company (mergers and acquisitions), to take control of another company (leveraged buy-outs), to provide temporary financing (bridge loans), or for other corporate purposes.

Some loans may be secured in whole or in part by assets or other collateral. The greater the value of the assets securing the loan the more the lender is protected against loss in the case of nonpayment of principal or interest. Loans made to highly leveraged borrowers may be especially vulnerable to adverse changes in economic or market conditions and may involve a greater risk of default.

Some loans may represent revolving credit facilities or delayed funding loans, in which a lender agrees to make loans up to a maximum amount upon demand by the borrower during a specified term. These commitments may have the effect of requiring the fund to increase its investment in a company at a time when it might not otherwise decide to do so (including at a time when the company's financial condition makes it unlikely that such amounts will be repaid). To the extent that the fund is committed to advance additional funds, the fund will segregate assets determined to be liquid in an amount sufficient to meet such commitments.

Some loans may represent debtor-in-possession financings (commonly known as "DIP financings"). DIP financings are arranged when an entity seeks the protections of the bankruptcy court under Chapter 11 of the U.S. Bankruptcy Code. These financings allow the entity to continue its business operations while reorganizing under Chapter 11. Such financings constitute senior liens on unencumbered collateral (i.e., collateral not subject to other creditors' claims). There is a risk that the entity will not emerge from Chapter 11 and will be forced to liquidate its assets under Chapter 7 of the U.S. Bankruptcy Code. In the event of liquidation, the fund's only recourse will be against the collateral securing the DIP financing.

The investment adviser generally makes investment decisions based on publicly available information, but may rely on non-public information if necessary. Borrowers may offer to provide lenders with material, non-public information regarding a specific loan or the borrower in general. The investment adviser generally chooses not to receive this information. As a result, the investment adviser may be at a disadvantage compared to other investors that may receive such information. The investment adviser's decision not to receive material, non-public information may impact the investment adviser's ability to assess a borrower's requests for amendments or waivers of provisions in the loan agreement. However, the investment adviser may on a case-by-case basis decide to receive such information when it deems prudent. In these situations the investment adviser may be restricted from trading the loan or buying or selling other debt and equity securities of the borrower while it is in possession of such material, non-public information, even if such loan or other security is declining in value.

The fund normally acquires loan obligations through an assignment from another lender, but also may acquire loan obligations by purchasing participation interests from lenders or other holders of the interests. When the fund purchases assignments, it acquires direct contractual rights against the borrower on the loan. The fund acquires the right to receive principal and interest payments directly from the borrower and to enforce their rights as a lender directly against the borrower. However, because assignments are arranged through private negotiations between potential assignees and potential assignors, the rights and obligations acquired by the fund as the purchaser of an assignment may differ from, and be more limited than, those held by the assigning lender. Loan assignments are often administered by a financial institution that acts as agent for the holders of the loan, and the fund may be required to receive approval from the agent and/or borrower prior to the purchase of a loan. Risks may also arise due to the inability of the agent to meet its obligations under the loan agreement.

Loan participations are loans or other direct debt instruments that are interests in amounts owed by the borrower to another party. They may represent amounts owed to lenders or lending syndicates, to suppliers of goods or services, or to other parties. The fund will have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the participation and only upon receipt by the lender of the payments from the borrower. In connection with purchasing participations, the fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower. In addition, the fund may not directly benefit from any collateral supporting the loan in which it has purchased the participation and the fund will have to rely on the agent bank or other financial intermediary to apply appropriate credit remedies. As a result, the fund will be subject to the credit risk of both the borrower and the lender that is selling the participation. In the event of the insolvency of the lender selling a participation, the fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower.

Investments in loan participations and assignments present the possibility that the fund could be held liable as a co-lender under emerging legal theories of lender liability. In addition, if the loan is foreclosed, the fund could be part owner of any collateral and could bear the costs and liabilities of owning and disposing of the collateral. The fund anticipates that loan participations could be sold only to a limited number of institutional investors. In addition, some loan participations and assignments may not be rated by major rating agencies and may not be protected by securities laws.

Reinsurance related notes and bonds — High-Income Bond Fund may invest in reinsurance related notes and bonds. These instruments, which are typically issued by special purpose reinsurance companies, transfer an element of insurance risk to the note or bond holders. For example, such a note or bond could provide that the reinsurance company would not be required to repay all or a portion of the principal value of the note or bond if losses due to a catastrophic event under the policy (such as a major hurricane) exceed certain dollar thresholds. Consequently, the fund may lose the entire amount of its investment in such bonds or notes if such an event occurs and losses exceed certain dollar thresholds. In this instance, investors would have no recourse against the insurance company. These instruments may be issued with fixed or variable interest rates and rated in a variety of credit quality categories by the rating agencies.

Repurchase agreements — Certain funds may enter into repurchase agreements, or "repos", under which the fund buys a security and obtains a simultaneous commitment from the seller to repurchase the security at a specified time and price. Because the security purchased constitutes collateral for the repurchase obligation, a repo may be considered a loan by the fund that is collateralized by the security purchased. Repos permit the fund to maintain liquidity and earn income over periods of time as short as overnight.

The seller must maintain with a custodian collateral equal to at least the repurchase price, including accrued interest. In tri-party repos, a third party custodian, called a clearing bank, facilitates repo clearing and settlement, including by providing collateral management services. However, as an alternative to tri-party repos, the fund could enter into bilateral repos, where the parties themselves are responsible for settling transactions.

The fund will only enter into repos involving securities of the type (excluding any maturity limitations) in which they could otherwise invest. If the seller under the repo defaults, the fund may incur a loss if the value of the collateral securing the repo has declined and may incur disposition costs and delays in connection with liquidating the collateral. If bankruptcy proceedings are commenced with respect to the seller, realization of the collateral by the fund may be delayed or limited.

Maturity — There are no restrictions on the maturity compositions of the portfolios of certain funds. Certain funds invest in debt securities with a wide range of maturities. Under normal market

conditions, longer term securities yield more than shorter term securities, but are subject to greater price fluctuations.

Derivatives — In pursuing its investment objective, the fund may invest in derivative instruments. A derivative is a financial instrument, the value of which depends on, or is otherwise derived from, another underlying variable. Most often, the variable underlying a derivative is the price of a traded asset, such as a traditional cash security (e.g., a stock or bond), a currency or a commodity; however, the value of a derivative can be dependent on almost any variable, from the level of an index or a specified rate to the occurrence (or non-occurrence) of a credit event with respect to a specified reference asset. In addition to investing in forward currency contracts, as described above under "Currency transactions," the fund may take positions in futures contracts, interest rate swaps and credit default swap indices, each of which is a derivative instrument described in greater detail below.

Derivative instruments may be distinguished by the manner in which they trade: some are standardized instruments that trade on an organized exchange while others are individually negotiated and traded in the over-the-counter (OTC) market. Derivatives also range broadly in complexity, from simple derivatives to more complex instruments. As a general matter, however, all derivatives — regardless of the manner in which they trade or their relative complexities — entail certain risks, some of which are different from, and potentially greater than, the risks associated with investing directly in traditional cash securities.

As is the case with traditional cash securities, derivative instruments are generally subject to counterparty credit risk; however, in some cases, derivatives may pose counterparty risks greater than those posed by cash securities. The use of derivatives involves the risk that a loss may be sustained by the fund as a result of the failure of the fund's counterparty to make required payments or otherwise to comply with its contractual obligations. For some derivatives, though, the value of — and, in effect, the return on — the instrument may be dependent on both the individual credit of the fund's counterparty and on the credit of one or more issuers of any underlying assets. If the fund does not correctly evaluate the creditworthiness of its counterparty and, where applicable, of issuers of any underlying reference assets, the fund's investment in a derivative instrument may result in losses. Further, if a fund's counterparty were to default on its obligations, the fund's contractual remedies against such counterparty may be subject to applicable bankruptcy and insolvency laws, which could affect the fund's rights as a creditor and delay or impede the fund's ability to receive the net amount of payments that it is contractually entitled to receive.

The value of some derivative instruments in which the fund invests may be particularly sensitive to changes in prevailing interest rates, currency exchange rates or other market conditions. Like the fund's other investments, the ability of the fund to successfully utilize such derivative instruments may depend in part upon the ability of the fund's investment adviser to accurately forecast interest rates and other economic factors. The success of the fund's derivative investment strategy will also depend on the investment adviser's ability assess and predict the impact of market or economic developments on the derivative instruments in which the fund invests, in some cases without having had the benefit of observing the performance of a derivative under all possible market conditions. If the investment adviser incorrectly forecasts such factors and has taken positions in derivative instruments contrary to prevailing market trends, or if the investment adviser incorrectly predicts the impact of developments on a derivative instrument, the fund could be exposed to the risk of loss.

Certain derivatives may also be subject to liquidity and valuation risks. The potential lack of a liquid secondary market for a derivative (and, particularly, for an OTC derivative) may cause difficulty in valuing or selling the instrument. If a derivative transaction is particularly large or if the relevant market is illiquid, as is often the case with many privately-negotiated OTC derivatives, the fund may not be able to initiate a transaction or to liquidate a position at an advantageous time or price. Particularly when there is no liquid secondary market for the fund's derivative positions, the fund may encounter difficulty in valuing such illiquid positions. The value of a derivative instrument does not always

correlate perfectly with its underlying asset, rate or index, and many derivatives, and OTC derivatives in particular, are complex and often valued subjectively. Improper valuations can result in increased cash payment requirements to counterparties or a loss of value to the fund.

Because certain derivative instruments may obligate the fund to make one or more potential future payments, which could significantly exceed the value of the fund's initial investments in such instruments, derivative instruments may also have a leveraging effect on the fund's portfolio. Certain derivatives have the potential for unlimited loss, irrespective of the size of the fund's investment in the instrument. When a fund leverages its portfolio, investments in that fund will tend to be more volatile, resulting in larger gains or losses in response to market changes. In accordance with applicable regulatory requirements, the fund will generally segregate or earmark liquid assets, or enter into offsetting financial positions, to cover its obligations under derivative instruments, effectively limiting the risk of leveraging the fund's portfolio. Because the fund is legally required to maintain asset coverage or offsetting positions in connection with leveraging derivative instruments, the fund's investments in such derivatives may also require the fund to buy or sell portfolio securities at disadvantageous times or prices in order to comply with applicable requirements.

Futures — The fund may enter into futures contracts to seek to manage the fund's interest rate sensitivity by increasing or decreasing the duration of the fund or a portion of the fund's portfolio. A futures contract is an agreement to buy or sell a security or other financial instrument (the "reference asset") for a set price on a future date. Futures contracts are standardized, exchange-traded contracts, and, when a futures contract is bought or sold, the fund will incur brokerage fees and will be required to maintain margin deposits.

Unlike when the fund purchases or sells a security, such as a stock or bond, no price is paid or received by the fund upon the purchase or sale of a futures contract. When the fund enters into a futures contract, the fund is required to deposit with its futures broker, known as a futures commission merchant (FCM), a specified amount of liquid assets in a segregated account in the name of the FCM at the applicable derivatives clearinghouse or exchange. This amount, known as initial margin, is set by the futures exchange on which the contract is traded and may be significantly modified during the term of the contract. The initial margin is in the nature of a performance bond or good faith deposit on the futures contract, which is returned to the fund upon termination of the contract, assuming all contractual obligations have been satisfied. Additionally, on a daily basis, the fund pays or receives cash, or variation margin, equal to the daily change in value of the futures contract. Variation margin does not represent a borrowing or loan by the fund but is instead a settlement between the fund and the FCM of the amount one party would owe the other if the futures contract expired. In computing daily net asset value, the fund will mark-to-market its open futures positions. In the event of the bankruptcy or insolvency of an FCM that holds margin on behalf of the fund, the fund may be entitled to return of margin owed to it only in proportion to the amount received by the FCM's other customers, potentially resulting in losses to the fund. An event of bankruptcy or insolvency at a clearinghouse or exchange holding initial margin could also result in losses for the fund.

When the fund invests in futures contracts and deposits margin with an FCM, the fund becomes subject to so-called "fellow customer" risk – that is, the risk that one or more customers of the FCM will default on their obligations and that the resulting losses will be so great that the FCM will default on its obligations and margin posted by one customer, such as the fund, will be used to cover a loss caused by a different defaulting customer. Applicable rules generally prohibit the use of one customer's funds to meet the obligations of another customer and limit the ability of an FCM to use margin posed by non-defaulting customers to satisfy losses caused by defaulting customers. As a general matter, an FCM is required to use its own funds to meet a defaulting customer's obligations. While a customer's loss would likely need to be substantial before non-defaulting customers would be exposed to loss on account

of fellow customer risk, applicable rules nevertheless permit the commingling of margin and do not limit the mutualization of customer losses from investment losses, custodial failures, fraud or other causes. If the loss is so great that, notwithstanding the application of an FCM's own funds, there is a shortfall in the amount of customer funds required to be held in segregation, the FCM could default and be placed into bankruptcy. Under these circumstances, bankruptcy law provides that non-defaulting customers will share pro rata in any shortfall. A shortfall in customer segregated funds may also make the transfer of the accounts of non-defaulting customers to another FCM more difficult.

Although certain futures contracts, by their terms, require actual future delivery of and payment for the reference asset, in practice, most futures contracts are usually closed out before the delivery date by offsetting purchases or sales of matching futures contracts. Closing out an open futures contract purchase or sale is effected by entering into an offsetting futures contract sale or purchase, respectively, for the same aggregate amount of the identical reference asset and the same delivery date with the same FCM. If the offsetting purchase price is less than the original sale price (in each case taking into account transaction costs, including brokerage fees), the fund realizes a gain; if it is less, the fund realizes a loss. Conversely, if the offsetting sale price is more than the original purchase price (in each case taking into account transaction costs, including brokerage fees), the fund realizes a gain; if it is less, the fund realizes a loss.

The fund is generally required to segregate liquid assets equivalent to the fund's outstanding obligations under each futures contract. With respect to long positions in futures contracts that are not legally required to cash settle, the fund will segregate or earmark liquid assets in an amount equal to the contract price the fund will be required to pay on settlement less the amount of margin deposited with an FCM. For short positions in futures contracts that are not legally required to cash settle, the fund will segregate or earmark liquid assets in an amount that, when added to the amounts deposited with an FCM as margin, equals the market value of the reference asset underlying the futures contract. With respect to futures contracts that are required to cash settle, however, the fund is permitted to segregate or earmark liquid assets in an amount that, when added to the amounts deposited with an FCM as margin, equals the fund's daily marked-to-market (net) obligation under the contract (i.e., the daily market value of the contract itself), if any, in other words, the fund may set aside its daily net liability, if any, rather than the notional value of the futures contract. By segregating or earmarking assets equal only to its net obligation under cash-settled futures, the fund may be able to utilize these contracts to a greater extent than if the fund were required to segregate or earmark assets equal to the full contract price or current market value of the futures contract. Such segregation of assets is intended to ensure that the fund has assets available to satisfy its obligations with respect to futures contracts and to limit any potential leveraging of the fund's portfolio. However, segregation of liquid assets will not limit the fund's exposure to loss. To maintain a sufficient amount of segregated assets, the fund may also have to sell less liquid portfolio securities at disadvantageous prices, and the earmarking of liquid assets will have the effect of limiting the fund's ability to otherwise inve

The value of a futures contract tends to increase and decrease in tandem with the value of its underlying reference asset. Purchasing futures contracts will, therefore, tend to increase the fund's exposure to positive and negative price fluctuations in the reference asset, much as if the fund had purchased the reference asset directly. When the fund sells a futures contract, by contrast, the value of its futures position will tend to move in a direction contrary to the market for the reference asset. Accordingly, selling futures contracts will tend to offset both positive and negative market price changes, much as if the reference asset had been sold.

There is no assurance that a liquid market will exist for any particular futures contract at any particular time. Futures exchanges may establish daily price fluctuation limits for futures contracts and may halt trading if a contract's price moves upward or downward more than the limit in a given day. On volatile trading days, when the price fluctuation limit is reached and a trading halt is imposed, it may be impossible to enter into new positions or close out existing positions. If the market for a futures contract is not liquid because of price fluctuation limits or other market conditions, the fund may be prevented from promptly liquidating unfavorable futures positions and the fund could be required to continue to hold a position until delivery or expiration regardless of changes in its value, potentially subjecting the fund to substantial losses. Additionally, the fund may not be able to take other actions or enter into other transactions to limit or reduce its exposure to the position. Under such circumstances, the fund would remain obligated to meet margin requirements until the position is cleared. As a result, the fund's access to other assets held to cover its futures positions could also be impaired.

Although futures exchanges generally operate similarly in the United States and abroad, foreign futures exchanges may follow trading, settlement and margin procedures that are different than those followed by futures exchanges in the United States. Futures contracts traded outside the United States may not involve a clearing mechanism or related guarantees and may involve greater risk of loss than U.S.-traded contracts, including potentially greater risk of losses due to insolvency of a futures broker, exchange member, or other party that may owe initial or variation margin to the fund. Margin requirements on foreign futures exchanges may be different than those of futures exchanges in the United States, and, because initial and variation margin payments may be measured in foreign currency, a futures contract traded outside the United States may also involve the risk of foreign currency fluctuations.

Interest rate swaps — The fund may enter into interest rate swaps to seek to manage the interest rate sensitivity of the fund by increasing or decreasing the duration of the fund or a portion of the fund's portfolio. An interest rate swap is an agreement between two parties to exchange or swap payments based on changes in an interest rate or rates. Typically, one interest rate is fixed and the other is based on a designated short-term interest rate such as the London Interbank Offered Rate (LIBOR), prime rate or other benchmark. Interest rate swaps generally do not involve the delivery of securities or other principal amounts. Rather, cash payments are exchanged by the parties based on the application of the designated interest rates to a notional amount, which is the predetermined dollar principal of the trade upon which payment obligations are computed. Accordingly, the fund's current obligation or right under the swap agreement is generally equal to the net amount to be paid or received under the swap agreement based on the relative value of the position held by each party. The fund will generally segregate assets with a daily value at least equal to the excess, if any, of the fund's accrued obligations under the swap agreement over the accrued amount the fund is entitled to receive under the agreement, less the value of any posted margin or collateral on deposit with respect to the position.

The use of interest rate swaps involves certain risks, including losses if interest rate changes are not correctly anticipated by the fund's investment adviser. To the extent the fund enters into bilaterally negotiated swap transactions, the fund will enter into swap agreements only with counterparties that meet certain credit standards; however, if the counterparty's creditworthiness deteriorates rapidly and the counterparty defaults on its obligations under the swap agreement or declares bankruptcy, a fund may lose any amount it expected to receive from the counterparty. Certain interest rate swap transactions are currently subject to mandatory central clearing or may be eligible for voluntary central clearing. Because clearing interposes a central clearinghouse as the ultimate counterparty to each participant's swap, central clearing is intended to decrease (but not eliminate) counterparty risk relative to uncleared bilateral swaps. Additionally, the term of an interest rate swap can be days, months or years and, as a result, certain swaps may be less liquid than others.

Credit default swap indices — In order to assume exposure to a diversified portfolio of credits or to hedge against existing credit risks, the fund may invest in credit default swap indices ("CDXs"). A CDX is based on a portfolio of credit default swaps with similar characteristics, such as credit default swaps on high-yield bonds. In a typical CDX transaction, one party — the protection buyer — is obligated to pay the other party — the protection seller — a stream of periodic payments over the term of the contract. If a credit event, such as a default or restructuring, occurs with respect to any of the underlying reference obligations, the protection seller must pay the protection buyer the loss on those credits.

The fund may enter into a CDX transaction as either protection buyer or protection seller. If the fund is a protection buyer, it would pay the counterparty a periodic stream of payments over the term of the contract and would not recover any of those payments if no credit events were to occur with respect to any of the underlying reference obligations. However, if a credit event did occur, the fund, as a protection buyer, would have the right to deliver the referenced debt obligations or a specified amount of cash, depending on the terms of the applicable agreement, and to receive the par value of such debt obligations from the counterparty protection seller. As a protection seller, the fund would receive fixed payments throughout the term of the contract if no credit events were to occur with respect to any of the underlying reference obligations. If a credit event were to occur, however, the value of any deliverable obligation received by the fund, coupled with the periodic payments previously received by the fund, may be less than the full notional value that the fund, as a protection seller, pays to the counterparty protection buyer, effectively resulting in a loss of value to the fund. Furthermore, as a protection seller, the fund would effectively add leverage to its portfolio because it would have investment exposure to the notional amount of the swap transaction.

The use of CDX, like all other swap agreements, is subject to certain risks, including the risk that the fund's counterparty will default on its obligations. If such a default were to occur, any contractual remedies that the fund might have may be subject to applicable bankruptcy laws, which could delay or limit the fund's recovery. Thus, if the fund's counterparty to a CDX transaction defaults on its obligation to make payments thereunder, the fund may lose such payments altogether or collect only a portion thereof, which collection could involve substantial costs or delays. Certain CDX transactions are subject to mandatory central clearing or may be eligible for voluntary central clearing. Because clearing interposes a central clearinghouse as the ultimate counterparty to each participant's swap, central clearing is intended to decrease (but not eliminate) counterparty risk relative to uncleared bilateral swaps.

Additionally, when the fund invests in a CDX as a protection seller, the fund will be indirectly exposed to the creditworthiness of issuers of the underlying reference obligations in the index. If the investment adviser to the fund does not correctly evaluate the creditworthiness of issuers of the underlying instruments on which the CDX is based, the investment could result in losses to the fund.

Pursuant to regulations and published positions of the U.S. Securities and Exchange Commission, the fund's obligations under a CDX agreement will be accrued daily and, where applicable, offset against any amounts owing to the fund. In connection with CDX transactions in which the fund acts as protection buyer, the fund will segregate liquid assets with a value at least equal to the fund's exposure (i.e., any accrued but unpaid net amounts owed by the fund to any counterparty), on a marked-to-market basis, less the value of any posted margin. When the fund acts as protection seller, the fund will segregate liquid assets with a value at least equal to the full notional amount of the swap, less the value of any posted margin. Such segregation is intended to ensure that the fund has assets available to satisfy its obligations with respect to CDX transactions and to limit any potential leveraging of the fund's portfolio. However, segregation of liquid assets will not limit the fund's exposure to loss. To maintain this required margin, the fund may also have to sell portfolio securities at disadvantageous prices,

and the earmarking of liquid assets will have the effect of limiting the fund's ability to otherwise invest those assets in other securities or instruments.

Equity-linked notes — A fund may purchase equity-linked notes to enhance the current income of its portfolio. Equity-linked notes are hybrid instruments that are specially designed to combine the characteristics of one or more reference securities — usually a single stock, a stock index or a basket of stocks — and a related equity derivative, such as a put or call option, in a single note form. For example, an equity-linked note that refers to the stock of an issuer may be the economic equivalent of holding a position in that stock and simultaneously selling a call option on that stock with a strike price greater than the current stock price. The holder of the note would be exposed to decreases in the price of the equity to the same extent as if it held the equity directly. However, if the stock appreciated in value, the noteholder would only benefit from stock price increases up to the strike price (i.e., the point at which the holder of the call option would be expected to exercise its right to buy the underlying stock). Additionally, the terms of an equity-linked note may provide for periodic interest payments to holders at either a fixed or floating rate.

As described in the example above, the return on an equity-linked note is generally tied to the performance of the underlying reference security or securities. In addition to any interest payments made during the term of the note, at maturity, the noteholder usually receives a return of principal based on the capital appreciation of the linked securities. Depending on the terms of the issuance, the maximum principal amount to be repaid on the equity-linked note may be capped. For example, in consideration for greater current income or yield, a noteholder may forego its participation in the capital appreciation of the underlying equity assets above a predetermined price limit. Alternatively, if the linked securities have depreciated in value, or if their price fluctuates outside of a preset range, the noteholder may receive only the principal amount of the note, or may lose the principal invested in the equity-linked note entirely.

