Annual Report

December 31, 2020

As permitted by regulations adopted by the U.S. Securities and Exchange Commission, you may no longer receive paper copies of the Fund's annual and semi-annual shareholder reports by mail from the insurance company that issued your variable annuity and variable life insurance contract or from the financial intermediary that administers your qualified pension or retirement plan, unless you specifically request paper copies of the reports from your insurance company or financial intermediary. Instead, the reports will be made available on the Fund's website www.nb.com/AMTliterature, and may also be available on a website from the insurance company or financial intermediary that offers your contract or administers your retirement plan, and such insurance company or financial intermediary will notify you by mail each time a report is posted and provide you with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the insurance company or financial intermediary electronically by following the instructions provided by the insurance company or financial intermediary. If offered by your insurance company or financial intermediary, you may elect to receive all future reports in paper and free of charge from the insurance company or financial intermediary. You can contact your insurance company or financial intermediary if you wish to continue receiving paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds available under your contract or retirement plan.

U.S. Equity Index PutWrite Strategy Portfolio Commentary (Unaudited)

The Neuberger Berman Advisers Management Trust U.S. Equity Index PutWrite Strategy Portfolio Class S generated a total return of 8.26% for the 12-month period ended December 31, 2020 (the reporting period), outperforming its blended benchmark, a blend consisting of 42.5% CBOE S&P 500 One-Week PutWrite Index / 42.5% CBOE S&P 500 PutWrite Index / 7.5% CBOE Russell 2000 One-Week PutWrite Index / 7.5% CBOE Russell 2000 PutWrite Index (collectively, the Index), which posted a -3.97% total return for the same time period.

2020 was simply one of the most physically, socially, politically and financially destructive years in a generation. A year from which the collective us will most likely take a long time to recover. Remarkably, equity markets shrugged off the negative prospects and were buoyed by hope for prolonged monetary and fiscal stimulus well into 2021. Given equity markets supposedly look to the future when setting valuations, one must assume, at some point in time, they will be forced to ponder a future without unlimited stimulus. However, until that day arrives, the equity market pendulum that's said to swing between greed and fear will remain tilted towards greed. Social unrest, political changes in the U.S. and a global pandemic that crippled all aspects of the global economy are not your run-of-the-mill financial challenges and they most definitely don't usually happen all in the same year. Yet, equity investors ultimately dragged markets from the depths of a first quarter drawdown to record levels by year-end. It was a truly astonishing nine month rebound. For all of 2020, the S&P 500® Index posted a notable 18.40% total return. Moreover, the CBOE S&P 500 PutWrite (PUT) gained 2.13% while the CBOE Russell 2000 PutWrite (PUTR) declined -0.63% during the reporting period.

2020 brought record levels of both implied volatility and realized volatility. After the severity of the first quarter market drawdown, implied volatility levels rapidly adjusted higher. Overall, implied volatility levels continued to oscillate around elevated levels and are anticipated to remain above long-term averages well into 2021. On the year, the CBOE S&P 500 Volatility Index (VIX) was up 9.0 points with an average 30-day implied volatility premium of 0.8. In concert, the CBOE Russell 2000 Volatility Index (RVX) was up 14.5 points with an average 30-day implied volatility premium of -0.9.

Over the reporting period, the S&P 500 PutWrite sleeve was the strongest contributor to the Fund's performance as it outperformed the PUT and demonstrated its ability to offset losses posted by the CBOE S&P 500 One-Week PutWrite (WPUT). Over the reporting period, the Russell 2000 PutWrite sleeve managed to outperform the PUTR and avoided the losses posted by the CBOE Russell 2000 One-Week PutWrite (WPTR). Over the reporting period, the Fund's collateral was also a positive contributor to performance and ended the period ahead of T-Bills (as measured by the ICE BofA 3-Month U.S. Treasury Bill Index), while 1-Month U.S. T-Bill rates decreased -140 basis points (bps) and 2-Year U.S. Treasury Notes rates fell by -145 bps.

For the reporting period, there were no detractors to overall Fund relative performance and average option notional exposure remained consistent with our strategic targets of 85% S&P 500® Index and 15% Russell 2000® Index.

As we look forward to 2021 and beyond, we want to emphasize our view that option market (implied volatility) premiums are different than more traditional factor premiums that are believed to be cyclical. In the case of option markets, we believe using the term 'cycle' is inaccurate. Describing volatility markets as cyclical implies similarity or inheritance of properties from one cycle (phase) to the next, i.e. a degree of predictability. To the contrary, we believe option markets evolve from one regime to another based on a constantly evolving risk landscape.

There is no better analogy than the regime change in the U.S. that was formalized on January 20, 2021. To say the U.S. is entering a new political cycle misses the mark. We believe U.S. politics are on the verge of regime change and a political recalibration that is seeking to find a new equilibrium. To simply say we are shifting from a Republican phase of the political cycle to a Democratic phase of the political cycle is, in our view, grossly incomplete.

We believe this subtle market structure difference ensures that implied volatility premiums will persist and avoid the prolonged periods of erosion experienced by traditional risk premiums, e.g. value, size, growth, momentum, etc.

Sincerely,

DEREK DEVENS AND RORY EWING
PORTFOLIO MANAGERS

* Prior to May 1, 2017, the Fund had different investment goals, fees and expenses, principal investment strategies and portfolio managers. Please also see Endnote 1.

The performance data quoted represent past performance and do not indicate future results. Current performance may be lower or higher than the performance data quoted. For current performance data, including current to the most recent month-end, please visit <http://www.nb.com/amtportfolios/performance>.

The results shown in the table reflect the reinvestment of income dividends and other distributions, if any. The results do not reflect the effect of taxes a shareholder would pay on Fund distributions or on the redemption of Fund shares. The results do not reflect fees and expenses of the variable annuity and variable life insurance policies or the qualified pension and retirement plans whose proceeds are invested in the Fund.

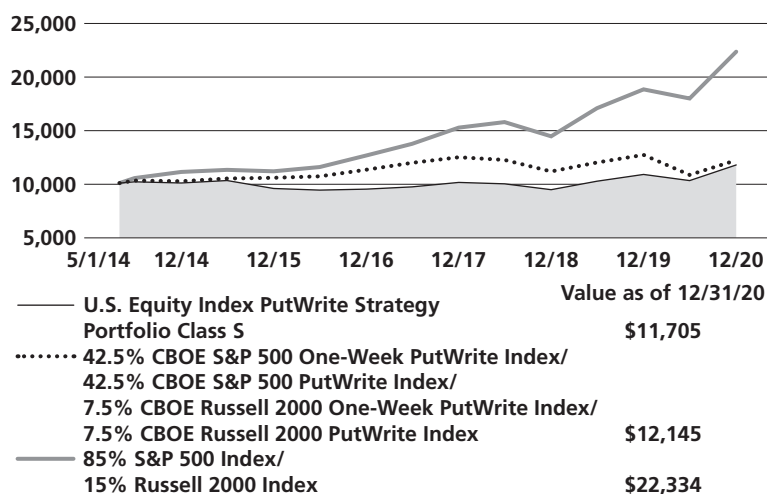

The investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost.

