## Pioneer Variable Contracts Trust

## **Pioneer Bond**

## **VCT Portfolio**

Class I and II Shares

Annual Report | December 31, 2020

Paper copies of the Portfolio's shareholder reports may no longer be sent by mail, unless you specifically request paper copies of the reports from the insurance company that offers your variable annuity or variable life insurance contract, or from your financial intermediary. Instead, the insurance company may choose to make the reports available on a website, and will notify you by mail each time a shareholder report is posted and provide you with a website link to access the report. Instructions for requesting paper copies will be provided by your insurance company.

You may elect to receive all future Portfolio shareholder reports in paper form, free of charge, from the insurance company. You can inform the insurance company or your financial intermediary that you wish to continue receiving paper copies of your shareholder reports by following the instructions provided by the insurance company, or by contacting your financial intermediary. Your election to receive reports in paper form will apply to all portfolios available under your contract with the insurance company.

Please refer to your contract prospectus to determine the applicable share class offered under your contract.

### Portfolio Update 12/31/20

#### **Portfolio Diversification**

(As a percentage of total investments)\*

<sup>†</sup> Amount rounds to less than 0.1%.

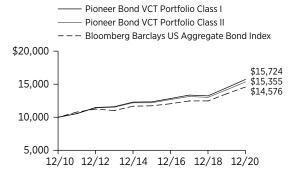

### Performance Update 12/31/20

#### **Prices and Distributions**

Net Asset Value per Share		<b>12/31/20</b>	<b>12/31/19</b>
Class I		\$11.78	\$11.17
Class II		\$11.80	\$11.19
Distributions per Share (1/1/20 - 12/31/20) Class I Class II	Net Investment Income \$0.3430 \$0.3155	Short-Term Capital Gains \$ — \$ —	Long-Term Capital Gains \$ — \$ —

### Performance of a \$10,000 Investment

The following chart shows the change in value of an investment made in Class I and Class II shares of Pioneer Bond VCT Portfolio at net asset value during the periods shown, compared to that of the Bloomberg Barclays US Aggregate Bond Index. Portfolio returns are based on net asset value and do not reflect any applicable insurance fees or surrender charges.

The Bloomberg Barclays US Aggregate Bond Index is an unmanaged, market value-weighted measure of Treasury and agency issues, corporate bond issues and mortgage-backed securities. Index returns are calculated monthly, assume reinvestment of dividends and, unlike Portfolio returns, do not reflect any fees, expenses or sales charges. It is not possible to invest directly in an index.

### **Average Annual Total Returns**

(As of December 31, 2020)

	Class I	Class II	US Aggregate Bond Index
10 Years	4.63%	4.38%	3.84%
5 Years	4.98%	4.71%	4.44%
1 Year	8.70%	8.42%	7.51%

All total returns shown assume reinvestment of distributions at net asset value.

The performance table does not reflect the deduction of taxes that a shareowner would pay on distributions or the redemption of shares.

### **5 Largest Holdings**

(As a percentage of total investments)\*

	1.	U.S. Treasury Bills, 1/26/21	5.16%
	2.	U.S. Treasury Note, 0.125%, 10/31/22	3.83
	3.	Fannie Mae, 3.0%, 1/1/51 (TBA)	1.96
4	4.	Fannie Mae, 2.0%, 1/1/51	1.95
ļ	5.	Fannie Mae, 4.5%, 1/1/51 (TBA)	1.88

- Excludes temporary cash investments and all derivative contracts except for options purchased. The Portfolio is actively managed, and current holdings may be different. The holdings listed should not be considered recommendations to buy or sell any securities.
- (j) Pioneer ILS Interval Fund is an affiliated closedend fund managed by Amundi Asset Management US, Inc. (the "Adviser").

Call 1-800-688-9915 or visit www.amundi.com/us for the most recent month-end performance results. Current performance may be lower or higher than the performance data quoted.

The performance data quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost.

The returns for the Portfolio do not reflect the deduction of expenses associated with variable products, such as mortality and expense risk charges, separate account charges, and sales charges. These expenses would reduce the overall returns shown.

Performance results reflect any applicable expense waivers in effect during the periods shown. Without such waivers, performance would be lower. Waivers may not be in effect for all portfolios. Certain fee waivers are contractual through a specified period. Otherwise, fee waivers can be rescinded at any time. See the prospectus and financial statements for more information.

### **Comparing Ongoing Portfolio Expenses**

As a shareowner in the Portfolio, you incur two types of costs:

- (1) ongoing costs, including management fees, distribution and/or service (12b-1) fees, and other Portfolio expenses; and
- (2) transaction costs, including sales charges (loads) on purchase payments.

This example is intended to help you understand your ongoing expenses (in dollars) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds offered through your variable annuity contract. The example is based on an investment of \$1,000 at the beginning of the Portfolio's latest six-month period and held throughout the six months.

### **Using the Tables**

### **Actual Expenses**

The first table below provides information about actual account values and actual expenses. You may use the information in this table, together with the amount you invested, to estimate the expenses that you paid over the period as follows:

- 1. Divide your account value by \$1,000 Example: an \$8,600 account value ÷ \$1,000 = 8.6
- 2. Multiply the result in (1) above by the corresponding share class's number in the third row under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

### Expenses Paid on a \$1,000 Investment in Pioneer Bond VCT Portfolio

Based on actual returns from July 1, 2020 through December 31, 2020.

Share Class	I	II
Beginning Account Value on 7/1/20	\$1,000.00	\$1,000.00
Ending Account Value on 12/31/20	\$1,058.94	\$1,056.62
Expenses Paid During Period*	\$3.05	\$4.34

<sup>\*</sup> Expenses are equal to the Portfolio's annualized net expense ratio of 0.59% and 0.84% for Class I and Class II shares, respectively, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

### Hypothetical Example for Comparison Purposes

The table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

You may use this information to compare the ongoing costs of investing in the Portfolio and other variable annuities. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other variable annuities.

Please note that the expenses shown in the tables are meant to highlight your ongoing costs only and do not reflect any transaction costs, such as sales charges (loads) that are charged at the time of the transaction. Therefore, the table below is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different variable annuities. In addition, if these transaction costs were included, your costs would have been higher.

### Expenses Paid on a \$1,000 Investment in Pioneer Bond VCT Portfolio

Based on a hypothetical 5% per year return before expenses, reflecting the period from July 1, 2020 through December 31, 2020.

Share Class	1	II
Beginning Account Value on 7/1/20	\$1,000.00	\$1,000.00
Ending Account Value on 12/31/20	\$1,022.17	\$1,020.91
Expenses Paid During Period*	\$3.00	\$4.27

<sup>\*</sup> Expenses are equal to the Portfolio's annualized net expense ratio of 0.59% and 0.84% for Class I and Class II shares, respectively, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

### Portfolio Management Discussion 12/31/20

Call 1-800-688-9915 or visit www.amundi.com/us for the most recent month-end performance results. Current performance may be lower or higher than the performance data quoted.

The performance data quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost.

The returns for the Portfolio do not reflect the deduction of expenses associated with variable products, such as mortality and expense risk charges, separate account charges, and sales charges. These expenses would reduce the overall returns shown.

Performance results reflect any applicable expense waivers in effect during the periods shown. Without such waivers, performance would be lower. Waivers may not be in effect for all portfolios. Certain fee waivers are contractual through a specified period. Otherwise, fee waivers can be rescinded at any time. See the prospectus and financial statements for more information.

In the following interview, Brad Komenda discusses the factors that affected the performance of Pioneer Bond VCT Portfolio during the 12-month period ended December 31, 2020. Mr. Komenda, Senior Vice President, Deputy Director of Investment Grade Corporates, and a portfolio manager at Amundi Asset Management US, Inc. (Amundi US), is responsible for the daily management of the Portfolio, along with Kenneth J. Taubes, Executive Vice President and Chief Investment Officer, US, and a portfolio manager at Amundi US, and Timothy Rowe, Managing Director, Director of Multisector Fixed Income, and a portfolio manager at Amundi US.

## Q: How did the Portfolio perform during the 12-month period ended December 31, 2020?

**A:** Pioneer Bond VCT Portfolio's Class I shares returned 8.70% at net asset value during the 12-month period ended December 31, 2020, and Class II shares returned 8.42%, while the Portfolio's benchmark, the Bloomberg Barclays US Aggregate Bond Index (the Bloomberg Barclays Index), returned 7.51%.