The price of an equity-linked note is derived from the value of the underlying linked securities. The level and type of risk involved in the purchase of an equity-linked note by the fund is similar to the risk involved in the purchase of the underlying linked securities. However, the value of an equity-linked note is also dependent on the individual credit of the issuer of the note, which, in the case of an unsecured note, will generally be a major financial institution, and, in the case of a collateralized note, will generally be a trust or other special purpose vehicle or finance subsidiary established by a major financial institution for the limited purpose of issuing the note. An investment in an equity-linked note bears the risk that the issuer of the note will default or become bankrupt. In such an event, the fund may have difficulty being repaid, or may fail to be repaid, the principal amount of, or income from, its investment. Like other structured products, equity-linked notes are frequently secured by collateral consisting of a combination of debt or related equity securities to which payments under the notes are linked. If so secured, the fund would look to this underlying collateral for satisfaction of claims in the event that the issuer of an equity-linked note defaulted under the terms of the note. However, depending on the law of the jurisdictions in which an issuer is organized and in which the note is issued, in the event of default, the fund may incur substantial expenses in seeking recovery under an equity-linked note, and may have limited legal recourse in attempting to do so.

Equity-linked notes are often privately placed and may not be rated, in which case the fund will be more dependent than would otherwise be the case on the ability of the investment adviser to evaluate the creditworthiness of the issuer, the underlying security, any collateral features of the note, and the potential for loss due to market and other factors. Ratings of issuers of equity-linked notes refer only to the creditworthiness of the issuer and strength of related collateral arrangements or other credit supports, and do not take into account, or attempt to rate, any potential risks of the underlying equity securities. The fund's successful use of equity-linked notes will usually depend on the investment adviser's ability to accurately forecast movements in the prices of the underlying securities. Should the prices of the underlying securities move in an unexpected manner, or should the structure of a note respond to market conditions differently than anticipated, the fund may not achieve the anticipated

benefits of the investment in the equity-linked note, and the fund may realize losses, which could be significant and could include the fund's entire principal investment in the note.

Equity-linked notes are generally designed for the over-the-counter institutional investment market, and the secondary market for equity-linked notes may be limited. The lack of a liquid secondary market may have an adverse effect on the ability of the fund to accurately value and/or sell the equity-linked notes in its portfolio.

Diversification — Global Bond Fund is a nondiversified investment company which allows the fund to invest a greater percentage of its assets in any one issuer. For the fund to be considered a "diversified" investment company under the Investment Company Act of 1940, as amended, the fund with respect to 75% of its total assets, would be required to limit its investment in any one issuer (other than the U.S. government) to 5% of the market value of the total assets of the fund or to 10% of the outstanding voting securities of such issuer. However, such a diversification limitation would reduce the extent to which the fund could concentrate its investments in securities of governmental issuers outside the United States, which are generally considered to be of higher credit quality than are securities of private issuers domiciled outside the United States. Accordingly, such a diversification limitation might increase the fund's investment risk. Although the fund is nondiversified, it has no current intention of investing more than 5% of its assets in securities of any one corporate issuer. In addition, the fund intends to comply with the diversification and other requirements of the U.S. Internal Revenue Code of 1986, as amended, applicable to regulated investment companies so that the fund will not be subject to U.S. taxes on the net investment income and net capital gains that it distributes to its shareholders. (See "Taxes and Distributions.")

Cybersecurity risks — With the increased use of technologies such as the Internet to conduct business, the series has become potentially more susceptible to operational and information security risks through breaches in cybersecurity. In general, a breach in cybersecurity can result from either a deliberate attack or an unintentional event. Cybersecurity breaches may involve, among other things, infection by computer viruses or other malicious software code or unauthorized access to the fund's digital information systems, networks or devices through "hacking" or other means, in each case for the purpose of misappropriating assets or sensitive information (including, for example, personal shareholder information), corrupting data or causing operational disruption or failures in the physical infrastructure or operating systems that support the fund. Cybersecurity risks also include the risk of losses of service resulting from external attacks that do not require unauthorized access to the fund's systems, networks or devices. For example, denial-of-service attacks on the investment adviser's or an affiliate's website could effectively render the fund's network services unavailable to fund shareholders and other intended end-users. Any such cybersecurity breaches or losses of service may cause the fund to lose proprietary information, suffer data corruption or lose operational capacity, which, in turn, could cause the fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. While the fund and its investment adviser have established business continuity plans and risk management systems designed to prevent or reduce the impact of cybersecurity attacks, there are inherent limitations in such plans and systems due in part to the ever-changing nature of technology and cybersecurity attacks, and there is a possibility that certain risks have not been adequately identified or prepared for.

In addition, cybersecurity failures by or breaches of the fund's third-party service providers (including, but not limited to, the fund's investment adviser, transfer agent, custodian, administrators and other financial intermediaries) may disrupt the business operations of the service providers and of the fund, potentially resulting in financial losses, the inability of fund shareholders to transact business with the fund and of the fund to process transactions, the inability of the fund to calculate its net asset value, violations of applicable privacy and other laws, rules and regulations, regulatory fines, penalties, reputational damage, reimbursement or other compensatory costs and/or additional compliance costs associated with implementation of any corrective measures. The series and its shareholders could be negatively impacted as a result of any such cybersecurity breaches, and there can be no assurance that

the series will not suffer losses relating to cybersecurity attacks or other informational security breaches affecting the series' third-party service providers in the future, particularly as the series cannot control any cybersecurity plans or systems implemented by such service providers.

Cybersecurity risks may also impact issuers of securities in which the fund invests, which may cause the fund's investments in such issuers to lose value.

Securities lending activities – Global Small Capitalization Fund may lend portfolio securities to brokers, dealers or other institutions that provide cash or U.S. Treasury securities as collateral in an amount at least equal to the value of the securities loaned. While portfolio securities are on loan, the fund will continue to receive the equivalent of the interest and the dividends or other distributions paid by the issuer on the securities, as well as a portion of the interest on the investment of the collateral. Additionally, although the fund will not have the right to vote on securities while they are on loan, the fund has a right to consent on corporate actions and a right to recall each loan to vote on proposals, including proposals involving material events affecting securities loaned. The fund has delegated the decision to lend portfolio securities to the investment adviser. The adviser also has the discretion to consent on corporate actions and to recall securities on loan to vote. In the event the adviser deems a corporate action or proxy vote material, it will use reasonable efforts to recall the securities and consent to or vote on the matter.

Securities lending involves risks, including the risk that the loaned securities may not be returned in a timely manner or at all and/or the risk of a loss of rights in the collateral if a borrower or the lending agent defaults. These risks could be greater for non-U.S. securities. Additionally, losses could result from the reinvestment of collateral received on loaned securities in investments that decline in value, default or do not perform as well as expected. The fund will make loans only to parties deemed by the fund's adviser to be in good standing and when, in the adviser's judgment, the income earned would justify the risks.

JPMorgan Chase Bank, N.A. ("JPMorgan") serves as securities lending agent for the fund. As the securities lending agent, JPMorgan administers the fund's securities lending program pursuant to the terms of a securities lending agent agreement entered into between the fund and JPMorgan. Under the terms of the agreement, JPMorgan is responsible for making available to approved borrowers securities from the fund's portfolio. JPMorgan is also responsible for the administration and management of the fund's securities lending program, including the preparation and execution of an agreement with each borrower governing the terms and conditions of any securities loan, ensuring that securities loans are properly coordinated and documented, ensuring that loaned securities are valued daily and that the corresponding required collateral is delivered by the borrowers, arranging for the investment of collateral received from borrowers, and arranging for the return of loaned securities to the fund in accordance with the fund's instructions or at loan termination. As compensation for its services, JPMorgan receives a portion of the amount earned by the fund for lending securities.

The following table sets forth, for the fund's most recently completed fiscal year, the fund's dollar amount of income and fees and/or other compensation related to its securities lending activities. Net income from securities lending activities may differ from the amount reported in the fund's annual report, which reflects estimated accruals.

Gross income from securities lending activities	\$866,090
Fees paid to securities lending agent from a revenue split	38,138
Fees paid for any cash collateral management service (including fees deducted from a pooled cash collateral reinvestment vehicle) not included in the	0
revenue split	ı
Administrative fees not included in the revenue split	0
Indemnification fees not included in the revenue split	i O
Rebates (paid to borrower)	102,934
Other fees not included in the revenue split	0
Aggregate fees/compensation for securities lending activities	141,072
Net income from securities lending activities	725,018

Portfolio turnover — Portfolio changes will be made without regard to the length of time particular investments may have been held. Short-term trading profits are not the funds' objective, and changes in their investments are generally accomplished gradually, though short-term transactions may occasionally be made. Higher portfolio turnover may involve correspondingly greater transaction costs in the form of dealer spreads or brokerage commissions. It may also result in the realization of net capital gains, which are taxable when distributed to shareholders, unless the shareholder is exempt from taxation or his or her account is tax-favored.

Fixed income securities are generally traded on a net basis and usually neither brokerage commissions nor transfer taxes are involved. Transaction costs are usually reflected in the spread between the bid and asked price.

A fund's portfolio turnover rate would equal 100% if each security in the fund's portfolio was replaced once per year. The following table sets forth the portfolio turnover rates for each fund for the fiscal years ended December 31, 2018 and 2017, and the portfolio turnover rates excluding mortgage dollar roll transactions for certain funds for the fiscal years ended December 31, 2018 and 2017. See "Forward commitment, when issued and delayed delivery transactions" above for more information on mortgage dollar rolls.

^{*} Increases (or decreases) in turnover were due to increased (or decreased) trading activity during the period.

See "Financial highlights" in the prospectus for each fund's annual portfolio turnover rates for each of the last five fiscal years.

Corporate Bond Fund has not yet begun investment operations, and therefore has not yet had portfolio turnover.

Fund policies

All percentage limitations in the following fund policies are considered at the time securities are purchased and are based on a fund's net assets (excluding, for the avoidance of doubt, collateral held in connection with securities lending activities) unless otherwise indicated. None of the following policies involving a maximum percentage of assets will be considered violated unless the excess occurs immediately after, and is caused by, an acquisition by a fund. In managing a fund, a fund's investment adviser may apply more restrictive policies than those listed below.

Fundamental policies — The Series has adopted the following policies, which may not be changed without approval by holders of a majority of its outstanding shares. Such majority is currently defined in the Investment Company Act of 1940, as amended (the "1940 Act"), as the vote of the lesser of (a) 67% or more of the voting securities present at a shareholder meeting, if the holders of more than 50% of the outstanding voting securities are present in person or by proxy, or (b) more than 50% of the outstanding voting securities.

The following policies apply to each fund in the Series (please also see "Additional information about fundamental policies" below):

- 1. Except as permitted by (i) the 1940 Act and the rules and regulations thereunder, or other successor law governing the regulation of registered investment companies, or interpretations or modifications thereof by the U.S. Securities and Exchange Commission ("SEC"), SEC staff or other authority of competent jurisdiction, or (ii) exemptive or other relief or permission from the SEC, SEC staff or other authority of competent jurisdiction, a fund may not:
 - a. Borrow money;
 - b. Issue senior securities;
 - c. Underwrite the securities of other issuers;
 - d. Purchase or sell real estate or commodities;
 - e. Make loans; or
 - f. Purchase the securities of any issuer if, as a result of such purchase, a fund's investments would be concentrated in any particular industry.
- 2. The fund may not invest in companies for the purpose of exercising control or management.

Nonfundamental policies — The following policy may be changed without shareholder approval:

The fund may not acquire securities of open-end investment companies or unit investment trusts registered under the 1940 Act in reliance on Sections 12(d)(1)(F) or 12(d)(1)(G) of the 1940 Act.

Additional information about fundamental policies — The information below is not part of the Series' fundamental policies. This information is intended to provide a summary of what is currently required or permitted by the 1940 Act and the rules and regulations thereunder, or by the interpretive guidance thereof by the SEC or SEC staff, for particular fundamental policies of the Series. Information is also provided regarding the fund's current intention with respect to certain investment practices permitted by the 1940 Act.

For purposes of fundamental policy 1a, the fund may borrow money in amounts of up to 33-1/3% of its total assets from banks for any purpose. Additionally, the fund may borrow up to 5% of its total assets from banks or other lenders for temporary purposes (a loan is presumed to be for temporary purposes if it is repaid within 60 days and is not extended or renewed). The percentage limitations in this policy are considered at the time of borrowing and thereafter. See "General information - Credit facility" in this statement of additional information for more information.

For purposes of fundamental policy 1b, a senior security does not include any promissory note or evidence of indebtedness if such loan is for temporary purposes only and in an amount not exceeding 5% of the value of the total assets of the fund at the time the loan is made (a loan is presumed to be for temporary purposes if it is repaid within 60 days and is not extended or renewed). Further, to the extent the fund covers its commitments under certain types of agreements and transactions, including derivatives, mortgage-dollar-roll transactions, sale-buybacks, when-issued, delayed-delivery, or forward commitment transactions, and other similar trading practices, by segregating or earmarking liquid assets equal in value to the amount of the fund's commitment (in accordance with applicable SEC or SEC staff guidance), such agreement or transaction will not be considered a senior security by the fund.

For purposes of fundamental policy 1c, the policy will not apply to the fund to the extent the fund may be deemed an underwriter within the meaning of the 1933 Act in connection with the purchase and sale of fund portfolio securities in the ordinary course of pursuing its investment objectives and strategies.

For purposes of fundamental policy 1e, the fund may not lend more than 33-1/3% of its total assets, provided that this limitation shall not apply to the fund's purchase of debt obligations, money market instruments and repurchase agreements.

For purposes of fundamental policy 1f, the fund may not invest more than 25% of its total assets in the securities of issuers in a particular industry. This policy does not apply to investments in securities of the United States government, its agencies or instrumentalities or government sponsored entities or repurchase agreements with respect thereto. Additionally, for purposes of fundamental policy 1f, Global Bond Fund considers the sovereign debt of each country as one separate industry.

Management of the Series

Board of trustees and officers

Independent trustees¹

The Series' nominating and governance committee and board select independent trustees with a view toward constituting a board that, as a body, possesses the qualifications, skills, attributes and experience to appropriately oversee the actions of the Series' service providers, decide upon matters of general policy and represent the long-term interests of fund shareholders. In doing so, they consider the qualifications, skills, attributes and experience of the current board members, with a view toward maintaining a board that is diverse in viewpoint, experience, education and skills.

The Series seeks independent trustees who have high ethical standards and the highest levels of integrity and commitment, who have inquiring and independent minds, mature judgment, good communication skills, and other complementary personal qualifications and skills that enable them to function effectively in the context of the Series' board and committee structure and who have the ability and willingness to dedicate sufficient time to effectively fulfill their duties and responsibilities.

Each independent trustee has a significant record of accomplishments in governance, business, not-for-profit organizations, government service, academia, law, accounting or other professions. Although no single list could identify all experience upon which the Series' independent trustees draw in connection with their service, the following table summarizes key experience for each independent trustee. These references to the qualifications, attributes and skills of the trustees are pursuant to the disclosure requirements of the SEC, and shall not be deemed to impose any greater responsibility or liability on any trustee or the board as a whole. Notwithstanding the accomplishments listed below, none of the independent trustees is considered an "expert" within the meaning of the federal securities laws with respect to information in the Series' registration statement.

Name, year of birth and position with Series (year first elected as a trustee²) William H. Baribault, 1945 Trustee (2009) James G. Ellis, 1947 Trustee (2010)	Principal occupation(s) during the past five years CEO and President, Richard Nixon Foundation; Chairman of the Board and CEO, Oakwood Enterprises (private investment and consulting) Dean and Professor of Marketing, Marshall School of Business, University of Southern California	Number of portfolios in fund complex overseen by trustee 82	Other directorships ³ held by trustee during the past five years General Finance Corporation Mercury General Corporation Former director of Quiksilver, Inc. (until 2014)	Other relevant experience Service as chief executive officer for multiple companies Corporate board experience Service on advisory and trustee boards for charitable, educational and nonprofit organizations Service as chief executive officer for multiple companies Corporate board experience Service on advisory and trustee boards for charitable, municipal and nonprofit organizations

Bush Foundation	Number of portfolios in fund complex overseen by trustee 83	Other directorships ³ held by trustee during the past five years Former director of ClubCorp Holdings, Inc. (until 2017)	Other relevant experience Former U.S. Secretary of Education, U.S. Department of Education Former Assistant to the President for Domestic Policy, The White House Former senior advisor to the Governor of Texas Service on advisory and trustee boards for charitable and nonprofit organizations
Alexandra Trower, 1964 Trustee (2018)	Executive Vice President, Global Communications and Corporate Officer, The Estée Lauder Companies	78	None	Service on trustee boards for charitable and nonprofit organizations Senior corporate management experience Branding

Interested trustee(s)^{4,5}

Interested trustees have similar qualifications, skills and attributes as the independent trustees. Interested trustees are senior executive officers and/or directors of Capital Research and Management Company or its affiliates. Such management roles with the Series' service providers also permit the interested trustees to make a significant contribution to the Series' board.

The address for all trustees and officers of the Series is 333 South Hope Street, 55th Floor, Los Angeles, California 90071, Attention: Secretary.

¹ The term independent trustee refers to a trustee who is not an "interested person" of the funds within the meaning of the 1940 Act.

² Trustees and officers of the Series serve until their resignation, removal or retirement.

³ This includes all directorships/trusteeships (other than those in the American Funds or other funds managed by Capital Research and Management Company or its affiliates) that are held by each trustee as a director/trustee of a public company or a registered investment company. Unless otherwise noted, all directorships/trusteeships are current.

⁴ The term interested trustee refers to a trustee who is an "interested person" of the funds within the meaning of the 1940 Act, on the basis of his or her affiliation with the Series' investment adviser, Capital Research and Management Company, or affiliated entities.

⁵ All of the trustees and/or officers listed, with the exception of Martin Jacobs, S. Keiko McKibben and Renaud H. Samyn, are officers and/or directors/trustees of one or more of the other funds for which Capital Research and Management Company serves as investment adviser.

Fund shares owned by trustees as of December 31, 2018:

Name	Dollar range ^{1,2} of fund shares owned ³	Aggregate dollar range ¹ of shares owned in all funds in the American Funds family overseen by trustee	Dollar range ¹ of independent trustees deferred compensation ⁴ allocated to fund	Aggregate dollar range ^{1,2} of independent trustees deferred compensation ⁴ allocated to all funds within American Funds family overseen by trustee
Independent trustees William H. Baribault	None	\$50,001 - \$100,000	N/A ⁵	Over \$100,000
James G. Ellis	None	Over \$100,000	N/A ⁵	N/A
Nariman Farvardin	None	Over \$100,000	N/A ⁵	Over \$100,000

Name Interested trustees	Dollar range ^{1,2} of fund shares owned	Aggregate dollar range ¹ of shares owned in all funds in the American Funds family overseen by trustee
Donald D. O'Neal	None	None
Michael C. Gitlin ⁶	None	Over \$100,000

Ownership disclosure is made using the following ranges: None; \$1 – \$10,000; \$10,001 – \$50,000; \$50,001 – \$100,000; and Over \$100,000. The amounts listed for interested trustees include shares owned through The Capital Group Companies, Inc. retirement plan and 401(k) plan.

² N/A indicates that the listed individual, as of December 31, 2018, was not a trustee of a particular fund, did not allocate deferred compensation to the fund or did not participate in the deferred compensation plan.

³ Shares of the funds may only be owned by purchasing variable annuity and variable life insurance contracts. Each trustee's need for variable annuity or variable life contracts and the role those contracts would play in his or her comprehensive investment portfolio will vary and depend on a number of factors including tax, estate planning, life insurance, alternative retirement plans or other considerations.

⁴ Eligible trustees may defer their compensation under a nonqualified deferred compensation plan. Amounts deferred by the trustee accumulate at an earnings rate determined by the total return of one or more American Funds as designated by the trustee.

 $^{^{5}}$ The funds in the Series are not available for investment in the independent trustees deferred compensation plan.

 $^{^{\}rm 6}$ Mr. Gitlin was elected to the board effective January 1, 2019.

Trustee compensation — No compensation is paid by the Series to any officer or trustee who is a director, officer or employee of the investment adviser or its affiliates. Except for the independent trustees listed in the "Board of trustees and officers — Independent trustees" table under the "Management of the Series" section in this statement of additional information, all other officers and trustees of the Series are directors, officers or employees of the investment adviser or its affiliates. The boards of funds advised by the investment adviser typically meet either individually or jointly with the boards of one or more other such funds with substantially overlapping board membership (in each case referred to as a "board cluster"). The Series typically pays each independent trustee an annual fee, which ranges from \$21,208 to \$46,338, based primarily on the total number of board clusters on which that independent trustee serves.

In addition, the Series generally pays independent trustees attendance and other fees for meetings of the board and its committees. The board chair receives an additional fee for this service

Independent trustees also receive attendance fees for certain special joint meetings and information sessions with directors and trustees of other groupings of funds advised by the investment adviser. The Series and the other funds served by each independent trustee each pay an equal portion of these attendance fees.

No pension or retirement benefits are accrued as part of Series expenses. Independent trustees may elect, on a voluntary basis, to defer all or a portion of their fees through a deferred compensation plan in effect for the Series. The Series also reimburses certain expenses of the independent trustees.

Trustee compensation earned during the fiscal year ended December 31, 2018:

Name	Aggregate compensation (including voluntarily deferred compensation ¹) from the series	Total compensation (including voluntarily deferred compensation ¹) from all funds managed by Capital Research and Management Company or its affiliates
William H. Baribault ²	\$80,966	\$413,345
James G. Ellis	80,699	410,845
Nariman Farvardin ²	78,360	362,545
Leonard R. Fuller2	79,218	394,345
(retired December 31, 2018)		
Mary Davis Holt	74,218	340,045
R. Clark Hooper ²	83,487	466,020
Merit E. Janow	78,015	372,345
Laurel B. Mitchell ²	97,416	314,845
Frank M. Sanchez (retired December 31, 2018)	94,476	303,845
Margaret Spellings ²	69,834	447,920
Alexandra Trower ²	94,476	303,845

¹ Amounts may be deferred by eligible trustees under a nonqualified deferred compensation plan adopted by the Series in 1993. Deferred amounts accumulate at an earnings rate determined by the total return of one or more American Funds as designated by the trustees. Compensation shown in this table for the fiscal year ended December 31, 2018 does not include earnings on amounts deferred in previous fiscal years. See footnote 2 to this table for more information.

² Since the deferred compensation plan's adoption, the total amount of deferred compensation accrued by the Series (plus earnings thereon) through the end of the 2018 fiscal year for participating trustees is as follows: William H. Baribault (\$99,751), Nariman Farvardin (\$74,289), Leonard R. Fuller (\$270,537), R. Clark Hooper (\$46,933), Laurel B. Mitchell (\$101,862), Margaret Spellings (\$181,652) and Alexandra Trower (\$89,088). Amounts deferred and accumulated earnings thereon are not funded and are general unsecured liabilities of the Series until paid to the trustees.

Series organization and the board of trustees — The Series, an open-end investment company, was organized as a Massachusetts business trust on September 13, 1983. At a meeting of the Series' shareholders on November 24, 2009, shareholders approved the reorganization of the Series to a Delaware statutory trust. However, the Series reserved the right to delay implementing the reorganization and has elected to do so. A summary comparison of the governing documents and state laws affecting the Delaware statutory trust and the current form of organization of the Series can be found in the proxy statement for the Series dated August 28, 2009, which is available on the SEC's website at sec.gov.

All Series operations are supervised by its board of trustees, which meets periodically and performs duties required by applicable state and federal laws. Independent board members are paid certain fees for services rendered to the Series as described above. They may elect to defer all or a portion of these fees through a deferred compensation plan in effect for the Series

Massachusetts common law provides that a trustee of a Massachusetts business trust owes a fiduciary duty to the trust and must carry out his or her responsibilities as a trustee in accordance with that fiduciary duty. Generally, a trustee will satisfy his or her duties if he or she acts in good faith and uses ordinary prudence.

The Series currently consists of separate funds which have separate assets and liabilities, and invest in separate investment portfolios. The board of trustees may create additional funds in the future. Income, direct liabilities and direct operating expenses of a fund will be allocated directly to that fund and general liabilities and expenses of the Series will be allocated among the funds in proportion to the total net assets of each fund.