Returns would have been lower if Management had not reimbursed certain expenses and/or waived a portion of the investment management fees during certain of the periods shown. Repayment by a class (of expenses previously reimbursed and/or fees previously waived by Management) will decrease the class's returns. Please see Note B in the Notes to Financial Statements for specific information regarding expense reimbursement and/or fee waiver arrangements.

As stated in the Fund's most recent prospectus, the total annual operating expense ratio for fiscal year 2019 was 1.73% for Class S shares (before expense reimbursements and/or fee waivers, if any). The expense ratio was 1.06% for Class S shares after expense reimbursements and/or fee waivers. The expense ratios for the annual period ended December 31, 2020 can be found in the Financial Highlights section of this report.

U.S. Equity Index PutWrite Strategy Portfolio (Unaudited)

COMPARISON OF A \$10,000 INVESTMENT

This graph shows the change in value of a hypothetical \$10,000 investment in the Fund over the past 10 fiscal years, or since the Fund's inception if it has not operated for 10 years. The result is compared with benchmarks, which include a broad-based market index and may include a more narrowly based index. Market indices described in this report do not take into account any fees, expenses or tax consequences of investing in the individual securities that they track. The results shown in the graph reflect the reinvestment of income dividends and other distributions, if any. The results do not reflect the effect of taxes a shareholder would pay on Fund distributions or on the redemption of Fund shares. The results do not reflect fees and expenses of the variable annuity and variable life insurance policies or the qualified pension and retirement plans whose proceeds are invested in the Fund. Results represent past performance and do not indicate future results.

Please see Endnotes for additional information.

Endnotes

- 1 The Fund was relatively small prior to December 31, 2014, which could have impacted Fund performance. The same techniques used to produce returns in a small fund may not work to produce similar returns in a larger fund. Effective May 1, 2017, Absolute Return Multi-Manager Portfolio changed its name to the U.S. Equity Index PutWrite Strategy Portfolio and changed its investment goal, fees and expenses, principal investment strategies, risks and portfolio manager(s). Prior to that date, the Fund had a higher management fee, different expenses, a different goal and principal investment strategies, which included a multi-manager strategy, and different risks. Its performance prior to that date might have been different if the current fees and expenses, goal, and principal investment strategies had been in effect.
- 2 The date used to calculate Life of Fund performance for the index is May 1, 2014, the Fund's commencement of operations.
- 3 The 42.5% CBOE S&P 500 One-Week PutWrite Index/42.5% CBOE S&P 500 PutWrite Index/7.5% CBOE Russell 2000 One-Week PutWrite Index/7.5% CBOE Russell 2000 PutWrite Index is a blended index composed of 42.5% CBOE S&P 500 One-Week PutWrite Index/42.5% CBOE S&P 500 PutWrite Index/7.5% CBOE Russell 2000 One-Week PutWrite Index/7.5% CBOE Russell 2000 PutWrite Index, and is rebalanced monthly. The CBOE S&P 500® One-Week PutWrite Index is designed to track the performance of a hypothetical strategy that sells an at-the-money (ATM) S&P 500 Index (SPX) put option on a weekly basis. The maturity of the written SPX put option is one week to expiry. The written SPX put option is collateralized by a money market account invested in one month Treasury bills. The index rolls on a weekly basis, typically every Friday. The CBOE S&P 500 PutWrite Index (PUT) is designed to represent a proposed hypothetical short put strategy. PUT is an award-winning benchmark index that measures the performance of a hypothetical portfolio that sells SPX put options against collateralized cash reserves held in a money market account. The PUT strategy is designed to sell a sequence of one-month, ATM SPX puts and invest cash at one- and three-month Treasury Bill rates. The CBOE Russell 2000® One-Week PutWrite Index is designed to track the performance of a hypothetical strategy that sells an ATM Russell 2000 Index put option on a weekly basis. The maturity of the written Russell 2000 put option is one week to expiry. The written Russell 2000 put option is collateralized by a money market account invested in one-month Treasury bills. The index rolls on a weekly basis, typically every Friday. The CBOE Russell 2000 PutWrite Index is designed to represent a proposed hypothetical short put strategy that sells a monthly ATM Russell 2000 Index put option. The written Russell 2000 put option is collateralized by a money market account invested in one-month Treasury bills. The 85% S&P 500® Index / 15% Russell 2000® Index is a blended index composed of 85% S&P 500 Index and 15% Russell 2000 Index, and is rebalanced monthly. The S&P 500 Index is a float-adjusted market capitalization weighted index that focuses on the large-cap segment of the U.S. equity market, and includes a significant portfolio of the total value of the market. The Russell 2000 Index is a float-adjusted market capitalization-weighted index that measures the performance of the small-cap segment of the U.S. equity market. It includes approximately 2,000 of the smallest securities in the Russell 3000® Index (which measures the performance of the 3,000 largest U.S. public companies based on total market capitalization). The index is rebalanced annually in June. Please note that individuals cannot invest directly in any index. The indices described in this report do not take into account any fees, expenses or tax consequences of investing in the individual securities that they track. Data about the performance of an index are prepared or obtained by Neuberger Berman Investment Advisers LLC ("Management") and reflect the reinvestment of income dividends and other distributions, if any. The Fund may invest in securities not included in a described index and generally does not invest in all securities included in a described index.

The investments for the Fund are managed by the same portfolio manager(s) who manage one or more other registered funds that have names, investment objectives and investment styles that are similar to those of the Fund. You should be aware that the Fund is likely to differ from those other mutual fund(s) in size, cash flow pattern and tax matters. Accordingly, the holdings and performance of the Fund can be expected to vary from those of the other mutual fund(s).

Endnotes (cont'd)

Shares of the separate Neuberger Berman Advisers Management Trust Portfolios, including the Fund, are not available to the general public. Shares of the Fund may be purchased only by life insurance companies to be held in their separate accounts, which fund variable annuity and variable life insurance policies, and by qualified pension and retirement plans. Statistics and projections in this report are derived from sources deemed to be reliable but cannot be regarded as a representation of future results of the Fund. This report is prepared for the general information of shareholders and is not an offer of shares of the Fund. Shares are sold only through the currently effective prospectus, which must precede or accompany this report.

Information About Your Fund's Expenses (Unaudited)

As a Fund shareholder, you incur two types of costs: (1) transaction costs such as fees and expenses that are, or may be, imposed under your variable contract or qualified pension plan; and (2) ongoing costs, including management fees, distribution and/or service (12b-1) fees (if applicable), and other Fund expenses. This example is intended to help you understand your ongoing costs (in U.S. dollars) of investing in the Fund and compare these costs with the ongoing costs of investing in other mutual funds.

This table is designed to provide information regarding costs related to your investments. The following examples are based on an investment of \$1,000 made at the beginning of the six month period ended December 31, 2020 and held for the entire period. The table illustrates the Fund's costs in two ways:

Actual Expenses and Performance:

The first section of the table provides information about actual account values and actual expenses in dollars, based on the Fund's actual performance during the period indicated. You may use the information in this line, together with the amount you invested, to estimate the expenses you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first section of the table under the heading entitled "Expenses Paid During the Period" to estimate the expenses you paid over the period.