## Q: How would you describe the investment environment in the fixed-income markets during the 12-month period?

A: After a benign opening to the 2020 calendar year, credit-sensitive fixed-income markets experienced a historic disruption in March, as the emergence of the COVID-19 virus and the related lockdown policies implemented to help curb its spread all but shuttered the global economy. Investors fled riskier assets on a broad scale and moved into so-called "safe havens" such as US Treasuries, which had the effect of driving Treasury yields to all-time lows. Significant selling in US dollar (USD) fixed-income markets eventually stressed market functionality and led to price dislocations in all segments, even Treasury bonds. As the "liquidity grab" by investors gathered pace in mid-March, historical asset-class return relationships broke down and performance became almost entirely correlated. (Correlation is defined as the degree to which assets or asset-class prices have moved in relation to one another. Correlation ranges from -1, always moving in opposite directions; through 0, absolutely independent; to 1, always moving together.)

The liquidity stress was greatest in the securitized credit sectors of non-agency mortgage-backed securities (MBS), asset-backed securities (ABS), and commercial MBS (CMBS), which have traditionally had a narrower buyer base than corporate bonds. Those markets faced forced selling by real estate investment trusts (REITs) and other leveraged investors, and by certain mutual funds, as concerns escalated over the impact of the pandemic on the US employment situation and on the ability of homeowners and businesses to service their mortgages.

The policy response to the market and economic turmoil from both central banks and government authorities was swift, as they sought to keep businesses and consumers from going under. The US Federal Reserve (Fed) slashed the target range of the benchmark federal funds rate to zero in mid-March, resurrected its 2008/2009 financial crisis-era lending facilities,

and launched a wide-ranging bond-purchase program. On the fiscal side, the US Congress and the White House agreed upon a \$2.2 trillion stimulus package in late March, and later approved additional aid packages in the second quarter.

The extraordinary support from policy makers in the wake of the pandemic had a positive effect on the markets in the second quarter. Investor optimism rose on the prospects that steps taken towards re-opening the economy could support something resembling a "V-shaped" recovery (that is, a swift, sharp rise). The result was a revival of sentiment towards the riskier assets that the market had been so quick to shun at the height of the pandemic crisis. The shift in investors' appetites allowed credit-sensitive areas of the bond market to recover much of their earlier losses over April and May. June saw the return of some market volatility as well as a widening in credit spreads as COVID-19 cases surged in a few states that had re-opened earlier than others, reigniting shutdown concerns. (Credit spreads are commonly defined as the differences in yield between Treasuries and other types of fixed-income securities with similar maturities.)

After simmering throughout the summer, macroeconomic uncertainty bubbled over during September, weighing on investor sentiment and the performance of riskier assets. The focus on heightened risks revolved around three key areas: stalled negotiations among law makers over another US fiscal stimulus package, a continued rise in COVID-19 cases, and the November US elections. A partisan dispute over when to appoint the late Supreme Court Justice Ginsburg's replacement further hardened both parties' negotiating positions on the fiscal stimulus bill, and lowered the odds of broader government support for the economy coming to fruition prior to the November election. At the same time, a notable uptick in European COVID-19 cases reignited fears that the US remained at risk for a second wave of virus cases, and yet another round of economic lockdowns in response. Finally, concerns mounted over the potential for a protracted dispute over the presidential election results as November 3rd drew closer.

In December, towards the end of the 12-month period, the US economic outlook received two "shots in the arm," as a pair of COVID-19 vaccines were authorized for emergency use by the Food and Drug Administration, and Congress finally agreed upon a \$900 billion COVID-19 relief package. The vaccines could help alleviate uncertainty regarding public health in general, and may bring forward the timing of a return to economic normalcy. Meanwhile, the additional fiscal stimulus could offer needed support for many individuals and businesses. Over the final weeks of the 12-month period, investors elected to focus attention on those positive developments and looked beyond another surge in COVID-19 cases as well as data suggesting a slowing in the rate of the economic recovery. As a result, riskier assets rallied once again, and Treasury yields drifted higher into the end of the calendar year.

### Portfolio Management Discussion 12/31/20 (continued)

For the 12-month period ended December 31, 2020, the investment-grade corporate bond market returned almost 10%, while high-yield corporate bonds returned more than 7%. Long-term Treasuries provided strong positive returns as well, given the steep decline in yields seen over the first quarter of 2020. Securitized assets ended the period in positive territory, too, but lagged the performance of both investment-grade corporates and Treasuries.

## Q: What factors influenced the Portfolio's performance relative to the benchmark Bloomberg Barclays Index during the 12-month period?

**A:** The Portfolio's outperformance relative to the benchmark for the 12-month period derived from both security selection and asset allocation results. Meanwhile, the Portfolio's duration-positioning was the main detractor from relative returns. (Duration is a measure of the sensitivity of the price, or the value of principal, of a fixed-income investment to a change in interest rates, expressed as a number of years.)

Positive contributions to benchmark-relative returns were led by the Portfolio's positioning with respect to corporate bonds, most notably security selection within the industrials sector. In the aftermath of the first quarter's liquidity crisis, we took the opportunity to add to the Portfolio's exposure to high-quality industrial names at discounted prices, and that decision aided the Portfolio's performance when investors' sentiment towards riskier assets improved during the second quarter, with the aid of strong policy support from the Fed and the US government. In addition, security selection results in financials as well as an overweight to the sector contributed notably to positive benchmark-relative performance. In the securitized sectors, positive contributions to the Portfolio's relative performance were led by positioning in agency MBS, where we were able to identify security selection opportunities created by the Fed's broad-based purchases within the asset class in its effort to drive down borrowing costs.

Duration positioning was the most significant detractor from the Portfolio's benchmark-relative performance for the 12-month period. We had entered 2020 with the Portfolio positioned for economic recovery, with a below-benchmark overall duration and corresponding sensitivity to interest-rate changes. The Portfolio's duration stance constrained relative performance as the emergence of COVID-19 derailed the economic outlook.

An overweight to CMBS weighed on the Portfolio's relative returns during the 12-month period. In particular, market sentiment towards multi-property "conduit" deals, which include exposure to segments of the economy impacted by the pandemic (such as hotels and strip malls), declined. The Portfolio's allocation to conduit deals is primarily to senior tranches within the sector and, ultimately, we do not believe the holdings will impair performance, despite the transient volatility of the assets. Selection results within ABS were another detractor from benchmark-relative returns, as we have generally focused on using research to help uncover opportunities in credits within the sector that we think could be less well-understood by the broader market. Those types of investments have tended to be less liquid.

# Q:Did the Portfolio have any investments in derivative securities during the 12-month period ended December 31, 2020? If so, did the derivatives have any material impact on performance?

**A:** Yes, we invested the Portfolio in Treasury futures and credit-default swaps during the 12-month period. We invest in Treasury futures as part of our duration-management strategy for the Portfolio. We believe the use of Treasury futures allows us to express our views on duration and yield-curve positioning in the most efficient manner. We invest in credit-default swaps to either gain or reduce Portfolio exposure to corporate bonds very quickly, as cash-bond transactions take a little more time to settle and have a higher liquidity cost.

The use of derivatives has allowed the Portfolio to benefit from the performance of the targeted asset classes, while retaining a better liquidity profile, which in turn may help to reduce risk. Treasury futures generally have not had an impact on the Portfolio's performance, as we have used them primarily for hedging purposes. The credit-based derivatives had a modest effect on the Portfolio's performance during the 12-month period.

## Q: What factors affected the Portfolio's yield, or distributions\* to shareholders, during the 12-month period?

**A:** The sharp decline in Treasury yields weighed on the Portfolio's yield during the 12-month period.

## Q: What is your investment outlook and how is the Portfolio positioned heading into a new fiscal year?

**A:** We anticipate accelerating domestic economic growth in 2021 as COVID-19 vaccines are rolled out and consumers slowly regain confidence and reopen their pocketbooks, potentially unleashing a wave of pent-up demand for services such as travel and dining during the second half of the calendar year.

Despite this outlook, we do not expect the Fed to start removing its accommodative monetary policies in 2021, as it has signaled an intense focus on getting the US economy back to full employment. In our view, the Fed has learned from its policy mistakes in 2018 and could be willing to maintain a highly supportive monetary policy environment, even if inflation ticks up above the US central bank's target rate.

Entering 2021, we have maintained the Portfolio's conservative positioning with respect to interest-rate risk, with a duration below that of the benchmark Bloomberg Barclays Index. While an accommodative Fed can anchor short-term US yields, we believe the Treasury curve could steepen as domestic economic growth accelerates (and prices rise) over the next year. At the same time, very low government bond yields globally may limit the extent of any increase in long-term US yields.

<sup>\*</sup>Distributions are not guaranteed.