Each fund has Class 1, Class 1A, Class 2 and Class 4 shares. In addition, Growth Fund, International Fund, Growth-Income Fund, Asset Allocation Fund, High-Income Bond Fund, Ultra-Short Bond Fund and U.S. Government/AAA-Rated Securities Fund have Class 3 shares. Other funds in the series have Class P1 and/or Class P2 shares. The shares of each class represent an interest in the same investment portfolio. Each class has equal rights as to voting, redemption, dividends and liquidation, except that each class bears different distribution expenses and other expenses properly attributable to the particular class as approved by the board of trustees and set forth in the Series' amended and restated rule 18f-3 Plan. Class 1A, Class 2, Class 3 and Class 4 shareholders have exclusive voting rights with respect to their respective rule 12b-1 Plans adopted in connection with the distribution of Class 1A, Class 2, Class 3 and Class 4 shares. Class 1A and Class 4 shareholders have exclusive voting rights with respect to their Insurance Administrative Services Plans. Shares of each Class of the Series vote together on matters that affect all classes in substantially the same manner. Each class votes as a class on matters that affect that class alone.

The Series does not hold annual meetings of shareholders. However, significant matters that require shareholder approval, such as certain elections of board members or a change in a fundamental investment policy, will be presented to shareholders at a meeting called for such purpose. Shareholders have one vote per share owned. At the request of the holders of at least 10% of the shares, the Series will hold a meeting at which any member of the board could be removed by a majority vote.

The Series' declaration of trust and by-laws, as well as separate indemnification agreements that the Series has entered into with independent trustees, provide in effect that, subject to certain conditions, the Series will indemnify its officers and trustees against liabilities or expenses actually and reasonably incurred by them relating to their service to the Series. However, trustees are not protected from liability by reason of their willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of their office.

Leadership structure — The board's chair is currently an independent trustee who is not an "interested person" of the Series within the meaning of the 1940 Act. The board has determined that an independent chair facilitates oversight and enhances the effectiveness of the board. The independent chair's duties include, without limitation, generally presiding at meetings of the board, approving board meeting schedules and agendas, leading meetings of the independent trustees in executive session, facilitating communication with committee chairs, and serving as the principal independent trustee contact for Series management and independent counsel to the trustees and the fund.

Risk oversight — Day-to-day management of the Series, including risk management, is the responsibility of the Series' contractual service providers, including the Series' investment adviser, principal underwriter/distributor and transfer agent. Each of these entities is responsible for specific portions of the Series' operations, including the processes and associated risks relating to the funds' investments, integrity of cash movements, financial reporting, operations and compliance. The board of trustees oversees the service providers' discharge of their responsibilities, including the processes they use. In that regard, the board receives reports regarding the operations of the Series' service providers, including risks. For example, the board receives reports from investment professionals regarding risks related to the funds' investments and trading. The board also receives compliance reports from the Series and the investment adviser's chief compliance officers addressing certain areas of risk.

Committees of the Series board, which are comprised of independent board members, none of whom is an "interested person" of the fund within the meaning of the 1940 Act, as well as joint committees of independent board members of funds managed by Capital Research and Management Company, also explore risk management procedures in particular areas and then report back to the full board. For example, the Series' audit committee oversees the processes and certain attendant risks relating to financial reporting, valuation of fund assets, and related controls.

Not all risks that may affect the Series can be identified or processes and controls developed to eliminate or mitigate their effect. Moreover, it is necessary to bear certain risks (such as investment-related risks) to achieve each fund's objectives. As a result of the foregoing and other factors, the ability of the Series' service providers to eliminate or mitigate risks is subject to limitations.

Committees of the board of trustees — The Series has an audit committee comprised of William H. Baribault, Mary Davis Holt, Laurel B. Mitchell and Alexandra Trower. The committee provides oversight regarding the Series' accounting and financial reporting policies and practices, its internal controls and the internal controls of the Series' principal service providers. The committee acts as a liaison between the Series' independent registered public accounting firm and the full board of trustees. The audit committee held five meetings during the 2018 fiscal year.

The Series has a contracts committee comprised of all of its independent board members. The committee's principal function is to request, review and consider the information deemed necessary to evaluate the terms of certain agreements between the Series and its investment adviser or the investment adviser's affiliates, such as the Investment Advisory and Service Agreement and plan of distribution adopted pursuant to rule 12b-1 under the 1940 Act, that the Series may enter into, renew or continue, and to make its recommendations to the full board of trustees on these matters. The contracts committee held one meeting during the 2018 fiscal year.

The Series has a nominating and governance committee comprised of James G. Ellis, Nariman Farvardin, R. Clark Hooper, Merit E. Janow and Margaret Spellings. The committee periodically reviews such issues as the board's composition, responsibilities, committees, compensation and other relevant issues, and recommends any appropriate changes to the full board of trustees. The committee also evaluates, selects and nominates independent trustee candidates to the full board of trustees. While the committee normally is able to identify from its own and other resources an ample

number of qualified candidates, it will consider shareholder suggestions of persons to be considered as nominees to fill future vacancies on the board. Such suggestions must be sent in writing to the nominating and governance committee of the Series, addressed to the Series' secretary, and must be accompanied by complete biographical and occupational data on the prospective nominee, along with a written consent of the prospective nominee for consideration of his or her name by the committee. The nominating and governance committee held three meetings during the 2018 fiscal year.

The independent board members of the Series have oversight responsibility for the Series and certain other funds managed by the investment adviser. As part of their oversight responsibility for these funds, each independent board member sits on one of three fund review committees comprised solely of independent board members. The three committees are divided by portfolio type. Each committee functions independently and is not a decision making body. The purpose of the committees is to assist the board of each series in the oversight of the investment management services provided by the investment adviser. In addition to regularly monitoring and reviewing investment results, investment activities and strategies used to manage the funds' assets, the committees also receive reports from the investment adviser's Principal Investment Officers for the funds, portfolio managers and other investment personnel concerning efforts to achieve the funds' investment objectives. Each committee reports to the full board of the Series.

Proxy voting procedures and principles — The funds' investment adviser, in consultation with the Series' board, has adopted Proxy Voting Procedures and Principles (the "Principles") with respect to voting proxies of securities held by the funds and other American Funds. The complete text of these principles is available on the American Funds website at americanfunds.com. Proxies are voted by a committee of the appropriate equity investment division of the investment adviser under authority delegated by the Series' board. Therefore, if more than one fund invests in the same company, they may vote differently on the same proposal. The Boards of American Funds have established a Joint Proxy Committee ("JPC") composed of independent board members from each American Funds board. The JPC's role is to facilitate appropriate oversight of the proxy voting process and provide valuable input on corporate governance and related matters.

The Principles, which have been in effect in substantially their current form for many years, provide an important framework for analysis and decision-making by all funds. However, they are not exhaustive and do not address all potential issues. The Principles provide a certain amount of flexibility so that all relevant facts and circumstances can be considered in connection with every vote. As a result, each proxy received is voted on a case-by-case basis considering the specific circumstances of each proposal. The voting process reflects the funds' understanding of the company's business, its management and its relationship with shareholders over time.

The investment adviser seeks to vote all U.S. proxies; however, in certain circumstances it may be impracticable or impossible to do so. Proxies for companies outside the U.S. also are voted, provided there is sufficient time and information available. After a proxy statement is received, the investment adviser prepares a summary of the proposals contained in the proxy statement. A notation of any potential conflicts of interest also is included in the summary (see below for a description of Capital Research and Management Company's special review procedures).

For proxies of securities managed by a particular equity investment division of the investment adviser, the initial voting recommendation is made by one or more of the division's investment analysts familiar with the company and industry. A second recommendation is made by a proxy coordinator (an investment analyst or other individual with experience in corporate governance and proxy voting matters) within the appropriate investment division, based on knowledge of these Principles and familiarity with proxy-related issues. The proxy summary and voting recommendations are made available to the appropriate proxy voting committee for a final voting decision. In cases where a fund is co-managed and a security is held by more than one of the investment adviser's equity investment

divisions, the divisions may develop different voting recommendations for individual ballot proposals. If this occurs, and if permitted by local market conventions, the fund's position will generally be voted proportionally by divisional holding, according to their respective decisions. Otherwise, the outcome will be determined by the equity investment division or divisions with the larger position in the security as of the record date for the shareholder meeting.

In addition to our proprietary proxy voting, governance and executive compensation research, Capital Research and Management Company may utilize research provided by Institutional Shareholder Services, Glass-Lewis & Co. or other third-party advisory firms on a case-by-case basis. It does not, as a policy, follow the voting recommendations provided by these firms. It periodically assesses the information provided by the advisory firms and reports to the JPC, as appropriate.

From time to time the investment adviser may vote proxies issued by, or on proposals sponsored or publicly supported by (a) a client with substantial assets managed by the investment adviser or its affiliates, (b) an entity with a significant business relationship with Capital Group, or (c) a company with a director of an American Fund on its board (each referred to as an "Interested Party"). Other persons or entities may also be deemed an Interested Party if facts or circumstances appear to give rise to a potential conflict. The investment adviser analyzes these proxies and proposals on their merits and does not consider these relationships when casting its vote.

The investment adviser has developed procedures to identify and address instances where a vote could appear to be influenced by such a relationship. Under the procedures, prior to a final vote being cast by the investment adviser, the relevant proxy committees' voting results for proxies issued by Interested Parties are reviewed by a Special Review Committee ("SRC") of the investment division voting the proxy if the vote was in favor of the Interested Party.

If a potential conflict is identified according to the procedure above, the SRC will be provided with a summary of any relevant communications with the Interested Party, the rationale for the voting decision, information on the organization's relationship with the party and any other pertinent information. The SRC will evaluate the information and determine whether the decision was in the best interest of fund shareholders. It will then accept or override the voting decision or determine alternative action. The SRC includes senior investment professionals and legal and compliance professionals.

Information regarding how the funds voted proxies relating to portfolio securities during the 12-month period ended June 30 of each year will be available on or about September 1 of such year (a) without charge, upon request by calling American Funds Service Company at (800) 421-4225, (b) on the American Funds website and (c) on the SEC's website at sec.gov.

The following summary sets forth the general positions of American Funds, the Series and the investment adviser on various proposals. A copy of the full Principles is available upon request, free of charge, by calling American Funds Service Company or visiting the American Funds website.

Director matters — The election of a company's slate of nominees for director generally is supported. Votes may be withheld for some or all of the nominees if this is determined to be in the best interest of shareholders or if, in the opinion of the investment adviser, such nominee has not fulfilled his or her fiduciary duty. Separation of the chairman and CEO positions also may be supported.

Governance provisions — Typically, proposals to declassify a board (elect all directors annually) are supported based on the belief that this increases the directors' sense of accountability to shareholders. Proposals for cumulative voting generally are supported in order to promote management and board accountability and an opportunity for leadership change. Proposals

designed to make director elections more meaningful, either by requiring a majority vote or by requiring any director receiving more withhold votes than affirmative votes to tender his or her resignation, generally are supported.

Shareholder rights — Proposals to repeal an existing poison pill generally are supported. (There may be certain circumstances, however, when a proxy voting committee of a fund or an investment division of the investment adviser believes that a company needs to maintain anti-takeover protection.) Proposals to eliminate the right of shareholders to act by written consent or to take away a shareholder's right to call a special meeting typically are not supported.

Compensation and benefit plans — Option plans are complicated, and many factors are considered in evaluating a plan. Each plan is evaluated based on protecting shareholder interests and a knowledge of the company and its management. Considerations include the pricing (or repricing) of options awarded under the plan and the impact of dilution on existing shareholders from past and future equity awards. Compensation packages should be structured to attract, motivate and retain existing employees and qualified directors; however, they should not be excessive.

Routine matters — The ratification of auditors, procedural matters relating to the annual meeting and changes to company name are examples of items considered routine. Such items generally are voted in favor of management's recommendations unless circumstances indicate otherwise.

Principal fund shareholders — The following tables identify those investors who own of record, or are known by the Series to own beneficially, 5% or more of any class of a fund's shares as of the opening of business on April 1, 2019. Unless otherwise indicated, the ownership percentages below represent ownership of record rather than beneficial ownership.

As of April 1, 2019, the officers and trustees of the Series, as a group, owned beneficially or of record less than 1% of the outstanding shares of each fund.

Investment adviser — Capital Research and Management Company, the Series' investment adviser, founded in 1931, maintains research facilities in the United States and abroad (Beijing, Geneva, Hong Kong, London, Los Angeles, Mumbai, New York, San Francisco, Singapore, Tokyo and Washington, D.C.). These facilities are staffed with experienced investment professionals. The investment adviser is located at 333 South Hope Street, Los Angeles, CA 90071. It is a wholly owned subsidiary of The Capital Group Companies, Inc., a holding company for several investment adviser is located at 333 South Hope Street, Los Angeles, CA 90071. It is a wholly owned subsidiary of The Capital Group Companies, Inc., a holding company for several investment advisers and fixed income investment divisions. Capital Research and Management Company manages equity assets through its fixed income investment divisions, Capital Fixed Income Investors. The three equity investment divisions — Capital World Investors, Capital Research Global Investors and Capital International Investors — make investment decisions independently of one another. Portfolio managers in Capital International Investors rely on a research team that also provides investment services to institutional clients and other accounts advised by affiliates of Capital Research and Management Company. The investment adviser, which is deemed under the Commodity Exchange Act (the "CEA") to be the operator of certain funds, has claimed an exclusion from the definition of the term commodity pool operator under the CEA with respect to each fund and, therefore, is not subject to registration or regulation as such under the CEA with respect to the funds.

The investment adviser has adopted policies and procedures that address issues that may arise as a result of an investment professional's management of the funds and other funds and accounts. Potential issues could involve allocation of investment opportunities and trades among funds and accounts, use of information regarding the timing of fund trades, investment professional compensation and voting relating to portfolio securities. The investment adviser believes that its policies and procedures are reasonably designed to address these issues.

Compensation of investment professionals — As described in the prospectus, the investment adviser uses a system of multiple portfolio managers in managing fund assets, and, for certain funds, individual managers may allocate a portion of their segment of the fund to fixed income managers in the fund. In addition, Capital Research and Management Company's investment analysts may make investment decisions with respect to a portion of a fund's portfolio within their research coverage.

Portfolio managers and investment analysts are paid competitive salaries by Capital Research and Management Company. In addition, they may receive bonuses based on their individual portfolio results. Investment professionals also may participate in profit-sharing plans. The relative mix of compensation represented by bonuses, salary and profit-sharing plans will vary depending on the individual's portfolio results, contributions to the organization and other factors.

To encourage a long-term focus, bonuses based on investment results are calculated by comparing pretax total investment returns to relevant benchmarks over the most recent one, three-, five- and eight-year periods, with increasing weight placed on each succeeding measurement period. For portfolio managers, benchmarks may include measures of the marketplaces in which the fund invests and measures of the results of comparable mutual funds. For investment analysts, benchmarks may include relevant market measures and appropriate industry or sector indexes reflecting their areas of expertise. Capital Research and Management Company makes periodic subjective assessments of analysts' contributions to the investment process and this is an element of their overall compensation. The investment results of each of the funds' portfolio managers may be measured against one or more benchmarks, depending on his or her investment focus, such as:

Global Growth Fund — MSCI All Country World Index, Lipper Global Funds Index;

Global Small Capitalization Fund — Lipper US Small Cap Funds Index, Lipper International Small Cap Funds Index, MSCI USA Small Cap Index, MSCI All Country World ex USA Small Cap Index;

Growth Fund — S&P 500 Index, MSCI All Country World ex-USA Index, Lipper Growth Funds Index;

International Fund — MSCI All Country World ex USA Index, Lipper International Funds Index;

New World Fund — MSCI All Country World Index, Lipper Global Funds Index, MSCI Emerging Markets Index, Lipper Emerging Markets Funds Index, JP Morgan Emerging Markets Bond Index Global Diversified, a custom average consisting of one share class per fund of emerging markets hard currency debt funds that disclose investment objectives and strategies comparable to those of the fund;

Blue Chip Income and Growth Fund — S&P 500 Index, Lipper Growth and Income Funds;

Global Growth and Income Fund — MSCI All Country World Index, Lipper Global Funds Index;

Growth-Income Fund — S&P 500 Index, Lipper Growth and Income Funds Index;

International Growth and Income Fund — MSCI All Country World ex USA Index, Lipper International Funds Index;

Capital Income Builder — Bloomberg Barclays U.S. Aggregate ex Credit, a custom index of U.S., international and global funds that have an explicit income objective or focus, a custom index of global securities screened by yield that aligns to the investment objectives and strategies of the fund;

Asset Allocation Fund — S&P 500 Index, Lipper Growth and Income Funds Index, Bloomberg Barclays U.S. Aggregate Index, Bloomberg Barclays U.S. Corporate High Yield Index 2% Issuer Cap:

Global Balanced Fund — MSCI All Country World Index, Bloomberg Barclays Global Aggregate Index, Lipper Global Funds Index, a custom average consisting of one share class per fund of global income funds that disclose investment objectives and strategies comparable to those of the fund;

Bond Fund — Bloomberg Barclays U.S. Aggregate Index, a custom average consisting of one share class per fund of core bond funds that disclose investment objectives and strategies comparable to those of the fund;

Corporate Bond Fund — Bloomberg Barclays U.S. Corporate Bond Index, a custom average consisting of one share class per fund of corporate debt BBB-rated funds that disclose investment objectives and strategies comparable to those of the fund, a custom average consisting of one share class per fund of corporate debt A-rated funds that disclose investment objectives and strategies comparable to those of the fund;

Global Bond Fund — Bloomberg Barclays Global Aggregate Bond Index; Bloomberg Barclays U.S. Corporate High Yield Index 2% Issuer Cap, a custom average consisting of one share class

per fund of global income funds that disclose investment objectives and strategies comparable to those of the fund, a custom average consisting of one share class per fund of high yield funds that disclose investment objectives and strategies comparable to those of the fund;

High-Income Bond Fund — Bloomberg Barclays U.S. Corporate High Yield Index 2% Issuer Cap, a custom average consisting of one share class per fund of high yield funds that disclose investment objectives and strategies comparable to those of the fund;

Mortgage Fund — Bloomberg Barclays U.S. Mortgage Backed Securities Index, a custom average consisting of one share class per fund of GNMA funds that disclose investment objectives and strategies comparable to those of the fund; and

U.S. Government/AAA-Rated Securities Fund — Bloomberg Barclays U.S. Government/Mortgage Backed Securities Index, a custom average consisting of one share class per fund of general U.S. Government funds that disclose investment objectives and strategies comparable to those of the fund.

From time to time, Capital Research and Management Company may adjust or customize these benchmarks to better reflect the universe of comparably managed funds of competitive investment management firms.

Portfolio manager fund holdings and management of other accounts — Shares of the funds may only be owned by purchasing variable annuity and variable life insurance contracts. Each portfolio manager's need for variable annuity or variable life insurance contracts and the role those contracts would play in his or her comprehensive investment portfolio will vary and depend on a number of factors including tax, estate planning, life insurance, alternative retirement plans or other considerations. The portfolio managers have determined that variable insurance or annuity contracts do not meet their current needs. Consequently, they do not hold shares of the funds.

Portfolio managers may also manage assets in other funds advised by Capital Research and Management Company or its affiliates. Other managed accounts as of the end of American Funds Insurance Series' most recently completed fiscal year are listed as follows:

The following table reflects information as of December 31, 2018:

Portfolio manager	Number of other registered investment companies (RICs) for which portfolio manager is a manager (assets of RICs in billions) ¹		Number of other pooled investment vehicles (PIVs) for which portfolio manager is a manager (assets of PIVs in billions) ¹		Number of other accounts for which portfolio manager is a manager (assets of other accounts in billions) ^{1,2}

¹ Indicates other RIC(s), PIV(s) or other accounts managed by Capital Research and Management Company or its affiliates for which the portfolio manager also has significant day to day management responsibilities. Assets noted are the total net assets of the RIC(s), PIV(s) or other accounts and are not the total assets managed by the individual, which is a substantially lower amount. No RIC, PIV or account has an advisory fee that is based on the performance of the RIC, PIV or account.

The fund's investment adviser has adopted policies and procedures to mitigate material conflicts of interest that may arise in connection with a portfolio manager's management of the fund, on the one hand, and investments in the other pooled investment vehicles and other accounts, on the other hand, such as material conflicts relating to the allocation of investment opportunities that may be suitable for both the fund and such other accounts.

² Personal brokerage accounts of portfolio managers and their families are not reflected.

³ The advisory fee of four of these accounts (representing \$2.78 billion in total assets) is based partially on their investment results.

⁴ The advisory fee of four of these accounts (representing \$2.55 billion in total assets) is based partially on their investment results.

⁵ The advisory fee of one of these accounts (representing \$0.02 billion in total assets) is based partially on its investment results.

⁶ The advisory fee of four of these accounts (representing \$2.55 billion in total assets) is based partially on their investment results.

⁷ The advisory fee of one of these accounts (representing \$0.14 billion in total assets) is based partially on its investment results.

Investment Advisory and Service Agreement — The Investment Advisory and Service Agreement (the "Agreement") between the Series and the investment adviser will continue in effect until April 30, 2020, unless sooner terminated, and may be renewed from year to year thereafter, provided that any such renewal has been specifically approved at least annually by (a) the board of trustees, or by the vote of a majority (as defined in the 1940 Act) of the outstanding voting securities of the applicable Series, and (b) the vote of a majority of trustees who are not parties to the Agreement or interested persons (as defined in the 1940 Act) of any such party, cast in person at a meeting called for the purpose of voting on such approval. The Agreement provides that the investment adviser has no liability to the Series for its acts or omissions in the performance of its obligations to the Series not involving willful misconduct, bad faith, gross negligence or reckless disregard of its obligations under the Agreement. The Agreement also provides that either party has the right to terminate it, without penalty, upon 60 days' written notice to the other party, and that the Agreement automatically terminates in the event of its assignment (as defined in the 1940 Act). In addition, the Agreement provides that the investment adviser may delegate all, or a portion of, its investment management responsibilities to one or more subsidiary advisers approved by the Series' board, pursuant to an agreement between the investment adviser and such subsidiary. Any such subsidiary adviser will be paid solely by the investment adviser out of its fees.

As compensation for its services, the investment adviser receives a monthly fee that is accrued daily, calculated at the annual rates of:

In addition to providing investment advisory services, the investment adviser furnishes the services and pays the compensation and travel expenses of qualified persons to perform the executive and related administrative functions of the Series, and provides necessary office space, office equipment and utilities, and general purpose accounting forms, supplies and postage used at the office of the Series relating to the services furnished by the investment adviser. Subject to the expense agreement described below, the Series will pay all expenses not expressly assumed by the investment adviser, including, but not limited to: registration and filing fees of federal and state agencies; blue sky expenses (if any); expenses of shareholders' meetings; the expense of reports to existing shareholders; expenses of printing proxies and prospectuses; insurance premiums; legal and auditing fees; dividend disbursement expenses; the expense of the issuance, transfer and redemption of its shares; custodian fees; printing and preparation of registration statements; taxes; compensation, fees and expenses paid to trustees unaffiliated with the investment adviser; association dues; and costs of stationary and forms prepared exclusively for the Series.

For the fiscal years ended December 31, 2018, 2017 and 2016, the investment adviser earned from the Series management fees, as follows:

	Fiscal year ended		
	2018	2017	2016
Global Growth Fund	\$32,234,000	\$30,510,000	\$27,627,000
Global Small Capitalization Fund	29,438,000	28,827,000	27,553,000
Growth Fund	83,065,000	77,148,000	69,570,000
International Fund	48,247,000	43,433,000	37,240,000
New World Fund	23,782,000	23,033,000	19,733,000

Ultra-Short Bond Fund	947,000	1,017,000	1,165,000
U.S. Government/AAA-Rated Securities Fund	10,160,000	10,190,000	10,395,000

The Series' board of trustees approved an amended Investment Advisory and Service Agreement, pursuant to which the annualized rate payable to the investment adviser on daily net assets of International Growth and Income Fund and Capital Income Builder in excess of certain levels would be decreased. The investment adviser voluntarily waived management fees to give effect to the approved rates in advance of the effective date of the amended Agreement. Accordingly, after giving effect to the voluntary fee waivers described above, the funds paid the investment adviser management fees of \$8,811,000 (a reduction of less than \$1,000) for International Growth and Income Fund and \$3,206,000 (a reduction of \$23,000) for Capital Income Builder for the fiscal year ended in 2018.