Hypothetical Example for Comparison Purposes:

The second section of the table provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return at 5% per year before expenses. This return is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in this Fund versus other funds. To do so, Compare the expenses shown in this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses in the table are meant to highlight your ongoing costs only and do not include any transaction costs, such as fees and expenses that are, or may be imposed under your variable contract or qualified pension plan. Therefore, the information under the heading "Hypothetical (5% annual return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transaction costs were included, your costs would have been higher.

Expense Example (Unaudited)

NEUBERGER BERMAN ADVISERS MANAGEMENT TRUST U.S. EQUITY INDEX PUTWRITE STRATEGY PORTFOLIO

	Beginning Account Value 7/1/2020	Ending Account Value 12/31/2020	Expenses Paid During the Period 7/1/2020 – 12/31/2020
Actual			
Class S	\$1,000.00	\$1,143.70	\$5.66 ^(a)
Hypothetical (5% annual return before expenses)			
Class S	\$1,000.00	\$1,019.86	\$5.33 ^(b)

(a) Expenses are equal to the annualized expense ratio of 1.05%, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period shown).

(b) Hypothetical expenses are equal to the annualized expense ratio of 1.05%, multiplied by the average account value over the period (assuming a 5% annual return), multiplied by 184/366 (to reflect the one-half year period shown).

Balance as of December 31, 2020	\$13
Net change in unrealized appreciation/(depreciation) on investments still held as of December 31, 2020	\$—

(a) As of the year ended December 31, 2020, these investments were fair valued in accordance with procedures approved by the Board of Trustees. These investments did not have a material impact on the Fund's net assets; therefore, disclosure of unobservable inputs used in formulating valuations is not presented.

The following is a summary, categorized by level (see Note A of Notes to Financial Statements), of inputs used to value the Fund's derivatives as of December 31, 2020:

Other Financial Instruments

	Level 1	Level 2	Level 3	Total
Options Written				
Liabilities	\$(457,795)	\$—	\$—	\$(457,795)

[^] A balance indicated with a "—", reflects either a zero balance or an amount that rounds to less than 1.

Notes to Financial Statements U.S. Equity Index PutWrite Strategy Portfolio

Note A—Summary of Significant Accounting Policies:

- 1 **General:** Neuberger Berman Advisers Management Trust (the “Trust”) is a Delaware statutory trust organized pursuant to an Amended and Restated Trust Instrument dated March 27, 2014. The Trust is registered as an open-end management investment company under the Investment Company Act of 1940, as amended (the “1940 Act”), and its shares are registered under the Securities Act of 1933, as amended. Neuberger Berman Advisers Management Trust U.S. Equity Index PutWrite Strategy Portfolio (the “Fund”) is a separate operating series of the Trust and is diversified. The Fund currently offers only Class S shares. The Trust’s Board of Trustees (the “Board”) may establish additional series or classes of shares without the approval of shareholders.

A balance indicated with a “—”, reflects either a zero balance or a balance that rounds to less than 1.

The assets of the Fund belong only to the Fund, and the liabilities of the Fund are borne solely by the Fund and no other series of the Trust.

The Fund is an investment company and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 946 “Financial Services—Investment Companies.”

The preparation of financial statements in accordance with U.S. generally accepted accounting principles (“GAAP”) requires Neuberger Berman Investment Advisers LLC (“Management” or “NBIA”) to make estimates and assumptions at the date of the financial statements. Actual results could differ from those estimates.

Shares of the Fund are not available to the general public and may be purchased only by life insurance companies to serve as an investment vehicle for premiums paid under their variable annuity and variable life insurance contracts and to certain qualified pension and other retirement plans.

- 2 **Portfolio valuation:** In accordance with ASC 820 “Fair Value Measurement” (“ASC 820”), all investments held by the Fund are carried at the value that Management believes the Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment under current market conditions. Various inputs, including the volume and level of activity for the asset or liability in the market, are considered in valuing the Fund’s investments, some of which are discussed below. Significant Management judgment may be necessary to value investments in accordance with ASC 820.

ASC 820 established a three-tier hierarchy of inputs to create a classification of value measurements for disclosure purposes. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

- Level 1—unadjusted quoted prices in active markets for identical investments
- Level 2—other observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, amortized cost, etc.)
- Level 3—unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing an investment are not necessarily an indication of the risk associated with investing in those securities.

The value of the Fund’s investments in exchange traded options written and rights for which market quotations are readily available, is generally determined by Management by obtaining valuations from independent pricing services based on the latest sale price quoted on a principal exchange or market for that security (Level 1 inputs). Securities traded primarily on the NASDAQ Stock Market are normally valued at the NASDAQ Official Closing

Price (“NOCP”) provided by NASDAQ each business day. The NOCP is the most recently reported price as of 4:00:02 p.m., Eastern Time, unless that price is outside the range of the “inside” bid and asked prices (i.e., the bid and asked prices that dealers quote to each other when trading for their own accounts); in that case, NASDAQ will adjust the price to equal the inside bid or asked price, whichever is closer. Because of delays in reporting trades, the NOCP may not be based on the price of the last trade to occur before the market closes. If there is no sale of a security on a particular day, the independent pricing services may value the security based on market quotations.

The value of the Fund’s investments in debt securities is determined by Management primarily by obtaining valuations from independent pricing services based on readily available bid quotations, or if quotations are not available, by methods which include various considerations based on security type (generally Level 2 inputs). In addition to the consideration of yields or prices of securities of comparable quality, coupon, maturity and type, indications as to values from dealers, and general market conditions, the following is a description of other Level 2 inputs and related valuation techniques used by independent pricing services to value certain types of debt securities held by the Fund:

U.S. Treasury Obligations. Inputs used to value U.S. Treasury securities generally include quotes from several inter-dealer brokers and other market information which may include benchmark yield curves, reported trades, broker-dealer quotes, issuer spreads, comparable securities and reference data, such as market research publications, when available (“Other Market Information”).

U.S. Government Agency Securities. Inputs used to value U.S. Government Agency securities generally include obtaining benchmark quotes and Other Market Information.

Management has developed a process to periodically review information provided by independent pricing services for all types of securities.

Investments in non-exchange traded investment companies are valued using the respective fund’s daily calculated net asset value (“NAV”) per share (Level 2 inputs).

If a valuation is not available from an independent pricing service, or if Management has reason to believe that the valuation received does not represent the amount a Fund might reasonably expect to receive on a current sale in an orderly transaction, Management seeks to obtain quotations from brokers or dealers (generally considered Level 2 or Level 3 inputs depending on the number of quotes available). If such quotations are not readily available, the security is valued using methods the Neuberger Berman Advisers Management Trust’s Board of Trustees (the “Board”) has approved in the good-faith belief that the resulting valuation will reflect the fair value of the security. Inputs and assumptions considered in determining the fair value of a security based on Level 2 or Level 3 inputs may include, but are not limited to, the type of the security; the initial cost of the security; the existence of any contractual restrictions on the security’s disposition; the price and extent of public trading in similar securities of the issuer or of comparable companies; quotations or evaluated prices from broker-dealers and/or pricing services; information obtained from the issuer, and/or analysts; an analysis of the company’s or issuer’s financial statements; an evaluation of the inputs that influence the issuer and the market(s) in which the security is purchased and sold.

Fair value prices are necessarily estimates, and there is no assurance that such a price will be at or close to the price at which the security is next quoted or next trades.