### Portfolio Management Discussion 12/31/20 (continued)

#### A Word About Risk:

All investments are subject to risk. including the possible loss of principal. In the past several years, financial markets have experienced increased volatility and heightened uncertainty. The market prices of securities may go up or down, sometimes rapidly or unpredictably, due to general market conditions, such as real or perceived adverse economic, political, or regulatory conditions, recessions, inflation, changes in interest or currency rates, lack of liquidity in the bond markets, the spread of infectious illness or other public health issues or adverse investor sentiment. These conditions may continue, recur, worsen or spread.

When interest rates rise, the prices of fixed- income securities in the Portfolio will generally fall. Conversely, when interest rates fall, the prices of fixed-income securities in the Portfolio will generally rise.

Investments in the Portfolio are subject to possible loss due to the financial failure of the issuers of the underlying securities and their inability to meet their debt obligations.

Prepayment risk is the chance that an issuer may exercise its right to prepay its security, if falling interest rates prompt the issuer to do so. Forced to reinvest the unanticipated proceeds at lower interest rates, the Portfolio would experience a decline in income and lose the opportunity for additional price appreciation.

Investments in high-yield or lower-rated securities are subject to greater-than-average price volatility, illiquidity and possibility of default.

The securities issued by U.S. Governmentsponsored entities (i.e., FNMA, Freddie Mac) are neither guaranteed nor issued by the U.S. Government.

The Portfolio may invest in mortgagebacked securities, which during times of fluctuating interest rates may increase or decrease more than other fixed-income securities. Mortgage-backed securities are also subject to prepayments.

At times, the Portfolio's investments may represent industries or industry sectors that are interrelated or have common risks, making the Portfolio more susceptible to any economic, political, or regulatory developments or other risks affecting those industries and sectors.

These risks may increase share price volatility.

The Portfolio's positioning has continued to reflect our constructive overall view on credit-based exposures. However, we trimmed the Portfolio's risk profile as most sectors rallied into year-end. We have maintained a positive outlook for sectors where valuations are still below their pre-pandemic levels and have remained disconnected from the underlying fundamentals, in our view. A backdrop of strong economic growth, accommodative monetary policies, and continued global demand for yield has continued to lend support to the corporate bond market. However, we believe current spreads have broadly reflected those expectations, and thus have continued to highlight the importance of security selection.

We view US housing-related securitized assets as positioned to benefit from solid consumer balance sheets, historically low mortgage rates, tight inventories, and strong demand, driven in part by a pandemic-induced shift in preference toward single-family homes.

While broad exposure to credit risk was a large positive contributor to the Portfolio's relative returns during 2020, we believe active security selection and sector allocation could be essential ingredients to attaining solid performance in the coming year.

Please refer to the Schedule of Investments on pages 9 to 34 for a full listing of Portfolio securities.

Past performance is no guarantee of future results.

Any information in this shareholder report regarding market or economic trends or the factors influencing the Portfolio's historical or future performance are statements of opinion as of the date of this report.

* Senior secured floating rate loan interests in which the Portfolio invests generally pay interest at rates that are periodically redetermined by reference to a base lending rate plus a premium. These base lending rates are generally (i) the lending rate offered by one or more major European banks, such as LIBOR, (ii) the prime rate offered by one or more major United States banks, (iii) the rate of a certificate of deposit or (iv) other base lending rates used by commercial lenders. The interest rate shown is the rate accruing at December 31, 2020.

#### CENTRALLY CLEARED CREDIT DEFAULT SWAP CONTRACT - SELL PROTECTION

Notional Amount (\$) <sup>(1)</sup>	Reference Obligation/Index	Pay/ Receive <sup>(2)</sup>	Annual Fixed Rate	Expiration Date	Premiums (Received)	Unrealized Appreciation	Market Value
490,000	Markit CDX North America High Yield Series 35	Receive	5.00%	12/20/25	\$(136)	\$46,650	\$46,514
TOTAL SWAP CONTRACT					\$(136)	\$46,650	\$46,514

<sup>(1)</sup> The notional amount is the maximum amount that a seller of credit protection would be obligated to pay upon occurrence of a credit event.

Purchases and sales of securities (excluding temporary cash investments) for the year ended December 31, 2020 were as follows:

	Purchases	Sales
Long-Term U.S. Government Securities	\$22,209,586	\$37,685,727
Other Long-Term Securities	\$79.378.307	\$95.470.372

The Portfolio is permitted to engage in purchase and sale transactions ("cross trades") with certain funds and accounts for which the Adviser serves as the Portfolio's investment adviser, as set forth in Rule 17a-7 under the Investment Company Act of 1940, pursuant to procedures adopted by the Board of Trustees. Under these procedures, cross trades are effected at current market prices. During the year ended December 31, 2020, the Portfolio engaged in sales of \$18,921 which resulted in a net realized gain/(loss) of \$1,069. During the year ended December 31, 2020, the Portfolio did not engage in purchases pursuant to these procedures.

At December 31, 2020, the net unrealized appreciation on investments based on cost for federal tax purposes of \$185,191,172 was as follows:

Aggregate gross unrealized appreciation for all investments in which there is an excess of value over tax cost

Aggregate gross unrealized depreciation for all investments in which there is an excess of tax cost over value

(1,534,448)

Net unrealized appreciation

\$8,501,323

Various inputs are used in determining the value of the Portfolio's investments. These inputs are summarized in the three broad levels below.

Level 1 - unadjusted quoted prices in active markets for identical securities.

Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risks, etc.). See Notes to Financial Statements — Note 1A.

Level 3 – significant unobservable inputs (including the Portfolio's own assumptions in determining fair value of investments). See Notes to Financial Statements — Note 1A.

<sup>(2)</sup> Receive quarterly.

The following is a summary of the inputs used as of December 31, 2020, in valuing the Portfolio's investments:

	Level 1	Level 2	Level 3	Total
Common Stock	\$ 14,154	\$ -	\$ -	\$ 14,154
Convertible Preferred Stocks	2,737,133	_	_	2,737,133
Asset Backed Securities	_	18,774,345	_	18,774,345
Collateralized Mortgage Obligations	_	23,995,438	_	23,995,438
Commercial Mortgage-Backed Securities	_	11,510,109	_	11,510,109
Corporate Bonds	_	65,226,291	_	65,226,291
Foreign Government Bonds	_	1,237,374	_	1,237,374
Insurance-Linked Securities				
Reinsurance Sidecars				
Multiperil - Worldwide	_	_	2,290	2,290
Municipal Bonds	_	65,864	_	65,864
Senior Secured Floating Rate Loan Interests	_	2,185,356	_	2,185,356
U.S. Government and Agency Obligations	_	65,251,334	_	65,251,334
Affiliated Closed-End Fund		2,728,793	_	2,728,793
Total Investments in Securities	\$2,751,287	\$190,974,904	\$2,290	\$193,728,481
Other Financial Instruments				
Net unrealized depreciation on futures contracts	\$ (82,500)	\$ -	\$ -	\$ (82,500)
Swap contracts, at value		46,514	_	46,514
Total Other Financial Instruments	\$ (82,500)	\$ 46,514	\$ -	\$ (35,986)

The following is a reconciliation of assets valued using significant unobservable inputs (Level 3):

	Insurance- Linked Securities
Balance as of 12/31/19	\$ 27,503
Realized gain (loss) <sup>(1)</sup>	_
Change in unrealized appreciation (depreciation) <sup>(2)</sup>	(789)
Accrued discounts/premiums	_
Purchases	_
Sales	(24,424)
Transfers in to Level 3*	_
Transfers out of Level 3*	
Balance as of 12/31/20	\$ 2,290

<sup>(1)</sup> Realized gain (loss) on these securities is included in net realized gain (loss) on investments in the Statement of Operations.

Net change in unrealized appreciation (depreciation) of Level 3 investments still held and considered Level 3 at December 31, 2020: \$ (789)

<sup>(2)</sup> Unrealized appreciation (depreciation) on these securities is included in change in net unrealized appreciation (depreciation) on investments in the Statement of Operations.

<sup>\*</sup> Transfers are calculated on the beginning of period value. For the year ended December 31, 2020, there were no transfers in or out of Level 3.

# Notes to Financial Statements 12/31/20

#### 1. Organization and Significant Accounting Policies

Pioneer Bond VCT Portfolio (the "Portfolio") is one of 8 portfolios comprising Pioneer Variable Contracts Trust (the "Trust"), a Delaware statutory trust. The Portfolio is registered under the Investment Company Act of 1940 as a diversified, open-end management investment company. The Portfolio seeks current income and total return.