Administrative services — The investment adviser and its affiliates provide certain administrative services for shareholders of the fund's Class 1, 1A, 2, 3 and 4 shares. Administrative services are provided by the investment adviser and its affiliates to help assist third parties providing non-distribution services to fund shareholders. These services include providing indepth information on the fund and market developments that impact fund investments. Administrative services also include, but are not limited to, coordinating, monitoring and overseeing third parties that provide services to fund shareholders.

These services are provided pursuant to an Administrative Services Agreement (the "Administrative Agreement") between the fund and the investment adviser relating to the fund's Class 1, 1A, 2, 3 and 4 shares. The Administrative Agreement will continue in effect until April 30, 2020, unless sooner renewed or terminated, and may be renewed from year to year thereafter, provided that any such renewal has been specifically approved at least annually by the vote of a majority of the members of the fund's board who are not parties to the Administrative Agreement or interested persons (as defined in the 1940 Act) of any such party, cast in person at a meeting called for the purpose of voting on such approval. The fund may terminate the Administrative Agreement at any time by vote of a majority of independent board members. The investment adviser has the right to terminate the Administrative Agreement upon 60 days' written notice to the fund. The Administrative Agreement automatically terminates in the event of its assignment (as defined in the 1940 Act).

The Administrative Services Agreement between the fund and the investment adviser provides the fund the ability to charge an administrative services fee of 0.05% for all share classes. The investment adviser currently receives an administrative services fee at the annual rate of .01% of the average daily net assets of the fund (which could be increased as noted above). Administrative services fees are paid monthly and accrued daily.

During the 2018 fiscal year, the administrative services fees were:

		Administrative services fee			
	Class 1	Class 1A	Class 2	Class 3	Class 4

^{*} Amount less than \$1,000.

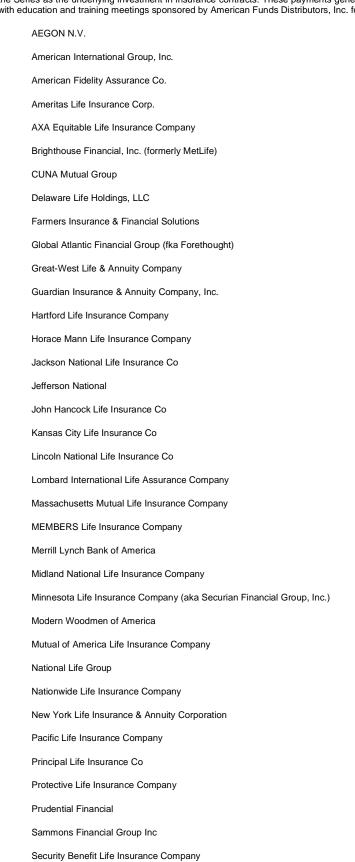

Plans of distribution — The Series has adopted plans of distribution (the "Plans") for its Class 1A, Class 2, Class 3 and Class 4 shares, pursuant to rule 12b-1 under the 1940 Act. As required by rule 12b-1, the Plans have been approved by a majority of the entire board of trustees, and separately by a majority of the trustees who are not "interested persons" of the Series and who have no direct or indirect financial interest in the operation of the Plans. Potential benefits of the Plans to the Series include benefits to the investment process from growth or stability of assets and maintenance of a financially healthy management organization. The selection and nomination of trustees who are not "interested persons" of the Series is committed to the discretion of the trustees who are not "interested persons" during the existence of the Plans. The Plans are reviewed quarterly and must be renewed annually by the board of trustees.

Under the Plans, the Series will pay to insurance company contract issuers .25% of each fund's average net assets annually (Class 2 and Class 4 shares) or .18% of each fund's average net assets annually (Class 3 shares) to finance any distribution activity which is primarily intended to benefit the Class 2, Class 3 and/or Class 4 shares of the Series, respectively, provided that the board of trustees of the Series has approved the categories of expenses for which payment is being made. Under the Plan for Class 1A shares, the Series may expend up to .25% of the assets of Class 1A shares; however, the board of trustees has not authorized any payments on Class 1A assets pursuant to the Plan for Class 1A shares. Payments made pursuant to the Plans will be used by insurance company contract issuers to pay a continuing annual service or distribution fee to dealers on the value of all variable annuity and variable life insurance contract payments for account-related services provided to existing shareholders. During the fiscal year ended December 31, 2018, the Series incurred distribution expenses for Class 2 shares of \$147,486,000, for Class 3 shares of \$838,000 and for Class 4 shares of \$20,782,000 payable to certain life insurance companies under the respective Plans. Accrued and unpaid distribution expenses were \$11,189,000 for Class 2 shares, \$63,000 for Class 3 shares and \$1,735,000 for Class 4 shares.

Insurance administration fee — The insurance companies for which the fund's Class 1A and Class 4 shares are available provide certain administrative services for the separate accounts that hold the shares of the fund and the contractholders for which the shares of the fund are beneficially owned as underlying investments of such contractholders annuities. These services include, but are not limited to, record maintenance, shareholder communications and transactional services.

These services are provided pursuant to Insurance Administrative Services Plans adopted by the Series relating to the fund's Class 1A and Class 4 shares. Under these plans, the insurance company receives .25% of the fund's average daily net assets attributable to Class 1A and Class 4 shares, respectively. During the fiscal year ended December 31, 2018, the Series incurred insurance administration fees of \$103,000 for Class 1A and \$20,784,000 for Class 4 shares.

Compensation to insurance companies — American Funds Distributors, Inc., at its expense, currently makes payments to certain of the insurance companies listed below that use the Series as the underlying investment in insurance contracts. These payments generally cover additional compensation (as described in the prospectus) and/or expenses associated with education and training meetings sponsored by American Funds Distributors, Inc. for insurance company sales forces.

Symetra Life Insurance Company

Thrivent Financial

Voya Financial

Western & Southern Financial Group

Woodmen Financial Services, Inc.

Execution of portfolio transactions

The investment adviser places orders with broker-dealers for the fund's portfolio transactions. Purchases and sales of equity securities on a securities exchange or an over-the-counter market are effected through broker-dealers who receive commissions for their services. Generally, commissions relating to securities traded on foreign exchanges will be higher than commissions relating to securities traded on U.S. exchanges and may not be subject to negotiation. Equity securities may also be purchased from underwriters at prices that include underwriting fees. Purchases and sales of fixed income securities are generally made with an issuer or a primary market maker acting as principal with no stated brokerage commission. The price paid to an underwriter for fixed income securities includes underwriting fees. Prices for fixed income securities in secondary trades usually include undisclosed compensation to the market maker reflecting the spread between the bid and ask prices for the securities.

In selecting broker-dealers, the investment adviser strives to obtain "best execution" (the most favorable total price reasonably attainable under the circumstances) for the fund's portfolio transactions, taking into account a variety of factors. These factors include the size and type of transaction, the nature and character of the markets for the security to be purchased or sold, the cost, quality, likely speed and reliability of execution and settlement, the broker-dealer's or execution venue's ability to offer liquidity and anonymity and the potential for minimizing market impact. The investment adviser considers these factors, which involve qualitative judgments, when selecting broker-dealers and execution venues for fund portfolio transactions. The investment adviser views best execution as a process that should be evaluated over time as part of an overall relationship with particular broker-dealers. The investment adviser and its affiliates negotiate commission rates with broker-dealers based on what they believe is reasonably necessary to obtain best execution. They seek, on an ongoing basis, to determine what the reasonable levels of commission rates for execution services are in the marketplace, taking various considerations into account, including the extent to which a broker-dealer has put its own capital at risk, historical commission rates and commission rates that other institutional investors are paying. The fund does not consider the investment adviser as having an obligation to obtain the lowest commission rate available for a portfolio transaction to the exclusion of price, service and qualitative considerations. Brokerage commissions are only a small part of total execution costs and other factors, such as market impact and speed of execution, contribute significantly to overall transaction costs.

The investment adviser may execute portfolio transactions with broker-dealers who provide certain brokerage and/or investment research services to it but only when in the investment adviser's judgment the broker-dealer is capable of providing best execution for that transaction. The investment adviser makes decisions for procurement of research separately and distinctly from decisions on the choice of brokerage and execution services. The receipt of these research services permits the investment adviser to supplement its own research and analysis and makes available the views of, and information from, individuals and the research staffs of other firms. Such views and information may be provided in the form of written reports, telephone contacts and meetings with securities analysts. These services may include, among other things, reports and other communications with respect to individual companies, industries, countries and regions, economic, political and legal developments, as well as scheduling meetings with corporate executives and seminars and conferences related to relevant subject matters. Research services that the investment adviser receives from broker-dealers may be used by the investment adviser in servicing the fund and other funds and accounts that it advises: however, not all such services will necessarily benefit the fund.

As of January 1, 2019, the investment adviser has undertaken to bear the cost of all third-party investment research services for all client accounts it advises. However, in order to compensate certain U.S. broker-dealers for research consumed, and valued, by the investment adviser's investment professionals, the investment adviser continues to operate a limited commission sharing arrangement with commissions on equity trades for certain registered investment companies it advises. The

investment adviser voluntarily reimburses such registered investment companies for all amounts collected into the commission sharing arrangement. In order to operate the commission sharing arrangement, the investment adviser may cause such registered investment companies to pay commissions in excess of what other broker-dealers might have charged for certain portfolio transactions in recognition of brokerage and/or investment research services. In this regard, the investment adviser has adopted a brokerage allocation procedure consistent with the requirements of Section 28(e) of the U.S. Securities Exchange Act of 1934. Section 28(e) permits the investment adviser and its affiliates to cause an account to pay a higher commission to a broker-dealer to compensate the broker-dealer or another service provider for certain brokerage and/or investment research services provided to the investment adviser and its affiliates, if the investment adviser and each affiliate makes a good faith determination that such commissions are reasonable in relation to the value of the services provided by such broker-dealer to the investment adviser and its affiliates in terms of that particular transaction or the investment adviser's overall responsibility to the fund and other accounts that it advises. Certain brokerage and/or investment research services may not necessarily benefit all accounts paying commissions to each such broker-dealer; therefore, the investment adviser and its affiliates assess the reasonableness of commissions in light of the total brokerage and investment research services provided to the investment adviser and its affiliates, regardless of whether they advise accounts with trading activity that generates eligible commissions.

In accordance with their internal brokerage allocation procedure, the investment adviser and its affiliates periodically assess the brokerage and investment research services provided by each broker-dealer and each other service provider from which they receive such services. As part of its ongoing relationships, the investment adviser and its affiliates routinely meet with firms to discuss the level and quality of the brokerage and research services provided, as well as the value and cost of such services. In valuing the brokerage and investment research services the investment adviser and its affiliates receive from broker-dealers and other research providers in connection with its good faith determination of reasonableness, the investment adviser and its affiliates also and its affiliates and its affiliates. Based on this information and applying their judgment, the investment adviser and its affiliates set an annual research budget.

Research analysts and portfolio managers periodically participate in a research poll to determine the usefulness and value of the research provided by individual broker-dealers and research providers. Based on the results of this research poll, the investment adviser and its affiliates may, through commission sharing arrangements with certain broker-dealers, direct a portion of commissions paid to a broker-dealer by the fund and other registered investment companies managed by the investment adviser or its affiliates to be used to compensate the broker-dealer and/or other research providers for research services they provide. While the investment adviser and its affiliates may negotiate commission rates and enter into commission sharing arrangements with certain broker-dealers with the expectation that such broker-dealers will be providing brokerage and research services, none of the investment adviser, any of its affiliates or any of their clients incurs any obligation to any broker-dealer to pay for research by generating trading commissions. The investment adviser and its affiliates negotiate prices for certain research that may be paid through commission sharing arrangements or by themselves with cash.

When executing portfolio transactions in the same equity security for the funds and accounts, or portions of funds and accounts, over which the investment adviser, through its equity investment divisions, has investment discretion, each investment division within the adviser and its affiliates normally aggregates its respective purchases or sales and executes them as part of the same transaction or series of transactions. When executing portfolio transactions in the same fixed income security for the fund and the other funds or accounts over which it or one of its affiliated companies has investment discretion, the investment adviser normally aggregates such purchases or sales and executes them as part of the same transaction or series of transactions. The objective of aggregating

purchases and sales of a security is to allocate executions in an equitable manner among the funds and other accounts that have concurrently authorized a transaction in such security.

The investment adviser currently owns an interest in IEX Group and Luminex Trading and Analytics. The investment adviser may place orders on these or other exchanges or alternative trading systems in which it, or one of its affiliates, has an ownership interest, provided such ownership interest is less than five percent of the total ownership interests in the entity. The investment adviser is subject to the same best execution obligations when trading on any such exchange or alternative trading system.

Purchase and sale transactions may be effected directly among and between certain funds or accounts advised by the investment adviser or its affiliates, including the fund. The investment adviser maintains cross-trade policies and procedures and places a cross-trade only when such a trade is in the best interest of all participating clients and is not prohibited by the participating funds' or accounts' investment management agreement or applicable law.

The investment adviser may place orders for the fund's portfolio transactions with broker-dealers who have sold shares of the funds managed by the investment adviser or its affiliated companies; however, it does not consider whether a broker-dealer has sold shares of the funds managed by the investment adviser or its affiliated companies when placing any such orders for the fund's portfolio transactions.

Purchases and sales of futures contracts for the fund will be effected through executing brokers and FCMs that specialize in the types of futures contracts that the fund expects to hold. The investment adviser will use reasonable efforts to choose executing brokers and FCMs capable of providing the services necessary to obtain the most favorable price and execution available. The full range and quality of services available will be considered in making these determinations. The investment adviser will monitor the executing brokers and FCMs used for purchases and sales of futures contracts for their ability to execute trades based on many factors, such as the sizes of the orders, the difficulty of executions, the operational facilities of the firm involved and other factors.

Forward currency contracts are traded directly between currency traders (usually large commercial banks) and their customers. The cost to the fund of engaging in such contracts varies with factors such as the currency involved, the length of the contract period and the market conditions then prevailing. Because such contracts are entered into on a principal basis, their prices usually include undisclosed compensation to the market maker reflecting the spread between the bid and ask prices for the contracts. The fund may incur additional fees in connection with the purchase or sale of certain contracts.

Brokerage commissions paid on portfolio transactions for the fiscal years ended December 31, 2018, 2017 and 2016 were:

		Fiscal year ended		
	2018	2017	2016

Brokerage commissions paid on portfolio transactions vary from year to year based primarily on the volume of a fund's trading activity. Increases (or decreases) in the dollar amount of brokerage commissions paid by the fund over the last three fiscal years resulted from increases (or decreases) in the volume of trading activity.

The Series is required to disclose information regarding investments in the securities of its "regular" broker-dealers (or parent companies of its regular broker-dealers) that derive more than 15% of their revenue from broker-dealer, underwriter or investment adviser activities. A regular broker-dealer is (a) one of the 10 broker-dealers that received from the Series the largest amount of brokerage commissions by participating, directly or indirectly, in the Series' portfolio transactions during the Series' most recently completed fiscal year; (b) one of the 10 broker-dealers that engaged as principal in the largest dollar amount of portfolio transactions of the Series during the Series' most recently completed fiscal year; or (c) one of the 10 broker-dealers that sold the largest amount of securities of the Series during the Series' most recently completed fiscal year. At the end of the Series' most recently completed fiscal year, the Series' regular broker-dealers included Pershing LLC (a subsidiary of The Bank of New York Mellon Corporation), Citigroup Global Markets Inc., Credit Suisse Group AG, Goldman Sachs & Co., J.P. Morgan Securities LLC, Morgan Stanley & Co. LLC, RBC Capital Markets LLC, UBS AG and Wells Fargo Securities, LLC. At the end of the Series' most recently completed fiscal year, the following funds held debt and/or equity securities of an affiliated company of such regular broker-dealers:

		Type of	
	Affiliated company of regular broker-dealer	security	Amount
Global Growth Fund	J.P. Morgan Securities LLC	equity	\$ 83,328,000
Growth Fund	Bank of New York Mellon	equity	21,982,000

Disclosure of portfolio holdings

The Series' investment adviser, on behalf of the funds, has adopted policies and procedures with respect to the disclosure of information about the funds' portfolio securities. These policies and procedures have been reviewed by the Series' board of trustees, and compliance will be periodically assessed by the board in connection with reporting from the Series' Chief Compliance Officer.

Under these policies and procedures a complete list of portfolio holdings of each fund available for public disclosure, dated as of the end of each calendar quarter, is permitted to be posted on the American Funds website (americanfunds.com/afis) no earlier than the 10th day after such calendar quarter. In practice, the publicly disclosed portfolio is typically posted on the American Funds website within 30 days after the end of the calendar quarter. The publicly disclosed portfolio may exclude certain securities when deemed to be in the best interest of the fund as permitted by applicable regulations. Such portfolio holdings information may be disclosed to any person pursuant to an ongoing arrangement to disclose portfolio holdings information to such person no earlier than one day after the day on which the information is posted on the American Funds website.

Certain intermediaries are provided additional information about the fund's management team, including information on the fund's portfolio securities they have selected. This information is provided to larger intermediaries that require the information to make the fund available for investment on the firm's platform. Intermediaries receiving the information are required to keep it confidential and use it only to analyze the fund.

The Series' custodian, outside counsel, auditor, financial printers, proxy voting service providers, pricing information vendors, consultants or agents operating under a contract with the investment adviser or its affiliates, co-litigants (such as in connection with a bankruptcy proceeding related to a fund holding) and certain other third parties described below, each of which requires portfolio holdings information for legitimate business and fund oversight purposes, may receive fund portfolio holdings information earlier. See the "General information" section in this statement of additional information for further information about the Series' custodian, outside counsel and auditor.

Each fund's portfolio holdings, dated as of the end of each calendar month, are made available to insurance companies that use the funds as underlying investments in their variable annuity contracts and variable life insurance policies. Monthly holdings are made available to help the insurance companies evaluate the funds for inclusion in the contracts and life insurance policies they offer and to evaluate and manage the insurance guarantees offered under their insurance contracts. Monthly holdings may be provided to insurance companies no earlier than the 10th day after the end of the calendar month. In practice, monthly holdings are provided within 30 days after the end of the calendar month. Monthly holdings may also be provided to the sub-adviser of the American Funds Insurance Series Managed Risk Funds. Holdings may also be disclosed more frequently to certain statistical and data collection agencies including Morningstar, Lipper, Inc., Value Line, Vickers Stock Research, Bloomberg and Thomson Financial Research. Information on certain portfolio characteristics of the funds are also provided to the insurance companies and the sub-adviser of the American Funds Insurance Series Managed Risk Funds each business day.

Affiliated persons of the Series, including officers of the Series and employees of the investment adviser and its affiliates, who receive portfolio holdings information are subject to restrictions and limitations on the use and handling of such information pursuant to applicable codes of ethics, including requirements not to trade in securities based on confidential and proprietary investment information, to maintain the confidentiality of such information, and to pre-clear securities trades and report securities transactions activity, as applicable. For more information on these restrictions and limitations, please see the "Code of ethics" section in this statement of additional information and the Code of Ethics. Third-party service providers of the Series and other entities, as described in this

statement of additional information, receiving such information are subject to confidentiality obligations. When portfolio holdings information is disclosed other than through the American Funds website to persons not affiliated with the Series, such persons will be bound by agreements (including confidentiality agreements) or fiduciary or other obligations that restrict and limit their use of the information to legitimate business uses only. None of the Series, its investment adviser or any of their affiliates receives compensation or other consideration in connection with the disclosure of information about portfolio securities.

Subject to board policies, the authority to disclose a fund's portfolio holdings, and to establish policies with respect to such disclosure, resides with the appropriate investment-related committees of the Series' investment adviser. In exercising their authority, the committees determine whether disclosure of information about the funds' portfolio securities is appropriate and in the best interest of fund shareholders. The investment adviser has implemented policies and procedures to address conflicts of interest that may arise from the disclosure of fund holdings. For example, the investment adviser's code of ethics specifically requires, among other things, the safeguarding of information about fund holdings and contains prohibitions designed to prevent the personal use of confidential, proprietary investment information in a way that would conflict with fund transactions. In addition, the investment adviser believes that its current policy of not selling portfolio holdings information and not disclosing such information to unaffiliated third parties until such holdings have been made public on the American Funds website (other than to certain Series service providers and other third parties for legitimate business and fund oversight purposes) helps reduce potential conflicts of interest between fund shareholders and the investment adviser and its affiliates.

The Series' investment adviser and its affiliates provide investment advice to clients other than the Series that have investment objectives that may be substantially similar to those of the funds. These clients also may have portfolios consisting of holdings substantially similar to those of the funds and generally have access to current portfolio holdings information for their accounts. These clients do not owe the Series' investment adviser or the funds a duty of confidentiality with respect to disclosure of their portfolio holdings.

Price of shares

Shares are purchased at the offering price or sold at the net asset value price next determined after the purchase or sell order is received and accepted by the Series or its designee. Orders received by the Series or authorized designee after the time of the determination of the net asset value will be entered at the next calculated offering price.

The price you pay for shares, the offering price, is based on the net asset value per share, which is calculated once daily as of approximately 4 p.m. New York time, which is the normal close of trading on the New York Stock Exchange, each day the New York Stock Exchange is open. If, for example, the New York Stock Exchange closes at 1 p.m. New York time, the fund's share price would still be determined as of 4 p.m. New York time. In such example, portfolio securities traded on the New York Stock Exchange would be valued at their closing price unless the investment adviser determines that a fair value adjustment is appropriate due to subsequent events. The New York Stock Exchange is currently closed on weekends and on the following holidays: New Year's Day; Martin Luther King Jr. Day; Presidents' Day; Good Friday; Memorial Day; Independence Day; Labor Day; Thanksgiving; and Christmas Day. Each share class of the fund has a separately calculated net asset value (and share price). The fund's investment adviser delivers the net asset value every day it is calculated to each insurance company that offers such fund as an underlying investment to its variable contracts by, for example, email, direct electronic transmission or facsimile or through the systems of the National Securities Clearing Corporation.

All portfolio securities of funds managed by Capital Research and Management Company (other than American Funds U.S. Government Money Market Fund) are valued, and the net asset values per share for each share class are determined, as indicated below. The fund follows standard industry practice by typically reflecting changes in its holdings of portfolio securities on the first business day following a portfolio trade.

Equity securities, including depositary receipts, are generally valued at the official closing price of, or the last reported sale price on, the exchange or market on which such securities are traded, as of the close of business on the day the securities are being valued or, lacking any sales, at the last available bid price. Prices for each security are taken from the principal exchange or market on which the security trades.

Fixed income securities, including short-term securities, are generally valued at prices obtained from one or more pricing vendors. The pricing vendors base prices on, among other things, benchmark yields, transactions, bids, offers, quotations from dealers and trading systems, new issues, underlying equity of the issuer, interest rate volatilities, spreads and other relationships observed in the markets among comparable securities and proprietary pricing models such as yield measures calculated using factors such as cash flows, prepayment information, default rates, delinquency and loss assumptions, financial or collateral characteristics or performance, credit enhancements, liquidation value calculations, specific deal information and other reference data. The fund's investment adviser performs certain checks on vendor prices prior to calculation of the fund's net asset value. When the investment adviser deems it appropriate to do so (such as when vendor prices are unavailable or not deemed to be representative), fixed income securities will be valued in good faith at the mean quoted bid and asked prices that are reasonably and timely available (or bid prices, if asked prices are not available) or at prices for securities of comparable maturity, quality and type.

Securities with both fixed income and equity characteristics (e.g., convertible bonds, preferred stocks, units comprised of more than one type of security, etc.), or equity securities traded principally among fixed income dealers, are generally valued in the manner described above for either equity or fixed income securities, depending on which method is deemed most appropriate by the investment adviser.

Forward currency contracts are valued at the mean of representative quoted bid and asked prices, generally based on prices supplied by one or more pricing vendors.

Futures contracts are generally valued at the official settlement price of, or the last reported sale price on, the principal exchange or market on which such instruments are traded, as of the close of business on the day the contracts are being valued or, lacking any sales, at the last available bid price.

Swaps, including both interest rate swaps and positions in credit default swap indices, are valued using market quotations or valuations provided by one or more pricing vendors.

Assets or liabilities initially expressed in terms of currencies other than U.S. dollars are translated prior to the next determination of the net asset value of the fund's shares into U.S. dollars at the prevailing market rates.