- 3 Foreign currency translations:** The accounting records of the Fund are maintained in U.S. dollars. Foreign currency amounts are normally translated into U.S. dollars using the exchange rate as of 4:00 p.m. Eastern Time, on days the New York Stock Exchange is open for business, to determine the value of investments, other assets and liabilities. Purchase and sale prices of securities, and income and expenses, are translated into U.S. dollars at the prevailing rate of exchange on the respective dates of such transactions. Net unrealized foreign currency gain/(loss), if any, arises from changes in the value of assets and liabilities, other than investments in securities, as a result of changes in exchange rates and is stated separately in the Statement of Operations.

4 Securities transactions and investment income: Securities transactions are recorded on trade date for financial reporting purposes. Dividend income is recorded on the ex-dividend date or, for certain foreign dividends, as soon as the Fund becomes aware of the dividends. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Interest income, including accretion of discount (adjusted for original issue discount, where applicable) and amortization of premium, where applicable, is recorded on the accrual basis. Realized gains and losses from securities transactions and foreign currency transactions, if any, are recorded on the basis of identified cost and stated separately in the Statement of Operations.

5 Income tax information: The Fund is treated as a separate entity for U.S. federal income tax purposes. It is the policy of the Fund to continue to qualify for treatment as a regulated investment company ("RIC") by complying with the requirements of the U.S. Internal Revenue Code applicable to RICs and to distribute substantially all of its net investment income and net realized capital gains to its shareholders. To the extent the Fund distributes substantially all of its net investment income and net realized capital gains to shareholders, no federal income or excise tax provision is required.

The Fund has adopted the provisions of ASC 740 "Income Taxes" ("ASC 740"). ASC 740 sets forth a minimum threshold for financial statement recognition of a tax position taken, or expected to be taken, in a tax return. The Fund recognizes interest and penalties, if any, related to unrecognized tax positions as an income tax expense in the Statement of Operations. The Fund is subject to examination by U.S. federal and state tax authorities for returns filed for the tax years for which the applicable statutes of limitations have not yet expired. As of December 31, 2020, the Fund did not have any unrecognized tax positions.

For federal income tax purposes, the estimated cost in value of investments held at December 31, 2020, was \$36,062,750. The estimated gross unrealized appreciation was \$193,630 and estimated gross unrealized depreciation was \$11,968 resulting in net unrealized appreciation of \$181,662 based on cost for U.S. federal income tax purposes.

Income distributions and capital gain distributions are determined in accordance with income tax regulations, which may differ from GAAP. These differences are primarily due to differing treatments of income and gains on various investment securities held by the Fund, timing differences and differing characterization of distributions made by the Fund. The Fund may also utilize earnings and profits distributed to shareholders on redemption of their shares as a part of the dividends-paid deduction for income tax purposes.

Any permanent differences resulting from different book and tax treatment are reclassified at year-end and have no impact on net income, NAV, or NAV per share of the Fund. For the year ended December 31, 2020, there were no permanent differences requiring a reclassification between total distributable earnings/(losses) and paid-in capital.

The tax character of distributions paid during the years ended December 31, 2020, and December 31, 2019, was as follows:

Distributions Paid From:					
Ordinary Income		Long-Term Capital Gain		Total	
2020	2019	2020	2019	2020	2019
\$1,201,796	\$50,670	\$1,354,523	\$—	\$2,556,319	\$50,670

As of December 31, 2020, the components of distributable earnings (accumulated losses) on a U.S. federal income tax basis were as follows:

Undistributed Ordinary Income/(Loss)	Undistributed Long-Term Capital Gain	Unrealized Appreciation/(Depreciation)	Loss Carryforwards and Deferrals	Other Temporary Differences	Total
\$1,086,509	\$1,442,299	\$181,763	\$—	\$(3,967)	\$2,706,604

The temporary differences between book basis and tax basis distributable earnings are primarily due to mark-to-market adjustments on options contracts and unamortized organization expenses.

- 6 **Foreign taxes:** Foreign taxes withheld, if any, represent amounts withheld by foreign tax authorities, net of refunds recoverable.
- 7 **Distributions to shareholders:** The Fund may earn income, net of expenses, daily on its investments. Distributions from net investment income and net realized capital gains, if any, are generally distributed once a year (usually in October) and are recorded on the ex-date.
- 8 **Expense allocation:** Certain expenses are applicable to multiple funds within the complex of related investment companies. Expenses directly attributable to a fund are charged to that fund. Expenses of the Trust that are not directly attributable to a particular series of the Trust (e.g., the Fund) are allocated among the series of the Trust, on the basis of relative net assets, except where a more appropriate allocation of expenses to each of the series can otherwise be made fairly. Expenses borne by the complex of related investment companies, which includes open-end and closed-end investment companies for which NBIA serves as investment manager, that are not directly attributable to a particular investment company in the complex (e.g., the Trust) or series thereof are allocated among the investment companies in the complex or series thereof on the basis of relative net assets, except where a more appropriate allocation of expenses to each of the investment companies in the complex or series thereof can otherwise be made fairly.
- 9 **Investment company securities and exchange-traded funds:** The Fund may invest in shares of other registered investment companies, including exchange-traded funds (“ETFs”), within the limitations prescribed by (a) the 1940 Act, (b) the exemptive order from the Securities and Exchange Commission (“SEC”) that permits the Fund to invest in both affiliated and unaffiliated investment companies, including ETFs, in excess of the limits in Section 12(d)(1)(A) of the 1940 Act, subject to the terms and conditions of such order, or (c) the ETF’s exemptive order or other relief. Some ETFs seek to track the performance of a particular market index. These indices include both broad-based market indices and more narrowly-based indices, including those relating to particular sectors, markets, regions or industries. However, some ETFs have an actively-managed investment objective. ETF shares are traded like traditional equity securities on a national securities exchange or NASDAQ. The Fund will indirectly bear its proportionate share of any management fees and other expenses paid by such other investment companies, which will decrease returns.
- 10 **Derivative instruments:** The Fund’s use of derivatives during the year ended December 31, 2020, is described below. Please see the Schedule of Investments for the Fund’s open positions in derivatives at December 31, 2020. The Fund has adopted the provisions of ASC 815 “Derivatives and Hedging” (“ASC 815”). The disclosure requirements of ASC 815 distinguish between derivatives that qualify for hedge accounting and those that do not. Because investment companies value their derivatives at fair value and recognize changes in fair value through the Statement of Operations, they do not qualify for hedge accounting. Accordingly, even though the Fund’s investments in derivatives may represent economic hedges, they are considered non-hedge transactions for purposes of this disclosure.

In October 2020, the SEC adopted new regulations governing the use of derivatives by registered investment companies. Rule 18f-4 will impose limits on the amount of derivatives a fund could enter into, eliminate the asset segregation framework currently used by funds to comply with Section 18 of the 1940 Act, and require funds whose use of derivatives is more than a limited specified exposure to establish and maintain a derivatives risk management program and appoint a derivatives risk manager. While the new rule will become effective February 19, 2021, funds will not be required to fully comply with the new rule until August 19, 2022. It is not currently clear what impact, if any, the new rule will have on the availability, liquidity or performance of derivatives. When fully implemented, the new rule may require changes in how the Fund will use derivatives, may adversely affect the Fund’s performance and may increase costs related to the Fund’s use of derivatives.