The Portfolio offers two classes of shares designated as Class I and Class II shares. Each class of shares represents an interest in the same portfolio of investments of the Portfolio and has identical rights (based on relative net asset values) to assets and liquidation proceeds. Share classes can bear different rates of class-specific fees and expenses, such as transfer agent and distribution fees. Differences in class-specific fees and expenses will result in differences in net investment income and, therefore, the payment of different dividends from net investment income earned by each class. The Amended and Restated Declaration of Trust of the Portfolio gives the Board of Trustees the flexibility to specify either per-share voting or dollar-weighted voting when submitting matters for shareowner approval. Under per-share voting, each share of a class of the Portfolio is entitled to one vote. Under dollar-weighted voting, a shareowner's voting power is determined not by the number of shares owned, but by the dollar value of the shares on the record date. Each share class has exclusive voting rights with respect to matters affecting only that class, including with respect to the distribution plan for that class. There is no distribution plan for Class I shares.

Portfolio shares may be purchased only by insurance companies for the purpose of funding variable annuity and variable life insurance contracts or by qualified pension and retirement plans.

Amundi Asset Management US, Inc., an indirect, wholly owned subsidiary of Amundi and Amundi's wholly owned subsidiary, Amundi USA, Inc., serves as the Portfolio's investment adviser (the "Adviser"). Prior to January 1, 2021, the Adviser was named Amundi Pioneer Asset Management, Inc. Amundi Distributor US, Inc., an affiliate of Amundi Asset Management US, Inc., serves as the Portfolio's distributor (the "Distributor").

In August 2018, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update 2018-13 "Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement" ("ASU 2018-13") which modifies disclosure requirements for fair value measurements, principally for Level 3 securities and transfers between levels of the fair value hierarchy. ASU 2018-13 is effective for fiscal years beginning after December 15, 2019 and for interim periods within those fiscal years. The Portfolio has adopted ASU 2018-13 for the year ended December 31, 2020. The impact to the Portfolio's adoption was limited to changes in the Portfolio's disclosures regarding fair value, primarily those disclosures related to transfers between levels of the fair value hierarchy and disclosure of the range and weighted average used to develop significant unobservable inputs for Level 3 fair value investments, when applicable.

In March 2020, FASB issued an Accounting Standard Update, ASU 2020-04, Reference Rate Reform (Topic 848) — Facilitation of the Effects of Reference Rate Reform on Financial Reporting ("ASU 2020-04"), which provides optional, temporary relief with respect to the financial reporting of contracts subject to certain types of modifications due to the planned discontinuation of the London Interbank Offered Rate ("LIBOR") and other LIBOR-based reference rates at the end of 2021. The temporary relief provided by ASU 2020-04 is effective for certain reference rate-related contract modifications that occur during the period from March 12, 2020 through December 31, 2022. Management is evaluating the impact of ASU 2020-04 on the Trust's investments, derivatives, debt and other contracts that will undergo reference rate-related modifications as a result of the reference rate reform.

The Portfolio is an investment company and follows investment company accounting and reporting guidance under U.S. Generally Accepted Accounting Principles ("U.S. GAAP"). U.S. GAAP requires the management of the Portfolio to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income, expenses and gain or loss on investments during the reporting period. Actual results could differ from those estimates.

The following is a summary of significant accounting policies followed by the Portfolio in the preparation of its financial statements:

#### A. Security Valuation

The net asset value of the Portfolio is computed once daily, on each day the New York Stock Exchange ("NYSE") is open, as of the close of regular trading on the NYSE.

Fixed-income securities are valued by using prices supplied by independent pricing services, which consider such factors as market prices, market events, quotations from one or more brokers, Treasury spreads, yields, maturities and ratings, or may use a pricing matrix or other fair value methods or techniques to provide an estimated value of the security or instrument. A pricing matrix is a means of valuing a debt security on the basis of current market prices for other debt securities, historical trading patterns in the market for fixed-income securities and/or other factors. Non-U.S. debt securities that are listed on an

exchange will be valued at the bid price obtained from an independent third party pricing service. When independent third party pricing services are unable to supply prices, or when prices or market quotations are considered to be unreliable, the value of that security may be determined using quotations from one or more broker-dealers.

Loan interests are valued in accordance with guidelines established by the Board of Trustees at the mean between the last available bid and asked prices from one or more brokers or dealers as obtained from Loan Pricing Corporation, an independent third party pricing service. If price information is not available from Loan Pricing Corporation, or if the price information is deemed to be unreliable, price information will be obtained from an alternative loan interest pricing service. If no reliable price quotes are available from either the primary or alternative pricing service, broker quotes will be solicited.

Event-linked bonds are valued at the bid price obtained from an independent third party pricing service. Other insurance-linked securities (including reinsurance sidecars, collateralized reinsurance and industry loss warranties) may be valued at the bid price obtained from an independent pricing service, or through a third party using a pricing matrix, insurance industry valuation models, or other fair value methods or techniques to provide an estimated value of the instrument.

Equity securities which may include restricted securities that have traded on an exchange are valued by using the last sale price on the principal exchange where they are traded. Equity securities which may include restricted securities that have not traded on the date of valuation, or securities for which sale prices are not available, generally are valued using the mean between the last bid and asked prices or, if both last bid and asked prices are not available, at the last quoted bid price. Last sale and bid and asked prices are provided by independent third party pricing services. In the case of equity securities which may include restricted securities not traded on an exchange, prices are typically determined by independent third party pricing services using a variety of techniques and methods.

The value of foreign securities is translated into U.S. dollars based on foreign currency exchange rate quotations supplied by a third party pricing source. Trading in non-U.S. equity securities is substantially completed each day at various times prior to the close of the NYSE. The values of such securities used in computing the net asset value of the Portfolio's shares are determined as of such times. The Portfolio may use a fair value model developed by an independent pricing service to value non-U.S. equity securities.

Futures contracts are generally valued at the closing settlement price established by the exchange on which they are traded.

Swap contracts, including interest rate swaps, caps and floors (other than centrally cleared swap contracts), are valued at the dealer quotations obtained from reputable International Swap Dealers Association members. Centrally cleared swaps are valued at the daily settlement price provided by the central clearing counterparty.

Shares of open-end registered investment companies (including money market mutual funds) are valued at such funds' net asset value. Shares of exchange-listed closed-end funds are valued by using the last sale price on the principal exchange where they are traded. Shares of closed-end interval funds that offer their shares at net asset value are valued at such funds' net asset value.

Securities or loan interests for which independent pricing services or broker-dealers are unable to supply prices or for which market prices and/or quotations are not readily available or are considered to be unreliable are valued by a fair valuation team comprised of certain personnel of the Adviser pursuant to procedures adopted by the Portfolio's Board of Trustees. The Adviser's fair valuation team uses fair value methods approved by the Valuation Committee of the Board of Trustees. The Adviser's fair valuation team is responsible for monitoring developments that may impact fair valued securities and for discussing and assessing fair values on an ongoing basis, and at least quarterly, with the Valuation Committee of the Board of Trustees.

Inputs used when applying fair value methods to value a security may include credit ratings, the financial condition of the company, current market conditions and comparable securities. The Portfolio may use fair value methods if it is determined that a significant event has occurred after the close of the exchange or market on which the security trades and prior to the determination of the Portfolio's net asset value. Examples of a significant event might include political or economic news, corporate restructurings, natural disasters, terrorist activity or trading halts. Thus, the valuation of the Portfolio's securities may differ significantly from exchange prices, and such differences could be material.

At December 31, 2020, no securities were valued using fair value methods (other than securities valued using prices supplied by independent pricing services, broker-dealers or using a third party insurance industry pricing model).

#### **B.** Investment Income and Transactions

Dividend income is recorded on the ex-dividend date, except that certain dividends from foreign securities where the ex-dividend date may have passed are recorded as soon as the Portfolio becomes aware of the ex-dividend data in the exercise of reasonable diligence.

## Notes to Financial Statements 12/31/20 (continued)

Interest income, including interest on income-bearing cash accounts, is recorded on the accrual basis. Dividend and interest income are reported net of unrecoverable foreign taxes withheld at the applicable country rates and net of income accrued on defaulted securities.

Interest and dividend income payable by delivery of additional shares is reclassified as PIK (payment-in-kind) income upon receipt and is included in interest and dividend income, respectively.

Principal amounts of mortgage-backed securities are adjusted for monthly paydowns. Premiums and discounts related to certain mortgage-backed securities are amortized or accreted in proportion to the monthly paydowns. All discounts/premiums on purchase prices of debt securities are accreted/amortized for financial reporting purposes over the life of the respective securities, and such accretion/amortization is included in interest income.