Securities and other assets for which representative market quotations are not readily available or are considered unreliable by the investment adviser are valued at fair value as determined in good faith under fair value guidelines adopted by authority of the Series' board. Subject to board oversight, the Series' board has appointed the fund's investment adviser to make fair valuation determinations, which are directed by a valuation committee established by the fund's investment adviser. The board receives regular reports describing fair-valued securities and the valuation methods used.

The valuation committee has adopted guidelines and procedures (consistent with SEC rules and guidance) to consider certain relevant principles and factors when making fair value determinations. As a general principle, securities lacking readily available market quotations, or that have quotations that are considered unreliable by the investment adviser, are valued in good faith by the valuation committee based upon what the fund might reasonably expect to receive upon their current sale. Fair valuations and valuations of investments that are not actively trading involve judgment and may differ materially from valuations that would have been used had greater market activity occurred. The valuation committee considers relevant indications of value that are reasonably and timely available to it in determining the fair value to be assigned to a particular security, such as the type and cost of the security, contractual or legal restrictions on resale of the security, relevant financial or business developments of the issuer, actively traded similar or related securities, conversion or exchange rights on the security, related corporate actions, significant events occurring after the close of trading in the security and changes in overall market conditions. The valuation committee employs additional fair value procedures to address issues related to equity securities that trade principally in markets outside the United States. Such securities may trade in markets that open and close at different times, reflecting time zone differences. If significant events occur after the close of a market (and before the fund's net asset values are next determined) which affect the value of equity securities held in the fund's portfolio, appropriate adjustments from closing market prices may be made to reflect these events. Events of this type could include, for example, earthquakes and other natural disasters or significant price changes in other markets (e.g., U.S. stock markets).

Each class of shares represents interests in the same portfolio of investments and is identical in all respects to each other class, except for differences relating to distribution, service and other charges and expenses, certain voting rights, differences relating to eligible investors, the designation of each class of shares, conversion features and exchange privileges. Expenses attributable to the fund, but not to a particular class of shares, are borne by each class pro rata based on relative aggregate net assets of the classes. Expenses directly attributable to a class of shares are borne by that class of shares. Liabilities attributable to particular share classes, such as liabilities for repurchases of fund shares, are deducted from total assets attributable to such share classes.

Net assets so obtained for each share class are then divided by the total number of shares outstanding of that share class, and the result, rounded to the nearest cent, is the net asset value per share for that class.

Taxes and distributions

Taxation as a regulated investment company — The fund intends to qualify each year as a "regulated investment company" under Subchapter M of the Internal Revenue Code ("Code") so that it will not be liable for federal tax on income and capital gains distributed to shareholders. In order to qualify as a regulated investment company, and avoid being subject to federal income taxes, the fund intends to distribute substantially all of its net investment income and realized net capital gains on a fiscal year basis, and intends to comply with other tests applicable to regulated investment companies under Subchapter M, including the asset diversification test. The asset diversification test trequires that at the close of each quarter of the fund's taxable year that (i) at least 50% of the fund's assets be invested in cash and cash items, government securities, securities of other funds and other securities which, with respect to any one issuer, represent neither more than 5% of the sasets of the fund nor more than 10% of the voting securities of the issuer, and (ii) no more than 25% of the fund's assets be invested in the securities of any one issuer (other than the securities of other funds) of two or more issuers that the fund controls and are engaged in similar trades or businesses, or the securities of one or more qualified publicly traded partnerships.

The Code includes savings provisions allowing the fund to cure inadvertent failures of certain qualification tests required under Subchapter M. However, should the fund fail to qualify under Subchapter M, the fund would be subject to federal, and possibly state, corporate taxes on its taxable income and gains.

The fund is subject to a set of asset diversification requirements applicable to insurance company separate accounts and their underlying funding vehicles. To satisfy these diversification requirements, as of the end of each calendar quarter or within 30 days thereafter, the fund must (a) be qualified as a "regulated investment company"; and (b) have either (i) no more than 55% of the total value of its assets in cash and cash equivalents, government securities and securities of other regulated investment companies; or (ii) no more than 55% of its total assets represented by any one investment, no more than 70% by any two investments, no more than 80% by any three investments, and no more than 90% by any four investments. For this purpose all securities of the same issuer are considered a single investment, and each agency or instrumentality of the U.S. government is treated as a separate issuer of securities. The Series intends to comply with these regulations. If the fund should fail to comply with these regulations, Contracts invested in the fund will not be treated as annuity, endowment or life insurance contracts under the Code.

The fund may declare a capital gain distribution consisting of the excess of net realized long-term capital gains over net realized short-term capital losses. Net capital gains for a fiscal year are computed by taking into account any capital loss carryforward of the fund.

Tax consequences of investing in non-U.S. securities — Dividend and interest income received by the fund from sources outside the United States may be subject to withholding and other taxes imposed by such foreign jurisdictions. Tax conventions between certain countries and the United States, however, may reduce or eliminate these foreign taxes. Some foreign countries impose taxes on capital gains with respect to investments by foreign investors.

Foreign currency gains and losses, including the portion of gain or loss on the sale of debt securities attributable to fluctuations in foreign exchange rates, are generally taxable as ordinary income or loss. These gains or losses may increase or decrease the amount of dividends payable by the fund to shareholders. A fund may elect to treat gain and loss on certain foreign currency contracts as capital gain and loss instead of ordinary income or loss.

If the fund invests in stock of certain passive foreign investment companies (PFICs), the fund intends to mark-to-market these securities and recognize any gains at the end of its fiscal and excise tax years. Deductions for losses are allowable only to the extent of any previously recognized gains. Both gains and losses will be treated as ordinary income or loss, and the fund is required to distribute any resulting income. If the fund is unable to identify an investment as a PFIC security and thus does not make a timely mark-to-market election, the fund may be subject to adverse tax consequences.

Tax consequences of investing in derivatives — The fund may enter into transactions involving derivatives, such as futures, swaps and forward contracts. Special tax rules may apply to these types of transactions that could defer losses to the fund, accelerate the fund's income, alter the holding period of certain securities or change the classification of capital gains. These tax rules may therefore impact the amount, timing and character of fund distributions.

General information

Custodian of assets — Securities and cash owned by all funds, including proceeds from the sale of shares of the funds and of securities in the funds' portfolios, are held by State Street Bank and Trust Company, One Lincoln Street, Boston, MA 02111, as custodian. Non-U.S. securities may be held by the custodian in non-U.S. banks or securities depositories or foreign branches of U.S. banks.

Transfer agent services — American Funds Service Company, a wholly owned subsidiary of the investment adviser, maintains the records of each insurance company's separate account, processes purchases and redemptions of the funds' shares, acts as dividend and capital gain distribution disbursing agent, and performs other related shareholder service functions. The principal office of American Funds Service Company is located at 6455 Irvine Center Drive, Irvine, CA 92618. American Funds Service Company was paid a fee of \$8,000 for Class 1 shares, less than \$1,000 for Class 1 shares, \$6,000 for Class 2 shares, less than \$1,000 for Class 3 shares and less than \$1,000 for Class 4 shares for the 2018 fiscal year.

Independent registered public accounting firm — PricewaterhouseCoopers LLP, 601 South Figueroa Street, Los Angeles, CA 90017, serves as the Series' independent registered public accounting firm, providing audit services, preparation of tax returns and review of certain documents to be filed with the SEC. The financial statements included in this statement of additional information from the annual report have been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report appearing herein. Such financial statements have been so included in reliance upon the report of such firm given upon their authority as experts in accounting and auditing. The selection of the Series' independent registered public accounting firm is reviewed and determined annually by the board of trustees.

Independent legal counsel — Morgan, Lewis & Bockius LLP, One Federal Street, Boston, MA 02110-1726, serves as independent legal counsel ("counsel") for the Series and for trustees who are not interested persons (as defined by the 1940 Act) of the Series. A determination with respect to the independence of the Series' counsel will be made at least annually by the independent trustees of the Series, as prescribed by applicable 1940 Act rules.

Prospectuses and reports to shareholders — The Series' fiscal year ends on December 31. Contract owners are provided updated prospectuses or summary prospectuses by their insurance provider annually and at least semiannually with reports showing the funds' investment portfolios or summary investment portfolios, financial statements and other information. The Series' annual financial statements are audited by the independent registered public accounting firm of PricewaterhouseCoopers LLP.

Code of ethics — The Series, Capital Research and Management Company and its affiliated companies have adopted codes of ethics that allow for personal investments, including securities in which the funds of the Series may invest from time to time. These codes include a ban on acquisitions of securities pursuant to an initial public offering; restrictions on acquisitions of private placement securities; pre-clearance and reporting requirements; review of duplicate confirmation statements; annual recertification of compliance with codes of ethics; blackout periods on personal investing for certain investment personnel; a ban on short-term trading profits for investment personnel; limitations on service as a director of publicly traded companies; disclosure of personal securities transactions; and policies regarding political contributions.

Shareholder and trustee responsibility — Under the laws of certain states, including Massachusetts, where the Series was organized, and California, where the Series' principal office is located, shareholders of a Massachusetts business trust may, under certain circumstances, be held personally liable as partners for the obligations of the Series. However, the risk of a shareholder incurring any

financial loss on account of shareholder liability is limited to circumstances in which the Series itself would be unable to meet its obligations. The declaration of trust contains an express disclaimer of shareholder liability for acts or obligations of the Series and provides that notice of the disclaimer may be given in each agreement, obligation, or instrument which is entered into or executed by the Series or trustees. The declaration of trust provides for indemnification out of Series property of any shareholder personally liable for the obligations of the Series and also provides for the Series to reimburse such shareholder for all legal and other expenses reasonably incurred in connection with any such claim or liability.

Under the declaration of trust, the trustees or officers are not liable for actions or failure to act; however, they are not protected from liability by reason of their willful misfeasance, bad faith, gross negligence, or reckless disregard of the duties involved in the conduct of their office. The Series will provide indemnification to its trustees and officers as authorized by its by-laws and by the 1940 Act and the rules and regulations thereunder.

Registration statement — A registration statement has been filed with the Securities and Exchange Commission under the Securities Act of 1933 and the 1940 Act with respect to the Series. The prospectus and this statement of additional information do not contain all information set forth in the registration statement, its amendments and exhibits, to which reference is made for further information concerning the Series. Statements contained in the prospectus and this statement of additional information as to the content of the contracts issued through the separate accounts and other legal instruments are summaries. For a complete statement of the terms thereof, reference is made to the registration statements of the separate accounts and contracts as filled with the Securities and Exchange Commission.

Authorized shares — The Series was organized as a Massachusetts business trust which permits each fund of the Series to issue an unlimited number of shares of beneficial interest of one or more classes.

Redemption of shares — While payment of redemptions normally will be in cash, the Series' declaration of trust permits payment of the redemption price wholly or partly with portfolio securities or other fund assets under conditions and circumstances determined by the Series' board of trustees. For example, redemptions could be made in this manner if the board determined that making payments wholly in cash over a particular period would be unfair and/or harmful to other Series shareholders.

Voting rights — Shareholders have one vote per share owned. In accordance with current laws, it is anticipated that an insurance company issuing a variable contract that participates in a fund will request voting instructions from variable contract owners and will vote shares or other voting interests in the separate account in accordance with voting instructions received, and will vote shares or other voting interests not received in proportion to the voting instructions received by all separate accounts. In addition, fund shares held directly by an insurance company, if any, will be voted in proportion to the voting instructions received by all separate accounts. As a result of proportional voting, the vote of a small number of contract holders could determine the outcome of a shareholder vote.

Credit facility — Global Small Capitalization Fund, New World Fund and High-Income Bond Fund, together with other U.S. registered investment funds managed by Capital Research and Management Company, have entered into a committed line of credit facility pursuant to which the funds may borrow up to \$1.5 billion as a source of temporary liquidity on a first-come, first-served basis. Under the credit facility, loans are generally unsecured; however, a borrowing fund must collateralize any borrowings under the facility on an equivalent basis if it has certain other collateralized borrowings.

Appendix

The following descriptions of debt security ratings are based on information provided by Moody's Investors Service, Standard & Poor's Ratings Services and Fitch Ratings, Inc.

Description of bond ratings

Moody's

Long-term rating scale

Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.

Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

Obligations rated A are considered upper-medium grade and are subject to low credit risk.

Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

BaObligations rated Ba are judged to be speculative and are subject to substantial credit risk.

Obligations rated B are considered speculative and are subject to high credit risk.

Obligations rated Caa are judged to be speculative and of poor standing and are subject to very high credit risk.

Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

Obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category. Additionally, a "(hyb)" indicator is appended to all ratings of hybrid securities issued by banks, insurers, finance companies and securities firms.

Standard & Poor's Long-term issue credit ratings

An obligation rated AAA has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

An obligation rated AA differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

An obligation rated A is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

An obligation rated BBB exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB. B. CCC, CC, and C

Obligations rated BB, B, CCC, CC, and C are regarded as having significant speculative characteristics. BB indicates the least degree of speculation and C the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

An obligation rated BB is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

An obligation rated B is more vulnerable to nonpayment than obligations rated BB, but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

An obligation rated CCC is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

An obligation rated CC is currently highly vulnerable to nonpayment. The CC rating is used when a default has not occurred, but Standard & Poor's expects default to be a virtual certainty, regardless of the anticipated time to default.

С

An obligation rated C is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared to obligations that are rated higher.

ь.

An obligation rated D is in default or in breach of an imputed promise. For non-hybrid capital instruments, the D rating category is used when payments on an obligation are not made on the date due, unless Standard & Poor's believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The D rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to D if it is subject to a distressed exchange offer.

Plus (+) or minus (-)

The ratings from AA to CCC may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

NR

This indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that Standard & Poor's does not rate a particular obligation as a matter of policy.

Fitch Ratings, Inc. Long-term credit ratings

Highest credit quality. AAA ratings denote the lowest expectation of default risk. They are assigned only in case of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

Very high credit quality. AA ratings denote expectations of very low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

High credit quality. A ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to changes in circumstances or in economic conditions than is the case for higher ratings.

Good credit quality. BBB ratings indicate that expectations of default risk are low. The capacity for payment of financial commitments is considered adequate but adverse changes in circumstances and economic conditions are more likely to impair this capacity.

Speculative. BB ratings indicate an elevated vulnerability to default risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial flexibility exists which supports the servicing of financial commitments.

Highly speculative. B ratings indicate that material default risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is vulnerable to deterioration in the business and economic environment.

Substantial credit risk. Default is a real possibility.

Very high levels of credit risk. Default of some kind appears probable.

Exceptionally high levels of credit risk. Default is imminent or inevitable, or the issuer is in standstill. Conditions that are indicative of a C category rating for an issuer include:

- · The issuer has entered into a grace or cure period following nonpayment of a material financial obligation;
- · The issuer has entered into a temporary negotiated waiver or standstill agreement following a payment default on a material financial obligation; or
- · Fitch Ratings otherwise believes a condition of RD or D to be imminent or inevitable, including through the formal announcement of a distressed debt exchange.

RD

Restricted default. RD ratings indicate an issuer that in Fitch Ratings' opinion has experienced an uncured payment default on a bond, loan or other material financial obligation but which has not entered into bankruptcy filings, administration, receivership, liquidation or other formal winding up procedure, and which has not otherwise ceased operating. This would include:

- · The selective payment default on a specific class or currency of debt;
- · The uncured expiry of any applicable grace period, cure period or default forbearance period following a payment default on a bank loan, capital markets security or other material financial obligation;
- · The extension of multiple waivers or forbearance periods upon a payment default on one or more material financial obligations, either in series or in parallel; or
- · Execution of a distressed debt exchange on one or more material financial obligations.

n

Default. D ratings indicate an issuer that in Fitch Ratings' opinion has entered into bankruptcy filings, administration, receivership, liquidation or other formal winding up procedure, or which has otherwise ceased business.

Default ratings are not assigned prospectively to entities or their obligations; within this context, nonpayment on an instrument that contains a deferral feature or grace period will generally not be considered a default until after the expiration of the deferral or grace period, unless a default is otherwise driven by bankruptcy or other similar circumstance, or by a distressed debt exchange.

Imminent default typically refers to the occasion where a payment default has been intimated by the issuer, and is all but inevitable. This may, for example, be where an issuer has missed a scheduled payment, but (as is typical) has a grace period during which it may cure the payment default. Another alternative would be where an issuer has formally announced a distressed debt exchange, but the date of the exchange still lies several days or weeks in the immediate future.

In all cases, the assignment of a default rating reflects the agency's opinion as to the most appropriate rating category consistent with the rest of its universe of ratings, and may differ from the definition of default under the terms of an issuer's financial obligations or local commercial practice.

Note: The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the AAA long-term rating category, or to categories below B.

Description of commercial paper ratings

Moody's

Global short-term rating scale

P-1

Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

P-2

Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

P-3

NP

Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

Standard & Poor's

Commercial paper ratings (highest three ratings)

A short-term obligation rated A-1 is rated in the highest category by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

۸_၁

A short-term obligation rated A-2 is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

A-3

A short-term obligation rated A-3 exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

'Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities was \$1,042,869,000, which represented 18.95% of the net assets of the fund. This amount includes \$1,012,346,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

²Security did not produce income during the last 12 months.

³Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$168,168,000, which represented 3.06% of the net assets of the fund.

Key to abbreviation

ADR = American Depositary Receipts

²All or a portion of this security was on loan. The total value of all such securities was \$67,607,000, which represented 1.85% of the net assets of the fund.

³Represents an affiliated company as defined under the Investment Company Act of 1940.

[&]quot;Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities was \$729,211,000, which represented 19.95% of the net assets of the fund. This amount includes \$697,427,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

Scquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$309,041,000, which represented 8.46% of the net assets of the fund.

[®]Value determined using significant unobservable inputs.

⁷Acquired through a private placement transaction exempt from registration under the Securities Act of 1933. May be subject to legal or contractual restrictions on resale. Further details on this holding appear below.

^{*}Security purchased with cash collateral from securities on loan.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

'Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities was \$819,772,000, which represented 3.50% of the net assets of the fund. This amount includes \$719,983,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

²Security did not produce income during the last 12 months.

 $\ensuremath{^{^{3}}\!\text{Value}}$ determined using significant unobservable inputs.

'Acquired through a private placement transaction exempt from registration under the Securities Act of 1933. May be subject to legal or contractual restrictions on resale. Further details on these holdings appear below.

⁵Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$427,632,000, which represented 1.82% of the net assets of the fund.

Private placement securities	Acquisition date	Cost (000)	Value (000)	Percent of net assets

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

¹Security did not produce income during the last 12 months.

Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities was \$2,613,221,000, which represented 29.00% of the net assets of the fund. This amount includes \$2,569,796,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

3Acquired through a private placement transaction exempt from registration under the Securities Act of 1933. May be subject to legal or contractual restrictions on resale. Further details on this holding appear below.

'Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$462,479,000, which represented 5.13% of the net assets of the fund.

⁵Step bond; coupon rate may change at a later date.

Private placement security	Acquisition date	Cost (000)	Value (000)	of net assets

'Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities was \$486,458,000, which represented 16.16% of the net assets of the fund. This amount includes \$463,432,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

²Security did not produce income during the last 12 months.

³Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$277,296,000, which represented 9.21% of the net assets of the fund.

⁴Value determined using significant unobservable inputs.

⁵Coupon rate may change periodically.

⁶Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Most recent payment was 100% cash unless otherwise noted.

Step bond; coupon rate may change at a later date.

⁹Scheduled interest and/or principal payment was not received.

American Funds Insurance Series — Growth-Income Fund — Page 48 of 179

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

¹Security did not produce income during the last 12 months.

Key to abbreviations

ADR = American Depositary Receipts
CAD = Canadian dollars

^aValued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities was \$1,082,559,000, which represented 3.62% of the net assets of the fund. This amount includes \$974,212,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

^aRepresents an affiliated company as defined under the Investment Company Act of 1940.

⁴Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$706,416,000, which represented 2.37% of the net assets of the fund.

'Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities was \$410,893,000, which represented 30.73% of the net assets of the fund. This entire amount relates to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

²Security did not produce income during the last 12 months.

³Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$59,763,000, which represented 4.47% of the net assets of the fund.

						\$429

^{&#}x27;Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities was \$77,218,000, which represented 11.43% of the net assets of the fund. This amount includes \$76,827,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

Key to abbreviations and symbol

ADR = American Depositary Receipts

CAD = Canadian dollars

FDR = Fiduciary Depositary Receipts

LIBOR = London Interbank Offered Rate

TBA = To-be-announced

USD/\$ = U.S. dollars

²Value determined using significant unobservable inputs.

³Security did not produce income during the last 12 months.

^{&#}x27;All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$284,000, which represented .04% of the net assets of the fund.

⁵Index-linked bond whose principal amount moves with a government price index.

⁶Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

⁷Purchased on a TBA basis.

⁸Coupon rate may change periodically.

⁹Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$23,524,000, which represented 3.48% of the net assets of the fund.

¹⁰Step bond; coupon rate may change at a later date.

[&]quot;Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Most recent payment was 100% cash unless otherwise noted.

¹²Notional amount is calculated based on the number of contracts and notional contract size.

¹³Value is calculated based on the notional amount and current market price.

Corporate Risk Holdings Corp.	8/31/2015-4/21/2017	_	_	.00
Total private placement securities		\$36,241	\$30,904	.13%

^{&#}x27;Security did not produce income during the last 12 months.

^aValued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities was \$396,462,000, which represented 1.73% of the net assets of the fund. This amount includes \$369,780,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

³Value determined using significant unobservable inputs.

⁴Acquired through a private placement transaction exempt from registration under the Securities Act of 1933. May be subject to legal or contractual restrictions on resale. Further details on these holdings appear below.

⁵Amount less than one thousand.

⁶Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$1,612,443,000, which represented 7.03% of the net assets of the fund.

⁷Represents an affiliated company as defined under the Investment Company Act of 1940.

^{*}All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$10,162,000, which represented .04% of the net assets of the fund.

⁹Index-linked bond whose principal amount moves with a government price index.

¹⁰Coupon rate may change periodically.

[&]quot;Loan participations and assignments; may be subject to legal or contractual restrictions on resale. The total value of all such loans was \$43,203,000, which represented .19% of the net assets of the fund.

¹²Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

¹³Step bond; coupon rate may change at a later date.

¹⁴Scheduled interest and/or principal payment was not received.

¹⁶Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Most recent payment was 100% cash unless otherwise noted.

¹⁶Purchased on a TBA basis

¹⁷Notional amount is calculated based on the number of contracts and notional contract size.

PLN = Polish zloty
RON = Romanian leu
TBA = To-be-announced

THB = Thai baht USD/\$ = U.S. dollars UYU = Uruguayan pesos ZAR = South African rand

²Security did not produce income during the last 12 months.

³Acquired in a transaction exempt from registration under Rule 144A of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$10,661,000, which represented 2.91% of the net assets of the fund.

⁴Index-linked bond whose principal amount moves with a government price index.

[&]quot;All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$154,000, which represented .04% of the net assets of the fund.

⁶Step bond; coupon rate may change at a later date.

⁷Coupon rate may change periodically.

[®]Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

⁹Purchased on a TBA basis.

 $^{^{\}mbox{\tiny 10}}\mbox{Notional}$ amount is calculated based on the number of contracts and notional contract size.

[&]quot;Value is calculated based on the notional amount and current market price.

¹² Amount less than one thousand.

American Funds Insurance Series — Bond Fund — Page 124 of 179

^{&#}x27;Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$1,180,984,000, which represented 11.98% of the net assets of the fund.

²Step bond; coupon rate may change at a later date.

³Coupon rate may change periodically.

Loan participations and assignments: may be subject to legal or contractual restrictions on resale. The total value of all such loans was \$1,243,000, which represented .01% of the net assets of the fund.

⁶Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Most recent payment was 100% cash unless otherwise noted.

⁷Amount less than one thousand.

⁸All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$25,155,000, which represented .26% of the net assets of the fund.

⁹Index-linked bond whose principal amount moves with a government price index.

¹⁰Purchased on a TBA basis.

[&]quot;Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities was \$1,591,000, which represented .02% of the net assets of the fund.

¹²Security did not produce income during the last 12 months.

¹³Value determined using significant unobservable inputs.

^{*}Acquired through a private placement transaction exempt from registration under the Securities Act of 1933. May be subject to legal or contractual restrictions on resale. Further details on this holding appear below.