Options: The Fund's principal investment strategy is an options-based strategy. During the year ended December 31, 2020, the Fund used options written to manage or adjust the risk profile of the Fund or the risk of individual index exposures and to gain exposure more efficiently than through a direct purchase of the underlying security or to gain exposure to securities, markets, sectors or geographical areas. Options written were also used to generate incremental returns.

Premiums paid by the Fund upon purchasing a call or put option are recorded in the asset section of the Fund's Statement of Assets and Liabilities and are subsequently adjusted to the current market value. When an option is exercised, closed, or expired, the Fund realizes a gain or loss and the asset is eliminated. For purchased call options, the Fund's loss is limited to the amount of the option premium paid.

Premiums received by the Fund upon writing a call option or a put option are recorded in the liability section of the Fund's Statement of Assets and Liabilities and are subsequently adjusted to the current market value. When an option is exercised, closed, or expired, the Fund realizes a gain or loss and the liability is eliminated.

When the Fund writes a call option on an underlying asset it does not own, its exposure on such an option is theoretically unlimited. When writing a covered call option, the Fund, in return for the premium, gives up the opportunity for profit from a price increase in the underlying security above the exercise price, but conversely retains the risk of loss should the price of the security decline. When writing a put option, the Fund, in return for the premium, takes the risk that it must purchase the underlying security at a price that may be higher than the current market price of the security. If a call or put option that the Fund has written expires unexercised, the Fund will realize a gain in the amount of the premium. All securities covering outstanding written options are held in escrow by the custodian bank.

The Fund (as the seller of a put option) receives premiums from the purchaser of the option in exchange for providing the purchaser with the right to sell the underlying instrument to the Fund at a specific price (i.e., the exercise price or strike price). If the market price of the instrument underlying the option exceeds the strike price, it is anticipated that the option would go unexercised and the Fund would earn the full premium upon the option's expiration or a portion of the premium upon the option's early termination. If the market price of the instrument underlying the option drops below the strike price, it is anticipated that the option would be exercised and the Fund would pay the option buyer the difference between the market value of the underlying instrument and the strike price.

At December 31, 2020, the Fund had the following derivatives (which did not qualify as hedging instruments under ASC 815), grouped by primary risk exposure:

Liability Derivatives

Derivative Type	Statement of	Equity Risk
	Assets and Liabilities	
	Location	
Options written	Option contracts written, at value	\$457,795

The impact of the use of these derivative instruments on the Statement of Operations during the fiscal year ended December 31, 2020, was as follows:

Realized Gain/(Loss)

Derivative Type	Statement of Operations Location	Equity Risk
Options written	Net realized gain/(loss) on: Expiration or closing of option contracts written	\$2,173,407

Change in Appreciation/(Depreciation)

Derivative Type	Statement of Operations Location	Equity Risk
Options written	Change in net unrealized appreciation/(depreciation) in value of: Option contracts written	\$172,678

While the Fund may receive rights and warrants in connection with its investments in securities, these rights and warrants are not considered “derivative instruments” under ASC 815.

- 11 Indemnifications:** Like many other companies, the Trust’s organizational documents provide that its officers (“Officers”) and trustees (“Trustees”) are indemnified against certain liabilities arising out of the performance of their duties to the Trust. In addition, both in some of its principal service contracts and in the normal course of its business, the Trust enters into contracts that provide indemnifications to other parties for certain types of losses or liabilities. The Trust’s maximum exposure under these arrangements is unknown as this could involve future claims against the Trust.
- 12 Other matters—Coronavirus:** The outbreak of the novel coronavirus in many countries, which is a rapidly evolving situation, has, among other things, disrupted global travel and supply chains, and has adversely impacted global commercial activity, the transportation industry and commodity prices in the energy sector. The impact of this virus has negatively affected and may continue to affect the economies of many nations, individual companies and the global securities and commodities markets, including liquidity and volatility, in ways that cannot necessarily be foreseen at the present time. The rapid development and fluidity of this situation precludes any prediction as to its ultimate impact, which may have a continued adverse effect on economic and market conditions and trigger a period of global economic slowdown. Such conditions (which may be across industries, sectors or geographies) have impacted and may continue to impact the issuers of the securities held by the Fund.

Note B—Investment Management Fees, Administration Fees, Distribution Arrangements, and Other Transactions with Affiliates:

The Fund retains NBIA as its investment manager under a Management Agreement. For such investment management services, the Fund pays NBIA an investment management fee at the annual rate of 0.45% of the Fund’s average daily net assets.

The Fund retains NBIA as its administrator under an Administration Agreement. The Fund pays NBIA an administration fee at the annual rate of 0.30% of its average daily net assets under this agreement. Additionally, NBIA retains JPMorgan Chase Bank, NA (“JPM”) as its sub-administrator under a Sub-Administration Agreement. NBIA pays JPM a fee for all services received under the Sub-Administration Agreement.

NBIA has contractually agreed to waive fees and/or reimburse the Fund for its total annual operating expenses so that the total annual operating expenses do not exceed the expense limitation as detailed in the following table. These undertakings exclude interest, taxes, brokerage commissions, dividend and interest expenses relating to short sales, acquired fund fees and expenses, and extraordinary expenses, if any (commitment fees relating to borrowings are treated as interest for purposes of this exclusion) (“annual operating expenses”); consequently, net expenses may exceed the contractual expense limitation. The Fund has agreed that it will repay NBIA for fees and expenses waived or reimbursed provided that repayment does not cause the annual operating expenses to exceed its contractual expense limitation in place at the time the fees and expenses were waived or reimbursed, or the expense limitation in place at the time the Fund repays NBIA, whichever is lower. Any such repayment must be made within three years after the year in which NBIA incurred the expense.

During the year ended December 31, 2020, there was no repayment to NBIA under this agreement.

At December 31, 2020, the Fund’s contingent liabilities to NBIA under the agreement were as follows:

			Expenses Reimbursed in Year Ending, December 31, <u>2018</u> <u>2019</u> <u>2020</u>		
			Subject to Repayment Until December 31,		
	Contractual Expense Limitation ⁽¹⁾	Expiration	2021	2022	2023
Class S	1.05%	12/31/23	\$176,764	\$192,742	\$183,237

- (1) Expense limitation per annum of the Fund’s average daily net assets.

Neuberger Berman BD LLC (the “Distributor”) is the Fund’s “principal underwriter” within the meaning of the 1940 Act. It acts as agent in arranging for the sale of the Fund’s Class S shares. The Board has adopted a distribution and shareholder services plan (the “Plan”) for Class S shares pursuant to Rule 12b-1 under the 1940 Act. The Plan provides that, as compensation for administrative and other services related to the sale and distribution of Class S shares, and ongoing services provided to investors in the class, the Distributor receives from Class S a fee at the annual rate of 0.25% of Class S’s average daily net assets. The Distributor may pay a portion of the proceeds from the 12b-1 fee to institutions that provide such services, including insurance companies or their affiliates and qualified plan administrators (“intermediaries”) for services they provide respecting the Fund to current and prospective variable contract owners and qualified plan participants that invest in the Fund through the intermediaries. Those institutions may use the payments for, among other purposes, compensating employees engaged in sales and/or shareholder servicing. The amount of fees paid by the class during any year may be more or less than the cost of distribution and other services provided to the class. FINRA rules limit the amount of annual distribution fees that may be paid by a mutual fund and impose a ceiling on the cumulative distribution fees paid. The Plan complies with those rules.