Security transactions are recorded as of trade date. Gains and losses on sales of investments are calculated on the identified cost method for both financial reporting and federal income tax purposes.

## C. Foreign Currency Translation

The books and records of the Portfolio are maintained in U.S. dollars. Amounts denominated in foreign currencies are translated into U.S. dollars using current exchange rates.

Net realized gains and losses on foreign currency transactions, if any, represent, among other things, the net realized gains and losses on foreign currency exchange contracts, disposition of foreign currencies and the difference between the amount of income accrued and the U.S. dollars actually received. Further, the effects of changes in foreign currency exchange rates on investments are not segregated on the Statement of Operations from the effects of changes in the market prices of those securities, but are included with the net realized and unrealized gain or loss on investments.

#### **D. Federal Income Taxes**

It is the Portfolio's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net taxable income and net realized capital gains, if any, to its shareowners. Therefore, no provision for federal income taxes is required. As of December 31, 2020, the Portfolio did not accrue any interest or penalties with respect to uncertain tax positions, which, if applicable, would be recorded as an income tax expense on the Statement of Operations. Tax returns filed within the prior three years remain subject to examination by federal and state tax authorities.

The amount and character of income and capital gain distributions to shareowners are determined in accordance with federal income tax rules, which may differ from U.S. GAAP. Distributions in excess of net investment income or net realized gains are temporary over distributions for financial statement purposes resulting from differences in the recognition or classification of income or distributions for financial statement and tax purposes. Capital accounts within the financial statements are adjusted for permanent book/tax differences to reflect tax character, but are not adjusted for temporary differences.

During the year ended December 31, 2020, a capital loss carryforward of \$793,329 was utilized to offset net realized gains by the Portfolio.

The tax character of distributions paid during the years ended December 31, 2020 and December 31, 2019, were as follows:

	2020	2019
Distributions paid from:		
Ordinary income	\$5,245,627	\$5,637,339
Total	\$5,245,627	\$5,637,339

The following shows the components of distributable earnings on a federal income tax basis at December 31, 2020:

	2020
Distributable earnings/(losses):	
Undistributed ordinary income	\$ 1,861,101
Undistributed long term capital gain	3,021,965
Net unrealized appreciation	8,501,323
Total	\$13,384,389

The difference between book basis and tax basis unrealized appreciation is attributable to the tax adjustments relating to wash sales, premium and amortization, credit default swaps, the mark to market of futures contracts and credit default swaps.

#### E. Portfolio Shares and Class Allocations

The Portfolio records sales and repurchases of its shares as of trade date. Distribution fees for Class II shares are calculated based on the average daily net asset value attributable to Class II shares of the Portfolio (see Note 5). Class I shares do not pay distribution fees.

Income, common expenses (excluding transfer agent and distribution fees) and realized and unrealized gains and losses are calculated at the Portfolio level and allocated daily to each class of shares based on its respective percentage of adjusted net assets at the beginning of the day.

All expenses and fees paid to the Portfolio's transfer agent for its services are allocated between the classes of shares based on the number of accounts in each class and the ratable allocation of related out-of-pocket expenses (see Note 4).

The Portfolio declares as daily dividends substantially all of its net investment income. All dividends are paid on a monthly basis. Short-term capital gain distributions, if any, may be declared with the daily dividends. Distributions paid by the Portfolio with respect to each class of shares are calculated in the same manner and at the same time, except that net investment income dividends to Class I and Class II shares can reflect different transfer agent and distribution expense rates. Dividends and distributions to shareowners are recorded on the ex-dividend date.

#### F. Risks

The value of securities held by the Portfolio may go up or down, sometimes rapidly or unpredictably, due to general market conditions, such as real or perceived adverse economic, political or regulatory conditions, recessions, the spread of infectious illness or other public health issues, inflation, changes in interest rates, lack of liquidity in the bond markets or adverse investor sentiment. In the past several years, financial markets have experienced increased volatility, depressed valuations, decreased liquidity and heightened uncertainty. These conditions may continue, recur, worsen or spread. A general rise in interest rates could adversely affect the price and liquidity of fixed-income securities and could also result in increased redemptions from the Portfolio.

At times, the Portfolio's investments may represent industries or industry sectors that are interrelated or have common risks, making the Portfolio more susceptible to any economic, political, or regulatory developments or other risks affecting those industries and sectors. The Portfolio's investments in foreign markets and countries with limited developing markets may subject the Portfolio to a greater degree of risk than investments in a developed market. These risks include disruptive political or economic conditions and the imposition of adverse governmental laws or currency exchange restrictions.

The Portfolio invests in below-investment-grade (high-yield) debt securities and preferred stocks. Some of these high-yield securities may be convertible into equity securities of the issuer. Debt securities rated below-investment-grade are commonly referred to as "junk bonds" and are considered speculative. These securities involve greater risk of loss, are subject to greater price volatility, and are less liquid, especially during periods of economic uncertainty or change, than higher rated debt securities.

The Portfolio's investments, payment obligations and financing terms may be based on floating rates, such as LIBOR (London Interbank Offered Rate). Plans are underway to phase out the use of LIBOR by the end of 2021. The administrator of LIBOR recently announced a possible delay in the phase out of a majority of the U.S. dollar LIBOR publications until mid-2023, with the remainder of the LIBOR publications to end at the end of 2021. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the fund, issuers of instruments in which the Portfolio invests, and financial markets generally.

## Notes to Financial Statements 12/31/20 (continued)

With the increased use of technologies such as the Internet to conduct business, the Portfolio is susceptible to operational, information security and related risks. While the Portfolio's Adviser has established business continuity plans in the event of, and risk management systems to prevent, limit or mitigate, such cyber-attacks, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified. Furthermore, the Portfolio cannot control the cybersecurity plans and systems put in place by service providers to the Portfolio such as Brown Brothers Harriman & Co., the Portfolio's custodian and accounting agent, and DST Asset Manager Solutions, Inc., the Portfolio's transfer agent. In addition, many beneficial owners of Portfolio shares hold them through accounts at broker-dealers, retirement platforms and other financial market participants over which neither the Portfolio nor the Adviser exercises control. Each of these may in turn rely on service providers to them, which are also subject to the risk of cyber-attacks. Cybersecurity failures or breaches at the Adviser or the Portfolio's service providers or intermediaries have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Portfolio's ability to calculate its net asset value, impediments to trading, the inability of Portfolio shareowners to effect share purchases, redemptions or exchanges or receive distributions, loss of or unauthorized access to private shareowner information and violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, or additional compliance costs. Such costs and losses may not be covered under any insurance. In addition, maintaining vigilance against cyber-attacks may involve substantial costs over time, and system enhancements may themselves be subject to cyber-attacks.

#### COVID-19

The respiratory illness COVID-19 caused by a novel coronavirus has resulted in a global pandemic and major disruption to economies and markets around the world, including the United States. Global financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted. Liquidity for many instruments has been greatly reduced for periods of time. Some interest rates are very low and in some cases yields are negative. Some sectors of the economy and individual issuers have experienced particularly large losses. These circumstances may continue for an extended period of time, and may continue to affect adversely the value and liquidity of the Portfolio's investments. The ultimate economic fallout from the pandemic, and the long-term impact on economies, markets, industries and individual issuers, are not known. Governments and central banks, including the Federal Reserve in the U.S., have taken extraordinary and unprecedented actions to support local and global economies and the financial markets. These actions have resulted in significant expansion of public debt, including in the U.S. The impact of these measures, and whether they will be effective to mitigate the economic and market disruption, will not be known for some time. The consequences of high public debt, including its future impact on the economy and securities markets, likewise may not be known for some time.

The Portfolio's prospectus contains unaudited information regarding the Portfolio's principal risks. Please refer to that document when considering the Portfolio's principal risks.

#### **G. Restricted Securities**

Restricted Securities are subject to legal or contractual restrictions on resale. Restricted securities generally are resold in transactions exempt from registration under the Securities Act of 1933. Private placement securities are generally considered to be restricted except for those securities traded between qualified institutional investors under the provisions of Rule 144A of the Securities Act of 1933.

Disposal of restricted investments may involve negotiations and expenses, and prompt sale at an acceptable price may be difficult to achieve. Restricted investments held by the Portfolio at December 31, 2020 are listed in the Schedule of Investments.