¹⁵Notional amount is calculated based on the number of contracts and notional contract size.

¹Index-linked bond whose principal amount moves with a government price index.

¹⁷Value is calculated based on the notional amount and current market price.

Private placement securities	Acquisition date	Cost (000)	Value (000)	of net assets
Blackstone CQP Holdco LP 6.50% 2021	3/6/2017	\$2,595	\$2,615	.12%
Advanz Pharma Corp.	8/31/2018	116	153	.01
Corporate Risk Holdings Corp.	8/31/2015	_	_	.00
NCI Building Systems, Inc.	11/16/2018	_	_	.00
Total private placement securities		\$2,711	\$2,768	.13%

²Step bond; coupon rate may change at a later date.

³Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

^{&#}x27;All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$4,216,000, which represented .20% of the net assets of the fund.

⁵Coupon rate may change periodically.

^{*}Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$188,658,000, which represented 9.04% of the net assets of the fund.

Loan participations and assignments; may be subject to legal or contractual restrictions on resale. The total value of all such loans was \$3,706,000, which represented .18% of the net assets of the fund.

^{*}Acquired through a private placement transaction exempt from registration under the Securities Act of 1933. May be subject to legal or contractual restrictions on resale. Further details on these holdings appear below.

⁹Purchased on a TBA basis.

¹⁰Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Most recent payment was 100% cash unless otherwise noted.

¹¹Scheduled interest and/or principal payment was not received.

¹³Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities was \$2,483,000, which represented .12% of the net assets of the fund. This amount includes \$283,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

¹³Value determined using significant unobservable inputs.

¹⁴Security did not produce income during the last 12 months.

 $^{^{\}mbox{\tiny 15}}\mbox{Amount less than one thousand.}$

¹⁶Notional amount is calculated based on the number of contracts and notional contract size.

Advanz Pharma Corp.	8/31/2018-9/4/2018	1,017	1,343	.11

¹Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$681,560,000, which represented 56.61% of the net assets of the fund.

²Loan participations and assignments; may be subject to legal or contractual restrictions on resale. The total value of all such loans was \$76,517,000, which represented 6.36% of the net assets of the fund.

³Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

⁴Coupon rate may change periodically.

⁵Scheduled interest and/or principal payment was not received.

Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Most recent payment was 100% cash unless otherwise noted.

⁷Acquired through a private placement transaction exempt from registration under the Securities Act of 1933. May be subject to legal or contractual restrictions on resale. Further details on these holdings appear below.

 $^{^{\}rm 8}\text{Step}$ bond; coupon rate may change at a later date.

[®]Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities was \$30,796,000, which represented 2.56% of the net assets of the fund. This amount includes \$3,926,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

 $^{^{\}mbox{\tiny 10}}\mbox{Value}$ determined using significant unobservable inputs. ..

¹¹All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$1,233,000, which represented .10% of the net assets of the fund.

 $[\]ensuremath{^{^{12}}\text{Security}}$ did not produce income during the last 12 months.

¹Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

²Purchased on a TBA basis.

³Coupon rate may change periodically.

- 'Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$52,359,000, which represented 17.98% of the net assets of the fund.
- "Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities was \$2,863,000, which represented .98% of the net assets of the fund.
- 6All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$2,758,000, which represented .95% of the net assets of the fund.
- $^{7} \text{Index-linked}$ bond whose principal amount moves with a government price index.
- $^{\rm 8}\mbox{Value}$ determined using significant unobservable inputs.
- ⁹Notional amount is calculated based on the number of contracts and notional contract size.
- ¹⁰Value is calculated based on the notional amount and current market price.

Report of Independent Registered Public Accounting Firm

To the Board of Trustees of American Funds Insurance Series and Shareholders of Global Growth Fund, Global Small Capitalization Fund, Growth Fund, International Fund, New World Fund[®], Blue Chip Income and Growth Fund, Global Growth and Income Fund, Growth-Income Fund, International Growth and Income Fund, Capital Income Builder[®], Asset Allocation Fund, Global Balanced Fund, Bond Fund, Global Bond Fund, High-Income Bond Fund, Mortgage Fund and U.S. Government/AAA-Rated Securities Fund

Opinions on the Financial Statements

We have audited the accompanying statements of assets and liabilities, including the summary investment portfolios, of Global Growth Fund, Global Small Capitalization Fund, Growth Fund, International Fund, New World Fund®, Blue Chip Income and Growth Fund, Global Growth and Income Fund, Growth-Income Fund, International Growth and Income Fund, Capital Income Builder®, Asset Allocation Fund, Global Balanced Fund, Bond Fund, Global Bond Fund, High-Income Bond Fund, Mortgage Fund and U.S. Government/AAA-Rated Securities Fund (seventeen of the funds constituting American Funds Insurance Series, hereafter collectively referred to as the "Funds") as of December 31, 2018, the related statements of operations for the year ended December 31, 2018, the statements of changes in net assets for each of the two years in the period ended December 31, 2018, including the related notes, and the financial highlights for each of the periods indicated therein (included in Item 1 of this Form N-CSR) and the investment portfolios (included in Item 6 of this Form N-CSR) as of December 31, 2018 (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds as of December 31, 2018, the results of each of their operations for the year then ended, the changes in each of their net assets for each of the two years in the period ended December 31, 2018 and each of the financial highlights for each of the periods indicated therein in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinions

These financial statements are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2018 by correspondence with the custodians, transfer agent and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

/s/ PricewaterhouseCoopers LLP Los Angeles, California February 12, 2019

We have served as the auditor of one or more investment companies in The Capital Group Companies Investment Company Complex since 1934.

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. One security in "Other securities" (with a value of \$16,560,000, an aggregate cost of \$8,280,000, and which represented .45% of the net assets of the fund) was acquired on 5/1/2015 through private placement transactions exempt from registration under the Securities Act of 1933, which may subject it to legal or contractual restrictions on resale.

Investments in affiliates

A company is an affiliate of the fund under the Investment Company Act of 1940 if the fund's holdings in that company represent 5% or more of the outstanding voting shares. The value of the fund's holdings in affiliated companies is included in "Other securities" under the respective industry sectors in the summary investment portfolio. Further details on these holdings and related transactions during the year ended December 31, 2018, appear below.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

- Security did not produce income during the last 12 months.
- Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$2,613,221,000, which represented 29.00% of the net assets of the fund. This amount includes \$2,569,796,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.
- 3 Acquired through a private placement transaction exempt from registration under the Securities Act of 1933. May be subject to legal or contractual restrictions on resale. Further details on this holding appear below.
- 4 Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$462,479,000, which represented 5.13% of the net assets of the fund.

- Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$395,472,000, which represented 21.78% of the net assets of the fund. This amount includes \$391,460,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading. Security did not produce income during the last 12 months.
- Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$49,910,000, which represented 2.75% of the net assets of the fund.

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. "Other securities" includes securities which were valued under fair value procedures adopted by authority of the board of trustees. The total value of securities which were valued under fair value procedures was \$1,082,559,000, which represented 3.62% of the net assets of the fund. This amount includes \$974,212,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.

Investments in affiliates

A company is an affiliate of the fund under the Investment Company Act of 1940 if the fund's holdings in that company represent 5% or more of the outstanding voting shares. The value of the fund's affiliated-company holding is shown in the summary investment portfolio. Further details on this holding and related transactions during the year ended December 31, 2018, appear below.

	Beginning shares	Additions	Reductions	Ending shares	Net realized gain (000)	Net unrealized depreciation (000)	Dividend income (000)	Value of affiliate at 12/31/2018 (000)
Common stocks 0.68%								
Industrials 0.68%								
BWX Technologies, Inc.	4,772,174	518,774	_	5,290,948	\$ —	\$ (116,886)	\$ 3,182	\$ 202,273

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

- Security did not produce income during the last 12 months.
- Represents an affiliated company as defined under the Investment Company Act of 1940.
- Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$706,416,000, which represented 2.37% of the net assets of the fund.

International Growth and Income Fund

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio.

- Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$410,893,000, which represented 30.73% of the net assets of the fund. This entire amount relates to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.
- ² Security did not produce income during the last 12 months.
- Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$59,763,000, which represented 4.47% of the net assets of the fund.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

- Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$77,218,000, which represented 11.43% of the net assets of the fund. This amount includes \$76,827,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.
- 2 All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$284,000, which represented .04% of the net assets of the fund.
- Index-linked bond whose principal amount moves with a government price index.
- 4 Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.
- 5 Purchased on a TBA basis.
- 6 Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$23,524,000, which represented 3.48% of the net assets of the fund.
- Notional amount is calculated based on the number of contracts and notional contract size.
- ⁸ Value is calculated based on the notional amount and current market price.
- 76 American Funds Insurance Series

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. "Other securities" also includes loan participations and assignments, which may be subject to legal or contractual restrictions on resale. The total value of all such loans was \$43,203,000, which represented .19% of the net assets of the fund. Some securities in "Other securities" (with an aggregate value of \$30,904,000, an aggregate cost of \$36,241,000, and which represented .13% of the net assets of the fund) were acquired from 9/26/2013 to 11/16/2018 through private placement transactions exempt from registration under the Securities Act of 1933, which may subject them to legal or contractual restrictions on resale.

Investments in affiliates

A company is an affiliate of the fund under the Investment Company Act of 1940 if the fund's holdings in that company represent 5% or more of the outstanding voting shares. The value of the fund's holdings in affiliated companies is included in "Other securities" under the respective industry sectors in the summary investment portfolio. Further details on these holdings and related transactions during the year ended December 31, 2018, appear below.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

- ¹ Security did not produce income during the last 12 months.
- Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$396,462,000, which represented 1.73% of the net assets of the fund. This amount includes \$369,780,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.
- All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$10,162,000, which represented .04% of the net assets of the fund.
- Index-linked bond whose principal amount moves with a government price index.
- Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$1,612,443,000, which represented 7.03% of the net assets of the fund.
- ⁶ Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.
- Coupon rate may change periodically.
- 8 Purchased on a TBA basis.
- 9 Notional amount is calculated based on the number of contracts and notional contract size.
- Value is calculated based on the notional amount and current market price.
- 11 This security was an unaffiliated issuer in its initial period of acquisition at 12/31/2017; it was not publicly disclosed.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

- Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$42,136,000, which represented 11.51% of the net assets of the fund. This amount includes \$40,068,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading.
- Security did not produce income during the last 12 months.
- Acquired in a transaction exempt from registration under Rule 144A of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$10,661,000, which represented 2.91% of the net assets of the fund.
- Index-linked bond whose principal amount moves with a government price index.
- All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$154,000, which represented .04% of the net assets of the fund.
- Step bond; coupon rate may change at a later date
- Coupon rate may change periodically.
- Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.
- Purchased on a TBA basis.
- Notional amount is calculated based on the number of contracts and notional contract size.
- 11 Value is calculated based on the notional amount and current market price.
- 12 Amount less than one thousand.

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. "Other securities" includes securities which were valued under fair value procedures adopted by authority of the board of trustees. The total value of securities which were valued under fair value procedures was \$1,591,000, which represented .02% of the net assets of the fund. "Other securities" also includes loan participations and assignments, which may be subject to legal or contractual restrictions on resale. The total value of all such loans was \$1,243,000, which represented .01% of the net assets of the fund.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

- Step bond; coupon rate may change at a later date.
- 2 Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$1,180,984,000, which represented 11.98% of the net assets of the fund.
- Coupon rate may change periodically.
- All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$25,155,000, which represented .26% of the net assets of the fund.
- 5 Index-linked bond whose principal amount moves with a government price index.
- Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.
- Purchased on a TBA basis.
- ⁸ Notional amount is calculated based on the number of contracts and notional contract size.
- 9 Value is calculated based on the notional amount and current market price.

This summary investment portfolio is designed to streamline the report and help investors better focus on the fund's principal holdings. See the inside back cover for details on how to obtain a complete schedule of portfolio holdings.

"Other securities" includes all issues that are not disclosed separately in the summary investment portfolio. "Other securities" includes securities which were valued under fair value procedures adopted by authority of the board of trustees. The total value of securities which were valued under fair value procedures was \$2,483,000, which represented .12% of the net assets of the fund. This amount includes \$283,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading. "Other securities" also includes loan participations and assignments, which may be subject to legal or contractual restrictions on resale. The total value of all such loans was \$3,706,000, which represented .18% of the net assets of the fund. Some securities in "Other securities" (with an aggregate value of \$2,768,000, and which represented .13% of the net assets of the fund) were acquired from 8/31/2015 to 11/16/2018 through private placement transactions exempt from registration under the Securities Act of 1933, which may subject them to legal or contractual restrictions on resale.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

- Index-linked bond whose principal amount moves with a government price index.
- All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$4,216,000, which represented .20% of the net assets of the fund.
- Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.
- Step bond; coupon rate may be made periodically. Therefore, the elective maturity date may be earlier than the stated maturity date.

 Step bond; coupon rate may change at a later date.

 Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$188,658,000, which represented 9.04% of the net assets of the fund.
- Purchased on a TBA basis.
- Notional amount is calculated based on the number of contracts and notional contract size.
- Value is calculated based on the notional amount and current market price.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

- Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$681,560,000, which represented 56.61% of the net assets of the fund.
- Scheduled interest and/or principal payment was not received.
- Acquired through a private placement transaction exempt from registration under the Securities Act of 1933. May be subject to legal or contractual restrictions on resale. Further details on these holdings appear below.
- Loan participations and assignments; may be subject to legal or contractual restrictions on resale. The total value of all such loans, including those in "Other securities," was \$76,517,000, which represented 6.36% of the net assets of the fund.
- Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.
- Coupon rate may change periodically.
- Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Most recent payment was 100% cash unless otherwise noted.
- Valued under fair value procedures adopted by authority of the board of trustees. The total value of all such securities, including those in "Other securities," was \$30,796,000, which represented 2.56% of the net assets of the fund. This amount includes \$3,926,000 related to certain securities trading outside the U.S. whose values were adjusted as a result of significant market movements following the close of local trading. Value determined using significant unobservable inputs.

Mortgage Fund

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

- 1 Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.
- Purchased on a TBA basis.
- ³ Coupon rate may change periodically.
- 4 Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$52,359,000, which represented 17.98% of the net assets of the fund.
- All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$2,758,000, which represented .95% of the net assets of the fund.
- 6 Index-linked bond whose principal amount moves with a government price index.
- Notional amount is calculated based on the number of contracts and notional contract size.
- 8 Value is calculated based on the notional amount and current market price.

The following footnotes apply to either the individual securities noted or one or more of the securities aggregated and listed as a single line item.

- 1 All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$36,486,000, which represented 1.27% of the net assets of the fund.
- Index-linked bond whose principal amount moves with a government price index.
- 3 Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.
- Purchased on a TBA basis.
- ⁵ Coupon rate may change periodically.
- 6 Acquired in a transaction exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities, including those in "Other securities," was \$151,166,000, which represented 5.27% of the net assets of the fund.
- Notional amount is calculated based on the number of contracts and notional contract size.
- 8 Value is calculated based on the notional amount and current market price.

Notes to financial statements

1. Organization

American Funds Insurance Series (the "series") is registered under the Investment Company Act of 1940 as an open-end, diversified management investment company with 28 different funds (the "funds"). Twenty-three funds in the series are covered in this report. The other five funds in the series, American Funds Insurance Series - Portfolio Series, are covered in a separate report. The assets of each fund are segregated, with each fund accounted for separately. Capital Research and Management Company ("CRMC") is the series' investment adviser. Milliman Financial Risk Management LLC ("Milliman FRM") is the subadviser for the risk management strategy for eight of the funds (the "managed risk funds"), five of which are covered in this report.

The managed risk funds covered in this report are Managed Risk Growth Fund, Managed Risk International Fund, Managed Risk Blue Chip Income and Growth Fund, Managed Risk Growth-Income Fund and Managed Risk Asset Allocation Fund. The managed risk funds invest in other funds within the series (the "underlying funds") and employ Milliman FRM to implement the risk management strategy, which consists of using hedging instruments — primarily short positions on exchange-traded futures contracts — to attempt to stabilize the volatility of the funds around target volatility levels and reduce the downside exposure of the funds during periods of significant market declines.

In 2009, shareholders approved the reorganization of the series from a Massachusetts business trust to a Delaware statutory trust. The series reserved the right to delay implementing the reorganization and has elected to do so.

The investment objectives for each fund covered in this report are as follows:

Global Growth Fund — Seeks to provide long-term growth of capital.

Global Small Capitalization Fund — Seeks to provide long-term growth of capital.

Growth Fund — Seeks to provide growth of capital.

International Fund — Seeks to provide long-term growth of capital.

New World Fund — Seeks long-term capital appreciation.

Blue Chip Income and Growth Fund — Seeks to produce income exceeding the average yield on U.S. stocks generally and to provide an opportunity for growth of principal consistent with sound common stock investing.

Global Growth and Income Fund — Seeks to provide long-term growth of capital while providing current income.

Growth-Income Fund — Seeks to achieve long-term growth of capital and income.

International Growth and Income Fund — Seeks to provide long-term growth of capital while providing current income.

Capital Income Builder — Seeks to provide a level of current income that exceeds the average yield on U.S. stocks generally and to provide a growing stream of income over the years. Secondarily, seeks to provide growth of capital.

Asset Allocation Fund — Seeks to provide high total return consistent with preservation of capital over the long term.

Global Balanced Fund — Seeks the balanced accomplishment of three objectives: long-term growth of capital, conservation of principal and current income.

Bond Fund — Seeks to provide as high a level of current income as is consistent with the preservation of capital.

Global Bond Fund — Seeks to provide, over the long term, a high level of total return consistent with prudent investment management.

High-Income Bond Fund — Seeks to provide a high level of current income and, secondarily, capital appreciation.

Mortgage Fund — Seeks to provide current income and preservation of capital.

Ultra-Short Bond Fund — Seeks to provide current income, consistent with the maturity and quality standards applicable to the fund, and preservation of capital and liquidity.

U.S. Government/AAA-Rated Securities Fund — Seeks to provide a high level of current income consistent with preservation of capital.

Managed Risk Growth Fund — Seeks to provide growth of capital while seeking to manage volatility and provide downside protection.

Managed Risk International Fund — Seeks to provide long-term growth of capital while seeking to manage volatility and provide downside protection.

Managed Risk Blue Chip Income and Growth Fund — Seeks to produce income exceeding the average yield on U.S. stocks generally and to provide an opportunity for growth of principal consistent with sound common stock investing, in each case while seeking to manage volatility and provide downside protection.

Managed Risk Growth-Income Fund — Seeks to achieve long-term growth of capital and income while seeking to manage volatility and provide downside protection.

Managed Risk Asset Allocation Fund — Seeks to provide high total return consistent with preservation of capital over the long term while seeking to manage volatility and provide downside protection.

Each fund in the series, except the managed risk funds, offers either four or five share classes (Classes 1, 1A, 2, 3 or 4); the managed risk funds offer two share classes (Classes P1 and P2). Holders of all share classes of each fund have equal pro rata rights to assets, dividends and liquidation proceeds of each fund held. Each share class of each fund has identical voting rights, except for the exclusive right to vote on matters affecting only its class. Share classes have different fees and expenses ("class-specific fees and expenses"), primarily due to different arrangements for certain distribution expenses. Differences in class-specific fees and expenses will result in differences in net investment income and, therefore, the payment of different per-share dividends by each class of each fund.

2. Significant accounting policies

Each fund is an investment company that applies the accounting and reporting guidance issued in Topic 946 by the U.S. Financial Accounting Standards Board. Each fund's financial statements have been prepared to comply with U.S. generally accepted accounting principles ("U.S. GAAP"). These principles require the series' investment adviser to make estimates and assumptions that affect reported amounts and disclosures. Actual results could differ from those estimates. Subsequent events, if any, have been evaluated through the date of issuance in the preparation of the financial statements. The funds follow the significant accounting policies described in this section, as well as the valuation policies described in the next section on valuation.

Security transactions and related investment income — Security transactions are recorded by the funds as of the date the trades are executed with brokers. Realized gains and losses from security transactions are determined based on the specific identified cost of the securities. In the event a security is purchased with a delayed payment date, the funds will segregate liquid assets sufficient to meet their payment obligations. Dividend income is recognized on the ex-dividend date and interest income is recognized on an accrual basis. Market discounts, premiums and original issue discounts on fixed-income securities are amortized daily over the expected life of the security.

Fees and expenses — The fees and expenses of the underlying funds held by the managed risk funds are not included in the fees and expenses reported for each of the managed risk funds; however, they are indirectly reflected in the valuation of each of the underlying funds. These fees are included in the net effective expense ratios that are provided as additional information in the financial highlights tables.

Class allocations — Income, fees and expenses (other than class-specific fees and expenses) and realized and unrealized gains and losses are allocated daily among the various share classes of each fund based on their relative net assets. Class-specific fees and expenses, such as distribution expenses, are accrued daily and charged directly to the respective share class of each fund.

Distributions paid to shareholders — Income dividends and capital gain distributions are recorded on each fund's ex-dividend date.

Currency translation — Assets and liabilities, including investment securities, denominated in currencies other than U.S. dollars are translated into U.S. dollars at the exchange rates supplied by one or more pricing vendors on the valuation date. Purchases and sales of investment securities and income and expenses are translated into U.S. dollars at the exchange rates on the dates of such transactions. The effects of changes in exchange rates on investment securities are included with the net realized gain or loss and net unrealized appreciation or investments in the funds' statements of operations. The realized gain or loss and unrealized appreciation or depreciation resulting from all other transactions denominated in currencies other than U.S. dollars are disclosed separately.

3. Valuation

CRMC, the series' investment adviser, values the funds' investments at fair value as defined by U.S. GAAP. The net asset value of each share class of each fund is generally determined as of approximately 4:00 p.m. New York time each day the New York Stock Exchange is open.

Methods and inputs — The series' investment adviser uses the following methods and inputs to establish the fair value of each fund's assets and liabilities. Use of particular methods and inputs may vary over time based on availability and relevance as market and economic conditions evolve.

Equity securities are generally valued at the official closing price of, or the last reported sale price on, the exchange or market on which such securities are traded, as of the close of business on the day the securities are being valued or, lacking any sales, at the last available bid price. Prices for each security are taken from the principal exchange or market on which the security trades. The value of an underlying fund is based on its reported net asset value.

Fixed-income securities, including short-term securities, are generally valued at prices obtained from one or more pricing vendors. Vendors value such securities based on one or more of the inputs described in the following table. The table provides examples of inputs that are commonly relevant for valuing particular classes of fixed-income securities in which the funds are authorized to invest. However, these classifications are not exclusive and any of the inputs may be used to value any other class of fixed-income security.

Fixed-income class	Examples of standard inputs
All	Benchmark yields, transactions, bids, offers, quotations from dealers and trading systems, new issues, spreads and other relationships observed in the markets among comparable securities; and proprietary pricing models such as yield measures calculated using factors such as cash flows, financial or collateral performance and other reference data (collectively referred to as "standard inputs")
Corporate bonds & notes; convertible securities	Standard inputs and underlying equity of the issuer
Bonds & notes of governments & government agencies	Standard inputs and interest rate volatilities
Mortgage-backed; asset-backed obligations	Standard inputs and cash flows, prepayment information, default rates, delinquency and loss assumptions, collateral characteristics, credit enhancements and specific deal information
Municipal securities	Standard inputs and, for certain distressed securities, cash flows or liquidation values using a net present value calculation based on inputs that include, but are not limited to, financial statements and debt contracts

When the series' investment adviser deems it appropriate to do so (such as when vendor prices are unavailable or not deemed to be representative), fixed-income securities will be valued in good faith at the mean quoted bid and ask prices that are reasonably and timely available (or bid prices, if ask prices are not available) or at prices for securities of comparable maturity, quality and type.

Securities with both fixed-income and equity characteristics, or equity securities traded principally among fixed-income dealers, are generally valued in the manner described for either equity or fixed-income securities, depending on which method is deemed most appropriate by the series' investment adviser. The Government Cash Management Fund held by the managed risk funds is managed to maintain a \$1.00 net asset value per share. The net asset value of each share class of each managed risk fund is calculated based on the reported net asset values of the underlying funds in which each fund invests.