Note C—Securities Transactions:

During the year ended December 31, 2020, there were purchase and sale transactions of long-term securities (excluding written option contracts) as follows:

Purchases of U.S. Government and Agency Obligations	Purchases excluding U.S. Government and Agency Obligations	Sales and Maturities of U.S. Government and Agency Obligations	Sales and Maturities excluding U.S. Government and Agency Obligations
\$16,860,367	\$468	\$13,989,709	\$54

During the year ended December 31, 2020, no brokerage commissions on securities transactions were paid to affiliated brokers.

Note D—Fund Share Transactions:

Share activity for the years ended December 31, 2020 and December 31, 2019 was as follows:

	For the Year Ended December 31, 2020				For the Year Ended December 31, 2019			
	Shares Sold	Shares Issued on Reinvestment of Dividends and Distributions	Shares Redeemed	Total	Shares Sold	Shares Issued on Reinvestment of Dividends and Distributions	Shares Redeemed	Total
Class S	253,053	263,267	(383,302)	133,018	2,422,391	5,113	(410,612)	2,016,892

Other: At December 31, 2020, affiliated persons, as defined in the 1940 Act, owned 0.08% of the Fund's outstanding shares.

Note E—Line of Credit:

At December 31, 2020, the Fund was a participant in a syndicated committed, unsecured \$700,000,000 line of credit (the "Credit Facility"), to be used only for temporary or emergency purposes. Series of other investment companies managed by NBIA also participate in this line of credit on substantially the same terms. Interest is charged on borrowings under this Credit Facility at the highest of (a) a federal funds effective rate plus 1.00% per annum, (b) a Eurodollar rate for a one-month period plus 1.00% per annum, and (c) an overnight bank funding rate plus 1.00% per annum. The Credit Facility has an annual commitment fee of 0.15% per annum of the available line of credit, which is paid quarterly. The Fund has agreed to pay its pro rata share of the annual commitment fee, based on the ratio of its individual net assets to the net assets of all participants at the time the fee is due, and interest charged on any borrowing made by the Fund and other costs incurred by the Fund. Because several mutual funds participate in the Credit Facility, there is no assurance that the Fund will have access to all or any part of the \$700,000,000 at any particular time. There were no loans outstanding under the Credit Facility at December 31, 2020. During the year ended December 31, 2020, the Fund did not utilize the Credit Facility.

Note F—Recent Accounting Pronouncement:

In March 2020, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update No. 2020-04 ("ASU 2020-04"), "Reference Rate Reform (Topic 848)". In response to concerns about structural risks of interbank offered rates, and particularly the risk of cessation of LIBOR, regulators have undertaken reference rate reform initiatives to identify alternative reference rates that are more observable or transaction based and less susceptible to manipulation. ASU 2020-04 provides optional guidance for a limited period of time to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. ASU 2020-04 is elective and applies to all entities, subject to meeting certain criteria, that have contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. The amendments are effective as of March 12, 2020 through December 31, 2022. Management is currently evaluating the impact of the guidance.

Financial Highlights

U.S. Equity Index PutWrite Strategy Portfolio

The following table includes selected data for a share outstanding throughout each year and other performance information derived from the Financial Statements. Amounts that do not round to \$0.01 or \$(0.01) per share are presented as \$0.00 or \$(0.00), respectively. Ratios that do not round to 0.01% or (0.01)% are presented as 0.00% or (0.00)%, respectively. A “—” indicates that the line item was not applicable in the corresponding period.

Notes to Financial Highlights U.S. Equity Index PutWrite Strategy Portfolio

- †† Total return based on per share NAV reflects the effects of changes in NAV on the performance of the Fund during each fiscal period. Returns assume income dividends and other distributions, if any, were reinvested. Results represent past performance and do not indicate future results. Current returns may be lower or higher than the performance data quoted. Investment returns and principal will fluctuate and shares, when redeemed, may be worth more or less than original cost. Total return would have been lower if Management had not reimbursed and/or waived certain expenses. The total return information shown does not reflect charges and other expenses that apply to the separate accounts or the related insurance policies or other qualified pension or retirement plans, and the inclusion of these charges and other expenses would reduce the total return for all fiscal periods shown.
- ‡ Calculated based on the average number of shares outstanding during each fiscal period.
- # Represents the annualized ratios of net expenses to average daily net assets if Management had not reimbursed certain expenses and/or waived a portion of the investment management fee.

Report of Independent Registered Public Accounting Firm

To the Shareholders of
U.S. Equity Index PutWrite Strategy Portfolio and
Board of Trustees of the Neuberger Berman Advisers Management Trust

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of U.S. Equity Index PutWrite Strategy Portfolio (the “Portfolio”) (one of the portfolios constituting Neuberger Berman Advisers Management Trust (the “Trust”)), including the schedule of investments, as of December 31, 2020, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the financial highlights for each of the five years in the period then ended and the related notes (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Portfolio (one of the portfolios constituting Neuberger Berman Advisers Management Trust) at December 31, 2020, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and its financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements are the responsibility of the Trust’s management. Our responsibility is to express an opinion on the Portfolio’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Trust in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Trust is not required to have, nor were we engaged to perform, an audit of the Trust’s internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Trust’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2020, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Ernst & Young LLP

We have served as the auditor of one or more Neuberger Berman investment companies since 1954.

Boston, Massachusetts

Proxy Voting Policies and Procedures

A description of the policies and procedures that the Trust uses to determine how to vote proxies relating to portfolio securities is available, without charge, by calling 800-877-9700 (toll-free) and on the SEC's website, at www.sec.gov. Information regarding how the Trust voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is also available upon request, without charge, by calling 800-877-9700 (toll-free), on the SEC's website at www.sec.gov, and on Neuberger Berman's website at www.nb.com.

Quarterly Portfolio Schedule

The Trust files a complete schedule of portfolio holdings for the Fund with the SEC for the first and third quarters of each fiscal year as an exhibit to its report on Form N-PORT. The Trust's Form N-PORT is available on the SEC's website at www.sec.gov. The portfolio holdings information on Form N-PORT is available upon request, without charge, by calling 800-877-9700 (toll-free).

Board Consideration of the Management Agreement

On an annual basis, the Board of Trustees (the "Board") of Neuberger Berman Advisers Management Trust (the "Trust"), including the Trustees who are not "interested persons" of the Trust or of Neuberger Berman Investment Advisers LLC ("Management") (including its affiliates) ("Independent Fund Trustees"), considers whether to continue the management agreement with Management (the "Agreement") with respect to U.S. Equity Index PutWrite Strategy Portfolio (the "Fund"). Throughout the process, the Independent Fund Trustees are advised by counsel that is experienced in Investment Company Act of 1940 matters and that is independent of Management ("Independent Counsel"). At a meeting held on October 1, 2020, the Board, including the Independent Fund Trustees, approved the continuation of the Agreement for the Fund.