#### H. Insurance-Linked Securities ("ILS")

The Portfolio invests in ILS. The Portfolio could lose a portion or all of the principal it has invested in an ILS, and the right to additional interest or dividend payments with respect to the security, upon the occurrence of one or more trigger events, as defined within the terms of an insurance-linked security. Trigger events, generally, are hurricanes, earthquakes, or other natural events of a specific size or magnitude that occur in a designated geographic region during a specified time period, and/or that involve losses or other metrics that exceed a specific amount. There is no way to accurately predict whether a trigger event will occur, and accordingly, ILS carry significant risk. The Portfolio is entitled to receive principal, and interest and/or dividend payments so long as no trigger event occurs of the description and magnitude specified by the instrument. In addition to the specified trigger events, ILS may expose the Portfolio to other risks, including but not limited to issuer (credit) default, adverse regulatory or jurisdictional interpretations and adverse tax consequences.

The Portfolio's investments in ILS may include event-linked bonds. ILS also may include special purpose vehicles ("SPVs") or similar instruments structured to comprise a portion of a reinsurer's catastrophe-oriented business, known as quota share instruments (sometimes referred to as reinsurance sidecars), or to provide reinsurance relating to specific risks to insurance or reinsurance companies through a collateralized instrument, known as collateralized reinsurance. Structured reinsurance investments also may include industry loss warranties ("ILWs"). A traditional ILW takes the form of a bilateral reinsurance contract, but there are also products that take the form of derivatives, collateralized structures, or exchange-traded instruments.

Where the ILS are based on the performance of underlying reinsurance contracts, the Portfolio has limited transparency into the individual underlying contracts, and therefore must rely upon the risk assessment and sound underwriting practices of the issuer. Accordingly, it may be more difficult for the Adviser to fully evaluate the underlying risk profile of the Portfolio's structured reinsurance investments, and therefore the Portfolio's assets are placed at greater risk of loss than if the Adviser had more complete information. Structured reinsurance instruments generally will be considered illiquid securities by the Portfolio. These securities may be difficult to purchase, sell or unwind. Illiquid securities also may be difficult to value. If the Portfolio is forced to sell an illiquid asset, the Portfolio may be forced to sell at a loss.

Additionally, the Portfolio may gain exposure to ILS by investing in a closed-end interval fund, Pioneer ILS Interval Fund, an affiliate of the Adviser. The Portfolio's investment in Pioneer ILS Interval Fund at December 31, 2020, is listed in the Schedule of Investments.

#### I. Futures Contracts

The Portfolio may enter into futures transactions in order to attempt to hedge against changes in interest rates, securities prices and currency exchange rates or to seek to increase total return. Futures contracts are types of derivatives. All futures contracts entered into by the Portfolio are traded on a futures exchange. Upon entering into a futures contract, the Portfolio is required to deposit with a broker an amount of cash or securities equal to the minimum "initial margin" requirements of the associated futures exchange. The amount of cash deposited with the broker as collateral at December 31, 2020, is recorded as "Futures collateral" on the Statement of Assets and Liabilities.

Subsequent payments for futures contracts ("variation margin") are paid or received by the Portfolio, depending on the daily fluctuation in the value of the contracts, and are recorded by the Portfolio as unrealized appreciation or depreciation. Cash received from or paid to the broker related to previous margin movement is held in a segregated account at the broker and is recorded as either "Due from broker for futures" or "Due to broker for futures" on the Statement of Assets and Liabilities. When the contract is closed, the Portfolio realizes a gain or loss equal to the difference between the opening and closing value of the contract as well as any fluctuation in foreign currency exchange rates where applicable. Futures contracts are subject to market risk, interest rate risk and currency exchange rate risk. Changes in value of the contracts may not directly correlate to the changes in value of the underlying securities. With futures, there is reduced counterparty credit risk to the Portfolio since futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees the futures against default.

The average market value of futures contracts open during the year ended December 31, 2020, was \$3,632,187. Open futures contracts outstanding at December 31, 2020, are listed in the Schedule of Investments.

#### J. Credit Default Swap Contracts

A credit default swap is a contract between a buyer of protection and a seller of protection against a pre-defined credit event or an underlying reference obligation, which may be a single security or a basket or index of securities. The Portfolio may buy or sell credit default swap contracts to seek to increase the Portfolio's income, or to attempt to hedge the risk of default on portfolio securities. A credit default swap index is used to hedge risk or take a position on a basket of credit entities or indices.

As a seller of protection, the Portfolio would be required to pay the notional (or other agreed-upon) value of the referenced debt obligation to the counterparty in the event of a default by a U.S. or foreign corporate issuer of a debt obligation, which would likely result in a loss to the Portfolio. In return, the Portfolio would receive from the counterparty a periodic stream of payments during the term of the contract, provided that no event of default occurred. The maximum exposure of loss to the seller would be the notional value of the credit default swaps outstanding. If no default occurs, the Portfolio would keep the stream of payments and would have no payment obligation. The Portfolio may also buy credit default swap contracts in order to hedge against the risk of default of debt securities, in which case the Portfolio would function as the counterparty referenced above.

## Notes to Financial Statements 12/31/20 (continued)

As a buyer of protection, the Portfolio makes an upfront or periodic payment to the protection seller in exchange for the right to receive a contingent payment. An upfront payment made by the Portfolio, as the protection buyer, is recorded within the "Swap contracts, at value" line item on the Statement of Assets and Liabilities. Periodic payments received or paid by the Portfolio are recorded as realized gains or losses on the Statement of Operations.

Credit default swap contracts are marked-to-market daily using valuations supplied by independent sources, and the change in value, if any, is recorded within the "Swap contracts, at value" line item on the Statement of Assets and Liabilities. Payments received or made as a result of a credit event or upon termination of the contract are recognized, net of the appropriate amount of the upfront payment, as realized gains or losses on the Statement of Operations.

Credit default swap contracts involving the sale of protection may involve greater risks than if the Portfolio had invested in the referenced debt instrument directly. Credit default swap contracts are subject to general market risk, liquidity risk, counterparty risk and credit risk. If the Portfolio is a protection buyer and no credit event occurs, it will lose its investment. If the Portfolio is a protection seller and a credit event occurs, the value of the referenced debt instrument received by the Portfolio, together with the periodic payments received, may be less than the amount the Portfolio pays to the protection buyer, resulting in a loss to the Portfolio. In addition, obligations under sell protection credit default swaps may be partially offset by net amounts received from settlement of buy protection credit default swaps entered into by the Portfolio for the same reference obligation with the same counterparty.

Certain swap contracts that are cleared through a central clearinghouse are referred to as centrally cleared swaps. All payments made or received by the Portfolio are pursuant to a centrally cleared swap contract with the central clearing party rather than the original counterparty. Upon entering into a centrally cleared swap contract, the Portfolio is required to make an initial margin deposit, either in cash or in securities. The daily change in value on open centrally cleared contracts is recorded as "Variation margin for centrally cleared swap contracts" on the Statement of Assets and Liabilities. Cash received from or paid to the broker related to previous margin movement is held in a segregated account at the broker and is recorded as either "Due from broker for swaps" or "Due to broker for swaps" on the Statement of Assets and Liabilities. The amount of cash deposited with a broker as collateral at December 31, 2020, is recorded as "Swaps collateral" on the Statement of Assets and Liabilities.

The average market value of credit default swap contracts open during the year ended December 31, 2020, was \$(27,461). Open credit default swap contracts at December 31, 2020, are listed in the Schedule of Investments.

#### 2. Management Agreement

The Adviser manages the Portfolio. Management fees are calculated daily and paid monthly at the annual rate of 0.40% of the Portfolio's average daily net assets. For the year ended December 31, 2020, the effective management fee (excluding waivers and/or assumption of expenses and acquired fund fees and expenses) was equivalent to 0.40% of the Portfolio's average daily net assets.

The Adviser has agreed to waive its management fee with respect to any portion of the Portfolio's assets invested in Pioneer ILS Interval Fund, an affiliated fund managed by the Adviser. For the year ended December 31, 2020, the Adviser waived \$48,073 in management fees with respect to the Portfolio, which is reflected on the Statement of Operations as an expense waiver.

The Adviser has contractually agreed to limit ordinary operating expenses (ordinary operating expenses means all Portfolio expenses other than extraordinary expenses, such as litigation, taxes, brokerage commissions and acquired fund fees and expenses) of the Portfolio to the extent required to reduce Portfolio expenses to 0.62% of the average daily net assets attributable to Class I shares. Class II shares expenses will be reduced only to the extent portfolio-wide expenses are reduced for Class I shares. Fees waived and expenses reimbursed during the year ended December 31, 2020, if any, are reflected on the Statement of Operations. This expense limitation is in effect through May 1, 2021. There can be no assurance that the Adviser will extend the expense limitation agreement for a class of shares beyond the date referred to above.