Exchange-traded options and futures are generally valued at the official closing price for options and official settlement price for futures of the exchange or market on which such instruments are traded, as of the close of business on the day such instruments are being valued. Forward currency contracts are valued at the mean of representative quoted bid and ask prices, generally based on prices supplied by one or more pricing vendors. Interest rate swaps and credit default swaps are generally valued by pricing vendors based on market inputs that include the index and term of index, reset frequency, payer/receiver, currency and pay frequency.

Securities and other assets for which representative market quotations are not readily available or are considered unreliable by the series' investment adviser are fair valued as determined in good faith under fair value guidelines adopted by authority of the series' board of trustees as further described. The investment adviser follows fair valuation guidelines, consistent with U.S. Securities and Exchange Commission rules and guidance, to consider relevant principles and factors when making fair value determinations. The investment adviser considers relevant indications of value that are reasonably and timely available to it in determining the fair value to be assigned to a particular security, such as the type and cost of the security; contractual or legal restrictions on resale of the security; relevant financial or business developments of the issuer; actively traded similar or related securities; conversion or exchange rights on the security; related corporate actions; significant events occurring after the close of trading in the security; and changes in overall market conditions. In addition, the closing prices of equity securities and futures that trade in markets outside U.S. time zones may be adjusted to reflect significant events that occur after the close of local trading but before the net asset value of each share class of each fund is determined. Fair valuations and valuations of investments and futures that are not actively trading involve judgment and may differ materially from valuations that would have been used had greater market activity occurred.

Processes and structure — The series' board of trustees has delegated authority to the series' investment adviser to make fair value determinations, subject to board oversight. The investment adviser has established a Joint Fair Valuation Committee (the "Fair Valuation Committee") to administer, implement and oversee the fair valuation process, and to make fair value decisions. The Fair Valuation Committee regularly reviews its own fair value decisions, as well as decisions made under its standing instructions to the investment adviser's valuation teams. The Fair Valuation Committee reviews changes in fair value measurements from period to period and may, as deemed appropriate, update the fair valuation guidelines to better reflect the results of back testing and address new or evolving issues. The Fair Valuation Committee reports any changes to the fair valuation guidelines to the board of trustees. The series' board and audit committee also regularly review reports that describe fair value determinations and methods.

The series' investment adviser has also established a Fixed-Income Pricing Review Group to administer and oversee the fixed-income valuation process, including the use of fixed-income pricing vendors. This group regularly reviews pricing vendor information and market data. Pricing decisions, processes and controls over security valuation are also subject to additional internal reviews, including an annual control self-evaluation program facilitated by the investment adviser's compliance group.

Classifications — The series' investment adviser classifies the funds' assets and liabilities into three levels based on the inputs used to value the assets or liabilities. Level 1 values are based on quoted prices in active markets for identical securities. Level 2 values are based on significant observable market inputs, such as quoted prices for similar securities and quoted prices in inactive markets. Certain securities trading outside the U.S. may transfer between Level 1 and Level 2 due to valuation adjustments resulting from significant market movements following the close of local trading. Level 3 values are based on significant unobservable inputs that reflect the investment adviser's determination of assumptions that market participants might reasonably use in valuing the securities.

The valuation levels are not necessarily an indication of the risk or liquidity associated with the underlying investment. For example, U.S. government securities are reflected as Level 2 because the inputs used to determine fair value may not always be quoted prices in an active market. The following tables present the funds' valuation levels as of December 31, 2018 (dollars in thousands):

¹ Interest rate swaps and credit default swaps are not included in the investment portfolio.

The following table reconciles the valuation of the fund's Level 3 investment securities and related transactions for the year ended December 31, 2018 (dollars in thousands):

	Beginning	Transfers		Net	Hannalina d	Transfers	Ending
	value at	into		realized	Unrealized	out of	value at
	1/1/2018	Level 3 ²	Purchases Sales	gain ³	appreciation ³	Level 3 ²	12/31/2018
Investment securities	\$ 23,741	\$ —	\$17,504 \$ (34,559)	\$ 6,060	\$ 9,202	\$ (4,411)	\$ 17,537
Net unrealized appreciation during the	e period on Level 3 inve	stment securities h	ield at December 31, 2018				\$ 1,603

- Transfers into or out of Level 3 are based on the beginning market value of the quarter in which they occurred.
 Net realized gain and unrealized appreciation are included in the related amounts on investments in the statement of operations.
- American Funds Insurance Series

Unobservable inputs — Valuation of the fund's Level 3 securities is based on significant unobservable inputs that reflect the investment adviser's determination of assumptions that market participants might reasonably use in valuing the securities. The following table provides additional information used by the fund's investment adviser to fair value the fund's Level 3 securities (dollars in thousands):

	Value at 12/31/2018	Valuation techniques	Unobservable inputs	Range	Weighted average	impact to valuation from an increase in input*
Bonds, notes & other debt			· · · · · · · · · · · · · · · · · · ·			
instruments	\$ 8,992	Yield analysis	Yield to maturity risk premium	0-400 bps	299 bps	Decrease
Convertible securities	5,892	Market comparables	EBITDA multiple	8.9x	8.9x	Increase
		Recent market information	Market comparables	25%	25%	Decrease
		Enterprise value	Revenue multiple	1.3x	1.3x	Increase
			Discount to reflect timing of receipt and			
Common stocks	2,397	Expected proceeds	amount of proceeds	50%	50%	Decrease
		Black-Scholes	Implied volatility	30%	30%	Increase
Rights & warrants	256	Recent market information	Quoted price	N/A	N/A	N/A
	\$ 17,537					

^{*} This column represents the directional change in fair value of the Level 3 securities that would result in an increase from the corresponding input. A decrease to the unobservable input would have the opposite effect. Significant increases and decreases in these inputs in isolation could result in significantly higher or lower fair value measurements.

Key to abbreviation

EBITDA = Earnings before income taxes, depreciation and amortization

Managed Risk Growth Fund

At December 31, 2018, all of the fund's investments were classified as Level 1.

Managed Risk International Fund

At December 31, 2018, all of the fund's investments were classified as Level 1.

Managed Risk Blue Chip Income and Growth Fund

At December 31, 2018, all of the fund's investments were classified as Level 1.

Managed Risk Growth-Income Fund

At December 31, 2018, all of the fund's investments were classified as Level 1.

Managed Risk Asset Allocation Fund

At December 31, 2018, all of the fund's investments were classified as Level 1.

4. Risk factors

Investing in the funds may involve certain risks including, but not limited to, those described below.

Market conditions — The prices of, and the income generated by, the common stocks, bonds and other securities held by a fund may decline — sometimes rapidly or unpredictably — due to various factors, including events or conditions affecting the general economy or particular industries; overall market changes; local, regional or global political, social or economic instability; governmental, governmental agency or central bank responses to economic conditions; and currency exchange rate, interest rate and commodity price fluctuations.

Issuer risks — The prices of, and the income generated by, securities held by a fund may decline in response to various factors directly related to the issuers of such securities, including reduced demand for an issuer's goods or services, poor management performance, major litigation against the issuer, changes in government regulations affecting the issuer or its competitive environment and strategic initiatives such as mergers, acquisitions or dispositions and the market response to any such initiatives.

Investing in growth-oriented stocks — Growth-oriented common stocks and other equity-type securities (such as preferred stocks, convertible preferred stocks and convertible bonds) may involve larger price swings and greater potential for loss than other types of investments. These risks may be even greater in the case of smaller capitalization stocks.

Investing in income-oriented stocks — The value of a fund's securities and income provided by a fund may be reduced by changes in the dividend policies of, and the capital resources available for dividend payments at, the companies in which the fund invests.

Investing in small companies — Investing in smaller companies may pose additional risks. For example, it is often more difficult to value or dispose of small company stocks and more difficult to obtain information about smaller companies than about larger companies. Furthermore, smaller companies often have limited product lines, operating histories, markets and/or financial resources, may be dependent on one or a few key persons for management, and can be more susceptible to losses. Moreover, the prices of their stocks may be more volatile than stocks of larger, more established companies, particularly during times of market turmoil.

Investing outside the U.S. — Securities of issuers domiciled outside the U.S., or with significant operations or revenues outside the U.S., may lose value because of adverse political, social, economic or market developments (including social instability, regional conflicts, terrorism and war) in the countries or regions in which the issuers operate or generate revenue. These securities may also lose value due to changes in foreign currency exchange rates against the U.S. dollar and/or currencies of other countries. Issuers of these securities may be more susceptible to actions of foreign governments, such as nationalization, currency blockage or the imposition of price controls or punitive taxes, each of which could adversely impact the value of these securities. Securities markets in certain countries may be more volatile and/or less liquid than those in the U.S. Investments outside the U.S. may also be subject to different accounting practices and different regulatory, legal and reporting standards and practices, and may be more difficult to value, than those in the U.S. In addition, the value of investments outside the U.S. may be reduced by foreign taxes, including foreign withholding taxes on interest and dividends. Further, there may be increased risks of delayed settlement of securities purchased or sold by the fund. The risks of investing outside the U.S. may be heightened in connection with investments in emerging markets.

Investing in developing countries — Investing in countries with developing economies and/or markets may involve risks in addition to and greater than those generally associated with investing in developed countries. For instance, emerging market countries may have less developed legal and accounting systems than those in developed countries. The governments of these countries may be less stable and more likely to impose capital controls, nationalize a company or industry, place restrictions on foreign ownership and on withdrawing sale proceeds of securities from the country, and/or impose punitive taxes that could adversely affect the prices of securities. In addition, the economies of these countries may be dependent on relatively few industries that are more susceptible to local and global changes. Securities markets in these countries can also be relatively small and have substantially lower trading volumes. As a result, securities issued in these countries may be more volatile and less liquid, and may be more difficult to value, than securities issued in countries with more developed economies and/or markets. Less certainty with respect to security valuations may lead to additional challenges and risks in calculating the fund's net asset value. Additionally, emerging markets are more likely to experience problems with the clearing and settling of trades and the holding of securities by banks, agents and depositories that are less established than those in developed countries.

Investing in emerging markets — Investing in emerging markets may involve risks in addition to and greater than those generally associated with investing in the securities markets of developed countries. For instance, emerging market countries may have less developed legal and accounting systems than those in developed countries. The governments of these countries may be less stable and more likely to impose capital controls, nationalize a company or industry, place restrictions on foreign ownership and on withdrawing sale proceeds of securities from the country, and/or impose punitive taxes that could adversely affect the prices of securities. In addition, the economies of these countries may be dependent on relatively few industries that are more susceptible to local and global changes. Securities markets in these countries can also be relatively small and have substantially lower trading volumes. As a result, securities issued in these countries may be more volatile and less liquid, and may be more difficult to value, than securities issued in countries with more developed economies and/or markets. Less certainty with respect to security valuations may lead to additional challenges and risks in calculating a fund's net asset value. Additionally, emerging markets are more likely to experience problems with the clearing and settling of trades and the holding of securities by banks, agents and depositories that are less established than those in developed countries.

Investing in debt instruments — The prices of, and the income generated by, bonds and other debt securities held by a fund may be affected by changing interest rates and by changes in the effective maturities and credit ratings of these securities.

Rising interest rates will generally cause the prices of bonds and other debt securities to fall. A general rise in interest rates may cause investors to sell debt securities on a large scale, which could also adversely affect the price and liquidity of debt securities and could also result in increased redemptions from a fund. Falling interest rates may cause an issuer to redeem, call or refinance a debt security before its stated maturity, which may result in a fund failing to recoup the full amount of its initial investment and having to reinvest the proceeds in lower yielding securities. Longer maturity debt securities generally have greater sensitivity to changes in interest rates and may be subject to greater price fluctuations than shorter maturity debt securities.

Bonds and other debt securities are also subject to credit risk, which is the possibility that the credit strength of an issuer or guarantor will weaken or be perceived to be weaker, and/or an issuer of a debt security will fail to make timely payments of principal or interest and the security will go into default. A downgrade or default affecting any of a fund's securities could cause the value of a fund's shares to decrease. Lower quality debt securities generally have higher rates of interest and may be subject to greater price fluctuations than higher quality debt securities. Credit risk is gauged, in part, by the credit ratings of the debt securities in which a fund invests. However, ratings are only the opinions of the rating agencies issuing them and are not guarantees as to credit quality or an evaluation of market risk. The funds' investment adviser relies on its own credit analysts to research issuers and issues in seeking to assess credit and default risks.

Investing in lower rated debt instruments — Lower rated bonds and other lower rated debt securities generally have higher rates of interest and involve greater risk of default or price declines due to changes in the issuer's creditworthiness than those of higher quality debt securities. The market prices of these securities may fluctuate more than the prices of higher quality debt securities and may decline significantly in periods of general economic difficulty. These risks may be increased with respect to investments in junk bonds.

Investing in derivatives — The use of derivatives involves a variety of risks, which may be different from, or greater than, the risks associated with investing in traditional securities, such as stocks and bonds. Changes in the value of a derivative may not correlate perfectly with, and may be more sensitive to market events than, the underlying asset, rate or index, and a derivative instrument may expose a fund to losses in excess of its initial investment. Derivatives may be difficult to value, difficult for a fund to buy or sell at an opportune time or price and difficult to terminate or otherwise offset. A fund's use of derivatives may result in losses to the fund, and investing in derivatives may reduce a fund's returns and increase a fund's price volatility. A fund's counterparty to a derivative transaction (including, if applicable, the fund's clearing broker, the derivatives exchange or the clearinghouse) may be unable or unwilling to honor its financial obligations in respect of the transaction.

Currency — The prices of, and the income generated by, most debt securities held by a fund may also be affected by changes in relative currency values. If the U.S. dollar appreciates against foreign currencies, the value in U.S. dollars of a fund's securities denominated in such currencies would generally fall and vice versa. U.S. dollar-denominated securities of foreign issuers may also be affected by changes in relative currency values.

Investing in mortgage-related and other asset-backed securities — Mortgage-related securities, such as mortgage-backed securities, and other asset-backed securities, include debt obligations that represent interests in pools of mortgages or other income-bearing assets, such as consumer loans or receivables. Such securities often involve risks that are different from or more acute than the risks associated with investing in other types of debt securities. Mortgage-backed and other asset-backed securities are subject to changes in the payment patterns of borrowers of the underlying debt, potentially increasing the volatility of the securities and a fund's net asset value. When interest rates fall, borrowers are more likely to refinance or prepay their debt before its stated maturity. This may result in a fund having to reinvest the proceeds in lower yielding securities, effectively reducing a fund's income. Conversely, if interest rates rise and borrowers repay their debt more slowly than expected, the time in which the mortgage-backed and other asset-backed securities are paid off could be extended, reducing a fund's cash available for reinvestment in higher yielding securities. Mortgage-backed securities are also subject to the risk that underlying borrowers will be unable to meet their obligations and the value of property that secures the mortgages may decline in value and be insufficient, upon foreclosure, to repay the associated loans. Investments in asset-backed securities are subject to similar risks.

Investing in future delivery contracts — A fund may enter into contracts, such as to-be-announced contracts and mortgage dollar rolls, that involve a fund selling mortgage-related securities and simultaneously contracting to repurchase similar securities for delivery at a future date at a predetermined price. This can increase a fund's market exposure, and the market price of the securities that the fund contracts to repurchase could drop below their purchase price. While a fund can preserve and generate capital through the use of such contracts by, for example, realizing the difference between the sale price and the future purchase price, the income generated by the fund may be reduced by engaging in such transactions. In addition, these transactions may increase the turnover rate of a fund.

Investing in inflation linked bonds — The values of inflation linked bonds generally fluctuate in response to changes in real interest rates — i.e., rates of interest after factoring in inflation. A rise in real interest rates may cause the prices of inflation linked securities to fall, while a decline in real interest rates may cause the prices to increase. Inflation linked bonds may experience greater losses than other debt securities with similar durations when real interest rates rise faster than nominal interest rates. There can be no assurance that the value of an inflation linked security will be directly correlated to changes in interest rates; for example, if interest rates rise for reasons other than inflation, the increase may not be reflected in the security's inflation measure.

Investing in inflation linked bonds may also reduce a fund's distributable income during periods of deflation. If prices for goods and services decline throughout the economy, the principal and income on inflation linked securities may decline and result in losses to a fund.

Investing in securities backed by the U.S. government — Securities backed by the U.S. Treasury or the full faith and credit of the U.S. government are guaranteed only as to the timely payment of interest and principal when held to maturity. Accordingly, the current market values for these securities will fluctuate with changes in interest rates and the credit rating of the U.S. government. Securities issued by government-sponsored entities and federal agencies and instrumentalities that are not backed by the full faith and credit of the U.S. government are neither issued nor guaranteed by the U.S. government.

Investing in repurchase agreements — Upon entering into a repurchase agreement, a fund purchases a security from a bank or broker-dealer, which simultaneously commits to repurchase the security within a specified time at the fund's cost with interest. The security purchased by the fund constitutes collateral for the seller's repurchase obligation. If the party agreeing to repurchase should default, the fund may seek to sell the security it holds as collateral. The fund may incur a loss if the value of the collateral securing the repurchase obligation falls below the repurchase price. The fund may also incur disposition costs and encounter procedural delays in connection with liquidating the collateral.

Interest rate risk — The values and liquidity of the securities held by a fund may be affected by changing interest rates. For example, the values of these securities may decline when interest rates rise and increase when interest rates fall. Longer maturity debt securities generally have greater sensitivity to changes in interest rates and may be subject to greater price fluctuations than shorter maturity debt securities. A fund may invest in variable and floating rate securities. When a fund holds variable or floating rate securities, a decrease in market interest rates will adversely affect the income received from such securities and the net asset value of a fund's shares. Although the values of such securities are generally less sensitive to interest rate changes than those of other debt securities, the value of variable and floating rate securities may decline if their interest rates as quickly, or as much, as market interest rates. Conversely, floating rate securities will not generally increase in value if interest rates decline. During periods of extremely low short-term interest rates, a fund may not be able to maintain a positive yield and, given the current low interest rate environment, risks associated with rising rates are currently heightened.

Credit and liquidity support — Changes in the credit quality of banks and financial institutions providing credit and liquidity support features with respect to securities held by a fund could cause the values of these securities to decline.

Asset allocation — A fund's percentage allocation to equity securities, debt securities and money market instruments could cause the fund to underperform relative to relevant benchmarks and other funds with similar investment objectives.

Nondiversification risk — As nondiversified funds, certain funds have the ability to invest a larger percentage of their assets in the securities of a smaller number of issuers than diversified funds. Although the funds do not intend to limit their investments to the securities of a small number of issuers, if they were to do so, poor performance by a single large holding could adversely impact the funds' investment results more than if the funds were invested in a larger number of issuers.

Liquidity risk — Certain fund holdings may be or become difficult or impossible to sell, particularly during times of market turmoil. Illiquidity may result from the lack of an active market for a holding, legal or contractual restrictions on resale, or the reduced number and capacity of market participants to make a market in such holding. Market prices for less liquid or illiquid holdings may be volatile, and reduced liquidity may have an adverse impact on the market price of such holdings. Additionally, the sale of less liquid or illiquid holdings may involve substantial delays (including delays in settlement) and additional costs and the fund may be unable to sell such holdings when necessary to meet its liquidity needs or may be forced to sell at a loss.

Management — The investment adviser to the funds actively manages the funds' investments. Consequently, the funds are subject to the risk that the methods and analyses, including models, tools and data, employed by the investment adviser in this process may be flawed or incorrect and may not produce the desired results. This could cause the funds to lose value or their investment results to lag relevant benchmarks or other funds with similar objectives.

Investing in the managed risk funds may involve additional risks including, but not limited to, those described below.

Fund structure — The managed risk funds invest in underlying funds and incur expenses related to those underlying funds. In addition, investors in the managed risk funds will incur fees to pay for certain expenses related to the operations of the managed risk funds. An investor holding the underlying fund directly would incur lower overall expenses but would not receive the benefit of the managed risk strategy.

Management — The managed risk funds are subject to the risk that the managed risk strategy or the methods employed by the subadviser in implementing the managed risk strategy may not produce the desired results. This could cause the managed risk funds to lose value or their investment results to lag relevant benchmarks or other funds with similar objectives.

Underlying fund risks — Because the managed risk funds' investments consist of investments in underlying funds, the managed risk funds' risks are directly related to the risks of the respective underlying fund in which each managed fund invests. For this reason, it is important to understand the risks associated with investing both in the managed risk fund and in each of the underlying funds.

Investing in options and futures contracts — In addition to the risks generally associated with investing in derivative instruments, options and futures contracts are subject to the creditworthiness of the clearing organizations, exchanges and, in the case of futures, futures commission merchants with which a fund transacts. Additionally, although futures require only a small initial investment in the form of a deposit of initial margin, the amount of a potential loss on a futures contract could greatly exceed the initial amount invested. While both options and futures contracts are generally liquid instruments, under certain market conditions, options and futures may be deemed to be illiquid. For example, a fund may be temporarily prohibited from closing out its position in an options or futures contract if intraday price change limits or limits on trading volume imposed by the applicable exchange are triggered. If a fund is unable to close out a position on an options or futures contract, the fund would remain subject to the risk of adverse price movements until the fund is able to close out the position in question. The ability of a fund to successfully utilize options and futures contracts may depend in part upon the ability of the fund's investment adviser or subadviser interest rates and other economic factors and to assess and predict the impact of such economic factors on the options and futures in which the fund invests. If the investment adviser or subadviser incorrectly forecasts economic developments or incorrectly predicts the impact of such developments on the options and futures in which it invests, a fund could be exposed to the risk of loss. Whereas the risk of loss on a put option purchased by the fund is limited to the initial cost of the option, the amount of a potential loss on a futures contract could greatly exceed the relatively small initial amount invested in entering the futures position.

Hedging — There may be imperfect or even negative correlation between the prices of the options and futures contracts in which a fund invests and the prices of the underlying securities or indexes which the fund seeks to hedge. For example, options and futures contracts may not provide an effective hedge because changes in options and futures contract prices may not track those of the underlying securities or indexes they are intended to hedge. In addition, there are significant differences between the securities market, on the one hand, and the options and futures markets, on the other, that could result in an imperfect correlation between the markets, causing a given hedge not to achieve its objectives. The degree of imperfection of correlation depends on circumstances such as variations in speculative market demand for options and futures, including technical influences in options and futures trading, and differences between the financial instruments being hedged and the instruments underlying the standard contracts available for trading. A decision as to whether, when and how to hedge involves the exercise of skill and judgment, and even a well-conceived hedge may be unsuccessful to some degree because of market behavior or unexpected interest rate trends. In addition, the fund's investment in exchange-traded options and futures and their resulting costs could limit the fund's gains in rising markets relative to those of the underlying funds, or to those of unhedged funds in general.

Short positions — A fund may suffer losses from short positions in futures contracts. Losses from short positions in futures contracts occur when the underlying index increases in value. As the underlying index increases in value, the holder of the short position in the corresponding futures contract is required to pay the difference in value of the futures contract resulting from the increase in the index on a daily basis. Losses from a short position in an index futures contract could potentially be very large if the value of the underlying index rises dramatically in a short period of time.

5. Certain investment techniques

Securities lending — One of the funds has entered into securities lending transactions in which the fund earns income by lending investment securities to brokers, dealers or other institutions. Each transaction involves three parties: the fund, acting as the lender of the securities, a borrower, and a lending agent that acts as an intermediary.

Securities lending transactions are entered into by the fund under the securities lending agreement with the lending agent. The lending agent facilitates the exchange of securities between the lender and the borrower, generally provides protection from borrower default, marks to market the value of collateral daily, secures additional collateral from the borrower if it falls below preset terms, and may reinvest the collateral on behalf of the fund according to agreed parameters. The lending agent has indemnified the fund against losses resulting from borrower default. Although risk is mitigated by the collateral and indemnification, the fund could experience a delay in recovering its securities and a potential loss of income or value if the borrower fails to return the securities, collateral investments decline in value or the lending agent fails to perform.

The borrower is required to post highly liquid assets, such as cash or U.S. government securities, as collateral for the loan in an amount at least equal to the value of the securities loaned. Investments made with cash collateral are recognized as assets in the fund's investment portfolio. The same amount is recorded as a liability in the fund's statement of assets and liabilities. While securities are on loan, the fund will continue to receive the equivalent of the interest, dividends or other distributions paid by the issuer, as well as a

portion of the interest on the investment of the collateral. Additionally, although the fund does not have the right to vote on securities while they are on loan, the fund has a right to consent on corporate actions and a right to recall loaned securities to vote on proposals affecting them. The borrower is obligated to return the loaned security at the conclusion of the loan or, during the pendency of the loan, on demand from the fund.