In evaluating the Agreement, the Board, including the Independent Fund Trustees, reviewed extensive materials provided by Management in response to questions submitted by the Independent Fund Trustees and Independent Counsel, and met with senior representatives of Management regarding its personnel, operations, and profitability as they relate to the Fund. The annual contract review extends over at least two regular meetings of the Board to ensure that Management has time to respond to any questions the Independent Fund Trustees may have on their initial review of the materials and that the Independent Fund Trustees have time to consider those responses.

In connection with its deliberations, the Board also considered the broad range of information relevant to the annual contract review that is provided to the Board (including its various standing committees) at meetings throughout the year, including reports on investment performance, portfolio risk, and other portfolio information for the Fund, including the use of derivatives, as well as periodic reports on, among other matters, pricing and valuation; quality and cost of portfolio trade execution; compliance; and shareholder and other services provided by Management and its affiliates. The Contract Review Committee, which is comprised of Independent Fund Trustees, was established by the Board to assist in its evaluation and analysis of materials for the annual contract review. The Board has also established other committees that focus throughout the year on specific areas relevant to the annual contract review, such as Fund performance or compliance matters, and that are charged with specific responsibilities regarding the annual contract review. Those committees provide reports to the Contract Review Committee and the full Board, which consider that information as part of the annual contract review process. The Board's Contract Review Committee annually considers and updates the questions it asks of Management in light of legal advice furnished to it by Independent Counsel; its own business judgment; and developments in the industry, in the markets, in mutual fund regulation and litigation, and in Management's business model.

The Independent Fund Trustees received from Independent Counsel a memorandum discussing the legal standards for their consideration of the proposed continuation of the Agreement. During the course of the year and during their deliberations regarding the annual contract review, the Contract Review Committee and the Independent Fund Trustees met with Independent Counsel separately from representatives of Management.

Provided below is a description of the Board's contract approval process and material factors that the Board considered at its meetings regarding renewal of the Agreement and the compensation to be paid thereunder. In connection with its approval of the continuation of the Agreement, the Board evaluated the terms of the Agreement, the overall fairness of the Agreement to the Fund, and whether the Agreement was in the best interests of the Fund and its shareholders. The Board's determination to approve the continuation of the Agreement was based on a comprehensive consideration of all information provided to the Board throughout the year and specifically in connection with the annual contract review. The Board considered the Fund's investment management agreement separately from those of other funds of the Trust.

This description is not intended to include all of the factors considered by the Board. The Board members did not identify any particular information or factor that was all-important or controlling, and each Trustee may have attributed different weights to the various factors. The Board focused on the costs and benefits of the Agreement to the Fund and, through the Fund, its shareholders.

Nature, Extent, and Quality of Services

With respect to the nature, extent, and quality of the services provided, the Board considered the investment philosophy and decision-making processes of, and the qualifications, experience, and capabilities of, and the resources available to, the portfolio management personnel of Management who perform services for the Fund. The Board noted that Management also provides certain administrative services, including fund accounting and compliance services. The Board also considered Management's policies and practices regarding brokerage, commissions, other trading costs, and allocation of portfolio transactions and reviewed the quality of the execution services that Management had provided. The Board also reviewed Management's use of brokers to execute Fund transactions that provide research services to Management. Moreover, the Board considered Management's approach to potential conflicts of interest both generally and between the Fund's investments and those of other funds or accounts managed by Management. The Board also noted that Management had increased its research capabilities with respect to environmental, social, and corporate governance matters and how those factors may relate to investment performance. The Board noted the additional responsibilities of Management in administering the liquidity risk management program.

The Board recognized the extensive range of services that Management provides to the Fund beyond the investment management services. The Board noted that Management is also responsible for monitoring compliance with the Fund's investment objectives, policies, and restrictions, as well as compliance with applicable law, including implementing rulemaking initiatives of the U.S. Securities and Exchange Commission. The Board considered that Management assumes significant ongoing entrepreneurial and business risks as the investment adviser and sponsor for the Fund, for which it is entitled to reasonable compensation. The Trustees also considered that Management's responsibilities include continual management of investment, operational, enterprise, legal, regulatory, and compliance risks as they relate to the Fund, and the Board considers on a regular basis information regarding Management's processes for monitoring and managing risk. In addition, the Board also noted that when Management launches a new fund or share class, it assumes entrepreneurial risk with respect to that fund or share class, and that some funds and share classes have been liquidated without ever having been profitable to Management.

The Board also reviewed and evaluated Management's activities under its contractual obligation to oversee the Fund's various outside service providers, including its renegotiation of certain service providers' fees and its evaluation of service providers' infrastructure, cybersecurity programs, compliance programs, and business continuity programs, among other matters. The Board also considered Management's ongoing development of its own infrastructure and information technology to support the Fund through, among other things, cybersecurity, business continuity planning, and risk management. The Board noted Management's largely seamless implementation of its business continuity plan in response to the COVID-19 pandemic. In addition, the Board noted the positive compliance history of Management, as no significant compliance problems were reported to the Board with respect to Management. The Board also considered the general structure of the portfolio managers' compensation and whether this structure provides appropriate incentives to act in the best interests of the Fund. The Board also considered the ability of Management to attract and retain qualified personnel to service the Fund.

As in past years, the Board also considered the manner in which Management addressed various matters that arose during the year, some of them a result of developments in the broader fund industry or the regulations governing it. In addition, the Board considered actions taken by Management in response to recent market conditions, such as the economic dislocation and rise in volatility that accompanied shutdowns related to the efforts to stem the spread of COVID-19, and considered the overall performance of Management in this context.

Fund Performance

The Board requested a report from an outside consulting firm that specializes in the analysis of fund industry data that compared the Fund's performance, along with its fees and other expenses, to a group of industry peers ("Expense Group") and a broader universe of funds pursuing generally similar strategies with the same investment classification and/or objective ("Performance Universe"). The Expense Group and Performance Universe were composed of two types of funds: proprietary funds that are operated by insurance companies or their affiliates, and non-proprietary funds, such as the Fund, operated for insurance company investors by independent investment managers. The Board considered the Fund's performance and fees in light of the limitations inherent in the methodology for constructing such comparative groups and determining which investment companies should be included in the comparative groups, noting differences as compared to certain fund industry ranking and rating systems. The Board also considered the impact and inherent limitation on the comparisons due to the small number of funds included in the Fund's Expense Group and Performance Universe.

With respect to investment performance, the Board considered information regarding the Fund's short-term performance, net of the Fund's fees and expenses, on an absolute basis, relative to a benchmark index that does not deduct the fees or expenses of investing, and compared to the performance of the Expense Group and Performance Universe, each constructed by the consulting firm. The Board also reviewed performance in relation to certain measures of the degree of investment risk undertaken by the portfolio managers.

The Performance Universe referenced in this section was identified by the consulting firm, as discussed above. For any period of underperformance, the Board considered the magnitude and duration of that underperformance relative to the Performance Universe, and/or the benchmark (e.g., the amount by which a Fund underperformed, including, for example, whether the Fund slightly underperformed or significantly underperformed its benchmark). With respect to performance quintile rankings for the Fund compared to its Performance Universe, the first quintile represents the highest (best) performance and the fifth quintile represents the lowest performance. For investment performance comparisons, the Board looked at the Fund's Class S as a proxy for both of the Fund's classes.