In addition, under the management and administration agreements, certain other services and costs, including accounting, regulatory reporting and insurance premiums, are paid by the Portfolio as administrative reimbursements. Included in "Due to affiliates" reflected on the Statement of Assets and Liabilities is \$5,897 in management fees, administrative costs and certain other reimbursements payable to the Adviser at December 31, 2020.

#### 3. Compensation of Trustees and Officers

The Portfolio pays an annual fee to its Trustees. The Adviser reimburses the Portfolio for fees paid to the Interested Trustees. The Portfolio does not pay any salary or other compensation to its officers. For the year ended December 31, 2020, the Portfolio paid \$7,944 in Trustees' compensation, which is reflected on the Statement of Operations as Trustees' fees. At December 31, 2020, the Portfolio had a payable for Trustees' fees on its Statement of Assets and Liabilities of \$169.

#### 4. Transfer Agent

DST Asset Manager Solutions, Inc. serves as the transfer agent to the Portfolio at negotiated rates. Transfer agent fees and payables shown on the Statement of Operations and the Statement of Assets and Liabilities, respectively, include sub-transfer agent expenses incurred through the Portfolio's omnibus relationship contracts.

#### 5. Distribution Plan

The Portfolio has adopted a distribution plan (the "Plan") pursuant to Rule 12b-1 of the Investment Company Act of 1940 with respect to its Class II shares. Pursuant to the Plan, the Portfolio pays the Distributor 0.25% of the average daily net assets attributable to Class II shares to compensate the Distributor for (1) distribution services and (2) personal and account maintenance services performed and expenses incurred by the Distributor in connection with the Portfolio's Class II shares. Included in "Due to affiliates" reflected on the Statement of Assets and Liabilities is \$2,873 in distribution fees payable to the Distributor at December 31, 2020.

#### 6. Affiliated Issuers

An affiliated issuer is a company in which the Portfolio has a direct or indirect ownership of, control of, or voting power of 5 percent or more of the outstanding voting shares. At December 31, 2020, the value of the Portfolio's investment in affiliated issuers was \$2,728,793, which represents 1.5% of the Portfolio's net assets.

Transactions in affiliated issuers by the Portfolio for the year ended were as follows:

Name of the Affiliated Issuer	Value at December 31, 2019	Purchase Costs	Change in Net Unrealized Appreciation/ (Depreciation) from Investments in Affiliated Issuers	Net Realized Gain/(Loss) From Investments in Affiliated Issuers	Dividends from Investments in Affiliated Issuers	Shares held at December 31, 2020	Value at December 31, 2020
Pioneer ILS Interval Fund	\$2,674,153	\$ <b>—</b>	\$54,640	\$ <i>-</i>	\$141.936	321.413	\$2,728,793

Annual and semi-annual reports for the underlying Pioneer funds are available on the funds' web page(s) at www.amundi.com/us.

#### 7. Additional Disclosures about Derivative Instruments and Hedging Activities

The Portfolio's use of derivatives may enhance or mitigate the Portfolio's exposure to the following risks:

Interest rate risk relates to the fluctuations in the value of interest-bearing securities due to changes in the prevailing levels of market interest rates.

Credit risk relates to the ability of the issuer of a financial instrument to make further principal or interest payments on an obligation or commitment that it has to the Portfolio.

Foreign exchange rate risk relates to fluctuations in the value of an asset or liability due to changes in currency exchange rates.

Equity risk relates to the fluctuations in the value of financial instruments as a result of changes in market prices (other than those arising from interest rate risk or foreign exchange rate risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment.

# Notes to Financial Statements 12/31/20 (continued)

Commodity risk relates to the risk that the value of a commodity or commodity index will fluctuate based on increases or decreases in the commodities market and factors specific to a particular industry or commodity.

The fair value of open derivative instruments (not considered to be hedging instruments for accounting disclosure purposes) by risk exposure at December 31, 2020, was as follows:

Statement of Assets and Liabilities	Interest Rate Risk	Credit Risk	Foreign Exchange Rate Risk	Equity Risk	Commodity Risk
Assets					
Swap contracts, at value	\$ -	\$46,514	\$-	\$ —	\$ <i>-</i>
Total Value	\$ <b>–</b>	\$46,514	<b>\$</b> —	<b>\$</b> —	<b>\$</b> —
<b>Liabilities</b> Net unrealized depreciation on futures contracts	\$82,500	\$ -	\$	\$ <b>—</b>	\$ <i>-</i>
Total Value	\$82,500	\$ <b>–</b>	<b>\$</b> —	<b>\$</b> —	<b>\$</b> —

The effect of derivative instruments (not considered to be hedging instruments for accounting disclosure purposes) on the Statement of Operations by risk exposure at December 31, 2020 was as follows:

Statement of	Interest	Credit	Foreign	Equity	Commodity
Operations	Rate Risk	Risk	<b>Exchange Rate Risk</b>	Risk	Risk
Net realized gain (loss) on:					
Futures contracts	\$(34,283)	\$ -	\$ <b>—</b>	\$ <b>—</b>	\$ <b>—</b>
Swap contracts	_	55,824	_		_
Total Value	\$(34,283)	\$ 55,824	<b>\$</b> —	<b>\$</b> —	<b>\$</b> —
Change in net unrealized appreciation (depreciation) on:					
Futures contracts	\$(99,398)	\$ -	\$—	\$ <b>—</b>	\$ <b>—</b>
Swap contracts	_	101,268	_	_	_
Total Value	\$(99,398)	\$101,268	<b>\$</b> —	<b>\$</b> —	<b>\$</b> —

## Report of Independent Registered Public Accounting Firm

# To the Board of Trustees of Pioneer Variable Contracts Trust and the Shareholders of Pioneer Bond VCT Portfolio:

#### **Opinion on the Financial Statements**

We have audited the accompanying statement of assets and liabilities of Pioneer Bond VCT Portfolio (the "Portfolio") (one of the portfolios constituting Pioneer Variable Contracts Trust (the "Trust")), including the schedule of investments, as of December 31, 2020, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the financial highlights for each of the four years in the period then ended and the related notes (collectively referred to as the "financial statements"). The financial highlights for the period ended December 31, 2016 were audited by another independent registered public accounting firm whose report, dated February 14, 2017, expressed an unqualified opinion on those financial highlights. In our opinion, the financial statements present fairly, in all material respects, the financial position of the Portfolio (one of the portfolios constituting Pioneer Variable Contracts Trust) at December 31, 2020, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and its financial highlights for each of the four years in the period then ended, in conformity with U.S. generally accepted accounting principles.

#### **Basis for Opinion**

These financial statements are the responsibility of the Trust's management. Our responsibility is to express an opinion on the Portfolio's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Trust in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Trust is not required to have, nor were we engaged to perform, an audit of the Trust's internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2020, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Ernst & Young LLP

We have served as the auditor of one or more Amundi Pioneer investment companies since 2017.

Boston, Massachusetts February 17, 2021

# Additional Information (unaudited)

Qualified interest income is exempt from nonresident alien (NRA) tax withholding. The percentage of the Portfolio's ordinary income distributions derived from qualified interest income was 77.73%

# Approval of Investment Management Agreement

Amundi Pioneer Asset Management, Inc. ("APAM") serves as the investment adviser to Pioneer Bond VCT Portfolio (the "Portfolio") pursuant to an investment management agreement between APAM and the Portfolio. In order for APAM to remain the investment adviser of the Portfolio, the Trustees of the Portfolio must determine annually whether to renew the investment management agreement for the Portfolio.

The contract review process began in January 2020 as the Trustees of the Portfolio agreed on, among other things, an overall approach and timeline for the process. Contract review materials were provided to the Trustees in March 2020, July 2020 and September 2020. In addition, the Trustees reviewed and discussed the Portfolio's performance at regularly scheduled meetings throughout the year, and took into account other information related to the Portfolio provided to the Trustees at regularly scheduled meetings, in connection with the review of the Portfolio's investment management agreement.

In March 2020, the Trustees, among other things, discussed the memorandum provided by Fund counsel that summarized the legal standards and other considerations that are relevant to the Trustees in their deliberations regarding the renewal of the investment management agreement, and reviewed and discussed the qualifications of the investment management teams for the Portfolio, as well as the level of investment by the Portfolio's portfolio managers in the Portfolio. In July 2020, the Trustees, among other things, reviewed the Portfolio's management fees and total expense ratios, the financial statements of APAM and its parent companies, profitability analyses provided by APAM, and analyses from APAM as to possible economies of scale. The Trustees also reviewed the profitability of the institutional business of APAM and APAM's affiliate, Amundi Pioneer Institutional Asset Management, Inc. ("APIAM" and, together with APAM, "Amundi Pioneer"), as compared to that of APAM's fund management business, and considered the differences between the fees and expenses of the Portfolio and the fees and expenses of APAM's and APIAM's institutional accounts, as well as the different services provided by APAM to the Portfolio and by APAM and APIAM to the institutional accounts. The Trustees further considered contract review materials, including additional materials received in response to the Trustees' request, in September 2020.