As of December 31, 2018, the total value of securities on loan was \$67,607,000, and the total value of collateral received was \$72,379,000. Collateral received included cash of \$60,486,000 and non-cash U.S. Government securities of \$11,893,000. Investment securities purchased from cash collateral of \$54,436,000 are disclosed in the summary investment portfolio as short-term securities received as collateral, if any, are not recognized as fund assets. The contractual maturity of collateral received under the securities lending agreement is classified as overnight and continuous.

Index-linked bonds — Some of the funds have invested in index-linked bonds, which are fixed-income securities whose principal value is periodically adjusted to a government price index. Over the life of an index-linked bond, interest is paid on the adjusted principal value. Increases or decreases in the principal value of index-linked bonds are recorded as interest income in the fund's statement of operations.

Mortgage dollar rolls — Some of the funds have entered into mortgage dollar roll transactions in which the fund sells a mortgage-backed security to a counterparty and simultaneously enters into an agreement with the same counterparty to buy back a similar security on a specific future date at a predetermined price. Mortgage dollar rolls are accounted for as purchase and sale transactions, which may increase the funds' portfolio turnover rates.

Loan transactions — Some of the funds have entered into loan transactions in which the fund acquires a loan either through an agent, by assignment from another holder, or as a participation interest in another holder's portion of a loan. The loan is often administered by a financial institution that acts as agent for the holders of the loan, and the fund may be required to receive approval from the agent and/or borrower prior to the sale of the investment. The loan's interest rate and maturity date may change based on the terms of the loan, including potential early payments of principal.

Short-term securities — The managed risk funds hold shares of the Government Cash Management Fund, a cash management vehicle offered by the Bank of New York Mellon ("BNY Mellon"), the funds' custodian bank. The Government Cash Management Fund is managed by the Dreyfus Corporation.

Options contracts — The Managed Risk Growth-Income Fund has entered into options contracts, which give the holder of the option, in return for a premium payment, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option, the security underlying the option (or the cash value of the index underlying the option) at a specified price. As part of its managed risk strategy, the Managed Risk Growth-Income Fund will at times purchase put options on equity indexes in standardized contracts traded on foreign or domestic securities exchanges, boards of trade, or similar entities. By purchasing a put option on an equity index, the fund obtains the right (but not the obligation) to sell the cash value of the index underlying the option at a specified exercise price, and in return for this right, the fund pays the current market price, or the option premium, for the option.

The fund may terminate its position in a put option by allowing the option to expire or by exercising the option. If the option is allowed to expire, the fund will lose the entire premium. If the option is exercised, the fund completes the sale of the underlying instrument (or delivers the cash value of the index underlying the option) at the exercise price. The fund may also terminate a put option position by entering into opposing close-out transactions in advance of the option expiration date.

Premiums paid on options purchased, as well as the daily fluctuation in market value, are included in investment securities in the fund's statement of assets and liabilities. Realized gains or losses are recorded at the time the option contract is closed or expires. Net realized gains or losses and net unrealized appreciation or depreciation from options contracts are recorded in the fund's statement of operations.

Futures contracts — Some of the funds have entered into futures contracts, which provide for the future sale by one party and purchase by another party of a specified amount of a specific financial instrument for a specified price, date, time and place designated at the time the contract is made. Futures contracts are used to strategically manage the fund's interest rate sensitivity by increasing or decreasing the duration of the fund or a portion of the fund's portfolio. For the managed risk funds, futures contracts are used to strategically manage portfolio volatility and downside equity risk.

Upon entering into futures contracts, and to maintain the fund's open positions in futures contracts, the fund is required to deposit with a futures broker, or FCM, in a segregated account in the name of the FCM an amount of cash, U.S. government securities or other liquid securities, known as initial margin. The margin required for a particular futures contract is set by the exchange on which the contract is

traded to serve as collateral, and may be significantly modified from time to time by the exchange during the term of the contract. Securities deposited as initial margin, if any, are disclosed in the investment portfolio and cash deposited as initial margin, if any, is reflected as restricted cash pledged for futures contracts in the fund's statement of assets and liabilities

On a daily basis, each fund pays or receives variation margin based on the increase or decrease in the value of the futures contracts and records variation margin on futures contracts in each fund's statement of assets and liabilities. In addition, each fund segregates liquid assets equivalent to the fund's outstanding obligations under the contract in excess of the initial margin and variation margin, if any. Futures contracts may involve a risk of loss in excess of the variation margin shown on each fund's statement of assets and liabilities. Each fund records realized gains or losses at the time the futures contract is closed or expires. Net realized gains or losses and net unrealized appreciation or depreciation from futures contracts are recorded in each fund's statement of operations.

Forward currency contracts — Some of the funds have entered into forward currency contracts, which represent agreements to exchange currencies on specific future dates at predetermined rates. The series' investment adviser uses forward currency contracts to manage the fund's exposure to changes in exchange rates. Upon entering into these contracts, risks may arise from the potential inability of counterparties to meet the terms of their contracts and from possible movements in exchange rates.

On a daily basis, the series' investment adviser values forward currency contracts based on the applicable exchange rates and records unrealized appreciation or depreciation for open forward currency contracts in each fund's statement of assets and liabilities. Realized gains or losses are recorded at the time the forward contract is closed or offset by another contract with the same broker for the same settlement date and currency. Closed forward currency contracts that have not reached their settlement date are included in the respective receivables or payables for closed forward currency contracts in each fund's statement of assets and liabilities. Net realized gains or losses from closed forward currency contracts and net unrealized appreciation or depreciation from open forward currency contracts are recorded in each fund's statement of operations.

Interest rate swaps — Some of the funds have entered into interest rate swaps, which are agreements to exchange one stream of future interest payments for another based on a specified notional amount. Typically, interest rate swaps exchange a fixed interest rate for a payment that floats relative to a benchmark or vice versa. The series' investment adviser uses interest rate swaps to manage the interest rate sensitivity of the fund by increasing or decreasing the duration of the fund or a portion of the fund's portfolio. Risks may arise as a result of the series' investment adviser incorrectly anticipating changes in interest rates, increased volatility, reduced liquidity and the potential inability of counterparties to meet the terms of their agreements.

Upon entering into an interest rate swap contract, the fund is required to deposit cash, U.S. government securities or other liquid securities, which is known as initial margin. Generally, the initial margin required for a particular interest rate swap is set and held as collateral by the clearinghouse on which the contract is cleared. The amount of initial margin required may be significantly modified from time to time by the clearinghouse during the term of the contract.

On a daily basis, the series' investment adviser records daily interest accruals related to the exchange of future payments as a receivable and payable in each fund's statement of assets and liabilities. Each fund also pays or receives a variation margin based on the increase or decrease in the value of the interest rate swaps, including accrued interest, and records variation margin on interest rate swaps in each fund's statement of assets and liabilities. Each fund records realized gains and losses on both the net accrued interest and any gain or loss recognized at the time the interest rate swap is closed or expires. Net realized gains or losses, as well as any net unrealized appreciation or depreciation, from interest rate swaps are recorded in each fund's statement of operations.

Credit default swap indices — Some of the funds have entered into centrally cleared credit default swap agreements on credit indices ("CDSI") that involve one party (the protection buyer) making a stream of payments to another party (the protection seller) in exchange for the right to receive a specified return upon the occurrence of a credit event, such as a default or restructuring, with respect to any of the underlying issuers (reference obligations) in the referenced index. The series' investment adviser uses credit default swaps to assume exposure to a diversified portfolio of credits or to hedge against existing credit risks.

CDSI are portfolios of credit instruments or exposures designed to be representative of some part of the credit market, such as the high-yield or investment-grade credit market. CDSI are generally traded using standardized terms, including a fixed spread and standard maturity dates, and reference all the names in the index. If there is a credit event, it is settled based on that name's weight in the index. The composition of the underlying issuers or obligations within a particular index may change periodically, usually every six months. A specified credit event may affect all or individual underlying reference obligations included in the index, and will be settled based upon the relative weighting of the affected obligation(s) within the index. The value of each CDSI can be used as a measure of the current payment/performance risk of the CDSI and represents the likelihood of an expected liability or profit should the notional amount of the CDSI be closed or sold as of the period end. An increasing value, as compared to the notional amount of the CDSI, represents a deterioration of the referenced indices' credit soundness and a greater likelihood of risk of default or other credit event

occurring as defined under the terms of the agreement. When a fund provides sell protection, its maximum exposure is the notional amount of the credit default swap agreement.

Upon entering into a centrally cleared CDSI contract, the fund is required to deposit with a derivatives clearing member ("DCM") in a segregated account in the name of the DCM an amount of cash, U.S. government securities or other liquid securities, which is known as initial margin. Generally, the initial margin required for a particular credit default swap is set and held as collateral by the clearinghouse on which the contract is cleared. The amount of initial margin required may be significantly modified from time to time by the clearinghouse during the term of the contract. Securities deposited as initial margin are designated on the investment portfolio.

On a daily basis, interest accruals related to the exchange of future payments are recorded as a receivable and payable in each fund's statement of assets and liabilities. Each fund also pays or receives a variation margin based on the increase or decrease in the value of the centrally cleared swaps, and records variation margin in each fund's statement of assets and liabilities. Each fund records realized gains and losses on both the net accrued interest and any gain or loss recognized at the time the swap is closed or expires. Net realized gains or losses, as well as any net unrealized appreciation or depreciation, from credit default swaps are recorded in each fund's statement of operations.

The following table presents the average month-end notional amounts of options purchased, futures contracts, forward currency contracts, interest rate swaps and credit default swaps while held for each fund (dollars in thousands):

Interest

Futures

Options purchased are included in net realized gain (loss) on unaffiliated investments.

Options purchased are included in net unrealized (depreciation) appreciation on unaffiliated investments.

Collateral — Some funds participate in a collateral program that calls for the funds to either receive or pledge highly liquid assets, such as cash or U.S. government securities, as collateral due to securities lending and/or their use of futures contracts, forward currency contracts, interest rate swaps, credit default swaps and/or future delivery contracts. For securities lending, each participating fund receives collateral in exchange for lending investment securities. The purpose of the collateral is to cover potential losses that could occur in the event that the borrower cannot meet its contractual obligation. The lending agent may reinvest collateral from securities lending transactions according to agreed parameters. For futures contracts, interest rate swaps and credit default swaps, the program calls for each participating fund to pledge collateral for initial and variation margin by contract. For forward currency contracts, the program calls for each participating fund to either receive or pledge collateral based on the net gain or loss on unsettled forward currency contracts by certain counterparties. The purpose of the collateral is to cover potential losses that could occur in the event that either party cannot meet its contractual obligation. Non-cash collateral pledged by each participating fund, if any, is disclosed in each fund's investment portfolio, and cash collateral pledged by each participating fund, if any, is held in a segregated account with the fund's custodian, which is reflected as pledged cash in each fund's statement of assets and liabilities.

Rights of offset — Funds that hold forward currency contracts have enforceable master netting agreements with certain counterparties, where amounts payable by each party to the other in the same currency (with the same settlement date and with the same counter-party) are settled net of each party's payment obligation. If an early termination date occurs under these agreements following an event of default or termination event, all obligations of each party to its counterparty are settled net through a single payment in a single currency ("closeout netting"). For financial reporting purposes, the funds do not offset financial assets and financial liabilities that are subject to these master netting arrangements in the statements of assets and liabilities.

The following tables present each fund's forward currency contracts by counterparty that are subject to master netting agreements but that are not offset in the funds' statements of assets and liabilities. The net amount column shows the impact of offsetting on the funds' statement of assets and liabilities as of December 31, 2018, if close-out netting was exercised (dollars in thousands):

Gross amounts not offset in the

6. Taxation and distributions

Federal income taxation — Each fund complies with the requirements under Subchapter M of the Internal Revenue Code applicable to mutual funds and intends to distribute substantially all of its net taxable income and net capital gains each year. The funds are not subject to income taxes to the extent such distributions are made. Therefore, no federal income tax provision is required.

As of and during the period ended December 31, 2018, none of the funds had a liability for any unrecognized tax benefits. Each fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in their respective statements of operations. During the period, none of the funds incurred any significant interest or penalties.

Each fund's tax returns are not subject to examination by federal, state and, if applicable, non-U.S. tax authorities after the expiration of each jurisdiction's statute of limitations, which is generally three years after the date of filing but can be extended in certain jurisdictions.

Non-U.S. taxaation — Dividend and interest income, if any, are recorded net of non-U.S. taxes paid. The funds may file withholding tax reclaims in certain jurisdictions to recover a portion of amounts previously withheld. As a result of rulings from European courts, the funds filed for additional reclaims related to prior years. These reclaims are recorded when the amount is known and there are no significant uncertainties on collectability. Gains realized by the funds on the sale of securities in certain countries, if any, may be subject to non-U.S. taxes. If applicable, the funds record an estimated deferred tax liability based on unrealized gains to provide for potential non-U.S. taxes payable upon the sale of these securities.

Distributions — Distributions paid to shareholders are based on each fund's net investment income and net realized gains determined on a tax basis, which may differ from net investment income and net realized gains for financial reporting purposes. These differences are due primarily to different treatment for items such as currency gains and losses; short-term capital gains and losses; capital losses related to sales of certain securities within 30 days of purchase; unrealized appreciation of certain investments in securities outside the U.S.; deferred expenses; cost of investments sold; paydowns on fixed-income securities; net capital losses; non-U.S. taxes on capital gains, amortization of premiums and discounts and income on certain investments. The fiscal year in which amounts are distributed may differ from the year in which the net investment income and net realized gains are recorded by the funds for financial reporting purposes.

Non-cash collateral is shown on a settlement basis.

Additional tax basis disclosures for each fund as of December 31, 2018, were as follows (dollars in thousands):

 Amount less than one thousand.

American Funds Insurance Series

7. Fees and transactions

CRMC, the series' investment adviser, is the parent company of American Funds Distributors, Inc. ("AFD"), the distributor of the series' shares, and American Funds Service Company ("AFS"), the series' transfer agent. CRMC, AFD and AFS are considered related parties to the series.

Investment advisory services — The series has an investment advisory and service agreement with CRMC that provides for monthly fees accrued daily. These fees are based on annual rates that generally decrease as net asset levels increase. CRMC receives investment advisory fees from the underlying funds held by the managed risk funds. These fees are included in the net effective expense ratios that are provided as additional information in the financial highlights tables. Subadvisory fees for the managed risk funds are paid by CRMC to Milliman FRM. The managed risk funds are not responsible for paying any subadvisory fees.

Investment advisory services waivers — On December 4, 2017, the series board of trustees approved amended agreements effective February 1, 2018, decreasing the annual rate to 0.580% on daily net assets in excess of \$4 billion for New World Fund, decreasing the annual rate to 0.350% on daily net assets in excess of \$10.5 billion for Blue Chip Income and Growth Fund, and decreasing the annual rate to 0.320% on daily net assets in excess of \$13 billion for Bond Fund. During the year ended December 31, 2018, CRMC voluntarily reduced the investment advisory services fees to a proposed rate of 0.500% on daily net assets in excess of \$1.5 billion for International Growth and Income Fund and a proposed rate of 0.450% and 0.410% on daily net assets in excess of \$600 million and \$1 billion, respectively, for Capital Income Builder. CRMC is also waiving a portion of its investment advisory services fees for each of the managed risk funds. Investment advisory services fees are presented in each fund's statement of operations gross of the waivers from CRMC. For the year ended December 31, 2018, total investment advisory services fees waived by CRMC were \$2,789,000.

The range of rates, net asset levels and the current annualized rates of average daily net assets for each fund before and after any investment advisory services waivers (if applicable), are as follows:

Distribution services — The series has plans of distribution for all share classes except Class 1. Under the plans, the board of trustees approves certain categories of expenses that are used to finance activities primarily intended to sell fund shares. The plans provide for payments to pay service fees to firms that have entered into agreements with the series. These payments, based on an annualized percentage of average daily net assets, range from 0.18% to 0.50% as noted in the table below. In some cases, the board of trustees has limited the amounts that may be paid to less than the maximum allowed by the plans.

Share class	Currently approved limits	Plan limits
Class 1A	0.00%	0.25%
Class 2	0.25	0.25
Class 3	0.18	0.18
Class 4	0.25	0.25
Class P1	0.00	0.25
Class P2	0.25	0.50

Insurance administrative services — The series has an insurance administrative services plan for Class 1A, 4, P1 and P2 shares. Under the plan, these share classes pay 0.25% of each insurance company's respective average daily net assets in each share class to compensate the insurance companies for services provided to their separate accounts and contractholders for which the shares of the fund are beneficially owned as underlying investments of such contractholders' annuities. These services include, but are not limited to, maintenance, shareholder communications and transactional services. The insurance companies are not related parties to the series.

Transfer agent services — The series has a shareholder services agreement with AFS under which the funds compensate AFS for providing transfer agent services to all of the funds' share classes. These services include recordkeeping, shareholder communications and transaction processing. In addition, the managed risk funds reimburse AFS for amounts paid to third parties for performing transfer agent services on behalf of fund shareholders.

Administrative services — The series has an administrative services agreement with CRMC under which each fund compensates CRMC for providing administrative services to all of the funds' share classes except Class P1 and P2 shares. Administrative services are provided by CRMC to help assist third parties providing non-distribution services to fund shareholders. These services include providing in depth information on each fund and market developments that impact fund investors. Administrative services also include, but are not limited to, coordinating, monitoring and overseeing third parties that provide services to fund shareholders. The agreement between the series and CRMC provides each fund, other than the managed risk funds, the ability to charge an administrative services fee of 0.05% of average daily net assets for all share classes. Currently all share classes pay an annual fee of 0.01% of average daily net assets (which could be increased as noted above). For the managed risk funds, CRMC receives administrative services fees of 0.01% of average daily net assets from Class 1 shares of the underlying funds for administrative services provided to the series.

Accounting and administrative services — The managed risk funds have a subadministration agreement with BNY Mellon under which the fund compensates BNY Mellon for providing accounting and administrative services to each of the managed risk funds' share classes. These services include, but are not limited to, fund accounting (including calculation of net asset value), financial reporting and tax services. BNY Mellon is not a related party to the managed risk funds.

Class-specific expenses under the agreements described above were as follows (dollars in thousands):

4,153 6,862 **11,015**

6,862 **6,862** Trustees' deferred compensation — Trustees who are unaffiliated with CRMC may elect to defer the cash payment of part or all of their compensation. These deferred amounts, which remain as liabilities of the funds, are treated as if invested in one or more of the American Funds. These amounts represent general, unsecured liabilities of the funds and vary according to the total returns of the selected funds. Trustees' compensation, shown on the accompanying financial statements, reflects current fees (either paid in cash or deferred) and a net increase in the value of the deferred amounts as follows (dollars in thousands):

		Increase in value of	Total trustees'

Amount less than one thousand.

Affiliated officers and trustees — Officers and certain trustees of the series are or may be considered to be affiliated with CRMC, AFD and AFS. No affiliated officers or trustees received any compensation directly from any fund in the series.

Other expenses — The amounts of \$(18,000), \$(9,000) and \$(1,637,000) for other expenses for Managed Risk International Fund, Managed Risk Growth-Income Fund and Managed Risk Asset Allocation Fund, respectively, are due to over accruals of prior year expenses.

Security transactions with related funds — The funds may purchase from, or sell securities to, other CRMC-managed funds (or funds managed by certain affiliates of CRMC) under procedures adopted by the fund's board of trustees. The funds involved in such transactions are considered related by virtue of having a common investment adviser (or affiliated investment advisers), common trustees and/or common officers. When such transactions occur, each transaction is executed at the current market price of the security and no brokerage commissions or fees are paid in accordance with Rule 17a-7 of the 1940 Act.

The following table presents purchase and sale transactions between each fund and related funds as of December 31, 2018 (dollars in thousands):

Fund	Purchases	Sales

8. Committed line of credit

Global Small Capitalization Fund, New World Fund and High-Income Bond Fund participate with other funds managed by CRMC in a \$1.5 billion credit facility (the "line of credit") to be utilized for temporary purposes to fund shareholder redemptions. Each fund has agreed to pay commitment fees on its pro-rata portion of the line of credit, which are reflected in other expenses in each fund's statement of operations. None of the funds borrowed on this line of credit at any time during the year ended December 31, 2018.

9. Capital share transactions

Capital share transactions in the funds were as follows (dollars and shares in thousands):

- Based on average shares outstanding.
- For the year ended December 31, 2014, reflects the impact of a corporate action event that resulted in a one-time increase to net investment income. If the corporate action event had not occurred, the net investment income per share and ratio of net income to average net assets would have been lower for all share classes.
- Based on operations for a period that is less than a full year.
- ⁴ Class 1A shares began investment operations on January 6, 2017.
- 5 Not annualized.
- Annualized.
- 7 Amount less than \$1 million.
- 8 Amount less than \$.01.
- 9 Amount less than .01%.
- ¹⁰ For the period May 1, 2014, commencement of operations, through December 31, 2014.
- All or a significant portion of assets in this class consisted of seed capital invested by CRMC and/or its affiliates. Certain fees (including, where applicable, fees for distribution services) are not charged or accrued on these seed capital assets. If such fees were paid by the fund on seed capital assets, fund expenses would have been higher and net income and total return would have been lower.
- 12 On May 1, 2016, the fund converted from a cash fund to an ultra-short-term bond fund and changed its name from Cash Management Fund to Ultra-Short Bond Fund.
- 13 This column reflects the impact of certain waivers/reimbursements by CRMC. CRMC waived a portion of investment advisory services and reimbursed a portion of miscellaneous fees and expenses for the managed risk funds.
- This column reflects the net effective expense ratios for each fund and class, which are unaudited. These ratios include each class's expense ratio combined with the weighted average net expense ratio of the underlying funds for the periods presented. See expense example for further information regarding fees and expenses.
- ¹⁵ Refer to Note 5 for further information on mortgage dollar rolls.

¹⁶ Amount is either less than 1% or there is no turnover.

Report of Independent Registered Public Accounting Firm

To the Board of Trustees of American Funds Insurance Series and Shareholders of Global Growth Fund, Global Small Capitalization Fund, Growth Fund, International Fund, New World Fund®, Blue Chip Income and Growth Fund, Global Growth and Income Fund, Growth-Income Fund, International Growth and Income Fund, Capital Income Builder®, Asset Allocation Fund, Global Balanced Fund, Bond Fund, Global Bond Fund, High-Income Bond Fund, Mortgage Fund, Ultra-Short Bond Fund, U.S. Government/AAA-Rated Securities Fund, Managed Risk Growth Fund, Managed Risk International Fund, Managed Risk Blue Chip Income and Growth Fund, Managed Risk Growth-Income Fund and Managed Risk Asset Allocation Fund

Opinions on the Financial Statements

We have audited the accompanying statements of assets and liabilities, including summary investment portfolios of Global Growth Fund, Global Small Capitalization Fund, Growth Fund, International Fund, New World Fund®, Blue Chip Income and Growth Fund, Global Growth and Income Fund, Growth-Income Fund, International Growth and Income Fund, Capital Income Builder®, Asset Allocation Fund, Global Balanced Fund, Bond Fund, High-Income Bond Fund, Mortgage Fund and U.S. Government/AAA-Rated Securities Fund and investment portfolios of Ultra-Short Bond Fund, Managed Risk International Fund, Managed Risk Blue Chip Income and Growth Fund, Managed Risk Growth-Income Fund and Managed Risk Asset Allocation Fund, (twenty-three of the funds constituting American Funds Insurance Series, hereafter collectively referred to as the "Funds") as of December 31, 2018, the related statements of operations for the year ended December 31, 2018, the statements of changes in net assets for each of the two years in the period ended December 31, 2018, including the related notes, and the financial highlights for each of the Funds as of December 31, 2018, the results of each of their operations for the year then ended, the changes in each of their operations for the period ended December 31, 2018 and each of the financial highlights for each of the periods indicated therein in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinions

These financial statements are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2018 by correspondence with the custodians, transfer agent and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

/s/PricewaterhouseCoopers LLP

Los Angeles, California February 12, 2019

We have served as the auditor of one or more investment companies in The Capital Group Companies Investment Company Complex since 1934.