With regard to performance, the Board considered that the Fund adopted an entirely new investment strategy in May 2017. The Board considered that, for its new investment strategy since May 2017, based on performance data for the periods ended December 31, 2019: (1) as compared to its benchmark, the Fund's performance was higher for the 1-year period; and (2) as compared to its Performance Universe, the Fund's performance was in the third quintile for the 1-year period. The Board also noted the Fund's outperformance versus its benchmark during the 7-month period ending July 31, 2020. Further, the Board noted the Fund's ranking exceeded the average of its Lipper and Morningstar peer category for the 1- and 3-year periods ending July 31, 2020.

The Board also considered Management's responsiveness to the Fund's relative performance. In this regard, the Board noted that performance, especially short-term performance, is only one of the factors that it deems relevant to its consideration of the Agreement and that, after considering all relevant factors, it determined to approve the continuation of the Agreement.

Fee Rates, Profitability, and Fall-out Benefits

With respect to the overall fairness of the Agreement, the Board considered the fee structure for the Fund under the Agreement as compared to the Expense Group provided by the consulting firm, as discussed above. The Board reviewed a comparison of the Fund's management fee to its Expense Group. The Board noted that the comparative management

fee analysis includes, in the Fund's management fee, the separate administrative fees paid to Management. However, the Board noted that some funds in the Expense Group pay directly from fund assets for certain services that Management covers out of the administration fees for the Fund. Accordingly, the Board also considered the Fund's total expense ratio as compared with its Expense Group as a way of taking account of these differences.

The Board compared the Fund's contractual and actual management fees to the median of the contractual and actual management fees, respectively, of the Fund's Expense Group. (The actual management fees are the contractual management fees reduced by any fee waivers or other adjustments.) The Board also compared the Fund's total expenses to the median of the total expenses of the Fund's Expense Group. The Board noted that the Fund's total expenses were higher than the Expense Group median, and considered whether specific portfolio management, administration or oversight needs contributed to the Fund's total expenses. With respect to the quintile rankings for fees and total expenses (net of waivers or other adjustments, if any) for the Fund compared to its Expense Group, the first quintile represents the lowest fees and/or total expenses and the fifth quintile represents the highest fees and/or total expenses. For fee comparisons, the Board looked at the Fund's Class S as a proxy for both of the Fund's classes.

The Board considered that, as compared to its Expense Group, the Fund's contractual management fee and total expenses each ranked in the third quintile and the actual management fee net of fees waived by Management ranked in the first quintile.

In addition to considering the above-referenced factors, the Board took note of its ongoing dialogue with Management regarding the dynamics of the insurance/annuity marketplace. The Board considered, among other matters, related tax restrictions and the unique challenges facing that market generally, which assisted the Board in understanding the context for the Fund's expense ratio and performance.

In concluding that the benefits accruing to Management and its affiliates by virtue of their relationship with the Fund were reasonable in light of the costs of providing the investment advisory and other services and the benefits accruing to the Fund, the Board reviewed specific data as to Management's estimated loss on the Fund for a recent period on a pre-tax basis without regard to distribution expenses, including year-over-year changes in each of Management's reported expense categories. (The Board also reviewed data on Management's estimated loss on the Fund after distribution/servicing expenses and taxes were factored in, as indicators of the health of the business and the extent to which Management is directing its profits into the growth of the business. The Board noted that when distribution expenses and taxes were considered, Management experienced a loss on the Fund.) The Board considered the cost allocation methodology that Management used in developing its estimated profitability figures. In recent years, the Board engaged an independent forensic accountant to review the profitability methodology utilized by Management when preparing this information and discussed with the consultant its conclusion that Management's process for calculating and reporting its estimated loss was not unreasonable.

Recognizing that there is no uniform methodology regarding the allocation of firm-wide or complex-wide expenses within the asset management industry for determining profitability for this purpose and that the use of different reasonable methodologies can give rise to different profit and loss results, the Board, in recent years, requested from Management examples of profitability calculated by different methods and noted that the estimated profitability levels were still reasonable when calculated by these other methods. The Board further noted Management's representation that its estimate of profitability is derived using methodology that is consistent with the methodology used to assess and/or report measures of profitability elsewhere at the firm. In addition, the Board recognized that Management's calculations regarding its costs may not reflect all risks, including regulatory, legal, operational, reputational, and, where appropriate, entrepreneurial risks, associated with offering and managing a mutual fund in the current regulatory and market environment. The Board also considered any fall-out (i.e., indirect) benefits likely to accrue to Management or its affiliates from their relationship with the Fund, such as research it may receive from broker-dealers executing the Funds' portfolio transactions on an agency basis. The Board noted that Management incurred a loss on its management of the Fund during the review period even before consideration of distribution expenses and taxes.

Information Regarding Services to Other Clients

The Board also considered other funds and separate accounts that were advised or sub-advised by Management or its affiliates with investment objectives, policies and strategies that were similar to those of the Fund, and compared the fees charged to the Fund to the fees charged to such comparable funds and separate accounts. The Board considered the appropriateness and reasonableness of any differences between the fees charged to a Fund and such comparable funds and/or separate accounts, and determined that differences in fees and fee structures were consistent with the differences in the management and other services provided. The Board explored with Management its assertion that although, generally, the rates of fees paid by such accounts, except other Neuberger Berman mutual funds, were lower than the fee rates paid by the corresponding Fund, the differences reflected Management's greater level of responsibilities and significantly broader scope of services regarding the Fund, the more extensive regulatory obligations and risks associated with managing the Fund, and other financial considerations with respect to creation and sponsorship of the Fund.

Economies of Scale

The Board also evaluated apparent or anticipated economies of scale in relation to the services Management provides to the Fund. The Board considered that the Fund's fee structure does not provide for a reduction of payments resulting from the use of breakpoints, and concluded that the lack of breakpoints was reasonable based on the consideration that setting competitive fee rates and pricing the Fund to scale are other means of sharing potential economies of scale with shareholders. In addition, the Board considered the expense limitation and/or fee waiver arrangements that reduces Fund expenses at all asset levels which can have an effect similar to breakpoints in sharing economies of scale with shareholders and provide protection from an increase in expenses if the Fund's assets decline. The Board also considered that Management has provided, at no added cost to the Fund, certain additional services, including but not limited to, services required by new regulations or regulatory interpretations, services impelled by changes in the securities markets or the business landscape, and/or services requested by the Board. The Board considered that this is a way of sharing economies of scale with the Fund and its shareholders.

Conclusions

In approving the continuation of the Agreement, the Board concluded that, in its business judgment, the terms of the Agreement are fair and reasonable to the Fund and that approval of the continuation of the Agreement is in the best interests of the Fund and its shareholders. In reaching this determination, the Board considered that Management could be expected to continue to provide a high level of service to the Fund; that the Board retained confidence in Management's capabilities to manage the Fund; that the Fund's fee structure appeared to the Board to be reasonable given the nature, extent, and quality of services provided or the Fund's relatively small size; and that the benefits accruing to Management and its affiliates by virtue of their relationship with the Fund were reasonable in light of the costs of providing the investment advisory and other services and the benefits accruing to the Fund. The Board's conclusions may be based in part on its consideration of materials prepared in connection with the approval or continuance of the Agreement in prior years and on the Board's ongoing regular review of Fund performance and operations throughout the year, in addition to material prepared specifically for the most recent annual review of the Agreement.