At a meeting held on September 15, 2020, based on their evaluation of the information provided by APAM and third parties, the Trustees of the Portfolio, including the Independent Trustees voting separately, unanimously approved the renewal of the investment management agreement for another year. In approving the renewal of the investment management agreement, the Trustees considered various factors that they determined were relevant, including the factors described below. The Trustees did not identify any single factor as the controlling factor in determining to approve the renewal of the agreement.

#### **Nature, Extent and Quality of Services**

The Trustees considered the nature, extent and quality of the services that had been provided by APAM to the Portfolio, taking into account the investment objective and strategy of the Portfolio. The Trustees also reviewed APAM's investment approach for the Portfolio and its research process. The Trustees considered the resources of APAM and the personnel of APAM who provide investment management services to the Portfolio. They also reviewed the amount of non-Portfolio assets managed by the portfolio managers of the Portfolio. They considered the non-investment resources and personnel of APAM that are involved in APAM's services to the Portfolio, including APAM's compliance, risk management, and legal resources and personnel. The Trustees noted the substantial attention and high priority given by APAM's senior management to the Pioneer Fund complex. The Trustees considered the implementation and effectiveness of APAM's business continuity plan in response to the COVID-19 pandemic.

The Trustees considered that APAM supervises and monitors the performance of the Portfolio's service providers and provides the Portfolio with personnel (including Portfolio officers) and other resources that are necessary for the Portfolio's business management and operations. The Trustees also considered that, as administrator, APAM is responsible for the administration of the Portfolio's business and other affairs. The Trustees considered the fees paid to APAM for the provision of administration services.

Based on these considerations, the Trustees concluded that the nature, extent and quality of services that had been provided by APAM to the Portfolio were satisfactory and consistent with the terms of the investment management agreement.

#### Performance of the Portfolio

In considering the Portfolio's performance, the Trustees regularly review and discuss throughout the year data prepared by APAM and information comparing the Portfolio's performance with the performance of its peer group of funds, as classified by Morningstar, Inc. (Morningstar), and with the performance of the Portfolio's benchmark index. They also discuss the Portfolio's performance with APAM on a regular basis. The Trustees' regular reviews and discussions were factored into the Trustees' deliberations concerning the renewal of the investment management agreement.

### Approval of Investment Management Agreement (continued)

#### **Management Fee and Expenses**

The Trustees considered information showing the fees and expenses of the Portfolio in comparison to the management fees of its peer group of funds as classified by Morningstar and also to the expense ratios of a peer group of funds selected on the basis of criteria determined by the Independent Trustees for this purpose using data provided by Strategic Insight Mutual Fund Research and Consulting, LLC (Strategic Insight), an independent third party. The peer group comparisons referred to below are organized in quintiles. Each quintile represents one-fifth of the peer group. In all peer group comparisons referred to below, first quintile is most favorable to the Portfolio's shareowners. The Trustees noted that they separately review and consider the impact of the Portfolio's transfer agency and Portfolio- and APAM-paid expenses for sub-transfer agency and intermediary arrangements, and that the results of the most recent such review were considered in the consideration of the Portfolio's expense ratio.

The Trustees considered that the Portfolio's management fee for the most recent fiscal year was in the first quintile relative to the management fees paid by other funds in its Morningstar category for the comparable period. The Trustees considered that the expense ratio of the Portfolio's Class II shares for the most recent fiscal year was in the third quintile relative to its Strategic Insight peer group for the comparable period. The Trustees noted that APAM had agreed to waive fees and/or reimburse expenses in order to limit the ordinary operating expenses of the Portfolio.

The Trustees reviewed management fees charged by APAM and APIAM to institutional and other clients, including publicly offered European funds sponsored by APAM's affiliates, unaffiliated U.S. registered investment companies (in a sub-advisory capacity), and unaffiliated foreign and domestic separate accounts. The Trustees also considered APAM's costs in providing services to the Portfolio and APAM's and APIAM's costs in providing services to the other clients and considered the differences in management fees and profit margins for fund and non-fund services. In evaluating the fees associated with APAM's and APIAM's client accounts, the Trustees took into account the respective demands, resources and complexity associated with the Portfolio and other client accounts. The Trustees noted that, in some instances, the fee rates for those clients were lower than the management fee for the Portfolio and considered that, under the investment management agreement with the Portfolio, APAM performs additional services for the Portfolio that it does not provide to those other clients or services that are broader in scope, including oversight of the Portfolio's other service providers and activities related to compliance and the extensive regulatory and tax regimes to which the Portfolio is subject. The Trustees also considered the entrepreneurial risks associated with APAM's management of the Portfolio.

The Trustees concluded that the management fee payable by the Portfolio to APAM was reasonable in relation to the nature and quality of the services provided by APAM.

#### **Profitability**

The Trustees considered information provided by APAM regarding the profitability of APAM with respect to the advisory services provided by APAM to the Portfolio, including the methodology used by APAM in allocating certain of its costs to the management of the Portfolio. The Trustees also considered APAM's profit margin in connection with the overall operation of the Portfolio. They further reviewed the financial results, including the profit margins, realized by APAM and APIAM from nonfund businesses. The Trustees considered APAM's profit margins in comparison to the limited industry data available and noted that the profitability of any adviser was affected by numerous factors, including its organizational structure and method for allocating expenses. The Trustees concluded that APAM's profitability with respect to the management of the Portfolio was not unreasonable.

## **Economies of Scale**

The Trustees considered APAM's views relating to economies of scale in connection with the Pioneer Funds as fund assets grow and the extent to which any such economies of scale are shared with the Portfolio and Portfolio shareholders. The Trustees recognize that economies of scale are difficult to identify and quantify, and that, among other factors that may be relevant, are the following: fee levels, expense subsidization, investment by APAM in research and analytical capabilities and APAM's commitment and resource allocation to the Portfolio. The Trustees noted that profitability also may be an indicator of the availability of any economies of scale, although profitability may vary for other reasons including due to reductions in expenses. The Trustees concluded that economies of scale, if any, were being appropriately shared with the Portfolio.

#### **Other Benefits**

The Trustees considered the other benefits that APAM enjoys from its relationship with the Portfolio. The Trustees considered the character and amount of fees paid or to be paid by the Portfolio, other than under the investment management agreement, for services provided by APAM and its affiliates. The Trustees further considered the revenues and profitability of APAM's businesses other than the Fund business. To the extent applicable, the Trustees also considered the benefits to the Portfolio and to APAM and its affiliates from the use of "soft" commission dollars generated by the Portfolio to pay for research and brokerage services.

The Trustees considered that Amundi Pioneer is the principal U.S. asset management business of Amundi, which is one of the largest asset managers globally. Amundi's worldwide asset management business manages over \$1.7 trillion in assets (including the Pioneer Funds). The Trustees considered that APAM's relationship with Amundi creates potential opportunities for APAM, APIAM and Amundi that derive from APAM's relationships with the Portfolio, including Amundi's ability to market the services of APAM globally. The Trustees noted that APAM has access to additional research and portfolio management capabilities as a result of its relationship with Amundi and Amundi's enhanced global presence that may contribute to an increase in the resources available to APAM. The Trustees considered that APAM and the Portfolio receive reciprocal intangible benefits from the relationship, including mutual brand recognition and, for the Portfolio, direct and indirect access to the resources of a large global asset manager. The Trustees concluded that any such benefits received by APAM as a result of its relationship with the Portfolio were reasonable.

#### Conclusion

After consideration of the factors described above as well as other factors, the Trustees, including the Independent Trustees, concluded that the investment management agreement for the Portfolio, including the fees payable thereunder, was fair and reasonable and voted to approve the proposed renewal of the investment management agreement.

# **Trustees, Officers and Service Providers**

The Portfolio's Trustees and officers are listed below, together with their principal occupations and other directorships they have held during at least the past five years. Trustees who are interested persons of the Portfolios within the meaning of the 1940 Act are referred to as Interested Trustees. Trustees who are not interested persons of the Portfolio are referred to as Independent Trustees. Each of the Trustees serves as a Trustee of each of the 45 U.S. registered investment portfolios for which Amundi US serves as investment adviser (the "Pioneer Funds"). The address for all Trustees and all officers of the Portfolios is 60 State Street, Boston, Massachusetts 02109.
